Reference, reference, reference!

- When citing previous work, do not use direct quotations... prepare all references
- Avoid basing everything on one review... reflect a variety of sources. I will know if you love just your favorite one review, and I will meet you there.
- Reference, reference, reference! When in doubt, reference!
- The quality of the writing will factor into your grade... avoid errors in topic, spelling, errors, and grammatical errors. Have someone proofread your paper & grammar, but only for basic aspects, not for content.
- Try not make the material interesting... tell the material is a story, give critical, provide a "hook" in the introductory paragraph. Please do not!
- The grading criteria are as follows:
 - Organization of paper: 15%
 - Quality of the writing: 15%
 - Scientific content: 60%
 - Appeal, interest, grammar: 10%
