

Undergraduate Calendar

Spring 2025

FOREWORD

The Undergraduate Calendar is a comprehensive guide to all undergraduate programs and courses available at the University of Windsor. It outlines academic regulations and standards, program degree requirements, and general University policies for all undergraduate programs (with the exception of Law)

The online calendars are the official calendars. The University of Windsor publishes undergraduate web calendars on a semester basis (Fall, Winter, and Spring).

Note: Students may follow the academic rules and program regulations set out in the calendar of the term in which they were first admitted to the program or any subsequent calendar.

FEDERATED AND AFFILIATED INSTITUTIONS

Assumption University
Canterbury College
Iona College

The University of Windsor is a full member of the Association of Universities and Colleges of Canada, and the International Association of Universities.

TABLE OF CONTENTS

FOREWORD.....	1
FEDERATED AND AFFILIATED INSTITUTIONS.....	1
TABLE OF CONTENTS	2
RESPONSIBILITY/DISCLOSURE NOTIFICATIONS	18
STATEMENT OF RESPONSIBILITY OF THE UNIVERSITY	18
NOTIFICATION OF DISCLOSURE OF PERSONAL INFORMATION TO STATISTICS CANADA	19
NOTIFICATION OF DISCLOSURE, CONFIDENTIALITY AND USE OF PERSONAL INFORMATION	19
VERIFICATION OF OFFICIAL DEGREE PARCHMENTS AND TRANSCRIPTS AND PREVENTION OF FRAUDULENT DOCUMENTATION	21
PROGRAM AND COURSE LEARNING OUTCOMES.....	23
APPLICATION/ADMISSION INFORMATION	24
Application Procedures.....	24
Application Deadlines	24
Admissions Policies.....	24
REGISTRATION/FEE REGULATIONS.....	26
TIME AND PLACE OF REGISTRATION	26
PROVISIONAL REGISTRATION	26
WITHDRAWAL FROM PROGRAMS OR COURSES	26
FEE REGULATIONS AND SCHEDULE	27
PAYMENT OF FEES	27
INTEREST CHARGES ON OUTSTANDING ACCOUNTS	28
NON-PAYMENT OF FEES AND CHARGES.....	28
TUITION AND EDUCATION CREDIT CERTIFICATE (T2202)	29
SCHOLARSHIPS.....	29
WITHDRAWAL AND REFUND POLICY.....	29
FREE TUITION FOR STUDENTS 65 YEARS OF AGE AND OVER.....	30
SCHEDULE OF FEES	30
UNIVERSITY/COLLEGE AGREEMENTS.....	31
FOR STUDENTS FROM CANADIAN COLLEGES AND RECOGNIZED UNIVERSITIES.....	31
Bachelor of Engineering Technology (BEngTech).....	31
FOR STUDENTS FROM ALL COLLEGES OF APPLIED ARTS AND TECHNOLOGY	31
From a College of Applied Arts and Technology	31
Durham College	34
Fanshawe College	34
Lambton College of Applied Arts and Technology	35
St. Clair College of Applied Arts and Technology	36
Seneca College	38
Sir Sandford Fleming College of Applied Arts and Technology	38
UNIVERSITY TO COLLEGE AGREEMENTS WITH ST. CLAIR COLLEGE OF APPLIED ARTS AND TECHNOLOGY	38
FORMAL UNIVERSITY/COLLEGE AGREEMENTS WITH OTHER INSTITUTIONS.....	38
ONTARIO	38

CHINA.....	39
HONG KONG	40
MALAYSIA	40
SINGAPORE.....	40
UNITED STATES.....	40
STUDENT EXCHANGE PROGRAMS	42
ACADEMIC REGULATIONS.....	43
ACADEMIC ADVISING.....	43
CLASSIFICATION OF STUDENTS.....	44
COMBINED MAJOR	44
COURSE CONTENT	45
COURSE NUMBERING FRAMEWORK.....	45
DEFINITION OF COURSES AND SESSIONS	45
CATEGORIES OF COURSES	46
TRANSFERRING TO ANOTHER PROGRAM	48
EXAMINATIONS, GRADING, AND GRADUATION.....	49
EXAMINATION PROCEDURES.....	49
GRADING AND CALCULATION OF AVERAGES.....	49
OFF-CAMPUS EXAMINATIONS.....	49
GRADE APPEALS.....	49
HONOUR ROLLS	50
BOARD OF GOVERNORS MEDALS.....	51
GRADUATING "WITH DISTINCTION"/"WITH GREAT DISTINCTION"	52
APPLICATION FOR GRADUATION	52
INTERDISCIPLINARY HEALTH SCIENCE.....	53
INTERDISCIPLINARY HEALTH SCIENCE COURSES	56
FACULTY OF ARTS, HUMANITIES AND SOCIAL SCIENCES (FAHSS)	57
GENERAL INFORMATION ABOUT HONOURS AND GENERAL PROGRAMS.....	57
Bachelor of Arts - Four-Year Honours Programs	57
Bachelor of Arts - Three-Year General Programs	57
Co-operative Education Program Regulations	57
PROGRAMS ADMINISTERED BY THE OFFICE OF THE DEAN OF FAHSS	58
Minor in Anthrozoology.....	58
Bachelor of Interdisciplinary Arts and Science (IAS) Minor Concentration in Anthrozoology.....	59
Minor in Indigenous Studies.....	59
Minor in Popular Culture	59
Honours Bachelor of Interdisciplinary Arts and Science (IAS).....	59
Honours Bachelor of Interdisciplinary Arts and Science (IAS) Double Major Concentration	61
Honours Bachelor of Interdisciplinary Arts and Science (IAS) Major and Double Minor Concentration	61
Discovery Program (undeclared majors in FAHSS).....	62
Honours in Commercial Aviation Leadership	63
FACULTY OF ARTS, HUMANITIES, AND SOCIAL SCIENCES (FAHSS) COURSES	64
COMMERCIAL AVIATION LEADERSHIP COURSES	64
ANTHROZOOLOGY COURSES	64
GENERAL FAHSS COURSES (GART-)	66
GENERAL FAHSS COURSES (SOSC-).....	68
HUMAN GEOGRAPHY COURSES	71

INTERDISCIPLINARY ARTS AND SCIENCE COURSES (ARSC).....	71
COMMUNICATION, MEDIA AND FILM	73
PROGRAMS.....	73
General Communication, Media and Film.....	73
Honours Communication, Media and Film (with/without Co-op)	73
Combined Honours Communication, Media and Film	74
Honours Film Production (Bachelor of Fine Arts).....	74
Concurrent General Bachelor of Arts (Communication, Media and Film)/Bachelor of Education	74
Minor in Communication, Media and Film.....	74
Minor in Film Studies	74
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Communication, Media and Film	75
COMMUNICATION, MEDIA AND FILM COURSES.....	75
FILM COURSES	80
DRAMATIC ART	81
PROGRAM REGULATIONS	81
PROGRAMS.....	81
General Bachelor of Arts in Drama.....	81
Honours Bachelor of Arts in Drama (with/without Co-op)	82
Honours Bachelor of Arts in Drama for Graduates of the Theatre Arts Ontario College Advanced Diploma.....	82
Honours Bachelor of Arts in Drama for Graduates of the Music Theatre Performance Ontario College Advanced Diploma.....	83
Honours Bachelor of Arts in Drama in Education and Community with concentration in Applied Theatre (with/without Co-op).....	83
Combined Honours Bachelor of Arts in Dramatic Art	84
Bachelor of Fine Arts (BFA) in Dramatic Art - Acting	85
Concurrent General Bachelor of Arts (Drama)/Bachelor of Education	86
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) – Dramatic Art	86
DRAMATIC ART COURSES.....	87
ENGLISH AND CREATIVE WRITING.....	96
PROGRAM REGULATIONS	96
PROGRAMS.....	96
General English	96
Honours English (with/without Co-op).....	97
Honours English and Creative Writing.....	97
Combined Honours English	98
Combined Honours English and Creative Writing	98
Concurrent General Bachelor of Arts (English)/Bachelor of Education	99
Minor in English	99
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - English.....	99
ENGLISH AND CREATIVE WRITING COURSES.....	100
HISTORY	107
PROGRAM REGULATIONS	107

PROGRAMS.....	107
BA General History	107
BA Honours History (with/without Co-op)	108
Combined BA Honours History Programs	108
Concurrent General Bachelor of Arts (History)/Bachelor of Education	109
Minor in History	109
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - History.....	109
HISTORY COURSES.....	109
INTERDISCIPLINARY AND CRITICAL STUDIES	120
PROGRAMS.....	120
DISABILITY STUDIES	120
BA Honours in Disability Studies.....	120
Combined Honours BA in Disability Studies and Psychology	121
Combined Honours BA in Disability Studies	121
BA Honours Bachelor of Arts in Disability Studies for Ontario College Child and Youth Care Program Graduates - Degree Completion Pathway	122
Honours Bachelor of Arts in Disability Studies for College of Applied Arts and Technology Graduates - Degree Completion Pathway	123
Minor in Disability Studies	124
LIBERAL AND PROFESSIONAL STUDIES.....	124
General Liberal Arts and Professional Studies.....	124
Honours Liberal Arts and Professional Studies	124
General Liberal Arts and Professional Studies Degree Completion Program (for Lambton College Liberal Studies Graduates) (formerly General Arts and Science University (GASU))	125
Honours Liberal Arts and Professional Studies Degree Completion Program (for Lambton College Liberal Studies Graduates) (formerly General Arts and Science University (GASU))	125
General Liberal Arts and Professional Studies for Career Professionals Degree Completion Program (for Graduates of Qualifying CAAT (or equivalent) Diploma Programs)	126
General Liberal Arts and Professional Studies for Career Professionals Degree Completion Program (for Graduates of Qualifying CAAT (or equivalent) Advanced Diploma Programs)	126
SOCIAL JUSTICE	127
Combined Honours in Social Justice	127
Minor in Social Justice Studies.....	128
WORK AND EMPLOYMENT ISSUES	128
Minor in Work and Employment Issues	128
Certificate in Work and Employment Issues	129
LATIN STUDIES	129
Minor in Latin American Studies	129
RACE AND ETHNICITY STUDIES.....	129
Minor in Race and Ethnicity Studies	129
WOMEN’S AND GENDER STUDIES.....	129
General BA in Women's and Gender Studies	129
BA Honours in Women's and Gender Studies	130
Combined Honours in Women's and Gender Studies	130
Combined Honours Women's and Gender Studies when taken with Criminology	131
Honours Business Administration and Women’s and Gender Studies (with/without thesis and with/without Specialization)	131
Honours Bachelor of Social Work and Women's Studies	132
Certificate in Women's Studies	132

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) -	
Women's and Gender Studies	132
Minor in Women's and Gender Studies	132
INTERDISCIPLINARY AND CRITICAL STUDIES COURSES	133
DISABILITY STUDIES COURSES	133
SOCIAL JUSTICE COURSES	134
WORK AND EMPLOYMENT ISSUES COURSES	136
WOMEN'S AND GENDER STUDIES COURSES	137
LANGUAGES, LITERATURES AND CULTURES/LANGUES, LITTÉRATURES ET CULTURES (LLC).....	145
PROGRAM REGULATIONS	145
PROGRAMS.....	146
GREEK AND ROMAN STUDIES.....	146
Honours Greek and Roman Studies (Greek or Latin Option)	146
Combined Honours Greek and Roman Studies	146
FRENCH STUDIES.....	147
General Bachelor of Arts in French Studies	148
Honours Bachelor of Arts in French Studies (with/without Co-op)	148
Combined Honours French Studies Programs.....	149
Concurrent General Bachelor of Arts (French Studies)/Bachelor of Education	150
Minor in French Studies.....	150
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) -	
French Studies	150
French Studies Outside of the University of Windsor	151
MODERN LANGUAGES.....	151
Honours Modern Languages (with year abroad)	151
Honours Modern Languages and Second-Language Education	152
Combined Honours Modern Languages	153
Honours Modern Languages with Two Languages Option	154
Concurrent General Bachelor of Arts (Modern Languages with Second Language	
Education)/Bachelor of Education.....	155
Certificate in Second Language Education	155
Minor in Modern Languages (Concentration in Language).....	156
Minor in Modern Languages (Concentration in Language and Culture).....	156
Minor in Modern Languages (Concentration in Linguistics and Literature)	156
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) -	
Modern Languages	157
Minor Concentration - Bachelor of Interdisciplinary Arts and Science (IAS) - Linguistics and	
Literature	157
Minor in Arabic Studies	157
Minor in Jewish Studies	158
LANGUAGES, LITERATURES AND CULTURES/LANGUES, LITTÉRATURES ET CULTURES (LLC) COURSES.....	158
ARABIC STUDIES COURSES.....	158

SPANISH LANGUAGE OPTION COURSES	173
PHILOSOPHY	174
PROGRAM REGULATIONS	174
PROGRAMS.....	174
General Philosophy.....	174
Honours Philosophy (with/without Co-op)	175
Combined Honours Philosophy Programs.....	176
Certificate in Critical Reasoning, Ethics and Law	176
Minor in Philosophy.....	177
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Philosophy	177
PHILOSOPHY COURSES.....	178
POLITICAL SCIENCE	185
PROGRAMS.....	185
General Political Science.....	185
Honours Political Science.....	186
Honours Political Science (Co-op Education)	187
Honours Political Science (with Thesis)	187
Honours Political Science with French Specialization	188
Honours Political Science with French Specialization and Thesis	189
Honours Law and Politics.....	190
Honours Law and Politics (with Thesis)	192
Honours International Relations and Development Studies	192
Honours International Relations and Development Studies (with Thesis)	193
Combined Honours Political Science Programs.....	194
Combined Honours Political Science Programs with Thesis in Political Science.....	195
Honours Business Administration and Political Science (with/without thesis and with/without Specialization).....	195
Concurrent General Bachelor of Arts (Political Science)/Bachelor of Education	195
Certificate in Law and Politics.....	196
Certificate in North American Studies	196
Certificate in Public Administration.....	196
Minor in Political Science.....	197
Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS)- Political Science	197
POLITICAL SCIENCE COURSES	197
PSYCHOLOGY	208
PROGRAMS.....	208
General Psychology	208
General Child Psychology	208
Honours Psychology (with/without Co-op)	209
Honours Psychology with Thesis	209
Honours Psychology – Interdisciplinary Health Science (IHS) Stream	210
Honours Developmental Psychology.....	211

Honours Developmental Psychology with Thesis.....	211
BSc Honours Program in Behaviour, Cognition and Neuroscience (with/without thesis).....	212
Combined Honours Psychology Programs	212
Combined Honours Programs in Psychology with Thesis	213
Combined Honours Programs in Developmental Psychology.....	214
Combined Honours Programs in Developmental Psychology with Thesis.....	214
Concurrent General Bachelor of Arts (Psychology)/Bachelor of Education/Diploma in Early Childhood Education.....	215
General Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway	215
General Child Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway	216
Honours Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway	217
Honours Psychology with Thesis for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates- Degree Completion Pathway	218
Honours Developmental Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway	219
Honours Developmental Psychology with Thesis for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway	219
Bachelor of Arts in Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program from Fanshawe College, Lambton College or St. Clair College.....	220
Bachelor of Arts in Developmental Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program from Fanshawe College, Lambton College or St. Clair College.....	221
BA Honours in Disability Studies.....	222
Combined Honours BA in Disability Studies	222
Combined Honours BA in Disability Studies and Psychology	222
Honours Bachelor of Social Work and Disability Studies	222
BA Honours Bachelor of Arts in Disability Studies for Ontario College Child and Youth Care (formerly Child and Youth Worker) - Degree Completion Pathway.....	222

RESPONSIBILITY/DISCLOSURE NOTIFICATIONS

STATEMENT OF RESPONSIBILITY OF THE UNIVERSITY

1. The content of this Calendar is provided for the general guidance of the student and is not intended to make any contractual commitments therefor. The Calendar is accurate at the time of its publication, but programs, courses, staffing, etc. are subject to change from time to time as deemed appropriate by the University of Windsor in order to fulfill its role and mission, or to accommodate circumstances beyond its control. Any such changes may be implemented without prior notice and, unless specified otherwise, are effective when made. The official University of Windsor academic calendars are: the Undergraduate Web Calendar, the Graduate Web Calendar, and the Faculty of Law Calendar.

2. This Calendar represents the University of Windsor's best judgment and projection of the course of conduct of the University of Windsor during the periods addressed herein. It is subject to change due to forces beyond the University of Windsor's control or as deemed necessary by the University of Windsor in order to fulfill its educational objectives.

3. Advisors are provided to assist students in planning their academic programs. Advisors are not authorized to change established policy of the University of Windsor. Students are solely responsible for assuring that their academic programs comply with the policies of the University of Windsor. Any advice which is at variance with established policy must be confirmed by the appropriate Dean's Office.

4. Any tuition fees and/or other charges described herein are good faith projections for the academic year. They are, however, subject to change from one academic term to the next as deemed necessary by the University of Windsor in order to meet its financial commitments and to fulfill its role and mission.

5. There are other fees and charges which are attendant upon a student's matriculation at the University of Windsor. These fees or charges may be determined by contacting the University offices which administer the programs or activities in which the student intends to enroll or engage.

6. The University of Windsor reserves the right to terminate or modify program requirements, content, and the sequence of program offerings from term to term for educational reasons which it deems sufficient to warrant such actions.

Further, the University of Windsor reserves the right to terminate programs from term to term for financial or other reasons which it determines warrant such action. The content, schedule, requirements and means of presentation of courses may be changed at any time by the University of Windsor for educational reasons which it determines are sufficient to warrant such action. Programs, services, or other activities of the University of Windsor may be terminated at any time due to reasons beyond the control of the University of Windsor.

7. The course descriptions herein are based upon reasonable projections of faculty and faculty availability and appropriate curriculum considerations. The matters described are subject to change based upon

changes in circumstances upon which these projections were based and as deemed necessary by the University of Windsor to fulfill its role and mission.

NOTIFICATION OF DISCLOSURE OF PERSONAL INFORMATION TO STATISTICS CANADA

Statistics Canada is the national statistical agency. As such, Statistics Canada carries out hundreds of surveys each year on a wide range of matters, including education.

It is essential to be able to follow students across time and institutions to understand, for example, the factors affecting enrollment demand at post-secondary institutions. The increased emphasis on accountability for public investment means that it is also important to understand 'outcomes'. In order to carry out such studies, Statistics Canada asks all colleges and universities to provide data on students and graduates. Institutions collect and provide to Statistics Canada student identification information (student's name, student ID number, Social Insurance Number), student contact information (address and telephone number), student demographic characteristics, enrollment information, previous education, and labour force activity.

The Federal Statistics Act provides the legal authority for Statistics Canada to obtain access to personal information held by educational institutions. The information may be used only for statistical purposes, and the confidentiality provisions of the Statistics Act prevent the information from being released in any way that would identify a student.

Students who do not wish to have their information used are able to ask Statistics Canada to remove their identification and contact information from the national database.

Further information on the use of this information can be obtained from Statistics' Canada of visiting their website at <https://www.statcan.gc.ca>

NOTIFICATION OF DISCLOSURE, CONFIDENTIALITY AND USE OF PERSONAL INFORMATION

The authorization for the collection of this information is the University of Windsor Act, 1962, and Senate Bylaw 33 of the University of Windsor. This collection is compliant with the Freedom of Information and Protection of Privacy Act of the Province of Ontario.

The University of Windsor is committed to the protection of privacy and confidentiality of all its constituency.

The purpose of this data collection is related directly to and needed by the University of Windsor to administer the university / student relationship including the proper recording of student academic progress and to adhere to governmental reporting requirements.

Data collected will be disclosed and used as follows:

- Registrarial, administrative and academic offices for record-keeping, institutional analysis, provision of services to students, academic integrity enforcement;
- Academic counselling and advising offices for advising services;
- Where the operational necessity of the University requires the disclosure;

- Federal and provincial government offices and Ministries for funding, statistical analysis and planning purposes;
- Student associations and societies for services to students and student elections;
- Student Services offices for the administration of activities including Career Services, Cooperative Education programs, Special Needs programs, Psychological Counselling services, Residence administration;
- Campus Community Police and Parking Services for campus security and parking services;
- Registrar's Office for production of graduation lists and Convocation programme; Alumni Association for services to alumni;
- Financial aid, scholarship and award determination;
- For academic purposes to support learning, including, but not limited to identification within the University's learning management system
- Student Health Services for health services; Greenshield Canada for insurance purposes; Windsor-Essex County Health Unit for health services;
- External collection agencies in the event of fee payment default;
- Athletics and Recreational Services for sports and athletic services;
- Citizenship and Immigration Canada, Canadian Consular Offices, and the Canada Border Services Agency for student / study visa administration.
- The university is required to report student-level enrolment-related data to the Ministry of Training, Colleges and Universities as a condition of its receipt of operating grant funding. The Ministry collects this enrolment data, which includes limited personal information such as Ontario Education Numbers, student characteristics and educational outcomes, in order to administer governments postsecondary funding, policies and programs including planning evaluation and monitoring activities.
- The University of Windsor is required to disclose personal information such as Ontario Education Numbers, student characteristics and educational outcomes to the Ministry of Training, Colleges and Universities under s. 15 of the Ministry of Training Colleges and Universities Act, R.S.O., 1990, Chapter M. 19, as amended. The ministry collects this data for purposes such as planning, allocating and administering public funding to colleges, universities and other post-secondary educational and training institutions and to conduct research and analysis, including longitudinal studies, and statistical activities conducted by or on behalf of the ministry for purposes that relate to post-secondary education and training. Further information on how the Minister of Training, Colleges and Universities uses this personal information is available on the ministry's website.
- As required by statute or law

If you have any questions about the collection, use, and disclosure of this information please contact: the Registrar OR the FIPPA Coordinator, University of Windsor, 401 Sunset Avenue, Windsor, Ontario, Canada N9B 3P4 (519)-253-3000 ext. 4059. richardt@uwindsor.ca

VERIFICATION OF OFFICIAL DEGREE PARCHMENTS AND TRANSCRIPTS AND PREVENTION OF FRAUDULENT DOCUMENTATION

Degree Verification

The University of Windsor has joined with AuraData, Canada's online education verification system for the purposes of verifying degree completion status of University of Windsor graduates.

AuraData is now providing risk prevention in the number one area of résumé fraud, post-secondary/professional designation education claims. Subscribers to AuraData can now efficiently confirm the post-secondary education achievement of prospective employees, online 24/7. AuraData does this while conforming to Federal and Provincial Privacy laws.

Employers can now minimize the hiring risk associated with education fraud so prevalent in the hiring process. Universities, Colleges and Professional Designations now have a reliable method of assuring the credibility of their product. Also, graduates are now protected from the illicit use of their designations by unscrupulous job hunters.

For fast, economical and convenient education verifications for the University of Windsor go to www.auradata.com or call 416-406-0444 or 1-877-580-2872.

Requests for verification of University of Windsor transcripts or enrolment status, when authorized by the student, can be directed to the Office of the Registrar by fax at 519-971-3653. Copies of the document(s) and the student's signed authorization are required.

Fraudulent University Documentation

Ontario universities are committed to ensuring the integrity of their degrees for their many graduates and adamantly oppose any activities that result in the creation of fraudulent documents or false representation of university studies.

Any accusation or indication of document fraud is subject to internal investigation at home institutions in accordance with legislative frameworks such as internally approved academic honesty policies. While the universities cannot speak to individual investigations or to any specific individual student file due to privacy legislation, any such accusations are accorded serious review and attention. Examples of possible punitive actions might include expulsion, refusal to allow admission and possible legal action.

- Publicly funded Ontario universities are members of the Association of Registrars of Universities and Colleges of Canada (ARUCC). Members of ARUCC routinely inform other institutions of suspicious activity related to fraudulent documentation to uphold the integrity of the Canadian educational system. The Council of Ontario Universities is on public record for taking a strong position against such inappropriate behaviour.
- Many universities in Canada and around the world, including those in Ontario, incorporate security features and security protocols when issuing transcripts and diplomas.
- The universities urge potential employers, verification agencies and other organizations to support the postsecondary sector by requesting that transcripts be sent directly from the university rather than accepting student copies, and by verifying all transcripts and diplomas with the issuing university.

The verification of University of Windsor degrees is done by the AURADATA degree verification agency. Contact them at: www.auradata.com

Requests for verification of University of Windsor transcripts or enrolment status, when authorized by the student, can be directed to the Office of the Registrar by fax at 519-971-3653. Copies of the document(s) and the student's signed authorization are required.

PROGRAM AND COURSE LEARNING OUTCOMES

Program and Course Learning Outcomes can be found online in the Curriculum Mapping and Design (CuMa) database, which is an online tool that contains an archive of the official program and course learning outcomes at the University of Windsor

Programs <https://ctl2.uwindsor.ca/cuma/public/programs/>

Courses: <https://ctl2.uwindsor.ca/cuma/public/courses/>

APPLICATION/ADMISSION INFORMATION

Application Procedures

Applicants for full-time, undergraduate studies must apply through the Ontario Universities' Application Centre (O.U.A.C.). Current Ontario secondary school students should contact their guidance office for application instructions. All others use the O.U.A.C. 105 application form, which is available at all Ontario universities or via the web at <www.ouac.on.ca>

Applicants for part-time studies must use the University of Windsor application form, which is available via the web at <www.uwindsor.ca/ptapp>

Application Deadlines

Candidates from outside continental North America should apply and submit all supporting documents to the Registrar's Office by:

- May 1 for September admissions (Fall)
- September 1 for January admissions (Winter)
- January 1 for May admissions (Spring)

The above application deadlines are recommended to best ensure your program choice is available and enough time is available for student VISA processing. UWindsor does, however, admit qualified students after the deadlines listed above, if the program has available space.

All other candidates must apply and submit all supporting documents as follows: August 1 for the Fall term; December 1 for the Winter term; and April 1 for the Summer term (Intersession and Summer Session).

Year III, Honours Bachelor of Social Work programs – December 2

Year III Social Work and Diaspora Studies – December 2

Year III Social Work and Women's Studies – December 2

Bachelor of Science in Nursing - March 1

Admissions Policies

The following policies can be found online on the Central Policies website at: www.uwindsor.ca/policies

- **Admission Requirements** (For Students Coming from Ontario Secondary Schools; Students Coming from Other Canadian Provinces; Students Coming from Another Canadian University; Students Coming from a College of Applied Arts and Technology; Students Coming from Lambton College's International Foundation Year; Students Coming from the United States; Students Coming from Outside Canada and the United States; Students who have completed the

International Baccalaureate (IB) Diploma Program); For Social Work Year III Second-Entry Programs; Returning Students)

- **Admissions for Mature Students (Undergraduate)**
- **Admissions for Special Student Status**
- **Advanced Standing and Credit Transfer (For Students Transferring from Other Institutions)**
- **English Language Proficiency Requirement**

REGISTRATION/FEE REGULATIONS

TIME AND PLACE OF REGISTRATION

Students register at the beginning of each term/session in the manner designated by the Office of the Registrar. Although the courses selected may be offered in different Faculties of the University, all students register through UWinsite Student. For programs where block enrolment is offered, registration will be coordinated by the Department and the Office of the Registrar.

PROVISIONAL REGISTRATION

A student whose application is not complete by the regular registration period may be allowed to register provisionally. All required forms and documents must be submitted before the last day of late registration.

WITHDRAWAL FROM PROGRAMS OR COURSES

- 1) The status of a student who withdraws from full-time studies is left to the decision of the Faculty in which the student is registered and will be reported to the student through the Office of the Registrar.

Students who find it necessary to withdraw from a course or from the University may drop their courses over the web or notify the Registrar in person or by registered mail.

- 2) Students wishing to withdraw from a course will do so through UWinsite Student. Students must withdraw from a course or courses within the withdrawal periods as indicated below. Specific dates vary from term to term and are indicated in the Academic Dates. Withdrawal periods for courses in other sessions are normally set at approximately two-thirds of the course length. The withdrawal will be entered on the student's transcript as VW, (Voluntary Withdrawal), which is defined as "Withdrawal in good standing. No academic credit."

Students may not withdraw from a course or courses after the appropriate designated withdrawal period. After the voluntary withdrawal period for a course, students remain registered and will be assigned grades as appropriate.

A student who wishes to drop a course or courses after the appropriate withdrawal period based on medical or compassionate grounds should refer to "Appeals" or to Senate Bylaw 54.

- 3) The dates for withdrawal from courses which may result in partial tuition refunds vary from term to term. See the Academic Dates (through the Office of the Registrar) for appropriate dates and Withdrawal and Refund Policy. The Cashier's Office will make the appropriate adjustment of fees where applicable.

Withdrawal Period

One-term course offered during Fall or Winter Term - within nine weeks of beginning of term. (Not including Study Week)

Two-term course - within four weeks of beginning of the second term.

Summer Term (Intersession/Summer Session)

Three-week course - within two weeks of beginning of session.

Six-week course - within four weeks of beginning of session.

Eight-week course - within five weeks of beginning of session.

Twelve-week course - within nine weeks of beginning of session.

FEE REGULATIONS AND SCHEDULE

The University reserves the right to make changes without prior notice in the various fee schedules, as well as changes in rules and regulations and the revision or cancellation of particular courses and programs. The acceptance of fees does not necessarily imply approval of registration.

The following regulations apply to all students.

PAYMENT OF FEES

Fees are due and payable before the commencement of regular term classes. As a convenience, students may pay their tuition fees at any time prior to the appropriate due date. It is the responsibility of the student to ensure that deadlines are met. It is the student's responsibility to be familiar with and understand all the University regulations contained in the Calendar; to understand how adding and dropping a course or courses, withdrawal, etc., affects a tuition fee account; and to ensure that tuition fees are paid in full without any notice from the University. Further, failure to receive a statement of account through the mail does not constitute a valid reason for non-payment of fees. It is the responsibility of the student to check their fee account balance details in UWinsite Student at www.uwindsor.ca/uwinsitestudent. Available methods of payments are available on the Cashiers Office website at www.uwindsor.ca/finance/student-accounts. You will need your student number and PIN to access this information.

Cheques or other remittances must be made payable to The University of Windsor and must be received by the Cashier's Office prior to the due date. The student's name, identification number, address and telephone number should be recorded in the upper portion of the form of the remittance to ensure that the records are properly credited.

Students may pay their fees at any chartered bank in Canada by using a bank payment form available at the Cashier's Office. If a student has a grant and/or loan (e.g., OSAP), the loan must be assigned to the University to pay the fees. Any known difference between the amount of the award and the fees must be paid on or before the due date.

Students who are unable to complete payment of fees by the prescribed due date must arrange a fee deferment. Daily interest charges and academic sanctions (see "Interest Charges on Outstanding Accounts") may apply. Deferments are permitted under the following circumstances:

- (a) a student has evidence of having been awarded a Canada Student Loan or an Ontario Student Loan.
- (b) a student has evidence of having been awarded a scholarship, bursary or similar award, which may be used to pay the fees.

Students who are sponsored and require invoices to be sent for collection of fees must bring the appropriate documentation to the Cashiers' Office.

Notes:

- 1) It is the responsibility of the student to accurately report his or her academic status and correctly calculate the amount owing to the University for fees and other charges. Where calculations are incorrect or full payment is not made, daily interest will be charged on balances outstanding after the payment due date. Students should check all calculations thoroughly.

Any errors in a student's academic program, level, and status in Canada must be reported to the Office of the Registrar. Any errors which result in the incorrect calculation of fees owing do not relieve the student of the responsibility for payment of these fees. Students will be responsible for any additional charges incurred as a result of changes in their academic profile for all terms that are applicable.

- 2) It is the responsibility of the student paying his or her fees by cheque to ensure that sufficient funds are available to cover any cheques made payable to the University of Windsor. Cheques returned by the student's bank for any reason will incur return cheque penalties plus other penalties.
- 3) Every effort is made to process payments in a timely manner; however, cheques are valid for a period of six months and may be cashed at any time during that period.

INTEREST CHARGES ON OUTSTANDING ACCOUNTS

A daily interest charge will be calculated on all outstanding accounts. The interest will be compounded monthly.

A student who has failed to comply with the above regulations may have his or her registration cancelled as of the date on which the unpaid fees were due.

NON-PAYMENT OF FEES AND CHARGES

Information concerning academic results of any student who has an overdue debt owing to the University shall be withheld until the debt is settled. This includes transcripts, tuition tax receipts and diplomas. Overdue accounts which are not settled in a timely manner may be referred to an external collection agency as deemed necessary by the Cashiers Office.

Students who are graduating and who have an outstanding debt will be permitted to attend Convocation, but they will not receive their diplomas until all their debts are settled.

Any student who has an overdue debt owing to the University may not be permitted to re-register until the debt is settled in full by cash, certified cheque, debit card, a money order, bank draft, electronic back transfer. Students who are settling an overdue account who pay with a personal cheque will have the hold remain on their account for 30 days (45 days for foreign cheques and drafts) to ensure the cheque clears the bank. The hold may be lifted upon presentation of a copy of the front and back of the cancelled cheque.

A student who has not made a satisfactory fee arrangement by the appropriate fee payment due date (see "Payment of Fees") may be subject to cancellation of his/her registration. Students will be notified

by mail of any cancellations due to non-payment using the most recent address available. Appropriate charges will be assessed effective the date of cancellation.

Note: Non-payment of fees does not automatically result in the cancellation of registration in a course or courses.

Any student whose registration has been cancelled for default of payment is required to apply for reinstatement of registration at the Office of the Registrar. If the application is approved, a \$50.00 reinstatement fee is added to any other assessable charges.

