INFORMATION SESSION ON THE WORK OF MATHEMATICIAN- STATISTICIANS

STATISTICS CANADA

Tuesday, March 12, 2024, 3:00-4:00 pm

Human Kinetics Building, Room 140

**Speaker: Ben Cheng, UoW Alumni (BSc-Math, 2017).
Working at Statistics Canada since 2022.**

Description: As part of a new initiative to showcase the work of mathematician-statisticians at Statistics Canada, our agency would like to give a presentation at the University of Windsor, highlighting the type of work a mathematician-statistician does and how it relates to studies in mathematics, statistics, operations research, or data science. This presentation will also cover the benefits of working under this role at Statistics Canada and provide information on the launch of the next recruitment campaign. The purpose of the presentation is to give concrete examples of our applications of mathematical, statistical or data science concepts within the framework of our work whose mandate is to serve Canadian society instead of the usual launch of the next recruitment campaign. The targeted audience is mainly undergraduate students, but all are welcome to come.

ORGANIZED BY THE DEPARTMENT OF MATHEMATICS AND STATISTICS
