NOTE 1: Students who wish to "get ahead" on their schedule are advised to enrol in "MATH 2780 Vector Calculus" and/or "MATH 2790 Differential Equations" which are both offered in the summer prior to their second year of classes. Taking these important pre-requisites will free up slots during the second year.

NOTE 2: Students have great flexibility in choosing their options, the following courses are <u>suggestions</u> only. Students should choose courses that are in an area of interest: more mathematics or statistics (as shown), more computer science, more chemistry, or business administration. For a physics degree, as much mathematics, statistics and computer science as possible is recommended. For a medical physics degree, as many optional medical physics classes as possible is recommended. The following options are listed in an appropriate order to satisfy prerequisites and include a mixture of mathematics, computer science, and physics.

OTHER POSSIBLE OPTIONS	
COMP 2120 Object-Oriented Programming Using Java	MATH 1020 Mathematical Foundations