Overdue accounts must be paid by cash, certified cheque, or money order.

Any student who has an unresolved grievance concerning fees or other charges may present an explanatory letter with appropriate official documentation (e.g. doctor's notes, etc.) to the Credit Manager, Cashier's Office.

TUITION AND EDUCATION CREDIT CERTIFICATE (T2202)

A tuition and education tax certificate (T2202) in a form acceptable to the Canadian Customs and Revenue Agency (CCRA) is available in UWinsite Student at www.uwindsor.ca/uwinsitestudent. This certificate is made available to all students whose accounts were paid in full by December 31 of the previous year. Student accounts that are not paid in full will show zero dollars for any semester which remains unpaid. If a student subsequently pays the semester, revised figures will be made available to them.

SCHOLARSHIPS

Undergraduate scholarships, awards and/or bursaries offered to students prior to the financial drop date in each semester, will appear on the UWinsite Student Homepage > Financial Account > Payment History as "Anticipated Aid", if the student meets eligibility requirements. Scholarship payments will occur, and are made directly to the student's tuition/financial account, after the financial drop date in each semester (early October for Fall, early February for Winter and mid-July for Summer) should eligibility requirements continue to be met. Renewable awards will be assigned one semester at a time. Additional information can be found on the Student Award website: <https://www.uwindsor.ca/studentawards/>

WITHDRAWAL AND REFUND POLICY

Graduate students who, for any reason, wish to withdraw from the University must notify, in writing, the Office of Graduate Studies, as otherwise resumption of graduate study at this University may be difficult or impossible.

Full-time undergraduate students who intend to withdraw completely from the University are required to undergo an interview and complete the appropriate forms at the Office of Student Development and Support.

Notice by telephone is not acceptable. Failure to attend classes does not constitute a withdrawal. Full refund will be given to part-time students enrolled in a course that has been cancelled by the University.

Full and part-time students withdrawing from regular courses during the periods indicated below will be assessed fees as indicated.

WITHDRAWAL FOR 12-WEEK TERM	FEE PAYABLE
Week(s) One through Four	Full Refund
After Week Four	Full fees for the appropriate program payable

Refunds resulting from withdrawals will be available on request.

FREE TUITION FOR STUDENTS 65 YEARS OF AGE AND OVER

The University of Windsor offers an incentive of free tuition and incidental fees for students sixty-five years of age and over, except in the case of professional programs. It is felt that people in this group might wish to avail themselves of the University facilities, not only for degree purposes, but perhaps for personal enrichment and the fuller utilization of their leisure time. If you feel that your needs can be served according to this program, we encourage and invite you to contact the Advising Centre. This applies to Canadian citizens or Permanent Residents of Canada only.

SCHEDULE OF FEES

The Board of Governors reserves the right to make changes without notice in the published schedule of fees and charges if, in its opinion, circumstances so require. Any such changes will be reflected in the Self-Assessment form issued through the Cashier's Office before registration. It is the responsibility of the student to obtain this information. The schedule of fees changes annually. Contact the Cashier's Office for information on the current schedule of fees, which outlines tuition, incidental, and other fees. The current Registrarial Service Fees be found on the Registrar Office website at <https://www.uwindsor.ca/registrar/>.

UNIVERSITY/COLLEGE AGREEMENTS

FOR STUDENTS FROM CANADIAN COLLEGES AND RECOGNIZED UNIVERSITIES

Bachelor of Engineering Technology (BEngTech)

See Faculty of Engineering for admission and program requirements.

FOR STUDENTS FROM ALL COLLEGES OF APPLIED ARTS AND TECHNOLOGY

From a College of Applied Arts and Technology

Applicants who have completed a minimum of one year of a CAAT diploma program that is academic in nature with a minimum cumulative average of B (3.0) at the CAAT will be considered for admission to First Year of an appropriate program. Applicants who have graduated from a three-year CAAT program that is academic in nature with a minimum cumulative average of B (3.0) at the CAAT will be considered for admission to Second Year of an appropriate program.

General Liberal Arts and Professional Studies for Career Professionals Degree Completion Pathway (for Graduates of Qualifying CAAT (or equivalent) Diploma Programs)

See Faculty of Arts, Humanities and Social Sciences for admission and program requirements.

General Liberal Arts and Professional Studies for Career Professionals Degree Completion Pathway (for Graduates of Qualifying CAAT (or equivalent) Advanced Diploma Programs)

See Faculty of Arts, Humanities and Social Sciences for admission and program requirements.

Combined Bachelor of Arts in Forensics (Applied Forensics Science Stream)

For graduates of a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate. See Faculty of Science for admission and program requirements.

Honours Bachelor of Arts in Economics (Applied Economics and Policy Stream)

For graduates of a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate. See Department of Economics for admission and program requirements.

Honours Chemistry (Applied Chemistry Stream)

For graduates of a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate. See Department of Chemistry and Biochemistry for admission and program requirements.

Bachelor of Commerce Program for 3-year CAAT (or equivalent) Diploma Holders in any area other than Business

See the Odette School of Business for admission and program requirements.

Bachelor of Commerce Program for 3-year CAAT (or equivalent) Diploma Holders in any area in Business

See the Odette School of Business for admission and program requirements.

Bachelor of Commerce Program for 2-year CAAT (or equivalent) Diploma Holders in any area in Business

See the Odette School of Business for admission and program requirements.

Bachelor of Commerce (Honours Business Administration) (with or without thesis) and (with or without Co-op) and Three-Year Diploma in Business

See the Odette School of Business for admission and program requirements.

General Arts and Science Diploma and Liberal Arts and Science Diploma programs (Two Year Diploma)

Graduates of General Arts and Science diploma programs, Liberal Arts and Science diploma programs, and equivalent diploma programs may receive transfer credit for up to ten courses. Transfer credit is awarded for approved courses with a minimum grade of B (3.0). Refer to the Faculty of Arts, Humanities and Social Sciences for current approved course lists.

Bachelor of Computer Science (General) or Bachelor of Computer Science (Honours Applied Computing) Degree Completion Pathways

See the School of Computer Science for admission and program requirements.

Bachelor of Computer Science (General) and (Honours Applied Computing) (Co-op) for Qualifying Ontario CAAT (or equivalent) Students with 2 Years of Study at CAAT (or equivalent) diploma program

See the School of Computer Science for admission and program requirements.

BA or BSW Degree for Graduates of Diploma in Protection, Security and Investigation (formerly Law and Security) (Two Year Diploma)

Graduates of the two-year Diploma in Protection, Security and Investigation program with a cumulative average grade of B or better may receive credit equivalent to five courses (15.00 credits) toward a BA or BSW degree. Transfer credit is awarded for approved courses with a minimum grade of B- or better.

Disabilities Studies Degree for Graduates of Child and Youth Care (formerly Child and Youth Worker), Developmental Services Worker, Early Childhood Education, Educational Support, Social Services Worker

Graduates of these College of Applied Arts and Technology diploma programs with an overall B average or better may be admitted into second year of the Disability Studies program. Graduates of related Education, Community and Social Services programs may be admitted with Disability Studies Program Coordinator (or their designate) approval. (Please refer to the BA Honours in Disability Studies for College of Applied Arts and Technology Graduates for more details)

BA or BSW Degree for Graduates of Early Childhood Education Diploma

Students who have completed the Diploma in Early Childhood Education with an overall average of at least B (3.0) will normally receive a minimum of ten course equivalents toward a BA or BSW degree in the Faculty of Arts, Humanities and Social Sciences. Students will receive credit on the basis of a General

Approved Course List or for courses on a Specific Approved Course List that they passed with a minimum grade of C. Refer to the Faculty of Arts, Humanities and Social Sciences for approved course lists. Students must meet all regular requirements for the program they choose; the number of course credits applied toward program requirements will vary depending on program choice. Students whose Early Childhood Education diploma program includes transfer credits for previously completed university courses will normally receive a minimum of 10 university credits in accordance with the above provisions.

NB: Should changes in the courses offered or required at either institution necessitate changes to the specific courses mentioned in the agreement, with the agreement of the respective Deans' offices the list of course included in the agreement can be modified by the appropriate University of Windsor Department in consultation with the Registrar's office. The changes have to be submitted to the appropriate Faculty.

BA or BSW Degree for Graduates of Developmental Services Worker Diploma

Graduates of the Developmental Services Worker program who have a cumulative grade point average equivalent to B (3.0) or better will normally receive credit equivalent to a minimum of ten courses toward a BA or BSW degree in the Faculty of Arts, Humanities and Social Sciences. Students will receive credit on the basis of a General Approved Course List or for courses on a Specific Approved Course List that they passed with a minimum grade of C. Refer to the Faculty of Arts, Humanities and Social Sciences for approved course lists. Students must meet all regular requirements for the program they choose; the number of course credits applied toward program requirements will vary depending on program choice. Students whose Developmental Services Worker diploma program includes transfer credits for previously completed university courses will normally receive a minimum of 10 university credits in accordance with the above provisions.

NB: Should changes in the courses offered or required at either institution necessitate changes to the specific courses mentioned in the agreement, with the agreement of the respective Deans' offices the list of course included in the agreement can be modified by the appropriate University of Windsor Department in consultation with the Registrar's office. The changes have to be submitted to the appropriate Faculty.

BA or BSW Degree for Child and Youth Care (formerly Child and Youth Worker Diploma)

Students who have completed the Child and Youth Care Diploma program with a cumulative average grade of B (3.0) or better will normally receive a minimum of 15 university credits toward a BA or BSW degree in the Faculty of Arts, Humanities and Social Sciences. Students will receive credit on the basis of a General Approved Course List or for courses on a Specific Approved Course List that they passed with a minimum grade of C. Refer to the Faculty of Arts, Humanities and Social Sciences for approved course lists. Students must meet all regular requirements for the program they choose; the number of course credits applied toward program requirements will vary depending on program choice. Students whose Child and Youth Care diploma program includes transfer credits for previously completed university courses will normally receive a minimum of 15 university credits in accordance with the above provisions.

NB: Should changes in the courses offered or required at either institution necessitate changes to the specific courses mentioned in the agreement, with the agreement of the respective Deans' offices the list of course included in the agreement can be modified by the appropriate University of Windsor Department in consultation with the Registrar's office. The changes have to be submitted to the appropriate Faculty.

Disability Studies, Psychology Degree, and Social Work Completion Programs for Graduates of Child and Youth Care Diploma (formerly Child and Youth Worker Diploma)

Graduates of all Ontario College Child and Youth Care diploma programs completed in 1996 or later with a cumulative average equivalent to a B (73%) or better will be eligible for entry into Disability Studies and Psychology Degree Completion Programs for CYC Graduates and are eligible to apply for entry into the Honours Bachelor of Social Work for CYC Graduates. Completion of these programs will normally require three semesters of full-time study (for General BA degree completion programs) or four semesters of full-time study (for Honours BA and BSW degree completion programs). Students may enroll in these programs in Summer, Fall or Winter semesters. Students are strongly advised to consult with a Disability Studies, Psychology or Social Work academic advisor before registering for courses in these programs. *See the Department of Psychology and School of Social Work for program requirements.*

BA or BSW Degree for Graduates of Social Service Worker Diploma

Students who have completed a Social Service Worker Diploma program recognized by and making them eligible for registration with the Ontario College of Social Workers and Social Service Workers with a cumulative average grade of B (3.0 or 70%) or better will normally receive a minimum of 10 university credits toward a BA degree or BSW degree in the Faculty of Arts, Humanities and Social Sciences. Students will receive credit on the basis of a General Approved Course List or for courses on a Specific Approved Course List that they passed with a minimum grade of C (or 63%). Refer to the Faculty of Arts, Humanities and Social Sciences for approved course lists. Students must meet all regular requirements for the program they choose; the number of course credits applied toward program requirements will vary depending on program choice. Students whose Social Service Worker diploma program includes transfer credits for previously completed university courses will normally receive a minimum of 10 university credits in accordance with the above provisions.

NB: Should changes in the courses offered or required at either institution necessitate changes to the specific courses mentioned in the agreement, with the agreement of the respective Deans' offices the list of course included in the agreement can be modified by the appropriate University of Windsor Department in consultation with the Registrar's office. The changes have to be submitted to the appropriate Faculty.

BSc in Biological Sciences, Biochemistry, or General Science for Graduates of the Medical Laboratory Science Program

Graduates of the three-year Diploma in Medical Laboratory Science from any Ontario College of Applied Arts and Technology (or Canadian equivalent) with a 3.0 G.P.A. (75% or equivalent) may receive up to the equivalent of eleven semester course credits towards the Bachelor of Science degree.

Durham College

Bachelor of Human Kinetics (Honours Kinesiology) with Sport Management Major for Graduates of Durham College's Sport Management Program

See the Faculty of Human Kinetics for admission and program requirements.

Fanshawe College

Bachelor of Human Kinetics for Graduates of Fanshawe College's Recreation and Leisure Services Program

See the Faculty of Human Kinetics for admission and program requirements.

Admission to First-Year for Graduates of Fanshawe College's General Arts and Science Certificate

Applicants who have completed the one-year General Arts and Science Program at Fanshawe College with a minimum cumulative average of B (3.0) will be considered for admission to First Year of an appropriate program. Should changes in course content warrant updates to the course equivalencies, the Office of the Registrar in collaboration with the applicable department will have these reassessments completed and updates applied where applicable.

Bachelor of Arts in Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

Bachelor of Arts in Developmental Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

Lambton College of Applied Arts and Technology

Transfer Credit for ENG 1113 and ENG 2113

Note: Lambton College students who have completed Lambton College Communications I (ENG 1113) will receive transfer credit for University of Windsor Effective Writing I (GART-1500); and, Lambton College students who have completed Lambton College Communications II (ENG 2113) will receive transfer credit for University of Windsor Effective Writing II (GART-1510), on the understanding that transfer credits given for one or both of these courses will not increase the number of transfer credits to which they are entitled according to the articulation or degree completion agreement nor decrease the number of courses they must complete in order to earn a University of Windsor degree.

BSc in Chemistry for Graduates of Chemical Engineering Technology Program

A student may enter a Bachelor of Science program after completing the three-year Diploma in Chemical Engineering Technology. Depending upon the selected level and area of study, the student may receive the equivalent of seventeen courses from Chemistry and Biochemistry.

BSc in Chemistry for Graduates of Environmental Technology Program

A student may enter a Bachelor of Science program after completing the three-year Diploma in Environmental Technology. Depending upon the selected level and area of study, the student may receive the equivalent of nineteen courses from Chemistry and Biochemistry.

BSc in Biological Sciences or Biochemistry for Graduates of Industrial Hygiene Technology Program

A student may enter a Bachelor of Science program after completing the three-year Diploma in Industrial Hygiene Technology. Depending upon the selected level and area of study, the student may receive the equivalent of up to sixteen courses towards a Biological Sciences Degree, or up to twenty courses towards a Biochemistry degree.

Bachelor of Human Kinetics for Graduates of Massage Therapy Program

See the Faculty of Human Kinetics for admission and program requirements.

BA or BSW Degree for Graduates of Police Foundations Program

A graduate of the two-year Diploma in Police Foundations program with a cumulative average grade of B or better and at least a grade of B- in specified College courses may receive up to one year (ten courses) of credit towards a BA or BSW degree program in the Faculty of Arts, Humanities and Social Sciences.

Bachelor of Human Kinetics (Honours Kinesiology) with Sport Management Major for Graduates of Lambton College's Sport and Recreation Administration Program

See the Faculty of Human Kinetics for admission and program requirements.

Bachelor of Science in Nursing for Graduates of the One-Year Pre-Health Science-Nursing Program

A student with a minimum grade point average of 2.7 (B) and a minimum average of 2.7 (B) in BIO 120, BIO 105, CHM 125 and CHM 225, will be considered for admission to the BScN program.

BA or BSW for Graduates of the General Arts and Science Psychology Program

Students who have completed a two-year high affinity General Arts and Science Psychology Stream diploma at Lambton College with a minimum cumulative average of 3.0 (Lambton College B) may enrol in any Bachelor of Arts or Bachelor of Social Work program offered at the University of Windsor. Students will receive the equivalent of up to 14 semester courses for all courses included in the Agreement on which they received a minimum average grade of 3.0. (Lambton College B).

General Liberal Arts and Professional Studies Degree Completion Pathway for Graduates of Lambton College's Liberal Studies Program (formerly General Arts and Science University (GASU))

See the Faculty of Arts, Humanities, and Social Sciences for admission and program requirements.

Honours Liberal Arts and Professional Studies Degree Completion Pathway for Graduates of Lambton College Liberal Students Transfer Program (formerly General Arts and Science University (GASU))

See the Faculty of Arts, Humanities, and Social Sciences for admission and program requirements.

Bachelor of Arts in Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

Bachelor of Arts in Developmental Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

St. Clair College of Applied Arts and Technology

Transfer Credit for FAW 100 and FAW 105

Applicants who have graduated from a St. Clair College of Applied Arts and Technology program for which a transfer agreement exists with the University of Windsor who have completed St. Clair College Foundations of Academic Writing I (FAW 100) and/or St. Clair College Foundations of Academic Writing II (FAW 105) will receive transfer credit for University of Windsor Effective Writing I (GART-1500) and/or University of Windsor Effective Writing II (GART-1510). These transfer credits will be included in the maximum number of transfer credits specified in the existing transfer agreement.

BA (General or Honours) in Communication, Media, and Film for Graduates of the Diploma in Journalism

St. Clair College graduates of the Diploma in Journalism with a minimum B-(2.7) average who have successfully completed the St. Clair courses may receive up to 10 course credits toward the requirements of a BA (General or Honours) in Communication, Media, and Film, from the University of Windsor. Credit will be awarded only if the St. Clair course was completed with a grade of B- (2.7) or better. Transfer students have to fulfill the regular degree requirement for the General or Honours BA (single or combined) in Communication, Media, and Film, including the residency and senior course requirement.

BSc in Chemistry for Graduates of the Chemical Engineering Technology Program

A student may enter a Bachelor of Science program after completing the three-year Diploma in Chemical Engineering Technology. Depending upon the selected level and area of study, the student may receive the equivalent of seventeen semester course credits from Chemistry and Biochemistry.

General Bachelor of Computer Science for Graduates of the Business Administration Information Systems Program

Graduates of this program with a 3.0 GPA or better, who have completed specific courses will be considered for admission to the General Bachelor of Computer Science on an individual basis, subject to the approval of the Dean of Science, and may receive up to fifteen semester course equivalents.

Bachelor of Applied Science in Mechanical Engineering (Automotive Engineering Option) degree for Graduates of the Mechanical Engineering Technology - Automotive Product Design Program

Graduates of the Mechanical Engineering Technology - Automotive Product Design program in the year 2001 or later, with a cumulative GPA of B or better, will be granted advanced standing in up to 14 semester courses towards the Bachelor of Applied Science in Mechanical Engineering (Automotive Engineering Option) degree. The transfer credit awarded for courses will be based on the approved course equivalencies, with some individual courses or groups of courses requiring a minimum B grade to earn the equivalent credit, and no grade lower than a C for the remainder of the courses on the approved course equivalencies list. See department for list of courses.

Bachelor of Science in Nursing for Graduates of the One-Year Pre-Health Science - Nursing Program

Students at St. Clair College who successfully complete the one-year Pre-Health Science-Nursing certificate with a minimum overall grade point average of 2.7 (B) and a minimum science subject average of 2.7 (B) in GAS 11, GAS 21, GAS 11A and GAS 21A, will be considered for admission to the BScN program.

BA or BSW Degree for Graduates of the Dental Hygiene Diploma

Students who have completed the two-year Diploma in Dental Hygiene with a cumulative average grade of B may receive up to five university credits for the following courses (or their equivalents), to apply toward any degree program in the Faculty of Arts, Humanities and Social Sciences, provided they passed the respective college courses with a grade of B- or better: Communication Across Cultures, Anatomy and Physiology II, Ethics and Professionalism, Basic Psychology, Three additional Dental Hygiene courses with a B average.

BA or BSW Degree for Graduates of the Police Foundations Program

A graduate of the two-year Diploma in Police Foundations program with a cumulative average grade of B or better and at least a grade of B- in specified College courses may receive up to one year (ten courses) of credit towards a BA or BSW degree program in the Faculty of Arts, Humanities and Social Sciences.

Bachelor of Applied Science in Civil Engineering for Graduates of the Civil Engineering Technology Program

Students who have completed the three-year Diploma Program at St. Clair College in Civil Engineering Technology with a cumulative average grade of B (70%) or better may receive credit for up to 13 specified semester courses provided they have passed the respective college courses with a grade of B (70%) or better.

BSc in Chemistry for Graduates of the Chemical Laboratory Technology Program

Students who graduate from the Chemical Laboratory Technology Program with a cumulative GPA of (3.0) or better will be awarded seventeen (17) semester transfer credits towards the Bachelor of Science

(Honours Chemistry and Honours Chemistry with Thesis) or awarded sixteen (16) credits towards the Bachelor of Science (Honours Biochemistry and Honours Biochemistry with Thesis).

Bachelor of Arts in Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

Bachelor of Arts in Developmental Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program

See the Department of Psychology for admission and program requirements.

Seneca College

Transfer Credit for Graduates of the Liberal Arts Diploma (Two Year Diploma)

Graduates of the two-year Liberal Arts diploma program from Seneca College may receive transfer credit for up to ten courses. Transfer credit is awarded for approved courses with a minimum grade of B.

Sir Sandford Fleming College of Applied Arts and Technology

BA or BSW Degree for Graduates of the One-Year General Arts and Science Program

Students who have completed the one-year certificate in General Arts and Science from Sir Sandford Fleming with a cumulative average grade of B may receive up to five university course credits, provided they passed the respective college courses with a grade of B- or better. The course credits received will be applicable to any BA/BSW program in the Faculty of Arts, Humanities and Social Sciences, and students would have to meet all regular requirements for the respective major of their choice.

UNIVERSITY TO COLLEGE AGREEMENTS WITH ST. CLAIR COLLEGE OF APPLIED ARTS AND TECHNOLOGY

University of Windsor graduates may obtain advanced standing into certain diploma programs offered by St. Clair College.

FORMAL UNIVERSITY/COLLEGE AGREEMENTS WITH OTHER INSTITUTIONS

ONTARIO

Academy of Learning

Graduates of selected Academy of Learning diploma programs with a cumulative average of seventy-five percent or better may receive advanced standing (transfer credit) for specified courses in Computer Science and/or Business Administration provided that they qualify for admission under any of the policies listed under "Admission Requirements".

McMaster University

Students who have successfully completed the Labour Studies Certificate program will receive five 1000-level unspecified course credits in the Faculty of Arts, Humanities and Social Science programs at the

University of Windsor. Students will still have to qualify for admission to the University based on the normal admission standards and students will be able to register in any program within the Faculty of Arts, Humanities and Social Science.

National Theatre School

Graduates of the National Theatre School three-year Certificate program in Acting may gain admission to the third year of the BFA in Acting program. A letter of recommendation from the Head of the National Theatre School and a successful placement audition are required. Completion of the BFA will normally require four semesters of full-time study. Students may be required to take certain academic courses, as well as performance courses at the first- or second-year level if their audition indicates a need for such courses. Students who graduated from the National Theatre School two or more years prior to application to the University of Windsor are subject to a placement audition before they can be covered by this agreement.

BRUNEI

University Brunei Darussalam (UBD)

Honours Biology and Biotechnology program: Students will be admitted into this program at UBD with three A-levels or equivalent in Chemistry, Biology, and Mathematics with grades of C, or higher. Students completing specified UBD courses with a cumulative average of C+ (65%) or higher and who have completed the University of Windsor course BIOC-2015 (Distance Education version of Organic Chemistry of Biomolecules) with a grade of B- or higher, will be eligible for transfer directly into the third year of the Honours Biology and Biotechnology program at the University of Windsor. Students must meet the University of Windsor's English language competency requirements and admission requirements before enrolling in BIOC-2015. Successful transfer students will be considered to have all the prerequisites necessary for continuation in the program and will receive credit for nineteen specified University of Windsor courses.

CHINA

Bachelor of Commerce (Honours Business Administration) for Students from Southwestern University Finance and Economics

See the Odette School of Business for admission and program requirements.

Bachelor of Commerce (Honours Business Administration) (with/without thesis; with/without Co-op; and with any specialization) for students from the Global Institute of Management and Economics (GIME) of Dongbei University of Finance and Economics

See the Odette School of Business for admission and program requirements.

General Political Science for Hebei Law and Politics College Graduates

See the Department of Political Science for admission and program requirements.

Honours Political Science for Hebei Law and Politics College Graduates

See the Department of Political Science for admission and program requirements.

HONG KONG

Hong Kong Baptist University (HKBU)

Students who have completed the two-year Associate Degree program of the College of International Education at HKBU with a cumulative average grade of B and who are otherwise admissible to the University of Windsor, including meeting the University of Windsor's English competency requirements, will receive University of Windsor credits, up to a total of twenty (20) semester courses, provided they passed the respective college courses with a grade of C- or better. Students will not be restricted to enrolling in a specific program but must present the necessary prerequisites for entry into the program of their choice.

MALAYSIA

Kolej Damansara Utama (KDU) College

Students who have completed a minimum of 60 approved credit hours in either the Arts or Science stream of the School of American University Studies program at any campus of KDU (Malaysia) with a cumulative average grade of B and who are otherwise admissible to the University of Windsor, including meeting the University of Windsor's English competency requirements, will receive University of Windsor credits, up to a total of twenty semester courses, provided they passed the respective college courses with a grade of C- or better. Students will not be restricted to enrolling in a specific program but must present the necessary prerequisites for entry into the program of their choice.

Taylor's College

A student who completes the American Degree Program at Taylor's College with a GPA of 2.7 (B-) or higher will be accepted by the University of Windsor with advanced standing in up to 20 semester courses in an appropriate Bachelor's degree program. Excluded from this agreement is any provision for transfer from the Engineering Stream in the American Degree Program to the Bachelor of Applied Science degree at the University of Windsor.

SINGAPORE

Overseas Family College

Students who have completed the two-year Diploma program at Overseas Family College with a cumulative average grade of B and who are otherwise admissible to the University of Windsor, including meeting English competency requirements, will receive University of Windsor credits, up to a total of twenty, provided they passed the respective college courses with a grade of C- or better. Students will not be restricted to enrolling in a specific program. The course credits received will be applicable to any Bachelor's program providing the degree requirements of that program allow it. Students will have to meet all regular requirements for the major of their choice.

UNITED STATES

Broward Community College

Students who have completed a minimum of 60 credit hours in either the Arts or Science streams of the Centre for American Education (CAE) program with a cumulative average grade of B and who are otherwise admissible to the University of Windsor, including meeting the University of Windsor's English competency requirements, will receive University of Windsor credits, up to a total of twenty semester courses, provided they passed the respective college courses with a grade of C- or better. Students will

not be restricted to enrolling in a specific program but must present the necessary prerequisites for entry into the program of their choice.

Owens College

A student who completes an associate degree at Owens Community College with a grade point average of 2.7 or higher will be accepted by the University of Windsor with advanced standing in up to 20 semester courses in a Bachelor's degree program.

STUDENT EXCHANGE PROGRAMS

The University of Windsor is a party to a number of multilateral and bilateral agreements with universities in other countries, which permit University of Windsor students to attend other institutions for periods up to one academic year as part of their degree program at Windsor. Courses taken while participating under one of these agreements are treated as if they were taken at the University of Windsor, and do not require a Letter of Permission.

Many agreements are open as to field of study, while others are intended for students in specific disciplines. In some (but not all) cases proficiency in a second language is required for participation. Other conditions of eligibility also vary from program to program.

For information on current exchange partner school and application process, contact the Student Exchange Office or visit their webpage at <http://www.uwindsor.ca/studentexchange>.

ACADEMIC REGULATIONS

Students are responsible for becoming familiar and complying with the general regulations of the University as contained in this section. Additionally, students must be familiar and comply with the regulations of the faculty in which they are enrolled. These particular requirements may be found in the program sections of this calendar.

Students also are directed to read the Statement of Responsibility, and the calendar of important dates and deadlines under posted on the Office of the Registrar under "Important Dates".

The following policies can be found online on the Central Policies website at: www.uwindsor.ca/policies

- **Advanced Standing and Credit Transfer** (advanced standing and transfer credits reduce the total number of courses a student must complete for a degree)
- **Certificate Programs**
- **Course Equivalency Policy** (permission to substitute one course for another)
- **Course Numbering Policy**
- **Course Overload Policy** (course taken in addition to the prescribed semester or term load)
- **Introductory Statistics Courses**
- **Letters of Permission** (permission to take courses at another university for credit towards their UWindsor degree)
- **Policy on Minors** (provides a general knowledge of an area of study)
- **Residency Requirements** (the number of courses that must be completed at the University of Windsor)
- **Repetition of Courses**
- **Senior-level Course Requirements** (minimum number of courses to be completed at the 2000-level or above)
- **Standing Required for Continuation in Programs and for Graduation** (minimum major and cumulative averages required to continue in a program of study and to graduate)

ACADEMIC ADVISING

The responsibility for becoming familiar and complying with the requirements for degrees and with academic regulations rests primarily with the student. Every student can access a "Degree Audit Report" on the Student Self Service page at <http://www.uwindsor.ca/current-students> which reports a student's progress towards fulfilling degree requirements. In addition, academic advising is strongly recommended for all students. Academic units provide individual assistance to students both in the selection of their programs of studies and in the choice of courses in keeping with program requirements. General questions normally should be addressed to the Associate Dean of the Faculty.

Students are strongly urged to seek course and program advising to ensure that they understand degree requirements. It is recognized that many students may not have decided on their major areas or on their final career goals prior to entering University. Consequently, it is not unusual for students to change their

programs of study after taking several courses. Every effort is made to assist such students, within the limits of the requirements of the various programs.

Students who are considering program changes may request assistance from advisors within their proposed area of study. Application forms for a change of program are available on the web on the Student Self Service page.

Students are required to have declared a major by the time they have successfully completed ten semester courses.

CLASSIFICATION OF STUDENTS

A full-time student is one who is registered in four or more undergraduate courses in a term.

A part-time student is one who is registered in fewer than four undergraduate courses in a term.

A regular student is one who has met the average requirements for admission or the minimum average requirements for continuation in his or her program of studies.

A conditioned student is one who, at the time of admission, does not have standing in a required subject or subjects.

A visiting student is one who registers and takes courses for credit for the purpose of transferring the credit to the university at which he or she was previously registered. Normally, visiting students are advised to have written permission from the home university in order to register for courses.

A special or non-degree student is one who is taking courses for credit but not proceeding to a degree at this University.

An audit student is one who attends (a) course(s) but does not receive any grade(s) or credit for the course(s) towards a degree. Such a student will not be allowed to write examinations and may not be graded in any way, but will be required to pay the regular fees for the course(s).

A student on academic probation is one who has not met the full admission requirements to a program or a student who, once admitted, has shown unsatisfactory progress at the conclusion of the previous term. (See the regulations pertaining to each Faculty.)

Academic probation is removed if a student demonstrates satisfactory progress by the end of the probationary period. Normally, a student will be required to withdraw from a faculty if performance is not satisfactory at the conclusion of the academic probationary period.

For regulations pertaining to the possible readmission of students who have been required to withdraw, see the regulations pertaining to each Faculty.

COMBINED MAJOR

Students wishing to combine two areas of study from the Arts, Languages, Social Sciences, or Science within a single four-year Honours B.A. or B.Sc. program may do so if the areas of study concerned have provided for this possibility in their respective sections of the Calendar. Such programs require a total of forty courses including the successful completion of degree requirements as defined by each area of

study in the appropriate section of the calendar. The area of study selected as the first major will determine the degree awarded. (e.g., BA in English and Chemistry, or BSc in Chemistry and English).

COURSE CONTENT

Information regarding the content and the hours of instruction per week for all courses is to be found in the individual subject area listings. The time schedule for classes can be obtained online at the Office of the Registrar at www.uwindsor.ca/registrar. The University does not attempt to impose uniformity in methods of course presentation. Therefore, methods of course presentation vary and may involve lectures, lectures combined with class discussion, small group or tutorial instruction, seminars, or other combinations of the above. In all cases, the method(s) to be used will be explained early in the course.

COURSE NUMBERING FRAMEWORK

Each course is identified by a subject code and a number code. The subject code consists of 4 alpha characters that identify the discipline. The number code consists of 4 numeric characters with the first digit designating the year/level of study. The series 1000, 2000, 3000, and 4000 numbers are intended to indicate progressively more demanding content and correspondingly increasing background and competence on the part of the students enrolled in the course. Numbers in the range 1000-1999 are ordinarily used for the introductory courses in most disciplines. Within the range, however, a lower number does not necessarily signify more elementary content. It is important that students planning their courses have clearly in mind the significance of these numbers so that they may guard against undertaking course work at levels for which they are insufficiently prepared. A number of courses have stated prerequisites which are prior requirements for entry to a course. Students who do not satisfy the prerequisite for a course, or who in the opinion of the instructor do not possess an equivalent background to that of the stated prerequisite, may not register for the course, and may be removed if they register inappropriately.

DEFINITION OF COURSES AND SESSIONS

The word "course" generally refers to a 3.00 credit hour offering which is given over one term. Each term includes approximately twelve weeks of classes. During each regular academic year (September to April), the Fall term runs from early September to early December and the Winter term runs from early January to mid-April. Each term concludes with final examinations. Additionally, the University schedules courses in a Summer term which includes Intersession (May - June) and Summer Session (July - August), each of which are approximately six weeks in duration. Courses given in these sessions carry the same credit as those in the Fall and Winter terms. Some courses offered in the Summer Term run from May - August (12 weeks).

In some areas, courses also may be offered for 1.50 credit hours, or for 6.00 credit hours. Courses of any credit hour value may be offered over multiple terms or over a part of a term.

In a few cases a course may be "linked" with another course in the sense that credit is granted only when both courses have been completed successfully. Course descriptions indicate "linked" courses. Unless otherwise indicated, such courses must be taken in successive terms.

The time required to complete programs can vary according to the student's choice. If courses are taken exclusively in the Fall and Winter terms, a general degree normally is completed in three years and a four-year Honours, Major or professional degree in four years of full-time study. Students may choose to

accelerate their programs by attending Summer term, Intersession and/or Summer Session, or may spread their programs over a longer period by attending as part-time students. Some programs place a time limit on degree completion. Refer to individual Faculty and program regulations for such limits.

CATEGORIES OF COURSES

For the purpose of meeting degree requirements, the University categorizes its courses as follows:

ARTS/HUMANITIES

(All Language courses can count for credit as Arts/Humanities courses)

Anthrozoology (ANZO)
Art History (MACS)
Greek and Roman Studies (GRST, GRHS, GREK)
Dramatic Art (DRAM)
English and Creative Writing (ENGL)
Film Studies (FILM)
General Courses, Faculty of Arts, Humanities and Social Sciences (GART)
Intercultural Studies (INCS)
Music-Academic Studies (MUSC)
Music-Performance Studies (MUSP)
Philosophy (PHIL)
Visual Arts (VSAR, CNMA)
Women's and Gender Studies* (WGST)

*The following Women's and Gender Studies courses may be taken for Arts credit: WGST-1200, WGST-1300, WGST-2360, WGST-2700, WGST-3590, and WGST-3850.

LANGUAGES (HUMANITIES)

Arabic (ARAB)
French (FREN)
German (GRMN)
Ancient Greek (GREK)
Italian (ITLN)
Latin (LATN)
Spanish (SPAN)
Hebrew (JWST)

Note: Courses in all languages listed above that may be used to satisfy language requirements include: XXXX-1000, XXXX-1010, XXXX-1020, XXXX-2000, XXXX-2010, XXXX-2020, XXXX-3000, XXXX-3010. All French Studies courses count as language requirements. ARAB-1100 and ARAB-1110 also count as language requirements. All other courses in any language listed above count only as Arts courses.

SOCIAL SCIENCES/HUMANITIES

Anthropology (SACR)
Anthrozoology (ANZO)
Communication, Media and Film (CMAF, CNMA)
Diaspora Studies (DIAS)
Disability Studies (DISB)
Economics (ECON)*

General Courses, Faculty of Arts, Humanities and Social Sciences (SOSC)**

Human Geography (HUGR)

History (HIST)

Interdisciplinary Arts and Science courses (ARSC)

Labour Studies (WORK)

Political Science (POLS)

Psychology (PSYC)

Social Justice (SJST)

Social Work (SWRK)

Sociology (SACR)

Women's and Gender Studies (WGST)***

Work and Employment Issues (WORK)

*All Economics courses will be permitted to satisfy either Science or Social Science requirements.

**The following courses may be taken for Social Science credit: ESTU-1100, and ESTU-2100.

***WGST-1200, WGST-1300, WGST-2360, WGST-2700, WGST-3590, and WGST-3850 can satisfy either a Social Science or an Arts requirement.

SCIENCE

Biology (BIOL)

Biochemistry (BIOC)

Chemistry (CHEM)

Computer Science (COMP)

Economics (ECON)*

School of the Environment (ESCI, ESTU)

Forensic Sciences (FRSC)

General Courses, Faculty of Science (SCIE)

Mathematics (MATH)

Physics (PHYS)

Statistics (STAT)

Women's and Gender Studies (WGST)**

*All Economics courses will be permitted to satisfy either Science or Social Science requirements.

**Women's and Gender Studies WGST-2500 will satisfy either a Social Science or a Science requirement.

Note: For students in the Faculty of Arts, Humanities and Social Sciences the following Nursing courses will satisfy a Science requirement: NURS-4951 and NURS-3910.

PROFESSIONAL

Business Administration (BUSR, ACCT, MGMT, FINA, MSCI, MKTG, STEN)

Education (EDUC)

Engineering (GENG, MECH, INDE, MATL, CIVL, ENVE, ELEC)

Kinesiology (KINE)

Law (LAWG, LAWS, LAWD)

Nursing (NURS)

TRANSFERRING TO ANOTHER PROGRAM

A student who wishes to transfer to a new program may apply on the UWinsite Student at <http://www.uwindsor.ca/registrar/uwinsite-student>. All program transfers and conditions for transfer are subject to the approval of the Dean in accordance with regulations established by the Faculty into which the student wishes to transfer.

- 1) Normally a student who has a cumulative average of 60% or greater in the previous program, and who meets the admission requirements of the intended program will be permitted to transfer. Transfer credit will be assessed and awarded in accordance with the Senate Policy on Advanced Standing and Credit Transfer.
- 2) If a student has been required to withdraw from a program, the student normally will be considered for admission to the new intended program on the same basis as students who have been required to withdraw from the program.
- 3) All courses that are transferable, whether passed or failed, will be considered in calculating both the cumulative and major averages (where appropriate) in the new program.
- 4) Applications for transfer to Business are subject to the following deadlines:
June 15th for Fall semesters
October 15th for Winter semesters
February 15th for Inter/Summer semesters

Transfer is based on academic achievement and the availability of space, and a minimum 67% cumulative average is required in order to be considered for a transfer to Business.

EXAMINATIONS, GRADING, AND GRADUATION

EXAMINATION PROCEDURES

Students should become familiar with the following bylaws and policies governing examinations and evaluations, which can be found online on the Central Policies website at: www.uwindsor.ca/policies:

- **Senate Bylaw 54: Undergraduate Academic Evaluation Procedures**
- **Senate Policy on Conduct of Exams and Tests**

Students with three invigilated final examinations scheduled on the same calendar day or in 24 hours may petition to have one of the examinations rescheduled by completing the appropriate request form available at the Office of the Registrar at <http://www.uwindsor.ca/registrar/>. The application must be submitted to the Office of the Registrar by the end of the fourth week of classes (or by the end of the second week of classes for six-week courses). See also Senate Bylaw 54.

GRADING AND CALCULATION OF AVERAGES

See **Senate Policy on Grading and Calculation of Averages**, which can be found online on the Central Policies website at: www.uwindsor.ca/policies.

OFF-CAMPUS EXAMINATIONS

A student with a cogent reason may be granted permission to write an examination at an off-campus centre. Application forms are available in the Registrar's Office. To allow sufficient time for arrangements and mailing, approved applications must be submitted, along with the appropriate fee, to the Registrar's Office at least one month prior to the date on which the examination is to be written.

GRADE APPEALS

Before exercising their right of appeal against a grade, students should consult **Senate Bylaw 54, Undergraduate Academic Evaluation Procedures**, which can be found online on the Central Policies website at: www.uwindsor.ca/policies. Students registered in the JD program should also consult the Academic Status regulations of the Faculty of Law.

All formal undergraduate grade appeals for incorrect evaluation or procedural irregularity must be made through UWinsite Student no later than three weeks after the final mark has been released by the Registrar. The official release dates are posted on the web. The appeal must be accompanied by a \$20 appeal fee which will be refunded to the student if the appeal is successful. Students must include the rationale for the appeal, including relevant supporting documents. Students who wish to receive consideration based on medical/compassionate reasons (health, bereavement or extenuating circumstances) also must file their requests through UWinsite Student and must include a rationale and

relevant supporting documentation. (If approved, accommodation may consist of aegrotat standing or other accommodation or alternate evaluation, etc.) See **Senate Bylaw 54, Undergraduate Academic Evaluation Procedures** at www.uwindsor.ca/policies.

HONOUR ROLLS

The new regulations related to 100% averaging and the new grading scale, for the President's and the Dean's Honour Rolls, are not retroactive to terms prior to Fall 2013.

President's Honour Roll Criteria

Eligibility: students in first-entry undergraduate programs

1. a minimum of ten courses must be completed;
2. designation is granted, as applicable, upon completion of the initial 10 courses and at the end of each semester of full-time or part-time studies thereafter;
3. cumulative average of 90% or higher;
4. notation is recorded on the transcript at the end of each semester.

Dean's Honour Roll

The following list the criteria for Dean's Honour Roll in each Faculty. Students who have met the criteria for Dean's Honour Roll in their Faculty will have a notation included on their transcript to this effect.

Faculty of Arts, Humanities and Social Science

1. Full-time student status in both the Fall and Winter terms.
2. Completed at least 10 or more courses with a major from the Faculty of Arts, Humanities, and Social Sciences at the University of Windsor.
3. Must have obtained a cumulative average of at least 80% by the end of the academic year, reviewed at the end of the Winter term annually.
4. Must have obtained a term average of at least 80% in both the Fall and Winter terms of the academic year reviewed.
5. Must have enrolled in courses with a major from the Faculty of Arts, Humanities, and Social Sciences at the University of Windsor in at least one term during the academic year (i.e. Summer, Fall, Winter).

Faculty of Business Administration

1. Students must have been enrolled in a business program on a full-time basis (i.e., four courses or greater) during at least two of the three semesters during the academic year. (i.e. Summer/Fall, Summer/Winter, or Fall/Winter). One exception applies: Co-op students may have two "working" semesters during an academic year. In this case, full-time enrolled status is required during the "study" semester.
2. Students must obtain an annual cumulative average and program major annual average of 80% or greater at the end of the academic year (i.e., the end of the Winter semester).

Faculty of Education

No Dean's Honour Roll.

Faculty of Engineering

For a student to be considered for the Engineering Dean's Honour Roll, she/he must be enrolled in an Engineering program, and must normally have:

1. Student has successfully completed at least five courses in the current semester
2. Student has attained an 80% average in the current semester
3. Student is in overall good standing

Faculty of Human Kinetics

To be eligible:

1. A student must be enrolled in 5 courses in a semester.
2. A student must have an semester average of 80% or above on 5 or more courses.

The Human Kinetics Dean's Honour Roll designation is awarded on a semester basis.

Faculty of Law

No Dean's Honour Roll.

Faculty of Nursing

1. Students will be eligible for the Dean's Honour Roll once they have completed 10 courses while enrolled in the Nursing program and are in good standing at the University of Windsor.
2. Having met the 10-course criteria, membership on the Dean's Honour Roll will be based on level of demonstrated achievement, i.e., average, in subsequent semesters.
3. The student must be enrolled full-time in the semester for which the average is calculated.
4. The student must have achieved a semester average of 80% as recorded on the transcript.

Faculty of Science

1. At least 10 courses completed at the University of Windsor.
2. Full time status in the Fall and Winter semesters.
3. Cumulative average of 80% in the most recent Winter term.
4. Major average of 80% on the transcript of the most recent Winter term. For General Science students replace the major average with the average of all science courses, excluding science courses that cannot be used to satisfy a BSc degree.
5. Registered in a Co-op term in Winter with grades in Fall at required levels.

BOARD OF GOVERNORS MEDALS

Board of Governors Graduation Medals

One medal is allocated to each AAU to be awarded to the students with the highest academic standing as defined in the criteria set out below. One medal is allocated to the General Arts programs, one to the General Social Sciences programs, and one to the General Science program to be awarded to the students with highest academic standing in each of these three general program areas as defined in the criteria set out below. Additional medals could be awarded at the discretion of the Dean, in consultation with the Provost.

Medalists are judged on their total academic performance at the University of Windsor. Students must have completed at least twenty semester courses or equivalent required in their program at the University of Windsor (with the exception of the Faculty of Education). Students will be ranked by major average, and must achieve at least an 83% cumulative average and major average. Both full-time and part-time students are eligible for consideration. Graduates from the previous Fall Convocation will be considered for medals issued at the following Spring Convocation. For programs where no major average is calculated (such as General programs), students will be ranked by cumulative average, and must achieve a cumulative average of at least 83%.

Board of Governors In-Course Medals

These medals are awarded annually, at the end of the Winter term, to the undergraduate student in each Faculty who had the highest cumulative average of all non-graduating students in that Faculty. A minimum cumulative average of 78.5% is required. The student must have completed the equivalent of at least ten courses at the University and must be registered full-time in an honours degree program.

GRADUATING "WITH DISTINCTION"/"WITH GREAT DISTINCTION"

Students in first-entry degree programs or certificate programs who graduate with a cumulative average from 80% to 89.9% will receive their degree or certificate "With Distinction". Students in first-entry degree programs or certificate programs who graduate with a cumulative average from 90% and above will receive their degree or certificate "With Great Distinction".

APPLICATION FOR GRADUATION

Registration in any program does not constitute an application for a degree, certificate, or diploma. An official application for graduation must be filled out regardless of if you are planning on attending/not attending the graduation ceremony. (Log into UWinsite Student at <http://www.uwindsor.ca/registrar/uwinsite-student>)

The deadline date to submit an application to graduate is March 1 for Spring Convocation and August 1 for Fall Convocation. In cases where credit is sought for work done elsewhere, all official transcripts or other documents as required by the Registrar's Office, but not already submitted, must be conveyed to the Registrar's Office no later than six weeks before Convocation. Failure to comply with these regulations will disqualify the student from graduation at the Convocation concerned (see the **Policy on Standing Required for Continuation in Programs and for Graduation** which can be found on the Central Policies website at: www.uwindsor.ca/policies).

INTERDISCIPLINARY HEALTH SCIENCE

Students with education and training in the health sciences are well-prepared for a plethora of careers ranging from health promotion specialists, data analysts, health policy analysts, and health care administrators, and are well-positioned for professional degrees and graduate programs. Interdisciplinary Health Sciences (IHS) Stream that will support the need for trained individuals with knowledge of health, wellness, and illness from multiple perspectives (e.g., biological, behavioural, social, environmental).

The following are the core courses available for the Stream:

IHSC-1000. Foundations in Interdisciplinary Health Sciences

IHSC-3000. Health Promotion and Translation

IHCS-4000. Capstone Project

Concentrations:

The concentrations have been developed by the contributing departments and include courses that they view as being directly or indirectly relevant to some aspect of the health sciences. As noted, the 'core' of the IHS program will ensure that the topics explored through the concentrations are related back to modern healthcare and the student's health-related major. In this respect, the 'core' courses are key to meeting the learning outcomes for each concentration.

Healthcare Economics (Pick 8 courses)

ECON-1100. Introduction to Economics I

ECON-1110. Introduction to Economics II

ECON-2120. Intermediate Statistical Methods

ECON-2210. Intermediate Microeconomics

ECON-2900. Health Economics

ECON-4300. Economic Analysis of Law

ECON-4600. Cost-benefit analysis

STAT-2910. Statistics for the Sciences

Aging and Health (Pick 8 courses)

GART-2040. Health-Care Ethics through the Lifespan

NURS-4951. The Meaning of Death

PHIL-2250. Ethics of Life, Death and Health Care

PHIL-2520. Existentialism

PSYC-1150. Introduction to Psychology as a Behavioural Science

PSYC-1160. Introduction to Psychology as a Social Science

PSYC-2250. Developmental Psychology: Adulthood and Aging

PSYC-2360. Introduction to Social Psychology

PSYC-3390. Health Psychology

SACR-3150. On Death and Dying

SWRK-3560. Serving Older People

Health and Society (Pick 8 courses)

GART-1210. An Introduction into Indigenous Topics
GART-2040. Health-Care Ethics through the Lifespan
POLS/SOSC-3300. Psychoactive Substance Use and Social Policy
SOSC/WORK/WGST-4601. Seminar on Prostitution, Sexual Labour and Health
SACR-1100. Foundations of Social Life
SACR-2040. Sociology of Families
SACR-2050. Sociology of Sexualities
SACR-3150. On Death and Dying
SACR-3400. Food and Global Sustainability
SACR-3650. Green Criminology
SWRK-1170. Meeting Human Needs through Social Welfare
WGST-1000. Women in Canadian Society
WGST-2500. Women's Bodies, Women's Health
WGST-2800. Boys to Men: A critical exploration
WGST-3470. Social Work and Violence
WGST-2100. Gender, Sexuality and Social Justice
WGST-2200. Women, Race and Social Justice
WGST-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
WGST-4500. Practicum in Social Change

Indigenous Health (Pick 8 courses)

GART-1210. An Introduction into Indigenous Topics
ENGL-2320. Indigenous Literature
HIST-2460. Aboriginal Peoples in Canadian History: Beginnings to Mid-Nineteenth Century
HIST-2470. Aboriginal Peoples in Canadian History: Mid-Nineteenth Century to Present
ENGL-3330. Indigenous Literature of Turtle Island
PHIL-2300. Indigenous Philosophy of the Americas
PHIL-4260. Philosophy of Law
ESTU-1100. Humans and the Environment - An Introduction to Environmental Studies
POLS-2000. Indigenous Policy and Constitutional Relationships
POLS-3000. Indigenous Policy and Constitutional Relationships
POLS-4000. Indigenous Nation-Building: Traditional Governance

Healthy Spaces and Places (Pick 8 courses)

ESCI-1151. Fundamentals of GIS
MACS-2500. Stories of the City
VABE-1100. Architectural Design I
VABE-1200. Architectural Design II
VABE-2130. Principles of Structural Behaviour
VABE-4600. Space in Acoustics and Light
MACS-4520. Urban Ecologies
MACS-4500. Border Culture
MACS-2200. The Planned City as a Work of Art
VSAR-3850. Green Corridor
MACS-1500. Contemporary Visual Culture
MACS-2050. Art and Material Culture
MACS-2150. Art and Visual Culture

Medical Humanities (Pick 8 courses)

CMAF-1010. Introduction to Media and Society
DRAM-2100. Speech Communication to Inform
ENGL-2401. Rhetoric
GART-1210. An Introduction into Indigenous Topics
GART-2040. Health-Care Ethics through the Lifespan
HIST-2500. Women in Canada and the United States, 1870-present
HIST-4030. Medicine, Healing and the Health Profession
MACS-2500. Stories of the City
PHIL-2550. Knowledge, Science and Society
PHIL-3590. Women, Knowledge & Reality
PSYC-1150. Introduction to Psychology as a Behavioural Science
PSYC-1160. Introduction to Psychology as a Social Science
PSYC-2400. Psychology of Sex and Gender
ENGL-2310. World Literatures in English
ENGL-2320. Indigenous Literature
ENGL-2330. Gender and Literature

One Health

BIOL-2101. Ecology
BIOL 2070. Introductory Microbiology or BIOL-2071. Introductory Microbiology and Techniques

Three (3) of:

BIOL-2040. Human Physiology I
BIOL-2080. Economic Botany
BIOL-2480. Principles of Neuroscience
BIOL-3212. Environmental Physiology
BIOL-3201. Applied Entomology
BIOL-3250. Population and Community ecology
BIOL-4252. Evolutionary Endocrinology
BIOL-4270. Conservation Biology)
BIOM-3070. Medical microbiology or BIOM-3071. Medical Micro and Techniques
BIOM-3540. Immunology
BIOM-3550. Embryology

Two (2) of:

ESCI-1100. Environmental systems – an Introduction to Environmental Science
ESCI-1111. Introduction to Earth Science
ESCI-1130. Atmosphere and Climate
ESCI-2210. Introduction to Climate Change
ESCI-3310. Global water Crisis
ESCI-4500. Ecosystem Health

One (1) of:

GART-1210. An introduction into Indigenous topics
SACR-2270. Globalization, Development and Social Change
ESTU-1100. Humans and the Environment - An Introduction to Environmental Studies
ESTU-2500. Concepts for Ecosystem Management
GART-2040. Health-Care Ethics through the Life-Span
PHIL-2270. Environmental Ethics
PHIL-2280. Technology, Human Values and the Environment
PHIL-2300. Indigenous Philosophy of the Americas

Biostatistics (Pick 8 courses)

MATH 1720/1760. Differential Calculus

MATH1250/1260. Linear Algebra

Math 1730. Integral Calculus

STAT-2920. Introduction to Probability

STAT-2950. Introduction to Statistics

STAT-3920. Probability

STAT-3950. Statistics

STAT-4xxx. Any other statistics

STAT-4550. Regression Analysis

STAT-4700. Biostatistics

INTERDISCIPLINARY HEALTH SCIENCE COURSES

IHSC-1000. Foundations in Interdisciplinary Health Sciences

This course will introduce students to the interdisciplinary field of health sciences, including definitions of health, wellness, and illness from multiple perspectives (e.g., biological, behavioural, social, environmental). Students will be exposed to various areas of specialization including: healthcare economics, healthcare informatics, health and aging, health and society, Indigenous health, healthy spaces and places, medical humanities, environmental health, and one health. Current health science issues within the community and media will be presented. (This course is restricted to students enrolled in an Interdisciplinary Health Sciences Stream.)

IHSC-3000. Health Promotion and Translation

This course will introduce students to health promotion and knowledge translation activities. In particular, students will gain skills in the analysis, synthesis, evaluation, and dissemination of evidence-informed research to diverse audiences as well as understand the role of education programs to health, wellness, and illness from multiple perspectives (e.g., biological, behavioural, social, environmental). (This course is restricted to students enrolled in an Interdisciplinary Health Sciences Stream.) (Prerequisites: IHSC-1000.)

IHSC-4000. Capstone Project

In this course students will work in interdisciplinary groups to develop a comprehensive and interdisciplinary solution to a grand challenge in health. This will include developing a plan, conducting research on this issue, and disseminating the findings and recommendations for solving this problem. Findings and recommendations will be presented at an annual colloquium. (This course is restricted to students enrolled in an Interdisciplinary Health Sciences Stream.) (Prerequisites: IHSC-1000, IHSC-3000). (This is an experiential learning course).

FACULTY OF ARTS, HUMANITIES AND SOCIAL SCIENCES (FAHSS)

GENERAL INFORMATION ABOUT HONOURS AND GENERAL PROGRAMS

Bachelor of Arts - Four-Year Honours Programs

Four-year Honours programs require the completion of a larger number of courses with greater concentration in a specific subject area than do three-year General programs. Total Courses: A student will qualify for the Honours BA degree normally by successfully completing forty courses, in accordance with degree requirements and program regulations.

Bachelor of Arts - Three-Year General Programs

Three-year General programs provide a moderate concentration in a specific subject, as well as a broad educational background. Students in these programs are encouraged to extend their studies over a wide range of subjects. Students are also encouraged to take courses which specifically address diversities of human experience, including culture, ethnicity, gender, or sexual orientation. Total courses: A student will qualify for the General BA. degree normally by successfully completing thirty courses with standing as specified in undergraduate regulations.

Co-operative Education Program Regulations

The co-op programs within the Faculty of Arts, Humanities and Social Sciences (FAHSS) integrate 3 four-month, paid, full-time, career related work terms. By combining semesters of study with career-related positions, students acquire valuable professional experience in the workplace.

The Co-op Program is not available for transfer students, combined honours, concurrent, general or thesis programs.

Students can apply for the Co-op Program either directly out of grade 12 (or equivalent) year, or in the winter term of their first year of study in the program.

Admission to the program is competitive. Students applying directly out of grade 12 (or equivalent) year will be admitted based on academic achievement (typically, a minimum 80% cumulative entry average and a 70% in ENG4U is required). First year, term two students must be in good academic standing and complete an application form with the Co-operative Education and Workplace Partnerships office.

Post-admission, co-op stream students must meet the program minimum continuation requirements of remaining in good standing (60% cumulative average and 60% major average).

Once students have accepted an offer of employment for a work term, they must remain in the co-op program until they have completed their work term requirements. Failure to complete the work term and/or work term requirements (as per the work term course outline) will result in a non-pass grade for that work term course, and they will be required to withdraw from the co-op stream. The co-op fee for the work term is non-refundable.

The deadline to withdraw from the co-op program and receive a fee refund for the current study term is the 1st Friday of classes. Students in the winter of first year have an extended withdrawal deadline date provided by Co-operative Education and Workplace Partnerships. Students that choose to withdraw from the co-op program, cannot re-join the co-op program at a future date.

All co-op positions must be full-time, paid, related to the degree program, and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Co-operative Education and Workplace Partnerships office using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek co-op employment outside of the advertised postings by completing a guided job search process in partnership with their coordinator at Cooperative Education and Workplace Partnerships.

Students must successfully complete 3 work terms to be eligible for the co-op designation. Students that are not able to secure a work term placement for any of the three work terms will continue in the non-coop stream. Although we strive to provide co-op opportunities to all our students, placements are not guaranteed as students must be selected for employment by the employer.

Co-op students must remain full-time students and must follow a standardized work/study sequence schedule. Faculty advisors can assist with course scheduling. Work/study sequence changes are not permitted.

Year of Study	Fall Term	Winter Term	Summer Term
Year 1	Study term 1	Study term 2	Study term 3
Year 2	Work term 1	Study term 4	Work term 2
Year 3	Study term 5	Study term 6	Work term 3
Year 4	Study term 7	Study term 8	

PROGRAMS ADMINISTERED BY THE OFFICE OF THE DEAN OF FAHSS

Minor in Anthrozoology

Total Courses: 6 courses

- a) ANZO-1600.
- b) five of: ANZO-2000, ANZO-2600, ANZO-2610, ANZO-3100, ANZO-3600, PHIL-3290, SACR-3410, VSAR-3860

Bachelor of Interdisciplinary Arts and Science (IAS) Minor Concentration in Anthrozoology

Total Courses: 6 courses

- a) ANZO-1600. Animals and Humans in Society
- b) five of: ANZO-2600, ANZO-2610, ANZO-3600, PHIL-3290, SACR-3410, ANZO-2000

Minor in Indigenous Studies

Total Courses: 6 courses

- a) GART/SOSC-1210. An Introduction into Indigenous Topics
- b) two Social Sciences courses: HIST-2460, HIST-2470, POLS-2000, POLS-3000, POLS-4000
- c) three Arts and Humanities courses from: ENGL-2320, ENGL-3330*, PHIL-2300, PHIL-4260

**May be repeated for credit if the topics are different.*

Minor in Popular Culture

Total Courses: 6 courses

- a) two Arts/Humanities from: PHIL-1300, GART-2990, CMAF-3020, HIST-3680;
- b) two Social Sciences from: WGST-1300, SOSC-2990, POLS-3790, SACR-3740;
- c) two from: POLS-2550, WGST-2800, SACR-3560, WGST-3850, HIST-4660

Honours Bachelor of Interdisciplinary Arts and Science (IAS)

The Bachelor of Interdisciplinary Arts and Science program provides substantial education in the disciplines of both arts and sciences, and it puts an emphasis on critical thinking and argument. Throughout, students will take course designed to foster the skills of inquiry and, in the third and fourth years, they will take courses in the methods of inquiry and applied inquiry. In addition to developing students' research skills and involving them with topics of public concern, these courses develop their abilities and confidence as writers and speakers.

Degree Requirements

Total courses: forty.

- (a) ARSC-1000, PHIL-2210, MATH-1720 (or MATH-1760) and MATH-1730 if major or minor concentration is Math, Physics or Biochemistry.), STAT-2910 or SOSC-2500 (Science majors must take STAT-2910), ARSC-3010, ARSC-3100, ARSC-4100, ARSC-4990, ARSC-4210 (ARSC-4990 may be replaced by any 6 credit fourth year Honours Thesis/Research courses, subject to enrolment restrictions).
- (b) One course from GRST-1100, HIST-1130, HIST-1140, PHIL-1100, POLS-2510, POLS-2520, INCS-2020, INCS-2030, INCS-2200.
- (c) Four courses (any two of the following pairs): ECON-1100 and ECON-1110, BIOL-1111 and BIOL-1101, CHEM-1100 and CHEM-1110, COMP-1400 and COMP-1410, ESCI-1111 and ESCI-1100, MATH-1720 and MATH-1730, PHYS-1400 and PHYS-1410, PHYS-1300 and PHYS-1310.

- (d) Major Concentration (12): maximum of two 1000-level courses in the major subject, and at least four 3000-level or 4000-level courses in the major subject.
- (e) Minor Concentration (6): maximum of two 1000-level courses in the minor subject; at least one 3000-level or 4000-level course in the minor subject.
- (f) Any remaining courses to bring the total course number to 40 may be from any area of study.
- (g) At least 15 courses must be taken in each of the Faculty of Arts, Humanities and Social Sciences and the Faculty of Science.
- (h) To continue in the program, and to receive the Honours IAS degree, students must maintain an Honours 70% cumulative average and major average.

When a requirement in the Major or Minor Concentration is taken as part of the core IAS program course requirements, another course must be selected from within the area of concentration and substituted with the approval of the Dean of Faculty of Arts, Humanities and Social Sciences. Similarly, when a requirement in the Major Concentration is taken as part of the course requirements in the Minor Concentration, another course must be selected from within the area of Major Concentration and substituted with the approval of the Dean of Faculty of Arts, Humanities, and Social Sciences.

IAS students who have successfully completed a fourth year thesis/research project, in lieu of ARSC-4990, will have the “with thesis” designation added to their transcript and diploma.

Courses used to calculate the major average are: courses listed under (d) and numbered ARSC-XXXX.

Program Sequencing:

Students must select a Major and a Minor Concentration at the start of Year 2. Consultation is available from the Director of the program. The selection of electives in Years 2, 3 and 4 must satisfy the requirements for the Major and the Minor concentrations, and the general program requirement that students must complete at least 15 courses in each of the two Faculties.

Year 1: ARSC-1000, MATH-1720 (or MATH-1760) (and MATH-1730 if requirement for major or minor concentration), one of GRST-1100, HIST-1130, HIST-1140, PHIL-1100, POLS-2510, POLS-2520, INCS-2030, INCS-2200, two courses selected as needed to satisfy major or minor requirements in Arts, Humanities, and Social Science, four courses consisting of any two of the following pairs: BIOL-1111 and BIOL-1101, MATH-1720 and MATH-1730, CHEM-1100 and CHEM-1110, COMP-1400 and COMP-1410, ESCI-1111 and ESCI-1100, MATH-1720 and MATH-1730, PHYS-1300 and PHYS-1310, PHYS-1400 and PHYS-1410, ECON-1100 and ECON-1110.

Year 2: STAT-2910 or SOSC-2500; plus any nine additional courses, at least 2 from each of the Faculty of Arts, Humanities, and Social Sciences and the Faculty of Science, and consistent with satisfying the requirements for the Major and the Minor concentrations.

Year 3: PHIL-2210, ARSC-3100, ARSC-3010; plus any seven additional courses, at least 2 from each of the Faculty of Arts, Humanities, and Social Sciences and the Faculty of Science, and consistent with satisfying the requirements for the Major and the Minor concentrations.

Year 4: ARSC-4210, ARSC-4100, ARSC-4990 (or other departmental requirement for the student's Major concentration); plus any seven additional courses as needed to satisfying the remaining requirements for the Major concentration, the Minor concentration and/or the Program.

Honours Bachelor of Interdisciplinary Arts and Science (IAS) Double Major Concentration

Degree Requirements

Total courses: forty.

- (a) ARSC-1000, PHIL-2210, MATH-1720 (or MATH-1760) (and MATH-1730 if major or minor concentration is Math, Physics or Biochemistry), STAT-2910, ARSC-3010, ARSC-3100, ARSC-4100, ARSC-4990 (or other departmental requirement for the student's Major concentration), ARSC-4210.
- (b) One course from GRST-1100, HIST-1130, HIST-1140, PHIL-1100, POLS-2510, POLS-2520, INCS-2020, INCS-2030, INCS-2200.
- (c) four courses (any two of the following pairs): ECON-1100 and ECON-1110, BIOL-1111 and BIOL-1101, CHEM-1100 and CHEM-1110, COMP-1400 and COMP-1410, ESCI-1111 and ESCI-1100, MATH-1720 and MATH-1730, PHYS-1400 and PHYS-1410, PHYS-1300 and PHYS-1310.
- (d) Major Concentration I (12): maximum of two 1000-level courses in the major subject; and at least four 3000-level or 4000-level courses in the major subject.
- (e) Major Concentration II (12): maximum of two 1000-level courses in the major subject; and at least four 3000-level or 4000-level courses in the major subject
- (f) At least 15 courses must be taken in each of the Faculty of Arts, Humanities, and Social Sciences and the Faculty of Science.
- (g) To continue in the program, and to receive the Honours IAS degree, students must maintain an Honours 70% cumulative average and major average.
- (h) Any remaining courses to bring the total course number to 40 may be from any area of study.

Courses used to calculate the major average are: courses listed under (d) and (e) and courses numbered ARSC-XXXX.

Honours Bachelor of Interdisciplinary Arts and Science (IAS) Major and Double Minor Concentration

Degree Requirements

Total courses: forty.

- (a) ARSC-1000, PHIL-2210, MATH-1720 (or MATH-1760) (and MATH-1730 if major or minor concentration is Math, Physics or Biochemistry.), STAT-2910 or SOSC-2500 (Science majors must take STAT-2910), ARSC-3010, ARSC-3100, ARSC-4100, ARSC-4990 (or other departmental requirement for the student's Major concentration), ARSC-4210.
- (b) One course from GRST-1100, HIST-1130, HIST-1140, PHIL-1100, POLS-2510, POLS-2520, INCS-2020, INCS-2030, INCS-2200
- (c) Four courses (any two of the following pairs): ECON-1100 and ECON-1110, BIOL-1111 and BIOL-1101, CHEM-1100 and CHEM-1110, COMP-1400 and COMP-1410, ESCI-1111 and ESCI-1100, MATH-1720 and MATH-1730, PHYS-1400 and PHYS-1410, PHYS-1300 and PHYS-1310.
- (d) Major Concentration (12): maximum of two 1000-level courses in the major subject; and at least four 3000-level or 4000-level courses in the major subject
- (e) Minor Concentration I (6): maximum of two 1000-level courses in the minor subject; and at least one 3000-level or 4000-level course in the minor subject

- (f) Minor Concentration II (6): maximum of two 1000-level courses in the minor subject; and at least one 3000-level or 4000-level course in the minor subject
- (g) At least 15 courses must be taken in each of the Faculty of Arts, Humanities, and Social Sciences and the Faculty of Science.
- (h) Any remaining courses to bring the total course number to 40 may be from any area of study.
- (i) To continue in the program, and to receive the Honours IAS degree, students must maintain an Honours 70% cumulative average and major average.

Courses used to calculate the major average are: courses listed under (d) and numbered ARSC-XXXX.

Bachelor of Interdisciplinary Arts and Science (IAS) Major and Minor Concentrations

Faculty of Arts, Humanities and Social Sciences (FAHSS)

Anthrozoology
Communication, Media and Film
Dramatic Art
English and Creative Writing
History
Languages, Literatures and Civilizations
Music and Visual Arts
Philosophy
Political Science
Psychology
Sociology and Criminology
Women's and Gender Studies

Faculty of Science

Biological Sciences
Chemistry and Biochemistry
Computer Science
School of the Environment
Economics
Mathematics and Statistics
Physics

Discovery Program (undeclared majors in FAHSS)

Students who have not decided on a major may remain undeclared until they have completed ten courses at the University of Windsor. These students will be placed in the Discovery Program.

The Discovery Program provides for undeclared students a home in their first year at university while they are discovering their preferred major. The “Effective Writing” courses required in this program will give them a solid foundation for the extensive amount of written work they face in courses they take throughout their university career. “Understanding the Contemporary World” will guide them into thinking critically while examining a variety of topics from several points of view. Students will receive attention to help them achieve academic success and the possibility for success after graduation.

Students in the Discovery Program (undeclared majors) must take GART-1200 Understanding the Contemporary World and GART-1500 Effective Writing in the Fall Semester of their first year, and GART-1510 Effective Writing II in the subsequent semester. Further academic counselling about choice of courses and other academic possibilities is available for students in this program through the Advising Centre.

Honours in Commercial Aviation Leadership

Degree Requirements

Total courses: 40

- a) 14 courses from Arts, Humanities and Social Sciences, including 6 of the following Leadership courses:
 - GART-1200. Understanding the Contemporary World (double credit)
 - GART-3100/SOSC-3100 Ways of Doing
 - GART-2100/SOSC-2100 Ways of Knowing
 - GART-2090 Ethics in the Professions
 - DRAM-2100. Speech Communication to Inform
 - DRAM-2720 The Creative Process
 - KINE-3501/SOSC-3500/SACR-3500/PSYC-3500/SWRK-3500/SJST-3500/WGST-3500 Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
 - VSAR-3850 Green Corridor (Prerequisites: at least Semester 5 and in good standing)
 - GART-4000/SOSC-4000 Mentorship and Learning
 - SOSC-4500/SACR-4500/SJST-4500/PSYC-4500/SWRK-4500/WGST-4500 Practicum in Social Change (Prerequisite: KINE-3501/SOSC-3500/SACR-3500/SJST-3500/PSYC-3500/SWRK-3500/WGST-3500)
 - EDUC-4000 Diversity and Inclusion in the Learning Organization
 - EDUC-4100 Learning-Centered Teaching: Planning, Delivery, Assessment and Evaluation
 - EDUC-4150 Learning Organizations: Management and Leadership
 - EDUC-4200 Theories of Individual and Collective Learning

- b) 3 courses from Business
 - STEN-1000 Introduction to Business
 - MGMT-2430 Human Resources Management (Prerequisite STEN-1000)
 - MGMT-4520 Management of Organizational Health, Wellness and Safety (Prerequisite: MGMT-2430)

- c) 4 courses from Science, Engineering, or Computer Science

- d) 8 courses in Flight Training
 - AERO-1970 Practicum in Professional Development (double credit)
 - AERO-2970 Practicum in Professional Development (double credit)
 - AERO-3970 Practicum in Professional Development (double credit)
 - AERO-4970 Practicum in Professional Development (double credit)

- e) GART-1500 Effective Writing I
GART-1510 Effective Writing II

- f) 9 courses from any area of study

FACULTY OF ARTS, HUMANITIES, AND SOCIAL SCIENCES (FAHSS) COURSES

The following courses are offered through the Office of the Dean of Arts and Social Sciences.

COMMERCIAL AVIATION LEADERSHIP COURSES

AERO-1970. Practicum in Professional Development, Pilot Training

Supervised practicum in professional development in pilot training. Introduction to leadership training, and aviation theory and practice. Includes a 3 day leadership training session held just prior to the Fall term. Completion of year one of pilot training plus submission of satisfactory portfolio entries to the supervising instructor required. (Marked on a pass/fail basis. Two semester course. 6.0 credits. Restricted to students in LAPS Pilot option program.) (This is an experiential learning course.)

AERO-2970. Practicum in Professional Development, Pilot Training

Supervised practicum in professional development in pilot training. Leadership training, navigation and meteorology. Completion of year two of pilot training plus submission of satisfactory portfolio entries to the supervising instructor required. (Marked on a pass/fail basis. Two semester course. 6.0 credits. Restricted to students in LAPS Pilot option program.) (Pre-requisite: AERO-1970) (This is an experiential learning course.)

AERO-3970. Practicum in Professional Development, Pilot Training

Supervised practicum in professional development in pilot training. Leadership training on health and safety issues. Completion of year three of pilot training plus submission of satisfactory portfolio entries to the supervising instructor required. (Marked on a pass/fail basis. Two semester course. 6.0 credits. Restricted to students in LAPS Pilot option program.) (Prerequisite: AERO-2970) (This is an experiential learning course.)

AERO-4970. Practicum in Professional Development, Pilot Training

Supervised practicum in professional development in pilot training. Leadership and management of flight crews and passenger safety. Completion of one year of post-pilot license training plus submission of satisfactory portfolio entries to the supervising instructor required. (Marked on a pass/fail basis. Two semester course. 6 credits. Restricted to students in LAPS Pilot option program.) (Pre-requisite: AERO-3970). (This is an experiential learning course.)

ANTHROZOOLOGY COURSES

ANZO-1600. Animals and Humans in Society

This course will explore and consider the different types of relationships between animals and humans in contemporary society from a variety of physical, social, and psychological perspectives. Topics may include companion animals, animal rights and welfare, animals and food and entertainment, human-animal violence, and animal-assisted therapy. (Can be taken for either Social Science or Arts credit).

ANZO-2000. The Paw and the Pen: Animals in Literature

This course explores the varying and significant ways in which animals are represented in literature. Throughout Western literary history, animals appear in a variety of images, symbols, characters, and themes, which can be studied from a wide array of critical perspectives: natural realism; animal society;

anthropomorphism; pests vs. pets; “owned” beings vs. companions; ecocriticism; cultural icons; and ethically and morally. The way in which animals both influence and reflect societal values is examined through human-animal relationships portrayed in selected texts, through class discussion and written analysis. (Can be taken as either a Social Science or Arts option.) (Prerequisite: ANZO-1600 for Minor in Anthrozoology only.) (Open to English majors with semester 3 standing.)

ANZO-2600. Animals For Sport and Entertainment

Building on *Animals and Humans in Society* (ANZO-1600), this course will focus on many of the issues, controversies, and paradoxes, which are inherent to human relationships with animals as companions, for human entertainment, and animals in sports. Students will be expected to engage in meaningful discussions and readings, both verbally and through their own writing, applying different perspectives (ie. historical, sociological, cultural, etc.) to relevant topics. Potential topics for this class include animal fighting as entertainment (cockfighting, dog fighting, bullbaiting, etc.); zoos and aquaria; circuses and rodeos; pedigree dogs and dog shows; and racing (greyhounds and horses). (Prerequisite: ANZO-1600 or ANZO-2600). (Can be taken as either a Social Science or Arts option).

ANZO-2610. Animals and the Law

This course, for undergraduate non-law majors, focuses on the role of law in human-animal interactions and the balancing of competing interests within traditional areas of law. Students will explore and debate the major issues surrounding animal welfare, rights, and protection, including the legal status of animals as living property, and the evolving societal beliefs and values surrounding these issues. The course will primarily focus on examining and comparing the laws of Canada and the United States, although laws and constitutions of other countries, as well as international law, will also be considered. (Prerequisite: ANZO-1600). (Can be taken as either a Social Science or Arts option).

ANZO-3100. Canine Impact: Exploring the Dog-Human Relationship

This course will explore the significance of dogs in a human world from a range of perspectives, including biological, ethical, historical, psychological, and social. From the evolution of the domestic canid to the unique construction of breeds to status as a family member, the course will examine the dog's role and value as protector, hunter, and companion within the contexts of evolution, domestication, behaviour, and cognition. Theories and complexities of the canine-human relationship will be explored through readings, discussions, media, debates, observation, and experience. (Prerequisite: ANZO-1600). (Can be taken as either a Social Science or Arts option).

ANZO-3600. Special Topics in Anthrozoology

This course focuses on a selected topic in Anthrozoology, which may vary according to special faculty interests and/or significant current issues. Among others, topics could include: *Animals in the Arts*; *Companion Animals*; *Human-Animal History*; *Politics and Animals*; *Food and Sustainability*; *Zoos*; *Animals in Religion*, etc. (Prerequisite: ANZO-1600). (3 lecture hours a week). (May be repeated for credit, with permission of the instructor, if content is different). (Can be taken as either a Social Science or Arts option).

ANZO-4980. Anthrozoology Capstone

This capstone provides students the opportunity, in collaboration with the instructor, to design and implement their own unique learning experience by demonstrating their accumulated knowledge and understanding of anthrozoology in an original project of their choice, subject to the instructor's approval. This course will reflect student knowledge of the interdisciplinary field of anthrozoology, which has been acquired through previous anthrozoology courses. The projects may be in collaboration with community partners, such as animal shelters, zoological parks, or educational environments. (Prerequisites: ANZO-

1600, ANZO-2600, ANZO-2610, ANZO-3600.) (Restricted to students with at least semester 5 standing and by permission of the instructor.)

GENERAL FAHSS COURSES (GART-)

GART-1200. Understanding the Contemporary World

This course will explore current political, cultural and social contexts. The perceived gulf between the "ivory tower" and the "real world" will be bridged each week as we analyze major current issues with attention to popular culture. (Restricted to year 1 FAHSS majors.) (3 lecture/1 tutorial hours a week.) (6.0 credit course.)

GART-1210. An Introduction into Indigenous Topics

This course introduces students to Indigenous histories, perspectives, and modern realities through an Indigenous lens. The role of colonization is introduced as Indigenous relationships on Turtle Island changed as a result of contact and colonization. This survey course provides a learning opportunity for students to engage in Indigenous pedagogy and worldview as they learn how history impacts the contemporary lives of Indigenous people. Through exploring relationships, this course engages critical reading, writing and thinking skills through course lectures and seminar activities. The history of relations assists in understanding how colonization's policies and statutory documents thereafter affected Indigenous peoples, such as the Royal Proclamation, Treaties, the Indian Act, the British North America Act (1867), and the Constitution Act (1982). Today, these colonial-state governance documents are a significant part of Indigenous-Crown and Indigenous-settler relations. (2 lecture hours and 1 tutorial hour per week.) (Also offered as SOSC-1210.)

GART-1500. Effective Writing I

A foundational course aimed at developing effective writing skills for communicating ideas in academic and other contexts. Topics may include grammar, paragraph writing conventions, academic learning, and critical thinking. This is a hybrid course.

GART-1510. Effective Writing II

A continuation of GART-1500 aimed at developing and refining writing skills for communicating ideas in academic and other contexts. Topics may include grammar, essay writing conventions, research skills, scholarly citations, editing and revising, academic learning, and critical thinking. This is a hybrid course. (Prerequisite: GART-1500.)

GART-2040. Health-Care Ethics through the Life-Span

Explores ethical issues of general interest which arise during the life-span, from conception until death, including methods to prevent contraception, methods to aid in reproduction, medical treatment for children, organ transplantation, research on human subjects, foregoing life-sustaining treatment, advance directives, assisted suicide, and euthanasia. This course is not directed specifically to health professionals.

GART-2050. Community Program Delivery and Evaluation

This course provides students with an overview of principles and methods of community program delivery and evaluation. Students will explore topics including systems change, collective impact, human-centered design, engaging diverse communities, and continuous improvement and will learn how to design a comprehensive community program delivery and evaluation plan that can be implemented in a community setting. (Requires third year standing or permission of the instructor.) (Also offered as SOSC-2050).

GART-2060. Practicing Community Program Delivery and Evaluation

This course provides students with an opportunity to practice the principles and methods of community program delivery and evaluation, providing them with practical skills for future academic or employment opportunities. Students will be placed in community settings as supported by the local collective impact initiative, ProsperUs, and will carry out activities that may include community activation, frontline and administrative program support, and program evaluation. (Prerequisite: SOSC-2050. Instructor permission. Interview may be required.) (This is an experiential learning course.)

GART-2090. Ethics in the Professions

Examines what constitutes a profession, its legitimacy, and its authority from society. The responsibilities of professionals to their clients, professions, and society are mapped. Codes of ethics and other statements of ethical standards, conflict of interest, and the roles of regulatory bodies and governments are examined and related to practice through relevant case studies.

GART-2100. Ways of Knowing – Selected Topics

Students complete problem-based learning with internal and external community partners to explore networks of knowledge in organizations and within civic settings. The topic for each year will be announced in advance. (Restricted to students with a minimum of second semester standing. (Also offered as SOSC-2100.) (May be repeated for credit by permission of the instructor.)

GART-2200. Investigating the Contemporary World

This course will explore the connections among culture, politics and society in historical and contemporary contexts with the use of case studies. (Restricted to students in the Fresh Start program.) (2 lecture/1 tutorial hours a week.) (Antirequisite: GART-1200)

GART-2980. Co-op Work Term I

Supervised experience in an approved, paid, full-time (minimum 420 hours) career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Students must be enrolled in a Co-operative education program. Offered on a pass/non-pass basis). Once a placement has been confirmed the student must remain in the Co-op program until they have completed their work term requirements. Students that fail to complete their work term requirements, as per work term course outline, will receive a non-pass on their academic transcript for that work term, and may be required to withdraw from Co-op.

GART-2990. Popular Culture: Special Topics

This course explores a featured topic within contemporary popular culture through an Arts, Humanities and/or Social Science perspective. Topics for the course will vary and may include: between popular culture, street art, Web 2.0, gothic literature, reality television, fan culture and fandoms, celebrity culture, science fiction fantasy, and video gaming. Course delivery may also vary according to instructor preference. (Course may be repeated for credit if topic is different.) (Also offered as SOSC-2990.)

GART-3100. Ways of Doing: Special Topics

This course introduces students to experiential learning through student proposed and instructor-approved problem or project-based learning. Students develop solutions or execute projects with a community partner that they have reason to value. Students may develop projects/proposals with existing or new employers. The instructor, community partner, and student will collaborate on the use of experiential learning (such as Kolb's learning cycle) and well-being frameworks (the Capabilities Approach) to reflect upon the success of their project. Restricted to students with Year 2 standing. This course is also offered as SOSC-3100. Students may repeat this course for credit by permission of the instructor.

GART-3980. Co-op Work Term II

Supervised experience in an approved, paid, full-time (minimum 420 hours) career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Students must be enrolled in a Co-operative education program. Offered on a pass/non-pass basis). Once a placement has been confirmed, the student must remain in the Co-op program until they have completed their work term requirements. Students that fail to complete their work term requirements, as per the work term course outline, will receive a non-pass on their academic transcript for that work term and may be required to withdraw from Co-op.

GART-4000. Mentorship and Learning

An intensive exploration of the theory and practice of learning and leadership which includes a practical component where students will mentor first-year students in a first-year course. Mentorship and Learning introduces students to learning theory, learning styles, group facilitation and effective leadership, critical thinking/reading and information literacy. Students will weave theory and practice throughout the semester, leading small group break-outs of first-year students. (Restricted to students in the Faculty of Arts and Social Sciences with at least Semester 5 standing, with consent of the instructor.) (A one-semester, 3-credit course offered in the Fall term.) (Also offered as SOSC-4000.) (Credit can only be obtained for one of GART-4000 or SOSC-4000) (3 lecture/3 lab hours a week.) (This is an experiential learning course.)

GART-4100. Modern Leadership

Students will review modern leadership theory and practices that were developed from the early 20th century to the present. Students will cover such relevant topics as: Servant Leadership, Behavioural Leadership, Psychodynamic Leadership, e-Leadership, Gender and Cultural Leadership, Path-Goal Theory, and Leader-Member Exchange Theory. (Restricted to students with at least semester 5 standing and by permission of the instructor.) (Also offered as SOSC-4100.)

GART-4980. -Co-op Work Term III

Supervised experience in an approved, paid, full-time (minimum 420 hours) career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Students must be enrolled in a Co-operative education program. Offered on a pass/non-pass basis). Once a placement has been confirmed, the student must remain in the Co-op program until they have completed their work term requirements. Students that fail to complete their work term requirements, as per work term course outline, will receive a non-pass on their academic transcript for that work term, and may be required to withdraw from Co-op.

GENERAL FAHSS COURSES (SOSC-)**SOSC-1210. An Introduction into Indigenous Topics**

This course introduces students to Indigenous histories, perspectives, and modern realities through an Indigenous lens. The role of colonization is introduced as Indigenous relationships on Turtle Island changed as a result of contact and colonization. This survey course provides a learning opportunity for students to engage in Indigenous pedagogy and worldview as they learn how history impacts the contemporary lives of Indigenous people. Through exploring relationships, this course engages critical reading, writing and thinking skills through course lectures and seminar activities. The history of relations assists in understanding how colonization's policies and statutory documents thereafter affected

Indigenous peoples, such as the Royal Proclamation, Treaties, the Indian Act, the British North America Act (1867), and the Constitution Act (1982). Today, these colonial-state governance documents are a significant part of Indigenous-Crown and Indigenous-settler relations. (2 lecture hours and 1 tutorial hour per week.) (Also offered as GART-1210.)

SOSC-2050. Community Program Delivery and Evaluation

This course provides students with an overview of principles and methods of community program delivery and evaluation. Students will explore topics including systems change, collective impact, human-centered design, engaging diverse communities, and continuous improvement and will learn how to design a comprehensive community program delivery and evaluation plan that can be implemented in a community setting. (Requires third year standing or permission of the instructor.) (Also offered as GART-2050)

SOSC-2060. Practicing Community Program Delivery and Evaluation

This course provides students with an opportunity to practice the principles and methods of community program delivery and evaluation, providing them with practical skills for future academic or employment opportunities. Students will be placed in community settings as supported by the local collective impact initiative, ProsperUs, and will carry out activities that may include community activation, frontline and administrative program support, and program evaluation. (Prerequisite: SOSC-2050. Instructor permission. Interview may be required.) (Also offered as GART-2060). (This is an experiential learning course.)

SOSC-2100. Ways of Knowing – Selected Topics

Students complete problem-based learning with internal and external community partners to explore networks of knowledge in organizations and within civic settings. The topic for each year will be announced in advance. (Restricted to students with a minimum of second semester standing. (Also offered as GART-2100.) (May be repeated for credit if the topics are different)

SOSC-2500. Basic Quantitative Methods in the Social Sciences

Introduction to measurement of variables, organization and description of numerical data, testing hypotheses, inference, and interpretation of findings in the Social Sciences. Topics include descriptive statistics, normal distribution, probability, sampling, hypothesis testing, t-tests, correlation, and chi-square tests. (Antirequisite: STAT-2910, STAT-2920, STAT-2950, MSCI-2020, GENG-2220, and KINE-2690.)

SOSC-2990. Popular Culture: Special Topics

This course explores a featured topic within contemporary popular culture through an Arts, Humanities and/or Social Science perspective. Topics for the course will vary and may include: between popular culture, street art, Web 2.0, gothic literature, reality television, fan culture and fandoms, celebrity culture, science fiction fantasy, and video gaming. Course delivery may also vary according to instructor preference. (Course may be repeated for credit if topic is different.) (Also offered as GART-2990.)

SOSC-3100. Ways of Doing: Special Topics

This course introduces students to experiential learning through student proposed and instructor-approved problem or project-based learning. Students develop solutions or execute projects with a community partner that they have reason to value. Students may develop projects/proposals with existing or new employers. The instructor, community partner, and student will collaborate on the use of experiential learning (such as Kolb's learning cycle) and well-being frameworks (the Capabilities Approach) to reflect upon the success of their project. Restricted to students with Year 2 standing. This course is also offered as GART-3100. Students may repeat this course for credit by permission of the instructor.

SOSC-3150. On Death and Dying

A critical exploration of topics related to death and dying. Topics covered may include: historical and cross-cultural perspectives on dying and death; memorial and commemoration; palliative care and medical aid in dying; death and popular culture; genocide and mass deaths; pandemics; the construction and medicalization of death; and death planning. Course delivery may vary according to instructor preference. (Pre-requisites: Semester 5 or higher standing or permission of instructor). (Cross-listed with SACR-3150)

SOSC-3300. Psychoactive Substance Use and Social Policy

This course provides a critical exploration of social factors affecting our understanding of psychoactive substances (e.g., alcohol, tobacco, cannabis, opiates, cocaine, psilocybin, club drugs, etc.), their use, relevant social policy and how these have changed over time. Course delivery may vary according to instructor preference. (Prerequisite: Semester 5 standing or above, or permission of instructor). (Antirequisite: SACR-3710) (Also offered as POLS-3300).

SOSC-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at [bystander initiative.ca](http://bystanderinitiative.ca)) (Also offered as KINE-3501, PSYC-3500, SACR-3500, SJST-3500, SWRK-3500, and WGST-3500)

SOSC-4000. Mentorship and Learning

An intensive exploration of the theory and practice of learning and leadership which includes a practical component where students will mentor first-year students in a first-year course. Mentorship and Learning introduces students to learning theory, learning styles, group facilitation and effective leadership, critical thinking/reading and information literacy. Students will weave theory and practice throughout the semester, leading small group break-outs of first-year students. (Restricted to students in the Faculty of Arts and Social Sciences with at least Semester 5 standing, with consent of the instructor.) (A one-semester, 3-credit course offered in the Fall term.) (Also offered as GART-4000.) (Credit can only be obtained for one of GART-4000 or SOSC-4000) (3 lecture/3 lab hours a week.) (This is an experiential learning course.)

SOSC-4100. Modern Leadership

Students will review modern leadership theory and practices that were developed from the early 20th century to the present. Students will cover such relevant topics as: Servant Leadership, Behavioural Leadership, Psychodynamic Leadership, e-Leadership, Gender and Cultural Leadership, Path-Goal Theory, and Leader-Member Exchange Theory. (Restricted to students with at least semester 5 standing and by permission of the instructor.) (Also offered as GART-4100.)

SOSC-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual assault and bystander intervention. Students co-facilitate the Bringing in the Bystander® In Person Prevention program for one or more small groups of students on campus. The practicum experience equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% or higher in KINE-3501/SOSC-3500/PSYC-3500/SJST-3500/SWRK-3500/SACR-3500/WGST-3500 and

permission of the instructor by online application at bystanderinitiative.ca.) (Also offered as SJST-4500, PSYC-4500, SWRK-4500, SACR-4500, and WGST-4500. (This is an experiential learning course.)

SOSC-4601. Seminar on Prostitution, Sexual Labour and Health

This course engages in a critical study of the conception and construction of prostitution/sex work and sexual labour and its impact on social determinants of health. Students will be required to examine and critically reflect on a variety of issues pertaining to adult consensual sex work and the impact of public policy on the health and well-being of people working in the sex industry. Substantive topics may include: policy and regulation; the construction of sex trafficking; stigmatization; politics and the media; violence and victimization; health and safety; customers; and organizing and advocacy. Course delivery may vary according to instructor preference. (Prerequisite: Semester 7 standing or above, or permission of instructor). (Cross-listed with WGST-4601 and WORK-4601.)

HUMAN GEOGRAPHY COURSES

Not all courses listed will necessarily be offered each year.

HUGR-2490. Political Economy of Agriculture and Food

Study of the physical, cultural, economic, and political factors influencing the spatial patterns and regional problems of world agriculture. (3 lecture hours a week.) (Also offered in Political Science POLS-2490.)

INTERDISCIPLINARY ARTS AND SCIENCE COURSES (ARSC)

ARSC-1000. Introduction to Interdisciplinary Arts and Science

This course examines how various academic disciplines contribute to integrative understanding. The course examines the history of interdisciplinary studies and different models of integration. Students will develop skills in interdisciplinary research and problem solving, in oral and written communication, and in the synthesis of diverse perspectives. (Open only to students in the IAS program).

ARSC-3010. World Civilizations

An introduction to the politics, culture and history of world civilizations. Focus will vary from year to year, depending on the interests of the instructor. (Open only to students in the IAS program.)

ARSC-3100. Modes and Methods of Inquiry

This course introduces methodological themes and principles that span disciplines across the Arts and Sciences, with an emphasis on developing skills for the critical appraisal of research literature. The course will enable students to become critical readers of published research in a variety of disciplines. (Open only to students in the IAS program.)

ARSC-4100. Inquiry and Communication

An examination to inquiry-based learning with a focus on contemporary political and social issues emphasizing the professional preparation and presentation of research results. This course is designed to provide experiences with planning, developing, and writing a research proposal under individual faculty supervision. In addition, group sessions on research ethics, procedures, writing, and data analysis will be provided. (Open only to students in the IAS program.) (Prerequisite: ARSC-3100.)

ARSC-4210. Science, Ethics and Social Policy

Students will explore the ethical dimensions of contemporary scientific controversies and their implications for social policy. The focus will vary from year to year but may include such topics as stem

cell research, invitro-fertilization, and global warming, emphasizing the role of scientific and ethical arguments in policy formation. (Open only to students in the IAS Program) (Prerequisite: ARSC-3100.)

ARSC-4990. Research Project

Students will design and implement a research project under the supervision of a faculty member integrating methodologies, critical perspectives and theoretical approaches acquired in the core IAS program. (Open only to students in the IAS program.) (A 6.00 credit hour research project, which counts as two courses.)

COMMUNICATION, MEDIA AND FILM

PROGRAMS

General Communication, Media and Film

Degree Requirements

Total courses: thirty.

- (a) ten courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340 or CMAF-3750, plus five additional CMAF or FILM courses, at least two of which must be at the 3000 level or above (excluding CMAF-3990);
- (b) GART-1500, GART-1510;
- (c) two courses from Arts;
- (d) two courses from Languages or Science;
- (e) two courses from any area of study, excluding Social Sciences;
- (f) six courses from any area of study, including CMAF and FILM;
- (g) six courses from any area of study, excluding CMAF and FILM.

Courses used to calculate the major average are: All CMAF and FILM courses.

Honours Communication, Media and Film (with/without Co-op)

Degree Requirements

Total courses: forty (Plus three work terms for students in the Co-op program).

- (a) eighteen courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340 or CMAF-3750, plus thirteen additional CMAF or FILM courses, at least two of which must be at the 3000 level or above (excluding CMAF-3990) and at least two of which must be at the 4000 level (excluding CMAF-4990);
- (b) GART-1500, GART-1510;
- (c) two courses from Arts;
- (d) two courses from Languages or Science;
- (e) two courses from any area of study, excluding Social Sciences;
- (f) six courses from any area of study, including CMAF and FILM;
- (g) eight courses from any area of study, excluding CMAF and FILM.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: All courses taken in CMAF and FILM.

Combined Honours Communication, Media and Film

Degree Requirements

Total courses: forty.

- (a) Communication, Media and Film – fourteen courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340 or CMAF-3750, plus nine additional CMAF or FILM courses, at least two of which must be at the 3000 level or above (excluding CMAF-3990) and at least one of which must be at the 4000 level (excluding CMAF-4990);
- (b) Course requirements-Other subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study;
- (c) GART-1500, GART-1510;
- (d) two courses from Arts;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Social Sciences;
- (g) additional courses from any area of study, including CMAF and FILM to a total of forty courses.

Courses used to calculate the major average are: All courses taken in CMAF and FILM, as well as the combined major area(s) of study.

Honours Film Production (Bachelor of Fine Arts)

This is a joint program with Communication, Media and Film (CMF) and the School of Creative Arts (SoCA). See School of Creative Arts for program requirements.

Concurrent General Bachelor of Arts (Communication, Media and Film)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between Communication, Media and Film (CMF) and the Faculty of Education. See Faculty of Education for program requirements.

Minor in Communication, Media and Film

Required: six CMAF or FILM courses, including CMAF-1010 and FILM-1100, plus four additional courses, two of which must be at the 2000 level or above.

Minor in Film Studies

Total Courses: 6 courses

- a) FILM-1001
- b) two Arts/Humanities from: GRMN-2480, ITLN-2480, SPAN-2480, ARAB-3610, GRST-3011, MUSC-3170, MUSC-4470;
- c) two Social Sciences from: CMAF-2400, CMAF-2410, HIST-2300, HIST-4660, CMAF-3410; CMAF-3430, CMAF-4900 (as film theory, film criticism, or film studies);

d) one more of (b) or (c) from either Social Sciences or Arts/Humanities**;

Note: One of the courses taken for the Minor in Film Studies must be at the 3000 level or higher
**Or an approved special topics course (as film theory, film criticism, or film studies) from either Social Sciences or Arts/Humanities.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Communication, Media and Film

Major Concentration: twelve courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340, CMAF-3750, plus seven additional CMAF or FILM courses three of which must be at the 3000 level or above (CMAF-3990 and CMAF-4990 do not count as fulfilling the 3000 level or above requirement).

Minor Concentration: six courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340, CMAF-3750, and one additional CMAF or FILM course at the 3000 level or above (CMAF-3990 and CMAF-4990 do not count as fulfilling the 3000 level or above requirement).

COMMUNICATION, MEDIA AND FILM COURSES

Not all courses listed will necessarily be offered each year. All courses are three hours per week (3.00 credit hours) unless otherwise indicated

CMAF-1010. Introduction to Media and Society

An overview of major themes, concepts and issues that inform the field of Canadian communication/ media studies. Topics may include: the political, economic, historical, and cultural contexts of communication; new media; policy issues and concerns; representation; the role of media in the social construction of reality and the broad interaction between media and society. (3 lecture hours or 2 lecture hours and 1 tutorial hour per week.)

CMAF-2010. New Media Studies

This course introduces students to theories and approaches to new media, explores the historical emergence of digital media forms, and examines their social, cultural, political and economic implications. Students will examine the social impact of new media from different perspectives, such as labour, politics, information, and the creative and entertainment industries. Topics may include: “old” and “new” media, algorithmic media, machine learning and artificial intelligence, augmented/virtual reality, digital platforms, social media networks, and influencer culture. (Prerequisite: Semester 2 standing or above).

CMAF-2130. Podcasting and Internet Media

This course introduces students to the craft of production for the Internet, specifically in the form of video and audio podcasts. Students will acquire skills in a variety of software applications to produce and circulate podcasts. Emphasis will also be placed on the creation of quality content through the examination of niche audiences and current practices in digital media production and distribution. (Prerequisite: FILM-1110 or CMAF-1130.) (2 lecture hours and 1 laboratory hour per week)

CMAF-2210. The Art of Photo-blogging

In this course students will develop and design photography-based blog projects that combine effective research and writing skills with the creative use of image capture as a tool for visual communication. Students will learn photographic techniques and image editing software as well as communication strategies, applicable Canadian copyright laws, web analytics and search engine optimization. (Prerequisite: FILM-1110 CMAF-1130.) (2 lecture hours and 1 laboratory hour per week)

CMAF-2250. Media Literacy

A critical exploration of how media contribute to the social construction of reality. Students will develop the skills and conceptual frameworks necessary to interpret and investigate the contemporary media environment with a particular focus on examples derived from Canadian information/news sources and popular culture. Topics may include: media coverage of social and political issues, political economy of media/culture industries, media and democracy, contestations of media representation and stereotypes. (Prerequisite: Semester 2 standing or above.)

CMAF-2340. Research Methods in Communication

An introductory overview of research approaches, methods, ethical standards, and designs in communication/media studies. Students will learn about the theoretical grounding of quantitative, qualitative, and interpretive methods, and practice various methods to explore communication issues. (Prerequisite: CMAF-1010) (3 lecture hours or 2 lecture hours and 1 tutorial hour per week.)

CMAF-2400. Cinema History I (Pre-War)

The course charts the early history of the cinema from its inception to World War II: film shorts at the turn of the century, the silent film era, the introduction of sound, and the decline of the studio system. Films are examined as technical, industrial, commercial, artistic, and, most importantly, as historical artifacts. Industry, audience, and the development of cinematic language are viewed within an international framework and their local cultural context.

CMAF-2410. Cinema History II (Post-War)

The course examines films from the post-War period to the present: the heyday of the classical Hollywood narrative and challenges to its dominance from European neo-realism and the avant-garde film movement are considered. Films are viewed as influenced by and reflective of social upheaval of the sixties, as well as their consolidation within distinct but mutually influencing categories of mainstream and alternative cinema. An important consideration is how films can either paper over or expose social fractures along the lines of gender, race, sexuality, and nationalism.

CMAF-2450. Communication and Cultural Policy in Canada

This course surveys the historical and contemporary development of communication and cultural policy in the Canadian context. Students will investigate particular cultural industries (e.g. music, film, television) and key themes (e.g., settler colonialism, public sphere, globalization, media convergence) that have informed policy debates as well as the structure, performance and regulation of culture/media industries. Topics may include: the role of the State in cultural production, citizenship, identity and multiculturalism, and support for Indigenous media.) (Prerequisite: Semester 2 standing or above. .)

CMAF-2610. Public Relations, Media and Society

This course critically examines the powerful yet often hidden role that public relations plays in mediating social discourse on a broad range of issues by drawing on historical and contemporary examples. Students will explore the emergence of the PR industry, PR strategies/techniques designed to alter perceptions, reshape reality and manufacture consent. Topics may include: corporate PR, disinformation and 'science denial,' PR, 'fake news,' and 'alternative facts;' the current media landscape and

'networked' propaganda; PR versus democratic communications. (Prerequisite: Semester 2 or above standing.)

CMAF-2700. Speaking Truth to Power: Voice and Activism

An examination of contemporary campaigns to improve the standard of living of Canadians. Students learn to conduct interviews and evaluate the effectiveness of social justice messages. (Prerequisite: Semester 3 or above standing.) (Also offered as DRAM-2700, SJST-2700, and WORK-2700)

CMAF-2750. Theories of Communication and Media

This course introduces students to various theorists and schools of thought that have shaped the field of communication/media studies. It traces the development of theoretical approaches to communication forms and processes and explores a variety of underlying philosophical perspectives and assumptions in communication and media theory. (Prerequisite: CMAF-1010.) (3 lecture hours or 2 lecture hours and 1 tutorial hour per week.)

CMAF-2820. Advertising in Historical and Cultural Context

This course draws upon a range of critical approaches to contextualize advertising and branding within the history of capitalism and contemporary consumer culture. Topics may include: the historical rise of consumer culture, advertising's reciprocal and structural relationship with media, controversial advertising categories, issues of representation and meaning and the ideological dimensions of advertising and branding. (Prerequisite: Semester 2 standing or above.)

CMAF-2900. Special Topics in Communication, Media and Film

Course on a selected topic in communication/media studies. Content will vary with instructor. (Prerequisite: Semester 2 standing or above.) (May be repeated once for credit if the topics differ.)

CMAF-3010. Digital Technologies and Everyday Life

This course surveys critical theories of technology with a focus on how evolving and emerging communication/digital technologies are received and adapted and how they shape practices in various institutional contexts and in everyday life. Topics may include: representations of technology, technologies and the organization/perception of space and time, privacy/surveillance, gender, labour, access and usage of technology by Indigenous communities, the environment and technology. (Prerequisite: CMAF-2010 or CMAF-2750.)

CMAF-3020. Popular Culture

Examines the relationship between popular culture and questions of economics and social and cultural politics, through an exploration of struggles over knowledge, power and authority manifest in popular cultural artifacts and processes. Intended to provide students with tools for critical evaluation of contemporary popular culture, including the constitution of social ideologies, values and representations through cultural artifacts. (Prerequisite: CMAF-2250 or CMAF-2750.)

CMAF-3040. Surveillance and Digital Media

This course provides an historical and conceptual examination surveillance and digital media. It critically assesses the capacities of the State and corporate entities to monitor digital activities and explores the social, political and economic implications of surveillance practices within digital media. Topics may include: user-generated and social media surveillance, mobile technologies, cloud computing, geo-locating technologies, tracking software, biometrics and data mining. (Prerequisite: CMAF-2010.)

CMAF-3340. Methods of Mass Media Criticism

In this course, students examine mass/popular cultural texts (e.g. news, TV shows, films, music videos, advertisements, social media, etc.,) and explore representational politics using a variety of contemporary methodological approaches. These may include: content analysis, cultural studies, discourse/textual analysis, semiotics, genre study, feminist criticism, audience research, on-line ethnography, web-based inquiry. (Prerequisites: CMAF-2340 or CMAF-2750.)

CMAF-3410. Media Aesthetics

An intermediate study of principles and tools to understand the formal qualities of visual signification within the broader contours of visual culture. Students learn aesthetic and technical terms, rules, conventions, and social assumptions used to construct meaning—across media forms and platforms—through sound, still and moving images, texts, or graphics. The course offers a conceptual grounding for producers, consumers, and critics of media culture. (Prerequisite: one of CMAF-2250, CMAF-2400, CMAF-2410, CMAF-2310, or CMAF-2320.)

CMAF-3430. Cinema and/in Culture

A study of cinema and its relationship to intersections of race, gender, class, and sexuality as well as its relationship to binaries such as first–third world, east–west, local–global, and national–transnational. The course interrogates cinema as a window to cultures, the transaction between social movements and cinema, the role of cinema in cross-cultural experience, and representations of race in Hollywood, Asian, and Asian diasporic cinema. (Prerequisite: one of CMAF-2250, CMAF-2400, or CMAF-2410.)

CMAF-3640. Media, Technology and the Environment

This course explores the relationship between media practices, representations, communication technologies and the environment justice. Topics may include: media constructions of the environment; mainstream and alternative media coverage of environmental justice movements and issues; environmental impact of communication practices, technological advancements and consumer culture; environmental themes in advertisements and corporate greenwashing; environmental racism. (Prerequisite: CMAF-2250 or CMAF-2750.)

CMAF-3700. Alternative Media and Digital Activism

This course examines existing theory and scholarship on alternative media and media activism and explores the ways in which activists and citizen groups use media to express alternative views on a range of social and political issues. Topics may include: mainstream versus alternative media framing; historical roots of alternative media; movements for Indigenous rights and sovereignty; participatory journalism; culture jamming; the tactics, strategies, aesthetics and goals of alternative/activist media. (Prerequisite: One of CMAF-2010, CMAF-2250, CMAF-2700, DRAM-2700 or WORK-2700).

CMAF-3750. Critical Approaches to Media and Culture

This course explores contemporary theories and methods related to the critical study of media; culture Topics may include: political economy of media and the culture industries; the production, consumption, and circulation of cultural texts and artefacts; the colonial “gaze; the materialities of communication and the politics and practices of representation. (Prerequisite: CMAF-2010 or CMAF-2750.)

CMAF-3820. Advertising in Digital Media: Contemporary Issues and Practices

This course considers how Internet, streaming, mobile, social, and user-generated media have altered the advertising industry and advertising practices. Topics may include: adtech, advertising’s structural influence over digital technologies and platforms, social media audiences/users/influencers, guerrilla marketing, advertising strategy, regulation and policy. Students will learn advertising skills and

techniques required to propose, plan, and execute campaigns in the digital media environment. (Prerequisite: CMAF-2610 or CMAF-2820.)

CMAF-3900 Special Topics in Media and Society

This Special Topics course will explore contemporary issues relevant to understanding the links between media institutions, cultural texts/forms and social practices. The specific focus will vary based on faculty expertise (Prerequisite: CMAF-2750.) (May be repeated for credit if the topics differ.)

CMAF-3990. Internship I

Application of communication skills and knowledge in work experience situations. Offered on a Pass/Non-Pass basis. (Prerequisites: Semester 5 standing, a Cumulative GPA of 70% and approval of Instructor.) (This course may be taken twice for credit.) (This is an experiential learning course.)

CMAF-4010. Advanced Topics in New Media and Digital Culture

This seminar provides an in-depth exploration of the diverse social, economic, political, cultural and artistic practices that constitute the contemporary new media landscape. Through an examination of web 2.0 technologies/digital platforms and their formations, structures, limits and possibilities, students will be engaged as both content consumers and producers. Topics may include: social networking as immaterial labour, art in the age of digital reproduction, cyber-identity/community, new media and public policy, digitally-mediated activism/social movements. (Prerequisite: CMAF-3010 or CMAF-3040.)

CMAF-4030. Advanced Studies in Media Culture

This seminar explores various theoretical approaches to the study of media culture including semiotics, cultural ethnography, critical theory, feminism, social constructionism, structuralism and postmodernism. Students will apply theoretical frameworks to an examination and interpretation of contemporary media forms and practices. (Prerequisites: CMAF-2750 and one of CMAF-3020, CMAF-3340 or CMAF-3750.)

CMAF-4250. Advanced Studies in the Sociology of News Media

This seminar course explores and investigates the role played by mass media in power relations and the social construction of reality from a critical political economy perspective. Topics may include: the political economy of mainstream media, including issues of media ownership and control; the intersections of media, corporate and governmental power; mainstream media coverage/representation of domestic and foreign affairs. (Prerequisite: CMAF-2250 or permission of the instructor.)

CMAF-4340. Capstone Project I: Research Design

Students will plan and write a proposal for a primary research or theoretical capstone paper, usually to be undertaken the following semester. Students will hone their skills in primary and/or secondary research, proposal writing, analysis, and the presentation of ideas. (Pre-requisite: CMAF-3340 or permission of instructor.)

CMAF-4350. Capstone Project II: Writing and Presentation

Students will carry out primary or secondary research and write the related capstone paper as per their proposal developed in CMAF-4340 the previous semester. They will present their completed work in a departmental forum. (Pre-requisite: CMAF-4340.)

CMAF-4430. Film Theory and Criticism

This seminar course examines the changing theoretical and critical approaches to film, including issues in the production and reception of film, such as realism, adaptation, convention, signification, and culture. (Prerequisites: CMAF-2400 and CMAF-2410.)

CMAF-4500. Border Culture

This course addresses the role of borders in contemporary global culture as both physical boundaries and affective conditions. In the context of the Windsor-Detroit border, students from the University of Windsor compare viewpoints based upon the experience of living in a border culture. Seminars and field trips address borders from a number of perspectives and contexts. Students look to historical and contemporary ideas about borders that have been articulated in various disciplines: from political theory and cultural geography, to urban planning, art, literature, architectural and spatial theory. (Open to majors and non-majors.) (Prerequisites: MACS-2050 and MACS-2150 for all Visual Arts Majors and semester 4 standing for non-majors.) (Also offered as MACS-4500.)

CMAF-4630. Gender and Technology

This advanced seminar addresses issues related to gendered experiences with technology in the digital age through an examination of various theoretical debates and case studies. Topics may include: the historical gendering of technological skills; the social construction of technology and masculinity; impact of technology on the environment; critiques of techno-science; gendered representation of, and participation in, video games; gendered experiences of mobile phone and social media use. (Prerequisite: CMAF-3010 or CMAF-3640.)

CMAF-4900. Honours Seminar in Communication, Media and Film

An advanced seminar that explores selected topics in the field of Communication, Media and Film. Topics will vary depending on the focus of the course. (Prerequisites: CMAF-2340, CMAF-2750, and two CMAF or FILM courses at the 3000 level. (May be repeated for credit if the topics are different.)

CMAF-4950. Directed Reading

Intended for students with special interest in areas not covered in sufficient depth by other courses. (To be taken only with permission of instructor and Department Head or delegate in Communication, Media and Film) (Normally, CMAF-4950 may be taken no more than a total of two times combined.)

CMAF-4990. Internship II

Application of communication skills and knowledge in work experience situations. Offered on a Pass/Non-Pass basis (Prerequisites: CMAF-3990, a cumulative GPA of 70%, and approval of instructor.) (This course may be taken twice for credit). (This is an experiential learning course.)

FILM COURSES

FILM-XXXX courses are jointly offered with the School of Creative Arts (SoCA). See School of Creative Arts for course listing.

DRAMATIC ART

PROGRAM REGULATIONS

1. Dramatic Art DRAM-1000 (Introduction to Theatre and Performance Studies I) and DRAM-2000 (Introduction to Theatre and Performance Studies II) are requirements for all first-year Dramatic Art majors.
2. Non-majors wishing to take a Dramatic Art course as an option may enter Dramatic Art courses (with the exception of those which are further restricted only to BFA. Acting or Drama in Education and Community students) only with the consent of the instructor.
3. Only 3rd and 4th year students may enrol in Production Problems with the consent of the Director of the School. Dramatic Art students may enrol in Directed Studies courses only with the consent of the instructor.
4. BFA students may not proceed to the next level without completing all core Dramatic Art course requirements of the previous level. Performance courses must be taken in sequence.
5. Refer to the Policy on Advanced Standing and Credit Transfer at www.uwindsor.ca/policies for information on Dramatic Art Transfer Credit Regulation (for workshop/classes offered by theatre/production professionals).

All students majoring in Dramatic Art programs are strongly advised to seek academic advising prior to registration each term.

Requirements for degree programs in Dramatic Art make reference to the following groups of courses:

Group A - Performance Related Courses: DRAM-2250, DRAM-2350, DRAM-2440, DRAM-2770, DRAM-2780, DRAM-2840, DRAM-3100, DRAM-3440, DRAM-3510, DRAM-3520, DRAM-4210, and DRAM-4490.

Group B - Theatre History Courses: DRAM-1300, DRAM-2300, DRAM-3350, DRAM-3330, DRAM-4390, and DRAM-4690.

Group C - Technical/Design Courses: DRAM-1170, DRAM-1180, DRAM-2110, DRAM-2130, DRAM-2150, DRAM-2170, DRAM-3150, DRAM-3170, DRAM-2500, DRAM-3190, and DRAM-4520.

PROGRAMS

General Bachelor of Arts in Drama

Note: As of Fall 2014, there are no direct admissions from High School. Students will be applying directly to the Honours program.

Degree Requirements

Total courses: thirty.

(a) 15 courses, including DRAM-1000, DRAM-1170 and DRAM-2000; plus one course from each of groups A, B, and C; and nine additional Dramatic Art courses as chosen in consultation with a Dramatic Art program advisor.

- (b) GART-1500, GART-1510;
- (c) eight courses from any area of study, excluding Dramatic Art;
- (d) five courses from any area of study, including Dramatic Art.

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Honours Bachelor of Arts in Drama (with/without Co-op)

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

- (a) twenty courses, including DRAM-1000, DRAM-1170 and DRAM-2000; plus one course from each of groups A, B, and C; and fourteen additional Dramatic Art courses as chosen in consultation with a Dramatic Art program advisor.
- (b) two courses from Social Sciences;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Arts.
- (e) GART-1500, GART-1510;
- (f) two English courses as recommended by an advisor in Dramatic Art;
- (g) four courses from Arts, Languages, Social Sciences, and Science, including Dramatic Art;
- (h) six courses from any area of study, excluding Dramatic Art.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Honours Bachelor of Arts in Drama for Graduates of the Theatre Arts Ontario College Advanced Diploma

Admission Requirements

Graduates of the three-year Theatre Arts Ontario College Advanced Diploma (MCU Code 61911) with a cumulative average of a B (3.0 or 75%) are eligible for admission into the BA Honours Drama through this degree completion Pathway.

Degree requirements

Total courses: 20

- (a) twelve courses, including one course from each of groups B and C; and ten additional Dramatic Art courses as chosen in consultation with a Dramatic Art program advisor;
- (b) two English courses as recommended by an advisor in Dramatic Art;
- (c) six courses from any area of study, excluding Dramatic Art.

Courses used to calculate the major average are: courses taken in the major area of study.

Honours Bachelor of Arts in Drama for Graduates of the Music Theatre Performance Ontario College Advanced Diploma

Admission Requirements

Graduates of the three-year Music Theatre Performance Ontario College Advanced Diploma (MCU Code 61912) with a cumulative average of a B (3.0 or 75%) are eligible for admission into the BA Honours Drama through this degree completion Pathway.

Degree requirements

Total courses: 20

- (a) twelve courses, including one course from each of groups B and C; and ten additional Dramatic Art courses as chosen in consultation with a Dramatic Art program advisor;
- (b) two English courses as recommended by an advisor in Dramatic Art;
- (c) six courses from any area of study, excluding Dramatic Art.

Courses used to calculate the major average: courses taken in the major area of study.

Honours Bachelor of Arts in Drama in Education and Community with concentration in Applied Theatre (with/without Co-op)

This program is designed for those students interested in pursuing future careers in the educational and developmental fields such as elementary classroom teachers and secondary theatre arts teachers; special education teachers; drama consultants; play and recreational leaders in the community; and specialists in theatre for young audiences. Field work will be assigned only if a student is assessed to have suitable personal qualities as well as academic qualifications.

Students wishing to obtain certification from the Ontario College of Teachers must enrol in a Faculty of Education upon the successful completion of this program. Drama in Education and Community students may select courses in Visual Arts. To do so, they must apply to Visual Arts during the Winter term of their first year. Their requests will be reviewed by interview and/or portfolio.

A concentration of six courses in a second teachable subject is advisable for students wishing to apply to a Faculty of Education. Students wishing to pursue a career in teaching are strongly advised to consult an academic advisor.

Admission Requirements

All candidates must meet the requirements for admission to the University of Windsor.

Enrolment is limited.

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

(a) twenty courses, including DRAM-1000, DRAM-1600, DRAM-1610, DRAM-2000, DRAM-2250, DRAM-2600, DRAM-2610, DRAM-2770, DRAM-2840, DRAM-3600, DRAM-3710, DRAM-2670, and DRAM-4790; plus two of DRAM-3780, DRAM-4700, DRAM-4710, and DRAM-4790; and five additional Dramatic Art courses to be identified in consultation with a Dramatic Art program advisor.

(b) two courses from Social Science;

(c) two courses from Languages or Science;

(d) two courses from any area of study, excluding Arts.

(e) GART-1500, GART-1510;

(f) two English courses. (Recommended: ENGL-1005 (may be repeated if topics differ));

(g) two Psychology courses: Required: PSYC-1150, PSYC-1160)

(h) eight additional courses from any area of study.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Standing Required for Continuation in the Program and for Graduation

In addition to complying with the general university regulations (Standing Required for Continuation in Programs: Cumulative Average Requirement: 60%; Major Average Requirement: 70%), in order to advance in the Drama in Education and Community program, students must obtain a minimum grade of 63% in all Dramatic Art courses.

Under exceptional circumstances, and with permission of the Academic Standing Committee, a student may be permitted to upgrade. If the student obtains a grade of 63% or better in the deficient course(s), and a major average of 70% or better, the student may be re-interviewed for the Drama in Education and Community program.

Grades will be reviewed at the end of each semester, and students who do not achieve the minimum grade of 63% in all Dramatic Art courses will be required to withdraw from the program. These students may transfer into the B.A. Drama program.

Combined Honours Bachelor of Arts in Dramatic Art

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements in the order presented, to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) Dramatic Art: DRAM-1000, DRAM 1170 and DRAM-2000, plus thirteen courses as recommended by a Dramatic Art program advisor including at least one at the 3000 level or above.

(b) Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500, GART-1510;

(d) two courses from Social Sciences;

(e) two courses from Languages or Science;

(f) two courses from any area of study, excluding Arts.

(g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Bachelor of Fine Arts (BFA) in Dramatic Art - Acting

(As of Fall 2025, there are no new admissions to the Bachelor of Fine Arts (BFA) in Dramatic Art program.)

The Bachelor of Fine Arts (Acting) program is available only to those who have successfully auditioned and been invited to study for an eventual career in the professional theatre. This intensive program requires four years of study. Students develop performance techniques through courses in acting, voice, interpretation, improvisation, and movement. They are also exposed to training from professional Canadian theatre artists who conduct workshops ranging in length from one day to six weeks. All BFA. (Acting) students participate in University Players productions. This professional program is designed for those students wishing to pursue a career in professional theatre, television, or film. It is also designed to prepare students to pursue graduate work and related arts. Transfer credit articulation agreements with the National Theatre School, Humber College, and George Brown College may allow graduates of their three-year Theatre Performance programs to obtain advanced standing.

Degree Requirements

Total courses: forty-two

(a) twenty-nine courses, consisting of DRAM-1000, DRAM-1200, DRAM-1210, DRAM-1260, DRAM-1270, DRAM-1280, DRAM-1290, DRAM-2000, DRAM-2200, DRAM-2210, DRAM-2230, DRAM-2240, DRAM-2260, DRAM-2270, DRAM-2280, DRAM-3210, DRAM-3220, DRAM-3230, DRAM-3240, DRAM-3260, DRAM-3270, DRAM-4200, DRAM-4290, and DRAM-4510; plus DRAM-4530 taken twice; plus three of DRAM-1300, DRAM-2300, DRAM-3330, DRAM-3350, or DRAM-4390, two of which must be at the 3000 or 4000 level.

(b) GART-1500, GART-1510;

(c) two of GRST-2111 when the topic is dramatic literature (may be repeated for credit if topics differ), ENGL-1005, when the topic is dramatic literature (may be repeated for credit if topics differ), ENGL-2030, ENGL-2510 when the topic is dramatic literature (may be repeated for credit if topics differ), ENGL-2520 when the topic is dramatic literature (may be repeated for credit if topics differ), ENGL 2530, any ENGL-3xxx course when the topic is dramatic literature (may be repeated for credit if topics differ), or FREN 3540, FREN 3830;

(d) two additional English courses, including any not already selected from the previous list;

(e) three courses from any area of study, excluding Dramatic Art;

(f) three courses from any area of study, including Dramatic Art;

(g) DRAM-2750***.

***DRAM-2750 will not be counted in the major average for the BFA.

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Standing Required for Continuation in the Program and for Graduation

In addition to complying with the general university regulations (Standing Required for Continuation in Programs: Cumulative Average Requirement: 60% Major Average Requirement: 70%), in order to advance in the BFA program, students must obtain a minimum grade of 65% in all Dramatic Art courses completed in the 1st year and a minimum grade of 70% in all Dramatic Art courses completed in the 2nd, 3rd, and 4th years. Grades will be reviewed at the end of each semester.

Students who do not achieve the minimum grades will be required to withdraw from the program. These students may transfer into the BA Dramatic Art program. Under exceptional circumstances, and with permission of the Academic Standing Committee, a student may be permitted to continue in the BFA program.

Concurrent General Bachelor of Arts (Drama)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between the School of Dramatic Art and the Faculty of Education. See Faculty of Education for program requirements.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) – Dramatic Art

Major Concentration: DRAM-1000; DRAM-2000; one courses from each of Category A, B, and C; seven course selected in association with a Dramatic art advisor.

Minor Concentration: DRAM-3350, DRAM-3330, four additional courses. (No more than two courses at the 1000-level.)

DRAMATIC ART COURSES

Not all courses listed will necessarily be offered each year. Courses are three hours a week (3.00 credit hours) unless otherwise indicated.

DRAM-1000. Introduction to Theatre and Performance Studies I

Introduction to the Process of Theatre and Performance Studies. Several of the following topics will be covered: play and performance analysis; genre and style; alternative articulations of performance; theories and process of production design; a survey of technical practices; and communication and collaboration. Introduction to Theatre and Performance Studies is a two-part sequence, required for majors in all School of Dramatic Art programs. A laboratory assignment supporting the production schedule of University Players is required for DRAM-1000. This course must be successfully completed in the first year of the program. (Laboratory hours by arrangement). (Open to non-majors). (This is an experiential learning course.)

DRAM-1170. Drawing for Theatrical Design

Introductory course in the theory and practice of drawing for the theatre with practical, historical and aesthetic aspects. This is a skills development course that involves the exploration of a variety of concepts, techniques and media used for visual expression. Emphasis is placed on observation, spatial relationships and effective visual communication in a two-dimensional format. This course must be completed by all BA(H) and RAMACOMM students in their first year. Open to non-drama majors.

DRAM-1180. Rendering for the Theatre

Introductory course confronting challenges in creating colourized renderings for the theatre. Areas covered will include common and innovative materials, colour theory and psychology, script and character analysis, textural creation, sheen, reflections, and their computer enhancement. (Pre-requisite: DRAM-1170) (Restricted to Dramatic Art majors.)

DRAM-1200. Voice for the Actor I

An introduction to the study and practice of voice and speech for the theatre. (Co-requisites: DRAM-1260, DRAM-1280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-1210. Voice for the Actor II

Continuation of DRAM-1200. The study and practice of voice and speech for the theatre. (Restricted to BFA Acting students only.) (Prerequisite: DRAM-1200.) (Co-requisites: DRAM-1270, DRAM-1290.) (Laboratory hours by arrangement.)

DRAM-1260. Movement for the Actor I

An introduction to the study and practice of movement for the actor. (Co-requisites: DRAM-1200, DRAM-1280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-1270. Movement for the Actor II

Continuation of DRAM-1260. The study and practice of movement for the actor. (Prerequisite: DRAM-1260.) (Co-requisites: DRAM-1200, DRAM-1280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-1280. Improvisation and Introduction to Acting for the Theatre I

An introduction to the study and practice of acting with an emphasis on the basic elements of improvisation. (Co-requisites: DRAM-1200, DRAM-1260.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-1290. Improvisation and Introduction to Acting for the Theatre II

Continuation of DRAM-1280. The study and practice of basic elements of acting and improvisation (Prerequisite: DRAM-1280.) (Co-requisites: DRAM-1210, DRAM-1270.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-1300. Theatre History I

Critical approaches to the main elements of Greek and Roman theatre, medieval western and Asian theatre, Italian, Spanish, and English Renaissance Theatre. (Open to non-Dramatic Art majors.)

DRAM-1600. Introduction to Drama in Education and Community I

An introduction to the principles, theories and applications of Drama in Education and Community with an emphasis on creativity, storytelling, and the developmental aspects of play. (Restricted to Drama in Education and Community Concurrent Drama/BEd_Majors, or consent of instructor.)

DRAM-1610. Introduction to Drama in Education and Community II

A continuing study of Drama in Education and Community. (Prerequisite: DRAM-1600 or consent of instructor.) (Restricted to Drama in Education and Community and Concurrent Drama/BEd Majors, or consent of instructor.)

DRAM-2000. Introduction to Theatre and Performance Studies II

Continuation of DRAM-1000. Several of the following topics not covered in DRAM-1000 will be covered in DRAM-2000: play and performance analysis; genre and style; alternative articulations of performance; theories and process of production design; a survey of technical practices; and communication and collaboration. Introduction to Theatre and Performance Studies is a two-part sequence, required for majors in all School of Dramatic Art programs. A laboratory assignment supporting the production schedule of University Players is required for DRAM-2000. This course must be successfully completed in the first year of the program. (Laboratory hours by arrangement). (Open to non-majors) (This is an experiential learning course.)

DRAM-2100. Speech Communication to Inform

A beginning course designed to help the student to develop poise and confidence in communicating information. (2 lecture hours and 1 laboratory hour per week.) (Not available on an Audit basis.)

DRAM-2110. Scenic Design I

Introduction to the technical aspects of design for the stage; communicating the design idea through basic drafting techniques. (Prerequisite: DRAM-1180, or consent of instructor.)

DRAM-2130. Scene Painting for the Theatre

Laboratory and demonstration course with an emphasis on materials, texturing techniques, and the creation of three-dimensional effects.

DRAM-2150. Lighting Design I

The introduction and application of basic principles, including electricity, instruments, and design theory. (Laboratory hours by arrangement.)

DRAM-2170. Costume Design

Introduction to the principles, theory and practice of costume design for theatre, film and television This course involves the practical, historical and aesthetic exploration of the design process, text, character analysis, costume rendering and collaboration. (Prerequisite: DRAM-1170 (or consent of instructor). Open to non-drama majors.

DRAM-2190. Gender, Movement and Performance

This course explores how people come to know themselves and others through their bodies. Students investigate movement as a cultural message and explore how stereotypes connected to gender, race, sexuality, and ability are created and contested through the body. Prerequisite: WGST-1000 or DRAM-1000 or with consent of the instructor. (Cross-listed as a Social Science course in Women and Gender Studies, WGST-2190)

DRAM-2200. Voice for the Actor III

Continuation of DRAM-1210. The study and practice of voice and speech for the theatre. (Prerequisite: DRAM-1210.) (Co-requisites: DRAM-2230, DRAM-2260, DRAM-2280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-2210. Voice for the Actor IV

Continuation of DRAM-2200. The study and practice of voice and speech for the theatre. (Prerequisite: DRAM-2200.) (Co-requisites: DRAM-2230, DRAM-2260, DRAM-2280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-2230. Acting for the Theatre I

Continuation of DRAM-1290. The emphasis will be on acting exercises, script analysis and scene work. (Prerequisite: DRAM-1290.) (Co-requisites: DRAM-2200, DRAM-2260, DRAM-2280.) (Restricted to BFA Acting students only.) (May be taken twice with the consent of instructor if assignments or their treatments are significantly varied.)

DRAM-2240. Acting for the Theatre II

Continuation of DRAM-2230. The emphasis will be on the analysis and performance of scenes from plays. (Prerequisite: DRAM-2230) (Co-requisites: DRAM-2200, DRAM-2260, DRAM-2280.) (Restricted to BFA Acting students only.) (May be taken twice with the consent of instructor if assignments or their treatments are significantly varied.)

DRAM-2250. Introductory Acting I

A practical study of the fundamentals of acting experienced through acting exercises. (Not open to BFA Acting students.)

DRAM-2260. Movement for the Actor III

Continuation of DRAM-1270. The study and practice of movement for the actor. (Prerequisite: DRAM-1270.) (Co-requisites: DRAM-2200, DRAM-2230, DRAM-2280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-2270. Movement for the Actor IV

Continuation of DRAM-2260. The study and practice of movement for the actor. (Prerequisite: DRAM-2260.) (Co-requisites: DRAM-2200, DRAM-2230, DRAM-2280.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-2280. Psychophysical Acting Techniques

Exercises in improvisation designed to support the rehearsal process for scripted works (Prerequisite: DRAM-1290). (Co-requisites: DRAM-2200, DRAM-2230, DRAM-2260.) (Restricted to BFA Acting majors only.) (Laboratory hours by arrangement.)

DRAM-2290. Dance for the Theatre

A practical course in a variety of dance styles for the theatre. (Not open to BFA Acting Majors except by consent of instructor.) (Laboratory hours by arrangement.)

DRAM-2300. Theatre History II

Critical approaches to the main elements of theatre of the seventeenth, eighteenth, and nineteenth centuries. (Open to non-Dramatic Art majors.)

DRAM-2350. Introductory Acting II

Emphasis is on acting exercises based on script analysis. (Prerequisite: DRAM-2250, or consent of instructor.) (Not open to BFA Acting students.)

DRAM-2440. Directing I

An examination of the principles of play direction, including the role of the director, choosing plays, casting, analysis, picturization and composition, rehearsal techniques, and scene presentation. (Prerequisite: DRAM-2250, or consent of instructor.) (Laboratory hours by arrangement.)

DRAM-2500. Stage Makeup

An introduction to the theory and practice of theatrical make-up application. Topics covered will include basic stage make-up, corrective make-up and aging. (Restricted to Drama majors only.)

DRAM-2600. Drama in the Classroom: Principles and Theories

A course in the use of drama as it relates to the school curriculum and the community. (Prerequisite: DRAM-1610.) (Restricted to Drama in Education and Community and Concurrent Drama/BEEd Majors only.) (This is an experiential learning course).

DRAM-2610. Drama in the Classroom: Applications I

Applications of drama as they relate to the curriculum for Grades K through Six. Completion of a classroom contact is required. (Field contacts are with the consent of Drama in Education and Community instructors and may be outside class time.) (Prerequisite: DRAM-2600 or consent of instructor.) (Restricted to Drama in Education and Community and Concurrent Drama/BEEd Majors only.) (This is an experiential learning course.)

DRAM-2670. Applied Theatre

An introduction to the theory and practice of Applied Theatre to promote and maintain health and well-being for individuals and communities. Focus will be on developing skills in performance, leadership and facilitation in a wide range of community settings. (Prerequisite: DRAM-2000 or consent of instructor.) (This is an experiential learning course).

DRAM-2700. Speaking Truth to Power: Voice and Activism

An examination of contemporary campaigns to improve the standard of living of Canadians. Students learn to conduct interviews and evaluate the effectiveness of social justice messages. (Prerequisite: Semester 3 or above standing.) (Also offered as WORK-2700, SJST-2700, and CMAF-2700)

DRAM-2720. The Creative Process

An introduction to the creative process through an exploration of various theories, principles, and techniques of selected theorists and innovative thinkers. Students may explore such topics as: Creative Problem Solving, Idea Generation, and Innovation. Through academic study and practical work, students will explore ways of developing their own creative potential and applying it to their daily lives. (Not open to 1st year students.)

DRAM-2750. Principles and Practices of Arts Management I

Structures and functions of arts organizations. Examination of core competencies as applied to arts organizations: marketing and publicity, financial management, various forms of fund-raising, board and volunteer management, and interaction with Unions and Associations. (This is an experiential learning course).

DRAM-2760. Principles and Practices of Arts Management II

A continuation of the study of Arts Management I. An exploration of the concepts and practices of organizational design, human resources, leadership, legal concerns, strategic planning, Board governance, policy making and advocacy relating to management of the not for profit and non-profit Arts sectors in Canada today. (Prerequisite: DRAM-2750)

DRAM-2770. Improvisation

Involves the development of performance skills through a practical application of theatre games and basic elements of improvisation with emphasis on self-development. (Prerequisite: DRAM-1000 and DRAM-2000; or consent of instructor.)

DRAM-2780. Improvisation: Working with Text

A continuation of the study of improvisation. Involves practical applications of improvisation to improvised scenes and written texts. (Prerequisite: DRAM-2770 or consent of instructor.) (Individual course sections may be restricted to Drama in Education and Community students only.)

DRAM-2840. Creative Movement and Voice I

The study and practice of movement and voice as they relate to the individual, theatre, and the classroom. Emphasis may be on one or both disciplines as necessary. (Prerequisite: DRAM-1000 or consent of instructor.) (Laboratory hours by arrangement.)

DRAM-3100. Play Creation

A study of the principles and techniques involved in play creation, culminating in a final staged reading or performance. Modules may include playwriting, devising, adaptation, dramaturgy, and translation. (Prerequisite: DRAM-1000 and DRAM-2000 or by permission of the instructor.)

DRAM-3150. Stage Management

A study of the role of the theatrical stage manager. Particular emphasis will be given to rehearsal organization and communication, cue notation, crew supervision, safety issues, Canadian Actors' Equity guidelines, and managing the production while in technical/dress rehearsals and performance. (Prerequisite: DRAM-2000, or consent of the instructor.)

DRAM-3170. Costume Design II

Continuation of DRAM-2170, involving theoretical and practical design projects; formal presentation of costume designs. (Prerequisite: DRAM-2170, or consent of the instructor.)

DRAM-3190. Studies in Design

Designed for the advanced student who wishes to explore further studies in scenic, lighting, or costume design. (Prerequisite: consent of a faculty advisor.) (May be repeated for credit if assignments or their treatments are significantly varied.)

DRAM-3210. Acting-Work in Progress I

Rehearsal project in a performance style selected by Dramatic Art. The play or scenes from plays become the catalyst for the discovery of the style related to its period. (Prerequisite: DRAM-2240.) (Co-requisites:

DRAM-2200, DRAM-2230, DRAM-2260.) (Restricted to BFA Acting students only.) (May be repeated for credit if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-3220. Acting-Work in Progress II

Rehearsal project in a performance style selected by Dramatic Art. The play or scenes from plays become the catalyst for the discovery of the style related to its period. (Prerequisite: DRAM-2240) (Co-requisites: DRAM-3260 or DRAM-3270, if offered.) (Restricted to BFA Acting students only.) (May be repeated for credit if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-3230. Acting-Work in Progress III

Rehearsal project in a performance style selected by Dramatic Art. The play or scenes from plays become the catalyst for the discovery of the style related to its period. (Prerequisite: DRAM-2240.) (Co-requisites: DRAM-3260 or DRAM-3270, if offered.) (Restricted to BFA Acting students only.) (May be repeated for credit if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-3240. Performing Shakespeare

A course in the acquisition of the skills required to interpret and perform Shakespearean text through the rehearsal and public performance of a play or scenes from a Shakespearean play or plays. (Prerequisite: DRAM-2240) (Corequisite: DRAM-3260 or DRAM-3270, if offered) (Restricted to BFA students only.) (May be repeated for credit if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-3250. Intermediate Acting III

Emphasis is on the development of situation and characterization. The period to be studied may vary from year to year. (Prerequisite: DRAM-2350 or consent of instructor.) (Not open to BFA Acting students.)

DRAM-3260. Voice and Movement for the Actor I

Application of voice and movement techniques as they relate to performance assignments. Emphasis may be on one or both disciplines as necessary. (Prerequisite: DRAM-2270.) (Co-requisites: DRAM-3210 and DRAM-3220 or DRAM-3230 and DRAM-3240.) (May be taken twice for credit.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-3270. Voice and Movement for the Actor II

Advanced application of voice and movement techniques as they relate to performance assignments. Emphasis may be on one or both disciplines as necessary. (Prerequisite: DRAM-2210.) (Co-requisites: DRAM-3210 and DRAM-3220 or DRAM-3230 and DRAM-3240.) (Restricted to BFA Acting students only.) (Laboratory hours by arrangement.)

DRAM-3330. Canadian Theatre History

A study of the evolution of theatre in Canada. (Open to non-Dramatic Art majors.)

DRAM-3350. Theatre from the Twentieth Century to the Present Day

Critical approaches to major theatrical movements and experiments in theatre during the twentieth and twenty-first centuries. (Open to non-Dramatic Art majors.)

DRAM-3440. Directing II

A practical course involving rehearsal techniques and the presentation of scenes or one-act plays. (Prerequisite: DRAM-2230 and DRAM-2240; or DRAM-2440 or consent of instructor.) (Laboratory hours by arrangement.)

DRAM-3510. Production Problems

Advanced explorations of current trends, materials, or practices in performance or non-performance, with an emphasis on problem solving techniques. The student will research and develop solutions to one or more production problems and present his/her findings in a seminar or performance situation. (Prerequisite: A minimum of two courses and/or equivalent experience in the subject area(s) explored and, consent of a faculty advisor and Director of the School.) (Hours by arrangement.) (May be repeated for credit if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-3520. Production Problems

Advanced explorations of current trends, materials, or practices in performance or non-performance, with an emphasis on problem solving techniques. The student will research and develop solutions to one or more production problems and present his/her findings in a seminar or performance situation. (Prerequisite: A minimum of two courses and/or equivalent experience in the subject area(s) explored and, consent of a faculty advisor and the Director of the School.) (May be repeated for credit if assignments or their treatments are significantly varied.) (Hours by arrangement.) (This is an experiential learning course.)

DRAM-3530. Production Problems: Stage Management

A theoretical and practical course examining the duties and responsibilities of the theatrical stage manager, including rehearsal procedures, protocol and etiquette, assembling the production script, cuing methods and notations, and security/safety regulations. (Prerequisite: DRAM-3150 plus previous experience as an assistant stage manager and consent of a faculty advisor.) (May be repeated for credit if assignments or their treatments are significantly varied.) (Laboratory hours by arrangement.) (This is an experiential learning course.)

DRAM-3600. Drama in the Classroom: Applications II

Applications of drama as they relate to the curriculum for Grades Seven through Twelve. Completion of a classroom contact is required. (Field contacts are with the consent of Drama in Education and Community instructors and may be outside class time.) (Prerequisite: DRAM-2610 or consent of instructor.) (Restricted to Drama in Education and Community and Concurrent Drama/BEEd Majors only.) (This is an experiential learning course.)

DRAM-3710. Literacy in Action

A course in the use of drama as it relates to the development of literacy in classroom and community settings. (Prerequisite: DRAM-2610.) (Restricted to Drama in Education and Community students only.)

DRAM-3780. Theatre for Social Action

A study of the theory, practice, and development of popular, community, and collective theatre. Students will examine various approaches to theatre for social action through a combination of academic study and practical exercises in popular theatre techniques. (Open only to 3rd and 4th year Dramatic Art majors.) (May be repeated for credit twice if assignments or approaches are significantly different.)

DRAM-3980. Internship I: Arts Management Certificate

Completion of field placement in an arts organization. (Prerequisite: DRAM-2750 with a minimum grade of 70%.) (This is an experiential learning course.)

DRAM-3990. Internship II: Arts Management Certificate

Completion of second field placement in an arts organization involving in-depth analysis of the organization. (Prerequisite: DRAM-2750 and DRAM-3980 with a minimum grade of 70%.) (This is an experiential learning course.)

DRAM-4000. Style in Theatre

An exploration of selected theatrical styles. Topics and materials may vary from year to year. (Students may use this course number to register for the Stratford Summer Campus. Contact Dramatic Art for further information.) (May be repeated for credit twice if assignments or approaches are significantly varied.)

DRAM-4200. Graduation Recital

The selection, preparation, and presentation of suitable audition material in a recital situation. An introduction to the business of being a professional actor will be addressed. (Prerequisite: All required first, second, and third year BFA performance courses; restricted to fourth-year BFA Acting students only.) (Laboratory hours by arrangement.) (This is an experiential learning course.)

DRAM-4210. Television Performance

Introduction to basic television performance techniques. Each student performs behind and in front of the camera although the emphasis is on performance. (Prerequisite: DRAM-2250 or DRAM-2350, or DRAM-3230 and DRAM-3240. or by consent of instructor. Restricted to third- and fourth-year Dramatic Art and Communication Studies students in the Combined Dramatic Arts and Communication Studies program, and 3rd and 4th year Dramatic Art students.) (May be taken for credit twice.)

DRAM-4290. Character Study

Independent work in researching, developing, and presenting character projects based on life studies. (Restricted to Fourth year BFA Acting students only.) (May be taken for credit twice with consent of instructor if assignments or their treatments are significantly varied.) (This is an experiential learning course.)

DRAM-4390. Directed Studies in History, Theory, or Theatre Administration

Designed for the advanced student who wishes to explore a special area of history, theory, or theatre administration with a faculty advisor. (Prerequisite: consent of a faculty advisor.) (May be taken for credit twice if assignments or their treatments are significantly varied.) (Hours by arrangement.)

DRAM-4490. Directed Studies in Direction

Designed for the advanced student who wishes to explore a special area of direction with a faculty advisor. (Prerequisite: consent of the faculty advisor.) (May be taken for credit twice.)

DRAM-4510. Advanced Shakespeare Performance

An extension and intensification of 24-324 Acting Work in Progress IV Performing Shakespeare. An advanced course in the acquisition of the skills required to interpret and perform Shakespearean text through the rehearsal and public performance of a play or scenes from a Shakespearean play or plays. (Co-requisites: 24-420 and 24-429, if offered) (Restricted to B.F.A. acting students only.) (This is an experiential learning course.)

DRAM-4520. Directed Studies in Production

An opportunity for the advanced student to research, develop, and execute a major technical/design assignment under the supervision of a faculty advisor. (May be repeated for credit if assignments or approaches are significantly varied.) (Prerequisites: A minimum of three production/design courses,

DRAM-3520, and/or equivalent experience in the subject area(s) explored, and consent of a faculty advisor and the Director of the School.) (Hours by arrangement.) (This is an experiential learning course).

DRAM-4530 to DRAM-4580. Directed Studies in Performance

The emphasis in these courses will be a series of plays selected and produced by Dramatic Art or by a theatre company outside of the University as approved by Dramatic Art. Students will research, develop, and execute a role in the performance situation under the supervision of a faculty advisor-director. (May be taken for credit twice.) (Prerequisites: All required first, second, and third year BFA performance courses: DRAM-1200, DRAM-1210, DRAM-1260, DRAM-1270, DRAM-1280, DRAM-1290, DRAM-2200, DRAM-2210, DRAM-2230, DRAM-2240, DRAM-2260, DRAM-2270, DRAM-2280, DRAM-3210, DRAM-3220, DRAM-3230, DRAM-3240, DRAM-3260, and DRAM-3270.) (This is an experiential learning course.)

DRAM-4690. Directed Studies in Cross-Cultural Theatre

Designed for the advanced student who wishes to explore a special area of theatre of a unique culture with a faculty advisor. (Prerequisite: previous experience/courses in the subject area(s) explored and consent of a faculty advisor.) (Restricted to students in Semester 5 and above.) (May be taken for credit twice.)

DRAM-4700. Theatre for Young Audiences

Research and practical work in the history, principles, and techniques of theatrical performance by, with, and for young audiences. Students may explore international perspectives on topics such as: Theatre in Education, Children's Theatre, Theatre for Youth, Collective Creation, and Devised Theatre. (Only open to 3rd and 4th year Dramatic Art majors.) (Prerequisites: DRAM-2250.) (May be repeated for credit twice if assignments or approaches are significantly varied.) (This is an experiential learning course.)

DRAM-4710. Drama and Community: Applications

A project-based practical course in the principles and techniques of drama and theatre as they relate to community, educational, and healthcare settings. Students will develop and deliver projects based on topics such as: Drama/Theatre and Disabilities, Theatre in Education, Socio-political Theatre, Popular Theatre, and Theatre for Young Audiences. Projects will be driven by the current research interest and involvement of the instructor or the need and interests of community groups. (Open only to 3rd and 4th year Dramatic Art majors or by consent of instructor.) (May be repeated for credit if assignments or approaches are significantly varied.)

DRAM-4790. Directed Studies in Drama in Education and Community

Independent, directed study in a special area of interest in drama in education under the supervision of a faculty advisor. (May be taken for credit twice.) (Prerequisite: DRAM-3710 and DRAM-2670 or consent of the faculty advisor.) (Placement hours by arrangement.) (This is an experiential learning course.)

ENGLISH AND CREATIVE WRITING

PROGRAM REGULATIONS

No more than five 1000-level English courses may count toward the Major requirements for a degree program in English.

ENGL-1001 does not count toward the English major or minor or IAS requirements.

ENGL-4710 is a two-term (6.0 credit) courses that take place over two consecutive semesters.

The following courses require portfolio application or permission of instructor: ENGL-3710, ENGL-4003, ENGL-4004, ENGL-4710.

Any major, minor, or IAS student, even if not in the English and Creative Writing degree program, may submit a portfolio to take any of the Creative Writing courses for credit.

ENGL-1006 does not count as a substitute for ENGL-3710, or ENGL-4710.

PROGRAMS

General English

Degree Requirements

Total courses: thirty.

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) any four ENGL courses at 3000-level or 4000-level;
- (h) two courses from Social Sciences;
- (i) two courses from Languages or Science;
- (j) two courses from any area of study, excluding Arts;
- (k) GART-1500;
- (l) four courses from any area of study, including English;
- (m) seven courses from any area of study, excluding English

Note: Five (5) 1000-level English courses may count toward the major.

Courses used to calculate the major average are: courses listed under requirements (a) to (g), and any courses taken in the major area of study.

Honours English (with/without Co-op)

Degree Requirements

Total courses: forty (Plus three work terms for students in the Co-op program).

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) ten additional ENGL courses, eight of which must be at the 3000 or 4000 level;
- (h) any two ENGL courses at the 4000-level;
- (i) two courses from Social Sciences;
- (j) two courses from Languages or Science;
- (k) two courses from any area of study, excluding Arts;
- (l) GART-1500;
- (m) four courses from any area of study, including English;
- (n) nine courses from any area of study, excluding English

Note: Five (5) 1000-level English courses may count toward the major

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirements (a) to (h), and any courses taken in the major area of study.

Honours English and Creative Writing

Degree Requirements

Total courses: forty.

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) six additional ENGL courses, five of which must be at the 3000 or 4000 level;
- (h) one of ENGL-4001, ENGL-4002, ENGL-4003, ENGL-4004;
- (i) ENGL-2710 (a 6.0-credit course), ENGL-3710, and ENGL-4710 (a 6.0-credit course);
- (j) two courses from Social Sciences;
- (k) two courses from Languages or Science;
- (l) two courses from any area of study, excluding Arts;

- (m) GART-1500;
- (n) four courses from any area of study, including English;
- (o) nine courses from any area of study, excluding English

Note: Five (5) 1000-level English courses may count toward the major

Courses used to calculate the major average are: courses listed under requirements (a) to (i), and any courses taken in the major area of study.

Combined Honours English

Degree Requirements

Total courses: forty.

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) eight additional ENGL courses, six of which must be at the 3000 or 4000-level;
- (h) one ENGL course at the 4000-level;
- (i) Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study;
- (j) two courses from Social Sciences;
- (k) two courses from Languages or Science;
- (l) two courses from any area of study, excluding Arts;
- (m) GART-1500;
- (n) additional courses from any area of study to a total of forty courses.

Note: Five (5) 1000-level English courses may count toward the major.

Courses used to calculate the major average are: courses listed under requirements (a) to (i), and any courses taken in the major area(s) of study.

Combined Honours English and Creative Writing

Degree Requirements

Total courses: forty.

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) any four additional ENGL courses, three of which must be at the 3000 or 4000-level;
- (h) ENGL-2710 (a 6.0-credit course), ENGL-3710, and ENGL-4710 (a 6.0-credit course);
- (i) Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study;

- (j) two courses from Social Sciences;
- (k) two courses from Languages or Science;
- (l) two courses from any area of study, excluding Arts;
- (m) GART-1500;
- (n) additional courses from any area of study to a total of forty courses.

Note: Five (5) 1000-level English courses may count toward the major.

Courses used to calculate the major average are: courses listed under requirements (a) to (i), and any courses taken in the major area(s) of study.

Concurrent General Bachelor of Arts (English)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between Department of English and Creative Writing and the Faculty of Education. See Faculty of Education for program requirements.

Minor in English

Required: a minimum of six English courses, including:

- (a) 2000-level: Any 3 ENGL courses
- (b) 3000-level: Any 2 ENGL courses
- (c) Any 1 additional ENGL course at any level

Note: ENGL 1001 does not count towards the English major or minor requirements

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - English

Major Concentration:

- (a) ENGL-1002, ENGL-1003, and ENGL-1004;
- (b) one of ENGL-2010, ENGL-2020, ENGL-2030, or ENGL-2040;
- (c) one of ENGL-2110, ENGL-2120, or ENGL-2130;
- (d) one of ENGL-2210, ENGL-2220, or ENGL-2230;
- (e) one of ENGL-2310, ENGL-2320, or ENGL-2330;
- (f) one of ENGL-2410, ENGL-2420, or ENGL-2430;
- (g) any four ENGL-courses at 3000-level.

Minor Concentration:

- (a) 2000-level: Any 3 ENGL courses
- (b) 3000-level: any 2 ENGL courses
- (c) Any 1 additional ENGL course at any level

Note: ENGL 1001 does not count towards the English minor requirements.

ENGLISH AND CREATIVE WRITING COURSES

Not all courses listed will be offered each year. All courses are three hours a week (3.0 credit hours) unless otherwise indicated. Students should consult the Departmental office or website for details of Topics and Seminar courses offered in a given year.

ENGL-1001. Composition

An introduction to the fundamentals of effective writing, including attention to rhetorical concepts of audience, purpose, context, planning, logical development, organization, format, and style. (Arts elective only; does not count for credit in English.)

A seminar focused on a specific topic in literary, cultural, language, or rhetoric studies. (Restricted to majors in English and IAS only.) (Prerequisite: Semester Five standing and three 3000-level English courses.) (May be repeated for credit if the topics are different.) (Credit cannot be obtained for both ENGL-4000 and ENGL-4119, ENGL-4129, ENGL-4139, ENGL-4149, ENGL-4159, ENGL-4169, ENGL-4179, ENGL-4189, ENGL-4199, ENGL-4209 or ENGL-4249 unless topic is different.)

ENGL-4001. Scholarship and Bibliography

A workshop in implementing methods of literary research and textual scholarship, including research techniques and bibliographic description, the study of editing procedures, and the examination of the historical and theoretical contexts of textual production. (Restricted to majors in English and IAS only.) (Prerequisite: Semester Five standing, and three 3000-level English courses.) (Not available on an Audit basis.) (Credit cannot be obtained for both ENGL-4001 and ENGL-3099.)

ENGL-4002. Writing Practicum

A project-based workshop course focused on both individual writing and collaborative projects geared towards the wider community (such as the Windsor non-profit sector and its clients). Topics may include writing for the non-profit sector, writing for radio, writing for start-ups, writing about music. (Restricted to majors in English and IAS only.) (Prerequisite: Semester Five standing, three 3000-level English courses.) (Not available on an Audit basis.) (May be repeated for credit if the topics are different.) (Credit cannot be obtained for both ENGL-4002 and ENGL-3979 or ENGL-3410.)

ENGL-4003. Editing Practicum

A workshop in the theory and practice of editing historical, scholarly, and creative texts for publication. Students will assist in current editorial projects of a publishing house or the Department. (Permission of the instructor required.) (Restricted to majors in English and IAS only.) (Not available on an Audit basis.) (Prerequisite: Semester Five standing, and three 3000-level English courses.) (Credit cannot be obtained for both ENGL-4003 and ENGL-3059.) (This is an experiential learning course.)

ENGL-4004. Publishing Practicum

A workshop in the theory and practice of book production starting with an edited manuscript and ending with the creation of a bound publication. Completed projects will be published through a professional Press, or in the format of a scholarly journal. (Permission of instructor required.) (Restricted to majors in English and IAS only.) (Not available on an Audit basis.) (Prerequisite: Semester Five standing, and three 3000-level English courses.) (Credit cannot be obtained for both ENGL-4004 and ENGL-3069.) (This is an experiential learning course.)

ENGL-4710. Creative Writing III

An advanced workshop that includes analyzing published texts and the peer review of student writing. (Requires portfolio application.) (Not available on an Audit basis.) (A 6.0-credit, Two-term course.) (Prerequisite: Semester Five standing, and three 3000-level English courses.)

ENGL-4900. Directed Readings

Students may, under exceptional circumstances, apply to undertake a Directed Reading after obtaining the support of an appropriate departmental supervisor. Candidates must then seek approval via written proposal justifying the need for the course. Proposals will be reviewed and approved or denied by the Department Head. (Not available on an Audit basis.) (Permission of instructor required.)

HISTORY

PROGRAM REGULATIONS

The major areas of concentration include Canadian, American, British, European, and Women's History. Courses are also offered which are designed to provide insight into current national or international issues. Additional offerings which have relevance to contemporary Canadian society include the History of Crime and Cities in North America. Students taking History as an option may select courses through the 3000 level. Permission for 4000-level courses is necessary unless these are required in an existing program.

General Information

The study of history provides skills essential to many careers - in teaching, law, business, museums, journalism, or public service. It develops critical thinking, research, and writing skills, using both old and new technologies, in a small department with ready access to professors. History is also fascinating, offering a window on various groups and perspectives that shaped the past, both in Canada and comparatively across the globe. Finally, studying the societies, politics, and ideas of past times sharpens the historical memory we can bring to issues of the present, informing and inspiring an active citizenship.

Course Outside of the Department Which May Be Counted Toward History Requirements

Up to four of the following courses may be used to satisfy the Major requirements for any history degree: GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, DRAM-1300, DRAM-2300, CMAF-2400, CMAF-2410, KINE-2400. (Please note, instructor's permission may be required.) No more than one of this list may be used to satisfy the requirements for a Minor in History.

PROGRAMS

BA General History

Degree Requirements

Total courses: thirty.

- (a) HIST-1030, HIST-2030;
- (b) 7 more History courses at the 1000 or 2000 Level, up to 2 of which may be 1000 Level;
- (c) 3 more History courses at the 3000 Level or higher.*
- (d) two courses from Arts;
- (e) two courses from Languages, Science, or one of each;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510;
- (h) four courses from any area of study, including History, but of which only one may be an additional 1000-level History course;
- (i) six courses from any area of study, excluding History.

*Up to four of the following courses may be used to satisfy the requirements under (b) and (c): GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, DRAM-1300, DRAM-2300, CMAF-2400, CMAF-2410, KINE-

2400. (Please note, instructor's permission may be required.) No more than one of this list may be used to satisfy the requirements for a Minor in History.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

BA Honours History (with/without Co-op)

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

- (a) HIST-1030, HIST-2030, and HIST-3030;
- (b) 8 more History courses at the 1000 or 2000 Level, up to 3 of which may be 1000 Level, and including at least one of HIST-1130, HIST-1140, HIST-2070, HIST-2460, and at least one of HIST-2100, HIST-2110, HIST-2120, HIST-2200, HIST-3100, HIST-3200, HIST-3210; *
- (c) 7 more History courses at the 3000 Level or higher, at least three of which must be at the 4000 Level.*
- (d) two courses from Arts;
- (e) two courses from Languages, Science, or one of each
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510;
- (h) six courses from any area of study, including History;
- (i) eight courses from any area of study, excluding History.

*Up to four of the following courses may be used to satisfy the requirements under (b) and (c): GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, DRAM-1300, DRAM-2300, CMAF-2400, CMAF-2410, KINE-2400. (Please note, instructor's permission may be required)

No more than one of this list may be used to satisfy the requirements for a Minor in History.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Combined BA Honours History Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) HIST-1030, HIST-2030, and HIST-3030;

- (b) 7 more History courses at the 1000 or 2000 Level, up to 3 of which may be 1000 Level, and including at least one of the following: HIST-1130, HIST-1140, HIST-2070, HIST-2460, and at least one of HIST-2100, HIST-2110, HIST-2120, HIST-2200, HIST-3100, HIST-3200, HIST-3210; *
- (c) 6 more History courses at the 3000 Level or higher, at least three of which must be at the 4000 Level
- (d) Course requirements -Other Subject: as prescribed by that area of study.
- (e) GART-1500, GART-1510;
- (f) two courses from Arts;
- (g) two courses from Languages, Science, or one of each
- (h) two courses from any area of study, excluding Social Sciences.
- (i) additional courses from any area of study to a total of forty courses.

*Up to four of the following courses may be used to satisfy the requirements under (b) and (c) : GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, DRAM-1300, DRAM-2300, CMAF-2400, CMAF-2410, KINE-2400. (Please note, instructor's permission may be required.) No more than one of this list may be used to satisfy the requirements for a Minor in History. Fourth year courses are restricted to History Majors and other students with at least semester 5 standing and permission of the instructor.

Courses used to calculate the major average are: courses listed under requirements (a) to (d), and any courses taken in the major area(s) of study.

Concurrent General Bachelor of Arts (History)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between Department of History and the Faculty of Education. See Faculty of Education for program requirements.

Minor in History

Required: six History courses, only one of which may be at the 1000 level, and two of which must be at the 3000 level or above. Students seeking a second teachable subject area in History are advised that they must take two courses in Canadian History.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - History

Major Concentration: HIST-1030 and HIST-2030; five 2000-level three 3000-level and two 4000-level courses.

Minor Concentration: one of HIST-1130, HIST-1140, or HIST-1240, two 2000-level courses, three 3000-level or above courses.

HISTORY COURSES

Not all courses listed will necessarily be offered each year. All courses are three hours a week (3.00 credit hours).

Some courses are labeled I and II. These numbers are meant to distinguish the subject matter. Except where specifically indicated, this does not imply the order in which the courses must be taken.

HIST-1030. Past to Present: Understanding History

This course is specifically designed for first semester history majors, to introduce them to the history department, different kinds of historical inquiry, and the basics of historical research. Further, it is designed to create a cohort of the new history majors, both through participating in this class together and by working in small groups.

HIST-1130. Europe Encounters the World: Facing Islam, 8th-15th Century

This course looks at the different forms of contact between Europeans and the rest of the world during the Middle Ages, focusing on conflict and coexistence with Islam. It will consider exchanges between civilizations, whether of an economic, cultural, artistic or spiritual nature. Topics include Muslim Spain, the Crusades, the Ottoman Empire and Venice.

HIST-1140. Europe Encounters the World: The Age of Discovery, 15th-18th Century

This course looks at the different forms of contact between Europeans and the rest of the world during their first period of imperial expansion (15th-18th Century). Special attention will be paid to the discovery, conquest and settlement of India, Asia, and the Americas, as well as the relationship of Europeans with native populations of these continents.

HIST-1230. The World in the Twentieth Century, 1914-1945

An overview of the major events and movements during the first half of the 'short' twentieth century. The course will broadly explore the world-wide impact of the world wars, communism, fascism, colonialism, the Great Depression, etc. The geographical focus of the material will vary with the instructor. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-1240. The World in the Twentieth Century, 1945-Present

An overview of the major events and movements during the second half of the 'short' twentieth century. The course will broadly explore the world-wide impact of the Cold War, communism, decolonization, globalization, terrorism, etc. The geographical focus of the material will vary with the instructor. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-1970. Selected Topics

Topics of current interest in history which may vary from year to year. (May be repeated for credit if content changes.)

HIST-2010. Early Modern Europe

A survey of Europe from the Age of Discovery to the French Revolution. Areas of study will include the formation of a world economy, the industrial revolution, the rise of the nation state, popular culture, the Catholic and Protestant Reformations, the printing revolution, the Renaissance, the scientific revolution, and the Enlightenment. (3 lecture hours a week.)

HIST-2030. Making History: Methods and Practices

This course builds on historical skills and knowledge of the discipline introduced in HIST-1030. It emphasizes skills in research, assessing evidence, analyzing primary sources, bibliographic skills, and others tools needed for writing history papers. It will also introduce students to public history, digital history, and the ethics of research. At a larger level, it helps students think critically about the past and to recognize the way historians interpret the past and use evidence. (Pre-requisite: HIST-1030 or consent of instructor)

HIST-2070. Early Modern England, 1485-1714

A survey of England's transition from a medieval realm to a modern state. Areas of study may include relations with Scotland, Ireland and Europe, as well as dynastic, religious, and constitutional change. (3 lecture hours or 2 lecture hours/1 tutorial hour a week.)

HIST-2080. Modern Britain, 1714 - Present

A survey of Britain's experience of industrialism, imperialism and post-colonialism. Areas of study may include political and social reform, the world wars, the welfare state, and the European Union. (3 lecture hours or 2 lecture hours/1 tutorial hour a week.)

HIST-2100. Islamic History: Formative Period 600-1000

This is a survey course that examines the development of a distinctive Islamic civilization over the course of four centuries in southern Europe, North Africa, the Middle East, and portions of Central Asia. The lectures will emphasize the following themes: 1) the formation of Islamic civilization as a long-term and gradual process engaged in by the conquering Arab Muslims and their conquered subjects; 2) the diversity of expressions of Islamic culture and religious practices; and 3) the important role played by historical memory in the formation of Islamic culture.

HIST-2110. Islamic History: Consolidation, Expansion and Empire 1000 - 1800

This is a survey course that explores the middle and early modern periods of Islamic history from 1000 to 1800 C.E. The middle period was one of continuing change and innovation as new political and religious institutions were developed. Throughout this period, the influence of Islamic civilization continued to expand to new regions including sub-Saharan Africa, Central Asia, and Southeast Asia. From 1500-1800 C.E. Muslims founded the Ottoman, Safavid, and Mughal empires. The subjects of these empires adopted new technologies and new patterns of trade as participants in the developing new world economy. The close of the course will be devoted to considering growing European dominance over these empires over the course of the 18th century, and the military and reforming modernizing schemes adopted by Muslims in response. (3 lecture hours per week.)

HIST-2120. Modern Islamic History 1800-Present: The Rise of Secular Nationalism and Political Islam

This survey course explores the history of the modern Islamic World. The dissolution of early modern empires led to a loss of sovereignty for most Muslims. The very serious challenges of colonialism, Zionism, war and civil war, and the impact of the oil economy were part of the Islamic world's encounter with modernity. So was the activism in the public and private spheres with which these challenges were met including the adoption of civil law codes, the creation of new national identities, Islamic reform movements and debates about gender and the role of women driven by intellectuals and elites. The final weeks of the course will address the tumultuous twenty-first century in the region, the Arab Spring and Political Islam in its various forms. (3 lecture hours per week.)

HIST-2180. War in the 20th Century

An overview of the evolution of military conflict during the last one hundred years. In addition to traditional military history, this course will introduce many facets of the New Military History, such as the social history of soldiers, life on the homefront, gender and war, etc. (3 lecture hours, or 2 lecture hours and 1 tutorial hour per week.)

HIST-2200. History of Africa, 700-1800

This course is an overview of the major historical shifts in Africa during the pre-modern period (700-1800 AD). Its purpose is to introduce the student to Africa and the Africans: the space and its occupants. Main topics include climatic and linguistic maps, major networks of trade and communication, the cultivation

of the 'Semitic' heritage (Christianity and Islam) and its impact on African experiences and relations with the rest of the world.

HIST-2300. History of Documentary Film

A survey of the history of documentary film, from the development of moving pictures in the late 19th to the present, with emphasis on the economic, social, and political context in the development of the documentary film genre, and the emergence of documentary filmmaking in all parts of the world. An introduction to major documentary films, and to the main stylistic schools that have defined the genre. (Prerequisite: At least semester 3 standing.)

HIST-2430. Canada from Early European Contacts to the Origins of Confederation, 1600-1867

An overview covering Aboriginal societies, European colonialism, and the emergence of the Canadian federation. Areas may include native-newcomer relations, colonial culture and society, imperial conflict, and the origins of confederation. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2440. Canada since Confederation, 1867 to the Present

An overview of the development of the Canadian federation. Areas may include competing visions of the Canadian "nation", relations with Aboriginal peoples, industrialization and social change, and shifts in politics and political culture. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2460. Aboriginal Peoples in Canadian History: Beginnings to Mid-Nineteenth Century

Aboriginal peoples and their impact on the history of Canada. Areas will include an overview of aboriginal nations, and the changing dynamics of the relationship between the first peoples and Europeans. (2 lecture, 1 lab hour per week.)

HIST-2470. Aboriginal Peoples in Canadian History: Mid-Nineteenth Century to the Present

Aboriginal peoples and their impact on the history of Canada since 1850. Areas will include relations with the state, cultural, land and resource issues, and politics and protest movements. (2 lecture, 1 lab hour per week.)

HIST-2490. Women in Canada and the United States, 1600-1870

A social history from the period of Native-European contact to the mid-nineteenth century. Work, family and sexuality, cultural ideals, and political status and activism among women of Native, African, and European origins will be examined. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2500. Women in Canada and the United States, 1870-Present

A social history from the mid-nineteenth century to the present. Native, black, immigrant, and native-born white women's roles in paid and household labour, family and cultural life, and reform movements will be examined. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2510. History of Women's Movements in North America

An exploration of the collective action of women in the past and present in North America. Areas of study may include women's involvement with the temperance, civil rights, suffrage, trade union, environmental, reproductive rights, and women's liberation movements. (Also offered as Women's and Gender Studies WGST-2510.) (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2610. History of America, 1600-1877

The social, economic, and political history of the British North American colonies and the United States. Areas may include Native-European contact and conflict, the growth of the British Empire, slavery, the

American Revolution, industrialization, reform movements, and the Civil War and Reconstruction. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2620. History of America, 1877 to the Present

The social, economic, and political history of the United States since Reconstruction. Topics may include urbanization and immigration, Progressive reform, women's suffrage, the Great Depression, the World Wars, McCarthyism, civil rights and women's liberation, the Vietnam War, and the end of the Cold War. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

HIST-2720. Modern Latin America

Nation-states in Spanish America, Brazil and the Caribbean, from the revolutions of independence to the present. Covers patterns of political and economic development shared throughout the continent. Country and thematic focus may vary from year to year, and may include the Haitian, Mexican, and Cuban revolutions, modern military dictatorships, resources and the environment, and gender and ethnic relations.

HIST-2870. History of Crime

Examines the ways in which crime and criminal justice were shaped by the societies in which they occurred and the ways in which they changed as these societies changed.

HIST-2970. Selected Topics in History

Topics of current interest, which may vary from year to year. (May be repeated for credit with consent of an advisor in History.)

HIST-3020. History Workshop

A series of modules that gives students first-hand experience in carrying out historical research and exposes them to sources for doing so. Activities may include visiting an archive and cataloguing sources, designing an historical web page, using computers for quantitative research, creating videos

HIST-3030. Schools of Historical Thought

This course is specifically designed to introduce third year history students to a case study in historiography. Each time it is taught, the instructor's specialization will be the theme, and he or she will outline the various historiographical approaches to that theme.

HIST-3100. Gender in Islamic History

This course is a historical study of gender in Islamic History, with special emphasis given to the modern Middle East and Afghanistan. We will examine the role of gender systems at different times and places in Islamic history through primary sources. Some themes of the course may be 1) the ways in which discourses of gender were constructed in ways usually disadvantageous to women. Though careful attention must be paid to important differences in time and place; 2) The relationship of gender systems to other hierarchical social structures such as class, ethnicity and age; 3) women and men's roles in preserving and constructing the gender systems of their society; and 4) the ways in which women and men were able to exercise agency in overcoming or transcending limitations of the dominant discourses on gender.

HIST-3160. The European Renaissance

A study of European intellectual, cultural and artistic life from the 14th to the 16th century. Centered around the notions of Humanism and the revival of Greco-Roman Antiquity, special attention will be given to Italy and the Germano-Flemish lands, but areas of study will also include Spain, France, Eastern Europe, and the Ottoman empire.

HIST-3200. Africa and the Atlantic System

This course explores the nature and terms of West Africa's interaction with the Atlantic commercial system that materialized after European colonization of the Americas. It revolves around the birth, growth and demise of the Trans-Atlantic Slave Trade (1600s-1800s). The major themes cover the rationale and mechanics of this slave trade, and its impact on the African side of the Atlantic system. Students will be introduced to the general parameters of academic discourses on the Transatlantic Slave Trade and its legacy. (Prerequisite: Semester 4 standing or Permission of instructor.)

HIST-3210. Colonialism in Africa, 1830s-1960s

This course explores the imposition and liquidation of European colonialism in Africa. It focuses on the political, economic, and cultural forces behind colonialism, and the attitudes of its agents. Emphasis will be placed on highlighting the major similarities and differences between European colonial power structures and African resistance to, adaptation to and adoption of those structures. (Prerequisites: HIST-2200 or semester 4 standing.)

HIST-3340. Love, Honour, and Obey: Marriage and Gender

Romantic heterosexual love shapes contemporary notions of marriage for both straight and gay women. But marriage is about much more than love. It shapes women's lives and organizes relations between women and men. This course examines the interpersonal, economic, social, cultural, and legal aspects of marriage past and present, primarily in North America. (Also offered as History WGST-3340.) (Prerequisite: One Women's and Gender Studies course or HIST-2510 or permission of the instructor.)

HIST-3360. Becoming Visible: Women in European History

An introduction to women's status, roles and significance in European history, with emphasis on feminist ideologies and women's movements from the eighteenth- through the mid-twentieth centuries. The geographic focus may vary from year to year.

HIST-3400. Women, War and Peace

This course examines the various and distinct ways in which women experience war and peace, in both historical and contemporary contexts. Topics include home fronts during wartime in both combat and non-combat zones, women's peace activism, displacement, war crimes against women, women in combat, and media coverage of women and war/peace across the 20th and 21st centuries. (Also offered as Women's and Gender Studies WGST-3400.) (Prerequisite: one 2000-level Women's and Gender Studies or History course or POLS-2600 or consent of the instructor.)

HIST 3480. Borderlands: Canada-United States Relations since 1783

This course examines the relations between British North America/Canada and the United States from the end of the American Revolution (1776-1783) until today. It looks at the multiple ways that both the people and the federal government from each side of the border interacted with their counterparts. It discusses several topics, including Indigenous peoples and Euro-American borders, colonial wars, diplomatic relations, transnational economies, cultural influences, borderland communities, and cross-border migrations. (Prerequisites: At least semester 5 standing.)

HIST-3490. Canadian Labour History

The development of the Canadian labour movement and the working-class experience from the nineteenth century to the present. (Also offered as Labour Studies WORK-3490.) (Prerequisites: semester 4 standing. Labour Studies majors must have Semester 4 or above standing or consent of instructor.)

HIST-3610. Slavery In North America, 1600-1877

The history of racial slavery, including both Amerindians and Africans, the emergence of the concept of “race”, male and female experiences, resistance to slavery, British abolition, Civil War, and Reconstruction. The Canadian and U.S. experiences will be compared.

HIST-3620. African Americans/Canadians After Emancipation, 1877 to the Present

The history of racial discrimination, violence, and segregation, struggles for political rights, labour, migration and immigration, and the cultural activity of people of African descent in the U.S. and Canada from the end of American slavery to the present. Women’s and men’s lives will be treated equally. (Prerequisite: semester 4 standing.)

HIST-3630. American History, 1945 to the Present

Selected themes in the political and social history of the United States from the end of World War II to the present. (Prerequisite: HIST-2620 or consent of instructor.)

HIST-3680. North American Popular Culture

An investigation of North American popular culture from the nineteenth century to the present. Topics of study may include sports and masculinity, youth culture, media representations of women, “the Sixties,” the impact of cinema and television, and popular music. (Prerequisite: One of HIST-2440, HIST-2620, or HIST-3630 or consent of the Instructor.)

HIST-3800. History on the Web

This course will explore the various ways in which history is currently being learned, studied, researched, created, manipulated, and enjoyed on the internet today. Students will both interrogate and analyze these various uses, as well as participate in each approach to history on the web, including creation. (Prerequisite: Semester 5 standing or above.)

HIST-3820. Storytelling and Design in Public History

A project-based course in which students do historical research as the basis for non-fiction storytelling and design, with an emphasis on practical approaches to creating monuments, documentary films, podcasts, websites, museum shows, and corporate and community heritage sites. Students develop typical public history projects based on an analysis of existing examples, combining research, storyboarding and design in a workshop environment. (Prerequisite: Semester 5 standing or above.) (This is an experiential learning course.)

HIST-3970. Selected Topics in History

Topics of current interest which may vary from year to year. (May be repeated for credit with consent of an advisor in History.)

NB: History courses at the 4000 level are restricted to History majors and to third- and fourth-year majors in other programs with a History component. Others may register only with the consent of the instructor.

HIST-4030. Medicine, Healing and the Health Professions

A social history of medicine, including non-Western and unorthodox traditions, with a cross cultural focus on healers and an emphasis on the evolution of the allied health professions. Topics may include the consolidation of biomedicine, women and indigenous healers, the modern hospital, and the patient’s perspective. (Prerequisite: Semester 7 standing or permission of instructor.)

HIST-4080. Culture and Society in Victorian Britain

A thematic approach to Victorian studies. Areas may include labour and leisure, science and religion, history and memory, gender and sexuality, class and national identity, literature and education. (Prerequisite: Restricted to History majors and other students with at least semester 5 standing and permission of the instructor.)

HIST-4110. The Life and Legacy of Muhammad

This course is designed to introduce students to four strands of thought in the history of constructing the life and legacy of the prophet Muhammad. These are 1) the traditional Muslim account of his life, 2) a variety of approaches to the topic by modern social scientists, 3) traditional delegitimizing of Muhammad in historic Western European polemics and their modern equivalents, 4) the role that Muhammad plays in the beliefs and practices of modern Muslims. (Semester 5 standing or above.)

HIST-4200. Religion and Politics in Modern Africa

This course deals with the intersection between religion and politics in Africa. The main focus of the course is on the role of religion in territorial expansion and political centralization. Comparable examples of the deployment of 'providential truth' to legitimize the conquest of space, control of its resources and the management of its occupants in different geographical settings will be introduced, and how it shaped African interactions with Asians or Europeans with comparable ideas about providential truth. (Prerequisite: Semester 5 standing or Consent of Instructor.)

HIST-4210. State of Apartheid: South Africa (1900s-1990s)

This course introduces students to the cumulative South African historical experience known as Segregation (1910-1948) and Apartheid (1948-1994). Students will explore how "race" became a determinant of where one could live, what one could do for a living, for 'how much', and even who one could marry. To emphasize the casual relation between power relations and the production of knowledge, the readings assigned for this course are, mostly, produced by South African literati with first-hand experience of Segregation and/or Apartheid. (Prerequisites: HIST-2200 or HIST-3210, and Semester 6 standing and/or permission of instructor.)

HIST-4350. The Early Modern Atlantic World

This course looks at the foundation, development and interaction of the different European empires (Portuguese, Spanish, French, Dutch, British) in the Americas and Africa from the 15th to the 18th century. Topics include encounters with Africans and the native peoples of the Americas, cross-cultural exchanges, circulation of peoples, ideas, and commodities, migration, missions, conversion, and slavery.

HIST-4450. Politics and Society in Industrializing Canada, 1890s-1930s

The impact of modernity on politics and the Canadian state. Topics may include political culture and ideology, political and social movements, and the beginning of state intervention in society. (Prerequisite: Restricted to History majors and other students with at least semester 5 standing and permission of instructor.)

HIST-4460. The Making of Post-War Canada

The changing relationship between the state and society during and after the Second World War. Topics may include the politics of post-war planning, the welfare state, nationalism, and political and social protest movements. (Prerequisite: Restricted to History majors and other students with at least semester 5 standing and permission of instructor.)

HIST-4580. Early American History, 1600-1800

Selected themes in the political and social history of early America, which may include European and Native American contacts, the political and social development of the American colonies, slavery, war

and society, the changing status of women, and the American Revolution and its aftermath. (Restricted to History majors and other students with at least semester 5 standing and permission of the instructor.)

HIST-4600. British North America and the United States of America, 1776-1867

This course examines the history of British North America from the Declaration of Independence of the United States in 1776 to the Confederation of Canada in 1867. Specifically, it examines the interactions between the various colonies that made up British North America (Cape Breton, Nova Scotia, New Brunswick, Newfoundland, Lower Canada, Upper Canada, British Columbia, and Vancouver Island) and the northern United States. Using a continental approach to Canada's history in the eighteenth and nineteenth centuries, this course focuses on these cross-border links. It addresses many topics, including colonial wars, political loyalties and cultural identities, migration, trade, diplomacy, American perceptions of British North America and its residents, and the transnational origins of Canadian Confederation. (This is an experiential learning course.)

HIST-4620. United States – Global South Encounters

The expansion of United States' power throughout the Global South (emphases may vary according to the expertise of the professor, but will include consideration of the Americas, Africa, the Indo-Pacific and the Middle East) from the late eighteenth century to the present. Topics will include transcontinental and overseas expansion, colonial warfare and resistance, the construction of racial and national identities, gender in an imperial context, and borderland cultures (Prerequisite: Restricted to History majors and other students with at least semester 5 and permission of the instructor.) Seminar (3 hours/week). (This is an experiential learning course.)

HIST-4630. History of Gender and Sexuality

This course explores major themes in the history of gender and sexuality. These may include reproduction, contraception, and abortion; gender, race, and power; sexuality and the state; heterosexual relations and marriage; gay, lesbian, and transgender identities. Time period and geographical region will vary with the instructor. (Prerequisite: Semester 5 or above standing and one of HIST-2500, or HIST-2510/WGST-2510 or permission of the instructor.) (Also offered as History WGST - 4630.)

HIST-4660. History in the Movies

This course treats films as historical documents through which to lens broader social and cultural phenomena. Distinct from film history, that is the study of the history of cinema, the course pairs more "traditional" historical research materials, such as academic historical writing and primary documentation, to what became the dominant cultural medium of the 20th century. Films function as both historical artefacts (objects implicitly capturing moments in time) and as historical narratives (mediums explicitly disseminating points of view relevant to the time of production). Engaging with them at both levels, students will be expected to examine the experiences, values, politics, and social identities within a particular period (such as 1970s America) or as related to a specific historical theme (gender, for example) as a means of better understanding the history of the subject. (The topic will vary with the instructor and may be re-taken by permission of History's undergraduate coordinator.)

HIST-4700. The Era of the Great War

This course will explore the political, military, cultural and social history of the First World War and surrounding period, primarily in Germany, France, and Britain, but including some attention to Eastern Europe, Africa and Asia. The course will address the historiography of the Great War, with a focus on the experience of the war for soldiers, for women on the home front, for artists, and for those under occupation. (Prerequisites: Restricted to History majors with at least semester 5 standing; and restricted to other students with at least semester 5 standing and permission of instructor.)

HIST-4800. Public History

This course explores the theory and practices of Public History, including the ways in which History is communicated to the wider public by museums, cultural institutions, heritage sites, archives, film, social media, advertising, and national parks. Topics may include approaches to digital history, curating, digitizing archival documents, and exhibit design and presentation. (Prerequisite: Semester 5 standing or above.)

HIST-4810. Public History Practicum

This practicum provides students in the History program with the opportunity to apply learned concepts and theory to a practical setting and become further familiarized with an area of interest in Public History. Students will be placed in organizations in the Windsor-Essex and Chatham-Kent regions related to their area of interest in Public History (e.g., museums, historical societies, heritage sites, etc.), and will be expected to dedicate a total of 100 hours to both in-class and on-line learning, and practicum components of the course. The course is open to History majors only. (Prerequisites: HIST-4800 and minimum average in History courses of 75% or permission of instructor). (This is an experiential learning course.)

HIST-4820. Making Historical Documentaries

A project-based, seminar-workshop on issues and problems specific to the historical documentary genre in which students research, write and make a short historical documentary film (or video). Study of methods and practices for incorporating historical elements into documentary, and analysis of traditional and experimental historical documentary practices. Student work will be developed through presentation in a workshop environment. (Prerequisite: Semester 5 standing).

HIST-4830. Local History and Research Methods

This seminar-based course introduces students to the history of southwestern Ontario and metro Detroit from the pre-colonial era to the twentieth century. It addresses many topics, including pre-colonial Indigenous history, the founding of Detroit and the local French presence, political regime changes in the eighteenth century and the creation of the border, Indigenous treaties and settler-Indigenous relations, the War of 1812, slavery and the Underground Railroad, industrialization/urbanization and environmental history, cross-border economic and cultural ties, transportation, African Americans in Detroit, immigration, and collective memories.

HIST-4970. Selected Topics in History

Topics of current interest which may vary from year to year. (May be repeated for credit with permission of a program advisor.) (May be repeated for credit with consent of an advisor in History.) (Prerequisite: Restricted to History majors and other students with at least semester 5 standing and permission of the instructor.)

HIST-4990. Research Capstone Thesis

Students will receive training in the methods and skills of advanced historical research, ultimately composing an undergraduate research thesis based on their own original research in the subject area of the course as offered. In the first term of this two-term course, they will identify a practical research topic, perform a review of relevant scholarly literature, and produce a research proposal outlining the topic and identifying a body of relevant research materials, either in manuscript form or available digital archives. In the second term, students will implement the research proposal, spending much of the term engaged in original research. Having collected the relevant research materials, they will write, edit, and revise their final research thesis, the cumulative exercise of the course. The course's specific theme or

region/time-period will vary with the instructor. (Pre-requisite: At least Semester 6 standing, and 75% average in History courses or permission of instructor.)

INTERDISCIPLINARY AND CRITICAL STUDIES

PROGRAMS

DISABILITY STUDIES

BA Honours in Disability Studies

This is a joint offering between Social Work and Psychology.

Degree Requirements

Total courses: 40 courses

- (a) six discipline foundation courses: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000, SWRK-2100;
- (b) four Disability Studies or Disability Studies-Emphasis courses
- (c) one social science research methods course: PSYC-2300;
- (d) three human development courses: PSYC-2230, PSYC-2240, PSYC-2250;
- (e) six Disability Studies courses: DISB-2010, DISB-3020, DISB-4010, DISB-4020, DISB-4650 (6.00 credit course);
- (f) two courses from Arts;
- (g) two courses from Languages or Science;
- (h) two additional courses from Arts, Languages, Social Sciences or Science.
- (i) GART-1500, GART-1510;
- (j) SOSC-2500;
- (k) 11 courses from any area of study.

Courses used to calculate the major average are: courses listed under requirements (a) to (e), and any courses taken in the major area(s) of study..

Recommended Course Sequence

Year 1: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000, GART-1500, GART-1510, one Arts course, one Languages or Science course; one Arts, Languages, Social Sciences or Science course;

Year 2: SWRK-2100, PSYC-2300, PSYC-2230, PSYC-2240, SOSC-2500, one Arts course, one Languages or Science course, one Arts, Languages, Social Sciences or Science course; two courses from any area of study;

Year 3: DISB-2010, DISB-3020, two Disability Studies-Emphasis courses, PSYC-2250, five courses from any area of study;

Year 4: DISB-4010, DISB-4020, DISB-4650 (6.00 credit course), two Disability Studies-Emphasis courses; four courses from any area of study.

Combined Honours BA in Disability Studies and Psychology

This is a joint offering between Social Work and Psychology.

Degree Requirements

Total courses: 40

(a) Disability Studies:

- (i) four discipline foundation courses: SWRK-1170, SWRK-1180, DISB/SJST-1000, SWRK-2100;
- (ii) four Disability Studies or Disability Studies-Emphasis courses;
- (iii) six Disability Studies courses: DISB-2010, DISB-3020, DISB-4010, DISB-4020, DISB-4650 (6.00 credit course);

(b) fourteen Psychology courses: PSYC-1150, PSYC-1160, PSYC-2230, PSYC-2240, PSYC-2250, PSYC-2300, PSYC-3200; and one of PSYC-3350, PSYC-3530 or PSYC-3580; and six additional Psychology courses.

*The total number of Psychology courses must include at least four 3000-level courses and two 4000-level courses.

- (c) two courses from Arts;
- (d) two courses from Languages or Science;
- (e) two courses from any area of study, excluding Social Sciences.
- (f) GART-1500, GART-1510;
- (g) SOSC-2500;
- (h) three courses from any area of study.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequencing:

Year 1: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000, GART-1500, GART-1510, one Arts course, one Languages or Science course; one course from any area of study;

Year 2: SWRK-2100, PSYC-2300, PSYC-2230, PSYC-2240, SOSC-2500, one Languages or Science course, one Disability Studies Emphasis course; one course from any area of study, one Arts course, one course from Arts, Languages, Social Sciences or Science;

Year 3: DISB-2010, DISB-3020, PSYC-2250, PSYC-3200, one of PSYC-3350, PSYC-3530 or PSYC-3580, one Disability Studies-Emphasis course, two open psychology courses, one course from any area of study, one course from Arts, Languages, Social Sciences or Science;

Year 4: DISB-4010, DISB-4020, DISB-4650 (6.00 credit course), two Disability Studies-Emphasis courses; four open psychology courses.

Combined Honours BA in Disability Studies

This is a joint offering between Social Work and Psychology.

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty

- (a) Disability Studies: sixteen courses, including DISB/SJST-1000, PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, PSYC-2300, PSYC-2230, PSYC-2240, PSYC-2250, SWRK-2100, DISB-2010, DISB-3020, DISB-4010, DISB-4020, DISB-4650 (double credit).
- (b) Course requirements-Other subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510;
- (d) SOSC-2500
- (e) two courses from Arts or Languages;
- (f) two courses from Languages or Science;
- (g) two additional courses from any area of study, excluding Social Sciences.
- (h) additional courses from any area of study to a total of forty (as required).

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study..

Recommended Course Sequencing:

Year 1: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000, GART-1500, GART-1510;

Year 2: SWRK-2100, PSYC-2300, PSYC-2230, PSYC-2240, SOSC-2500;

Year 3: DISB-2010, DISB-3020, PSYC-2250;

Year 4: DISB-4010, DISB-4020, DISB-4650 (6.00 credit course).

BA Honours Bachelor of Arts in Disability Studies for Ontario College Child and Youth Care Program Graduates - Degree Completion Pathway

This is a joint offering between Social Work and Psychology.

Students are strongly advised to enrol in this program in the summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Disability Studies academic advisor before registering for courses.

Degree Requirements

Total courses: 20 courses, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Disability Studies Program Coordinator (or designate) will identify substitute course requirement(s).

- (a) four discipline foundation courses: PSYC-1150, SWRK-1170, SWRK-1180, DISB/SJST-1000;
- (b) one social science research methods course: PSYC-2300;
- (c) two human development courses: PSYC-2240, PSYC-2250;

- (d) six Disability Studies courses: DISB-2010, DISB-3020, DISB-4010, DISB-4020, DISB-4650 (6 credit course);
- (e) one Disability Studies or Disability Studies-Emphasis course (2000 level or higher) and one Disability Studies or Disability Studies-Emphasis course (any level).
- (f) two Arts, Languages or Science courses, excluding Disability Studies or Disability Studies-Emphasis courses.
- (g) SOSC-2500;
- (h) two courses from any area of study, including Psychology (excluding PSYC-1160 and PSYC-2230), Social Work, or Disability Studies.

Courses used to calculate the major average are: courses listed under requirements (a) to (e), and any courses taken in the major area(s) of study.

Recommended Course Sequencing:

Year 1, Fall Semester: PSYC-1150, SWRK-1170, DISB/SJST-1000, DISB-2010, SOSC-2500.

Year 1, Winter Semester: SWRK-1180, PSYC-2240, PSYC-2300, DISB-3020, and one additional course.

Year 2, Fall Semester: PSYC-2240, DISB-4010, and three additional courses.

Year 2, Winter Semester: PSYC-2250, DISB-4020, DISB-4650 (6 credit course) and one additional course.

Honours Bachelor of Arts in Disability Studies for College of Applied Arts and Technology Graduates - Degree Completion Pathway

This is a joint offering between Social Work and Psychology.

Degree Requirements

Total courses: 30 courses, plus a College of Applied Arts and Technology diploma in a Child and Youth Care (formerly Child and Youth Worker), Developmental Services Worker, Early Childhood Education, Educational Support and Social Service Worker program. Graduates of related Education, Community and Social Services programs may be admitted with Disability Studies Program Coordinator (or their designate) approval with the following stipulations:

- No more than nine courses can be at the 1000 level.
- In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 30 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Disability Studies Program Coordinator (or their designate) will identify a substitute course requirement.

- (a) five discipline foundation courses: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000;
- (b) one human diversity course: SWRK-2100;
- (c) one social science research methods course: PSYC-2300;
- (d) three human development courses: PSYC-2230, PSYC-2240, and PSYC-2250;
- (e) six Disability Studies courses: DISB-2010, DISB-3020, DISB-4010, DISB-4020, DISB-4650 (6 credit course);
- (f) four Disability Studies or Disability Studies-Emphasis courses.
- (g) two courses from Arts;
- (h) two courses from Languages or Science;
- (i) SOSC-2500;
- (j) five courses from any area of study.

Courses used to calculate the major average are: courses listed under requirements (a) to (f), and any courses taken in the major area(s) of study.

Recommended Course Sequencing

Year 1: PSYC-1150, PSYC-1160, SWRK-1170, SWRK-1180, DISB/SJST-1000, SWRK-2100, SOSC-2500, one course from Arts, one course from Languages or Science; one course from any area of study.

Year 2: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-2300, DISB-2010, DISB-3020, two Disability Studies or Disability Studies-Emphasis courses, two courses from any area of study.

N.B.: Students who did not complete SOSC-2500, DISB/SJST-1000, SWRK-2100, and PSYC-2300 prior to acceptance into the Disability Studies program are strongly encouraged to complete these courses by the end of the first semester of their Second Year.

Year 3: DISB-4010, DISB-4020, DISB-4650 (6 credit course), two Disability Studies or Disability Studies-Emphasis courses, one course from Arts, one course from Languages or Science, two courses from any area of study.

Minor in Disability Studies

This is a joint offering between Social Work and Psychology.

Requirements: Six Disability Studies courses including DISB-1000, DISB-2010, DISB-3020, plus one Disability Studies and/or Disability Studies Emphasis course at the 1000 level or above and two Disability Studies and/or Disability Studies Emphasis courses at the 2000 level or above.

LIBERAL AND PROFESSIONAL STUDIES

General Liberal Arts and Professional Studies

Degree Requirements

Total courses: thirty, at least sixteen of which must be at the 2000 level or above, and at least four of which must be at the 3000 level or above.

- (a) One of GART-1500, MGMT-1000, GENG-1190; and GART-1510
- (b) one Certificate chosen from the following list: Certificate in Applied Information Technology, Certificate in Arts Management, Certificate in Law and Politics, Certificate in Public Administration, Certificate in Human Resources, Certificate in Second Language Education, Certificate in Women's and Gender Studies, and Certificate in Work and Employment Issues;
- (c) One Minor from any area of study within the Faculty of Arts, Humanities, and Social Sciences, excluding the area of study selected under (b);
- (d) one Minor from any area of study, excluding the area of study selected under (b);
- (e) two courses from Science, Engineering, or Nursing unless this requirement is met in (b), (c), or (d);
- (f) Additional courses from any area of study to a total of thirty courses.

Honours Liberal Arts and Professional Studies

Degree Requirements

Total courses: forty, at least eight of which must be at the 3000 level or above, and a least two of these at the 4000 level.

- (a) One of GART-1500, MGMT-1000, GENG-1190; and GART-1510
- (b) One Certificate chosen from the following list Certificate in Applied Information Technology, Certificate in Arts Management, Certificate in Law and Politics, Certificate in Public Administration, Certificate in Human Resources, Certificate in Second Language Education, Certificate in Women's and Gender Studies, and Certificate in Work and Employment Issues;
- (c) One Minor from any area of study within the Faculty of Arts, Humanities and Social Sciences or the Department of Economics, excluding the area of study selected under (b);
- (d) One Minor from any area of study, excluding the area of study selected under (b) and (c)
- (e) One Minor from any area of study, excluding the area of study selected under (b), (c) and (d);
- (f) Two courses from Science unless this requirement is met in (b), (c), (d) or (e) above;
- (g) Additional courses from any area of study, to a total of forty courses.

General Liberal Arts and Professional Studies Degree Completion Program (for Lambton College Liberal Studies Graduates) (formerly General Arts and Science University (GASU))

Admission Requirements

Students who have completed the Liberal Studies program with an average of B or better will be granted advanced standing of ten courses under this degree completion pathway.

Degree Requirements

At least 16 courses must be at the 2000 level or above, and 4 of these must be at the 3000 level or above.

Total courses: 20

- (a) One Certificate chosen from the following list: Certificate in Applied Information Technology, Certificate in Arts Management, Certificate in Law and Politics, Certificate in Public Administration, Certificate in Human Resources, Certificate in Second Language Education, Certificate in Women's and Gender Studies, and Certificate in Work and Employment Issues;
- (b) One Minor from any program, excluding (a);
- (c) Two courses in Science or Nursing unless this requirement is met in (a) or (b) above;
- (d) Additional courses from any area of study to a total of twenty courses.

Honours Liberal Arts and Professional Studies Degree Completion Program (for Lambton College Liberal Studies Graduates) (formerly General Arts and Science University (GASU))

Admission Requirements

Students who have completed the Liberal Studies program with an average of B or better will be granted advanced standing of ten courses under this degree completion pathway.

Degree Requirements

Total courses: 30

At least 26 courses must be at the 2000 level or above. Eight courses must be at the 3000 level or above, and a least two of these at the 4000 level.

- (a) One Certificate chosen from the following list: Certificate in Applied Information Technology, Certificate in Arts Management, Certificate in Law and Politics, Certificate in Public Administration, Certificate in Human Resources, Certificate in Second Language Education, Certificate in Women's and Gender Studies, and Certificate in Work and Employment Issues;
- (b) One Minor from any program, excluding (a);
- (c) Two courses in Science or Nursing unless this requirement is met in (a) or (b) above;
- (d) Additional courses from any area of study to a total of thirty courses.

General Liberal Arts and Professional Studies for Career Professionals Degree Completion Program (for Graduates of Qualifying CAAT (or equivalent) Diploma Programs)

Students who have graduated from an approved CAAT college diploma (or equivalent) with a suggested cumulative average of 3.0 (70%) or higher in their final ten courses will be considered for admission. Approved CAAT college diploma programs include Border Services, Business programs, Community & Justice Services, Dental Hygiene, Developmental Service Worker, Early Childhood Education, Educational Support, Engineering, General Arts and Science, Journalism, Liberal Arts, Liberal Studies, Music – Industry Arts, Paralegal, Paramedic, Police Foundations, Protection, Security, and Investigation, Recreation and Leisure Services, Social Service Worker.

Degree Requirements

Total courses: 20 courses

At least 16 courses must be at the 2000 level or above, and 4 of these must be at the 3000 level or above.

- (a) One Certificate chosen from the following list: Certificate in Applied Information Technology, Certificate in Arts Management, Certificate in Law and Politics, Certificate in Public Administration, Certificate in Human Resources, Certificate in Second Language Education, Certificate in Women's and Gender Studies, and Certificate in Work and Employment Issues;
- (b) One Minor from any program, excluding (a);
- (c) Two courses in Science or Nursing unless this requirement is met in (a) or (b) above;
- (d) Additional courses from any area of study to a total of twenty courses.

General Liberal Arts and Professional Studies for Career Professionals Degree Completion Program (for Graduates of Qualifying CAAT (or equivalent) Advanced Diploma Programs)

Students who have graduated from a CAAT college advanced diploma with a cumulative average of 3.0 (70%) or higher in their final ten courses will be considered for admission. Approved Advanced Diploma

Programs include: Business Administration, Child and Youth Care/Child and Youth Worker, Computer Science or Computer Programming or Information Technology, Dental Hygiene (the province has recently changed the program to an advanced diploma, Diagnostic Medical Sonography, Engineering, Massage Therapy, Medical Laboratory Science, Respiratory Therapy, Sport and Recreation Management.

Degree Requirements

Total courses: 15

At least 15 courses must be at the 2000 level or above, and 4 of these must be at the 3000 level or above. No more than eight courses may be taken in any one area.

(a) Any combination of three courses from Arts, Humanities and Languages,
The following course may also count as an Arts, Humanities and Languages requirement: NURS-4951NURS-4951;

(b) Any combination of three courses from Social Sciences, Economics, or Organizational Learning;
The following courses from programs may also be used as a Social Science requirement: ANZO-1600, ANZO-2600, ANZO-2610, ANZO-3600, ESTU-1100, ESTU-2100.

(c) Any two courses from the professional studies requirement:
GART-2090, GART-3100, SOSC-3100, DRAM-2100, DRAM-2750, DRAM-2760, SOSC-2500, POLS-3230, PSYC-3700, ECON-2000, ECON-2010, ACCT-1510, ACCT-2550, MGMT-2400, FINA-2700, MKTG-1310, STEN-1000, KINE-2450*, KINE-2500*, KINE-2520*, KINE-4500*, KINE-4550*.

*Requires the permission of the instructor

(d) Any combination of two courses from Science, Engineering, Nursing, and Kinesiology,

The following Forensics courses may be used to fulfill the science requirement: FRSC-1107, FRSC-2007, FRSC-3201, FRSC-4207, FRSC-4217, NURS-3910.

(e) five additional courses from any area of study.

SOCIAL JUSTICE

Combined Honours in Social Justice

(As of Winter 2019, there are no new admissions to the Combined Social Justice program.)

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty

- (a) DISB/SJST-1000; SJST-3000; PHIL-3230, SACR-3520; and WORK-1000;
- (b) seven courses from the following list: JWST-1700, JWST-2350, JWST-2700, DRAM-3780, DRAM-4710, ENGL-1005, ENGL-2320, ENGL-3330, VSAR-3850, MACS/CMAF-4500, PHIL/WGST-2360, PHIL-2220, CMAF-2250, CMAF/DRAM/WORK-2700; CMAF-3700, HIST/WORK-3490, HIST-2510/WGST-2510, HIST-3620, POLS/WGST-2110; POLS-2480, POLS-2490, POLS-3350, POLS-3560, PSYC-2400, PSYC-3340, PSYC-4400, PSYC-4450, SWRK-1170, SWRK-2100, SACR-2280, SACR-2400, SACR-3400, WGST/WORK-2600, WGST-3530 /SACR-3530, WGST-4100, WORK-2000.
- (c) Course Requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area.
- (d) GART-1500, GART-1510
- (e) two courses from Arts or Languages
- (f) two courses from Science
- (g) additional course from any area of study excluding Social Sciences, to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Minor in Social Justice Studies

Total courses: 6

Requirements: six Social Justice Studies (SJST-) or Social Justice Emphasis courses, including SJST-1000 and at least two courses at the 2000-, 3000-, or 4000-level; no more than three courses may be Social Justice Emphasis.

Social Justice Emphasis Courses:

CMAF-2250, CMAF-3700

PHIL-2270, PHIL/WGST-2360, PHIL-3230/POLS-3620, PHIL-3290, PHIL-3300

POLS-1709, POLS/WGST-2110, POLS-2300

PSYC-2400, PSYC-4400, PSYC-4450

WGST/SACR-2100, WGST-2200, WGST/HIST-2510, WGST/SACR-3530

WORK-1000, WORK-2000, WORK/WGST-2400, WORK/WGST-2600

Courses offered within the Walls to Bridges program.

Various areas of study from time to time offer courses dealing specifically with social justice issues under specific course titles or general titles such as, "Special Topics", "Directed Readings", or "Seminars". Information regarding such courses will be available from a program advisor in Women's and Gender Studies and they may be taken with permission of the program.

*NB: Students are responsible for ensuring that they have the required pre-requisites for enrolment in the above list of courses.

WORK AND EMPLOYMENT ISSUES

Minor in Work and Employment Issues

Required: WORK-1000, WORK-2000, WORK-2500, plus three other (WORK-**) courses.

Certificate in Work and Employment Issues

Admission Requirements

Minimum admission requirements for undergraduate degrees.

Total courses: eight

Program Requirements

- (a) one of: WORK-1000 or WORK-1500
- (b) WORK-2000, WORK-2500, and WORK-3500;
- (c) four of: WORK/WGST-2400, WORK/PSYC-2180, WORK/WGST-2600, WORK/DRAM/SJST/CMAF-2700, WORK/SACR-3270, WORK/HIST-3490, WORK/PSYC-3700, PHIL-2240, MGMT-3440.

LATIN STUDIES

Minor in Latin American Studies

Required: six courses, including two of SPAN-2610, HIST-2720; two of SACR-3520; SPAN-1010 (or SPAN-1020) or two intermediate or advanced level courses in Spanish language training (as appropriate, as determined by a placement test).

RACE AND ETHNICITY STUDIES

Minor in Race and Ethnicity Studies

Total Courses: 6 courses

- a) GART/SOSC-1210. An Introduction into Indigenous Topics
- b) two Arts/Humanities from: ARAB-2610, PHIL-2380, ENGL-3310, HIST-3210;
- c) two Social Sciences from: SACR-2400, SWRK-2100, WGST-2200, CMAF-3430, HIST-4210;
- d) one from: ARAB-2620, ARAB-3610, PSYC-4450, SACR-3330, SACR-3390, SACR-4220

WOMEN'S AND GENDER STUDIES

General BA in Women's and Gender Studies

Degree Requirements

Total courses: thirty.

- (a) WGST-1000, WGST-2500, WGST-3050 or WGST/PHIL-3590, WGST-3060
- (b) five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500
- (c) two Women's and Gender Studies
- (g) two courses from Arts
- (h) one course from Science

- (i) two courses from any area of study, excluding Social Sciences
- (j) GART-1500, GART-1510
- (k) six courses from any area of study, including Women's and Gender Studies (WGST)
- (l) six courses from any area of study, excluding Women's and Gender Studies (WGST)

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

BA Honours in Women's and Gender Studies

Degree Requirements

Total courses: forty.

- (a) WGST-1000, WGST-2500, WGST-3050 or WGST/PHIL-3590, WGST-3060, WGST-4000;
- (b) five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500
- (c) WGST-4***
- (d) seven additional Women's and Gender Studies (at least three must be WGST-3*** or WGST-4***)
- (e) two courses from Arts;
- (r) one course from Science;
- (g) two courses from any area of study, excluding Social Sciences.
- (h) GART-1500, GART-1510;
- (i) nine courses from any area of study, including Women's and Gender Studies (WGST);
- (j) six courses from any area of study, excluding Women's and Gender Studies (WGST).

Courses used to calculate the major average are: courses listed under requirements (a) to (d), and any courses taken in the major area(s) of study.

Combined Honours in Women's and Gender Studies

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) Women's and Gender Studies: WGST-1000, WGST-2500, WGST-3050 or WGST/PHIL-3590, WGST-3060, WGST-4000, five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500; WGST-4***; two additional Women's and Gender Studies courses at the 3000- or 4000-level.
- (b) Course Requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510;
- (d) two courses from Arts;

- (e) one course from Science;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) additional courses from any area of study a total of forty courses.

*Any course(s) not taken in category (e) can be taken in category (f) (except any cross-listed course numbers).

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Combined Honours Women's and Gender Studies when taken with Criminology

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) Women's and Gender Studies: fourteen courses: WGST-1000, WGST-2500, WGST-3050 or WGST/PHIL-3590, WGST-3060; five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500; at least one of WGST-2800, PSYC/SACR/SOSC/SWRK/SJST/WGST-3500/KINE-3501, WGST-3300, WGST-3800, or WGST-3850; WGST-4***;
- (b) three additional Women's and Gender Studies courses.
- (c) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (d) GART-1500, GART-1510;
- (e) two courses from Arts;
- (f) two courses from Languages or Science**;
- (g) two courses from any area of study, excluding Social Sciences.
- (h) additional courses from any area of study a total of forty courses.

*Any course(s) not taken in (a) can be taken in (b) (except any cross-listed course numbers).

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Honours Business Administration and Women's and Gender Studies (with/without thesis and with/without Specialization)

This is a joint offering between Women's and Gender Studies and the Odette School of Business. See the Odette School of Business for program requirements.

Honours Bachelor of Social Work and Women's Studies

This is a joint offering between Women's and Gender Studies and the Social Work. See the Social Work for program requirements.

Certificate in Women's Studies

Admission Requirements

Admission requirements are the same as those for the Honours Women and Gender Studies program.

Requirements

Total courses: ten.

- (a) WGST-1000;
- (b) at least one of WGST/PHIL-3590 (or WGST-3050) or WGST-3060;
- (c) at least three of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500
- (d) five Women's and Gender Studies courses, with at least one at the 3000- or 4000-level.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Women's and Gender Studies

Major Concentration: WGST-1000, at least one of WGST/PHIL-3590, WGST-3050, or WGST-3060; five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500; one Women's and Gender Studies-course at the 1000-level or above, one Women's and Gender Studies course at the 2000-level or above, three Women's and Gender Studies-

Minor Concentration: six Women's and Gender Studies (WGST-) courses, including WGST-1000; and one Women's and Gender Studies (WGST-) course at the 3000- or 4000-level, no more than one other course may be at the 1000-level.

Minor in Women's and Gender Studies

Requirements: six Women's and Gender Studies (WGST-) courses, including WGST-1000 and one Women's and Gender Studies (WGST-) course at the 3000- or 4000-level; no more than one other course may be at the 1000-level.

INTERDISCIPLINARY AND CRITICAL STUDIES COURSES

DISABILITY STUDIES COURSES

DISABILITY STUDIES EMPHASIS COURSES

Program requirements in Disability Studies make reference to Disability Studies-Emphasis courses. These currently include: Anthrozoology: ANZO-1600; General Arts: GART-2040, GART-2090; Intercultural Studies: INCS-2360; Kinesiology: KINE-1000; KINE-4000; KINE-4040, KINE-4100; KINE-4610; Nursing: NURS-4951NURS-4951; NURS-3910; Organizational Learning and Teaching Courses: EDUC-4000; Philosophy: PHIL-1290; PHIL-2250; PHIL-2270; PHIL-2280; PHIL-3190; Psychology: PSYC-1070; PSYC-2280; PSYC-2400; PSYC-2560; PSYC-3220; PSYC-3230; PSYC-3240; PSYC-3330; PSYC-3390; PSYC-3390; PSYC-4300; PSYC-4320; PSYC-4450; Social Justice Studies: SJST-2100, SJST-2350; SJST-2700, SJST-3000; Social Work: SWRK-2040, SWRK-3470; SWRK-3580; Sociology: SACR-1100; SACR-2100; SACR-2280; SACR-2400; SACR-2900; SACR-3050; SACR-3150; SACR-3270; SACR-3520; SACR-4510; Women's and Gender Studies: WGST-2100; WGST-2200; WGST-2350; WGST-3900.

Various areas of study from time to time may offer courses dealing specifically with disability studies under specific course titles or general titles such as "Special Topics," "Directed Readings," or "Seminars." These courses may be taken with permission of the Disability Studies Program Coordinator.

DISB-1000. Social Justice in Action

Students investigate the local and global origins of a contemporary social problem through the eyes of social justice activists. Students will assess the strengths and limitations of strategies and theoretical frameworks for social change and use this knowledge to create social action messages that raise public awareness, influence government or corporate policy, or positively change attitudes and behaviours. (3 lecture hours per week.) (Also offered as SJST-1000.)

DISB-2010. Disability Studies: Theory and Culture

This course explores the multiple meanings of disability and emphasizes the lived experience and knowledge generated by people with disabilities. It critically examines how Western economic, medical, moral, and social norms produce social exclusion and marginalization. It introduces students to key Disability Studies theorists, theories, and social justice models that resist ableism by addressing issues of access, accommodation, cultural representation, and identity. This course uses an intersectional framework to consider how variances in race, ethnicity, gender-identity, sexuality, class, citizenship, and culture impact both individual and collective experiences of disability. It considers how Disability Studies differs from other disciplinary approaches to disability, understands disability as a social construct, and positions disability as difference rather than deficit. (Prerequisite: SJST/DISB-1000.)

DISB-3020. Historical Approaches to People with Disabilities

This course will select national and international milestones highlighting people, events, and legislation that have affected disability rights. It will include historical discussions about significant dates related to the eugenics movement, the civil rights movement, the self-help movement, deinstitutionalization, demedicalization, and consumerism. Emphasis will be placed upon Canadian history with comparison with historical developments in other countries. This course will expose current issues, controversies, and trends in disability and teach students how to interpret historical documents, court cases, media reports, and other materials. It will use case studies to analyze the ideological, socioeconomic, and political history of disability. (Prerequisite: DISB-2010)

DISB-4010. Community Approaches, Advocacy and Empowerment

Students will critically review traditional approaches to professional practice with people with disabilities, with special attention to the role of the professional. Using case studies, students will explore professional intervention strategies that promote full participation and equality for people with disabilities. Other themes include self-determination and choice, supporting disability rights and self-advocacy organizations, and building alliances. Recognizing how important family is to many people with disabilities, this course will also explore the implications of the views and experiences of family members. Stressing the need for empowerment, this course introduces students to social change movements as led by people in search of full citizenship who have disabilities. The implications for empowerment, created by the advent of new technologies, is also explored. (Prerequisite for Social Work/Disability Studies BSW students: DISB 2010. Prerequisite for all other students: DISB-3020.)

DISB-4020. Service Delivery Systems and Independent Living

This course helps the student understand how to put the social model of disability into practice. It will encourage students to analyze power, inequality and influence and then to build strategies for actions. It will promote a team-oriented approach by using case studies to examine the issues of access and related policies and practices that support or impede inclusion. Theoretical and practical approaches draw from the perspective that people supported by human services need opportunities to lead dignified lives with the means to exercise greater personal choice, control and independence. The Independent Living model and organization exposes students to multiple issues that involve the actions of consumer leaders, activists and managers in designing, organizing and changing services and support models for people with disabilities. This course considers how people with disabilities access societal and community resources, engage socially, and take part in policy development and implementation. (Prerequisite: DISB-4010)

DISB-4610. Community Practice

This four course equivalent sequence is a field placement, designed to enable students to apply and integrate the various theoretical perspectives and themes explored in the Disability Studies program. Students will work with people with disabilities in community agencies and programs and develop respectful and empowering professional skills. Students will also have the opportunity to gain knowledge of an issue or area of specific interest. Students will acquire knowledge of the needs and issues relevant to at least one disability group. (Prerequisite: DISB-2010, DISB-3020: Semester 7 standing in Disability Studies Program) (Co-requisites: DISB-4010, DISB-4020).

DISB-4650. Community Orientation to Disability Issues

This two-course equivalent sequence is a field placement, designed to enable students to apply and integrate the various theoretical perspectives and themes explored in the Disability Studies program through implementation of a community based project. Students will work with people with disabilities in community agencies and programs and develop respectful and empowering professional skills. Students will also have the opportunity to gain knowledge of an issue or area of specific interest. This will necessitate the development of an individual or group project of interest and importance to the organization involved. (Prerequisite: DISB-2010, DISB-3020: Semester 7 standing in Disability Studies Program)(Co-requisites: DISB-4010, DISB-4020).(Anti-requisite: DISB-4610) (Winter 2012: Offered as Pass/Non-Pass.) (This is an experiential learning course.)

SOCIAL JUSTICE COURSES

SJST-1000. Social Justice in Action

Students investigate the local and global origins of a contemporary social problem through the eyes of social justice activists. Students will assess the strengths and limitations of strategies and theoretical

frameworks for social change and use this knowledge to create social action messages that raise public awareness, influence government or corporate policy, or positively change attitudes and behaviours. (3 lecture hours per week) (Also offered as DISB-1000.)

SJST-2370. Queer Activism

Students engage with 2SLGBTQIA+ activism, past and present. Students investigate how queer communities are created and sustained through protest, alliance-building, symbols, and memes. (Also offered as WGST-2370).

SJST-2100. Being Heard: Advocating for Social Change

Students envision a better world by raising awareness about social problems and practicing the advocacy skills needed to create a more just society. Students prepare, present and defend action plans that address the needs of those communities whose voices are undervalued in public discussions. (Prerequisite: DISB/SJST-1000 or semester 3 standing or above or permission of the instructor.)

SJST-2180. Everyday Conflicts and Their Resolution

Students design and practice techniques for resolving everyday conflicts with friends and co-workers effectively and respectfully, and without damaging interpersonal relationships. Students learn to focus on the problem, not the person; identify and respond to hidden agendas and subvert personal attacks. Pre-requisite: Semester 3 or above standing or permission of the instructor. (Also offered as PSYC-2180 and WORK-2180)

SJST-2350. Disability, Madness, and Social Justice

This course uses first-person narratives to engage students in experiences of disability and madness. Students learn to develop a feminist intersectional, anti-ableist analysis of their own thoughts, feelings and behaviours in relation to disability, madness, and other intersecting forms of oppression. Intersections of disability, madness, race, class, sexuality, and gender identity are explored. Topics may include disability and madness in popular culture, disability and sexuality, mad activism, disability justice, and feminist perspectives on disability and madness. (Prerequisites: WGST-1000 or SJST/DISB-1000) (Also offered as WGST-2350)

SJST-2700. Speaking Truth to Power: Voice and Activism

An examination of contemporary campaigns to improve the standard of living of Canadians. Students learn to conduct interviews and evaluate the effectiveness of social justice messages. (Prerequisite: Semester 3 or above standing.) (Also offered as CMAF-2700, WORK-2700 and DRAM-2700).

SJST-3000. Social Justice Seminar

An inter-disciplinary exploration of the role of the state, alternative media, arts, literature, critical pedagogy, international and domestic law, social movements, non-governmental agencies, international governmental agencies, and scholars in bringing about social change. (Prerequisites: SJST-1000 and semester 5 standing.)

SJST-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at

bystanderinitiative.ca) (Also offered as KINE-3501, PSYC-3500, SACR-3500, SOSC-3500, SWRK-3500, and WGST-3500.)

SJST-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual violence and bystander intervention, and they lead sexual violence prevention workshops to groups of students on campus. This course equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% or higher in KINE-3501/SOSC-3500/PSYC-3500/SJST-3500/SWRK-3500/SACR-3500/WGST-3500 and permission of the instructor by online application at bystanderinitiative.ca.) (Also offered as PSYC-4500, SACR-4500, SOSC-4500, SWRK-4500, and WGST-4500.)

WORK AND EMPLOYMENT ISSUES COURSES

WORK-1000. Labour and Social Movements in Canadian Society

An interdisciplinary introduction to the study of labour and social movements, focussing on their efforts to address the needs of workers, women, gays and lesbians, social and ethnic minorities, students, and the poor.

WORK-1500. Working for a Living

This course uses the students' own experiences of work to examine the economic, social, and psychological significance of paid and unpaid work in Canadian society, the tasks and values assigned to various kinds of work, and the relationship between work and living standards.

WORK-2000. Labour Law and Workers' Rights

This course examines the everyday application of employment law and human rights legislation to workplace issues. Students investigate the rights and responsibilities of workers and employers in unionized and non-unionized environments.

WORK-2180. Everyday Conflicts and Their Resolution

Students design and practice techniques for resolving everyday conflicts with friends and co-workers effectively and respectfully, and without damaging interpersonal relationships. Students learn to focus on the problem, not the person; identify and respond to hidden agendas and subvert personal attacks. Pre-requisite: Semester 3 or above standing or permission of the instructor. (Also offered as PSYC-2180 and SJST-2180)

WORK-2400. Work and Equality

This course explores how paid and unpaid work are gendered, valued and rewarded. Students investigate how public policy, law, collective bargaining, and advocacy enhance equality in pay and working conditions for women and racialized workers. (Prerequisites: WORK-1500 or WGST-1000 or SACR-1100 (Also offered as Work and Employment Issues WGST-2400)

WORK-2500. Worker Health and Safety

An interdisciplinary examination of the political, legal, social, and economic aspects of occupational health and safety. This course covers the history of health and safety within industrial, office, and rural contexts in Canada and other parts of the world.

WORK-2600. Women and Globalization

This course introduces students to gender-sensitive analysis of the role of women in the global economy. Course materials cover the place of women in the international division of labour, the role of women in export-oriented industries in the "Third World," and women as "homeworkers" in the First and Third

World. Students will utilize relevant empirical material to develop critical thinking and an understanding of gender inequalities in the "development process." (Prerequisites: at least Semester 3 standing.)(Also offered as Women's and Gender Studies WGST-2600.)

WORK-2700. Speaking Truth to Power: Voice and Activism

An examination of contemporary campaigns to improve the standard of living of Canadians. Students learn to conduct interviews and evaluate the effectiveness of social justice messages. (Prerequisite: Semester 3 or above standing.) (Also offered as DRAM-2700, SJST-2700, and CMAF-2700.)

WORK-3270. Social Movements

An examination of theories and case studies of world revolutions, class struggles, and various social movements, such as the feminist, gay and lesbian, labour, native, ecological, and other movements. (Also offered as SACR-3270 and SACR-3270.) (Prerequisites: SACR-1100/1101 or WORK-1000; or Labour Studies students must have at least Semester 5 standing.)

WORK-3490. Canadian Labour History

A study of the development of the Canadian labour movement and an analysis of the Canadian working-class experience during the nineteenth and twentieth centuries. (Also offered as History HIST-3490.) (Prerequisites: semester 4 standing. Labour Studies majors must have Semester 4 or above standing or consent of instructor.)

WORK-3500. Investigating Contemporary Workplace Issues

Students consolidate and enhance their knowledge of workplace rights and responsibilities by identifying and analyzing labour management problems in union and non-union settings. (Prerequisites: WORK-2000 and WORK-2500 and semester 5 standing.)

WORK-3700. Industrial-Organizational Psychology

The study of employees, workplaces, and organizations. Topics include job analysis and competency models, recruitment, selection, and decision making, performance management, training, group and team processes in organizations, employee attitudes, affect, and behaviour, motivation, leadership, productive and counterproductive work behaviour. (Prerequisites: PSYC-1150 and PSYC-1160; or Labour Studies students with at least Semester 4 standing; or consent of instructor.) (Also offered as PSYC-3700.)

WORK-4601. Seminar on Prostitution, Sexual Labour and Health

This course engages in a critical study of the conception and construction of prostitution/sex work and sexual labour and its impact on social determinants of health. Students will be required to examine and critically reflect on a variety of issues pertaining to adult consensual sex work and the impact of public policy on the health and well-being of people working in the sex industry. Substantive topics may include: policy and regulation; the construction of sex trafficking; stigmatization; politics and the media; violence and victimization; health and safety; customers; and organizing and advocacy. Course delivery may vary according to instructor preference. (Prerequisite: Semester 7 standing or above, or permission of instructor). (Cross-listed with WGST-4601 and SOSC-4601.)

WOMEN'S AND GENDER STUDIES COURSES

Women's and Gender Studies Emphasis Courses

Program requirements in Women's and Gender Studies make reference to Women's and Gender Studies Emphasis courses. Women's and Gender Studies Emphasis Courses are defined as courses from other disciplines that focus on gender from a feminist perspective.

These currently include:

English ENGL-2330;
Languages, Literatures and Cultures ARAB-2620,
History , HIST-2500, HIST-3360, HIST-3610, HIST-3620;
Psychology PSYC-2400, PSYC-4400, PSYC-4450;
Sociology SACR-3520, SACR-4080, SACR-4650;
Kinesiology KINE-4050.

Various areas of study from time to time offer courses dealing specifically with women and gender under specific course titles or general titles such as, "Special Topics", "Directed Readings", or "Seminars". Information regarding such courses will be available from a program advisor in Women's and Gender Studies and they may be taken with permission of the program.

WGST-1000. Women in Canadian Society

This course illustrates and account for the position of women in Canadian society. We explore how gender identities are informed by the process of social construction which privileges some women while disadvantaging others.

WGST-1200. Gal Pals: Women and Friendship

This course examines a diverse range of women's friendships. Through discussion, reading, and films we will explore topics such as the meaning of friendship for women, how women's friendships have been portrayed in literature and film, the link between friendship and social activism for women, and the political meanings of women's friendship in cultures resistant to woman-centered consciousness. (Can be taken for Social Science or Arts credit.)

WGST-1300. Imagining Women

This course examines a broad cross-section of historical and contemporary representations of western women in popular culture, and visual media – photographs, film and video, the fine arts, and advertising. The student will be introduced to feminist and gender-related theories of representation. (Can be taken for either Social Science or Arts credit.)

WGST-2100. Gender, Sexuality and Social Justice

This course examines the personal and cultural meanings of sexual and gender identities in Canada today. Students consider how sexual and gender identities are created and experienced in conjunction with other identities such as race/ethnicity, social class, and (dis)ability and explore social justice activism that challenges the personal, social, political, and economic inequities based on these identities. Topics may include: transgender, intersex, and non-binary perspectives, Indigenous and queer people of colour activism, 2SLGBTQIA+ identities, feminist online resistance, disability and desirability, colonialism and the sex/gender binary, and the social construction of sex, gender, and sexuality. (Also offered as SACR-2100.) (Prerequisites: WGST-1000.)

WGST-2110. Women and Politics

An introduction to the principal themes in the study of women in Canadian politics. Topics may include: feminist theory, women in Canadian political institutions, the status of women in the Canadian economy, and gender equality rights in the Charter. Also offered as Political Science POLS-2110.

WGST-2190. Gender, Movement and Performance

This course explores how people come to know themselves and others through their bodies. Students investigate movement as a cultural message and explore how stereotypes connected to gender, race, sexuality, and ability are created and contested through the body. Prerequisite: WGST-1000 or DRAM-

1000 or with consent of the instructor. (Cross-listed as a Social Science course in Women and Gender Studies, DRAM-2190)

WGST-2200. Women, Race, and Social Justice

This course examines race, racialization, racism, and anti-racism in Canada today. Students consider how racial and ethnic identities are created and experienced in conjunction with other identities such as gender, sexuality, social class, and (dis)ability as well as social justice activism that challenges the personal, social, political, and economic inequities based on these identities. This course challenges the essentializing of the category of 'woman' while examining how race and gender intersect in women's lives. Topics may include: colonization and systemic racism in Canada, white privilege, Indigenous womanhood, Islamophobia and Muslim women, resisting anti-Black racism, allyship and anti-racism, and the social construction of race. (Prerequisite: WGST-1000 or permission of the instructor).

WGST-2350. Disability, Madness, and Social Justice

This course uses first-person narratives to engage students in experiences of disability and madness. Students learn to develop a feminist intersectional, anti-ableist analysis of their own thoughts, feelings and behaviours in relation to disability, madness, and other intersecting forms of oppression. Intersections of disability, madness, race, class, sexuality, and gender identity are explored. Topics may include disability and madness in popular culture, disability and sexuality, mad activism, disability justice, and feminist perspectives on disability and madness. (Prerequisites: WGST-1000 or SJST/DISB-1000) (Also offered as SJST-2350)

WGST-2360. Feminist Philosophies

An examination of key philosophical themes in feminism and philosophical debates among feminists. The themes and subjects of debate addressed may include sexism and oppression, feminist identity; theories the political significance of language, personal appearance, and pornography; feminist ethics; and feminist theories of knowledge. (Prerequisite: PHIL-1100 or PHIL-1120 or semester 3 or above standing, or consent of the instructor. Can be taken as an Arts credit.) (Also offered as Philosophy PHIL-2360).

WGST-2370. Queer Activism

Students engage with 2SLGBTQIA+ activism, past and present. Students investigate how queer communities are created and sustained through protest, alliance-building, symbols, and memes. (Also offered as SJST-2370).

WGST-2380. Good Relations: Indigenous Sovereignty, Feminism, and Reconciliation

Contemporary Indigenous feminist scholarship interrogates Indigenous historical experience and ancestral practices to reimagine a future that centers good relations, which involves a deep appreciation for Indigenous sovereignty, consent, and care. Colonization is a violent structure that devalues women, non-human beings, and other living relations. This course explores the impact of colonial structures on Indigenous ways of being in the present and showcases the work of Indigenous feminist scholars, artists, and activists fostering good ways of relating to each other as we slowly work collectively towards the ideals of reconciliation. Students will learn about the variety of Indigenous ways of being, Indigenous feminist approaches to historical narratives, tensions between Indigenous, feminist, and progressive ways of imagining the future, and how to respectfully approach Indigenous consultation and learning.

WGST-2400. Work and Equality

This course explores how paid and unpaid work are gendered, valued and rewarded. Students investigate how public policy, law, collective bargaining, and advocacy enhance equality in pay and working

conditions for women and racialized workers. (Prerequisites: WORK-1500 or WGST-1000 or SACR-1100 (Also offered as Work and Employment Issues WORK-2400))

WGST-2500. Women's Bodies, Women's Health

This course examines and critiques commonly cited biological evidence in support of sex differences and male superiority, including research on anatomy, genetics, hormones, and differential brain functioning. Students explore the social, cultural, and political meanings of the female body and consider how these understandings influence medical and non-medical definitions of "health" for women. Students investigate how sexism, classism, racism, ageism, and homophobia shape how individuals think about and value different female bodies. (Prerequisite: One Women's and Gender Studies course or permission of the instructor.) (Can be taken for either Science or Social Science credit.)

WGST-2510. History of Women's Movements in North America

An exploration of the collective action of women in the past and present in North America. Areas of study may include women's involvement with the temperance, civil rights, suffrage, trade union, environmental, reproductive rights, and women's liberation movements. (Also offered as History HIST-2510.)

WGST-2600. Women and Globalization

This course introduces students to gender-sensitive analysis of the role of women in the global economy. Course materials cover the place of women in the international division of labour, the role of women in export-oriented industries in the "Third World," and women as "homeworkers" in the First and Third World. Students will utilize relevant empirical material to develop critical thinking and an understanding of gender inequalities in the "development process." (Prerequisites: at least Semester 3 standing.) (Also offered as Work and Employment Issues WORK-2600.)

WGST-2700. Gender, Power, and Language

This course makes visible the politics hidden in the English language. Students learn how to identify and challenge aspects of language structure and use which perpetuate power and privilege. Topics include naming, slang, metaphor, grammar rules, and humour. (Prerequisite: Semester 3 standing or above and one Women's and Gender Studies course or consent of the instructor.) (Can be taken for either Social Science or Arts credit.)

WGST-2800. Boys to Men: A critical exploration of masculinities

This course uses personal narrative and popular culture to examine the lived realities of boys and men. The course explores dominant models of masculinity in order to challenge gender stereotypes that often flatten and narrow the lives of boys and men, and also the lives of women and girls. (Semester 4 standing or above.)

WGST-2990. Special Topics in Women's Studies

Special Topics courses will be offered occasionally to meet a demonstrated academic need that cannot be satisfied by regular course offerings. (Prerequisites: will vary depending on the subject.)

WGST-3000. Seminar in Emerging Feminist Scholarship

This course focuses on a selected topics in Women's and Gender Studies, which may vary according to special faculty interests and/or significant current issues. Topics may include: feminist politics, feminist activism, feminist social movements, gender and dis/ability, gender identities, transnational feminism, etc. (Prerequisite: WGST-1000 or permission of instructor). (3 lecture hours a week). (May be repeated for credit if the topics differ.)

WGST-3050. Feminist Theories

This course traces the evolution of contemporary feminist theories, the connection between theory and practice, and illustrates the significance of theory-driven practice on women's lives. (Prerequisites: two Women's and Gender Studies (WGST-) courses at the 2000-level or above and at least semester 5 standing.)

WGST-3060. Frameworks for Feminist Research

An exploration of the diverse approaches to feminist research in a variety of fields. Students will examine the core questions and approaches that various disciplines bring to the study of women. (Prerequisites: Two courses at the 2000-level or above from Women's and Gender Studies or consent of the instructor.)

WGST-3100. Women and the Law

This course examines the relationship between gender inequality and the legal system. Topics include abortion, marriage, divorce, custody, equal pay, sexual harassment, rape, pornography, and prostitution. Students are introduced to basic legal research tools, such as statutes, regulations, cases, and legal literature. (Prerequisites: two Women's and Gender Studies courses.)

WGST-3300. Victims, Survivors, and Warriors: Violence in the Lives of Women and Girls

An interdisciplinary exploration of male violence against women and girls locally and globally. The course will explore the power of language to shape our understanding of issues, the many forms of subtle and explicit violence, the impact of violence on the individual and the status of women, and the creative resistance of women and girls, among other issues. (Prerequisites: two Women's and Gender Studies courses and at least semester 4 standing.)

WGST-3340. Love, Honour, and Obey: Marriage and Gender

Romantic heterosexual love shapes contemporary notions of marriage for both straight and gay women. But marriage is about much more than love. It shapes women's lives and organizes relations between women and men. This course examines the interpersonal, economic, social, cultural, and legal aspects of marriage past and present, primarily in North America. (Also offered as History HIST-3340.) (Prerequisite: One Women's and Gender Studies course or HIST-2510 or permission of the instructor.)

WGST-3400. Women, War and Peace

This course examines the various and distinct ways in which women experience war and peace, in both historical and contemporary contexts. Topics include home fronts during wartime in both combat and non-combat zones, women's peace activism, displacement, war crimes against women, women in combat, and media coverage of women and war/peace across the 20th and 21st centuries. (Also offered as History HIST-3400.) (Prerequisite: one 2000-level Women's and Gender Studies or History course or POLS-2600 or consent of the instructor.)

WGST-3470. Social Work and Violence

Examines aspects of violence in society, particularly against marginalized groups. The primary focus is on generalist social work intervention related to violence. (Open to senior students. Required course for Social Work/Women's and Gender Studies students; elective for BSW students. Pre-requisite: One Women's and Gender Studies (WGST-) course or permission of the instructor. (Also offered as SWRK-3470.)

WGST-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to

successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at bystanderinitiative.ca) (Also offered as KINE-3501, SOSC-3500, PSYC-3500, SJST-3500, SWRK-3500, and SACR-3500.)

WGST-3530. Women, Power, and Environments

This course focuses on environmental issues as they affect women across cultures. It provides a feminist critical analysis of the power relations in modern societies that cause environmental degradation and examines the theories, policies, and institutions that contribute to unsustainable practices. Emphasis is placed on the women-nature debate within various environmental social movements and the historical role women have played as activists. (Also offered as Sociology SACR-3530.) (Prerequisite: Semester 3 or above standing and one course at the 2000-level or above from Women's and Gender Studies or Sociology.)

WGST-3540. Home, Work and Leisure in the Digital Age

An intersectional exploration of how home, work and leisure are reproduced through space-time relations that are organized and augmented by mobile technologies. Topics may include an investigation of the home as a contested racialized and gendered workspace, remote and mobile technologies in identity practices, history making and community-building, or the changing meaning of mobility for workers under globalization. (Also offered as Sociology SACR-3540.) (Prerequisites: SACR-1100 or WGST-1000 and semester 5 or higher standing.)

WGST-3550. Feminist Social Work Practice

This course prepares students to apply the principles, processes, and techniques of feminist social work practice. Required course for Social Work/Women's and Gender Studies students; elective for BSW students. (Prerequisite: One Women's and Gender Studies (WGST-) course or permission of the instructor.) (Also offered as SWRK-3550)

WGST-3590. Women, Knowledge, and Reality

An exploration of feminist theories about knowledge and reality that inform and are informed by scholarship in Women's Studies. Students examine how gender might affect identity, reasoning, objectivity, and evidence, and in turn, how such variations might affect feminist political practices. (Prerequisites: Two courses at the 2000-level or above from Women's and Gender Studies and/or Philosophy and at least semester 5 standing.) (Also offered as Philosophy PHIL-3590.)

WGST-3800. Masculinity, Crime and Punishment

Students examine the gendered nature of violence, crime and punishment in Canada today. Students will investigate how masculinity is lived on the streets, in the courts and in prisons, and imagine whether new forms of masculinity are possible. (WGST-2800 or permission of the instructor.)

WGST-3850. Tough Chicks: Representations of Women's Strength and Anger in Popular Culture and Society

This course examines popular interest in "tough chicks.". Students investigate the social construction of women's and girls' anger and aggression in fiction, popular media, and real life. and how these understandings are rooted in sexist, racist, homophobic, and other oppressive discourses. Students are encouraged to examine how their own lives and the lives of other women are impacted by these understandings. This course can be used for either Arts of Social Science credit. (Prerequisites: WGST-1000 and one 2000-level Women's and Gender Studies (WGST-) course or consent of the instructor)

WGST-3990. Special Topics

The content will vary to reflect student need and faculty expertise and may be offered as a cross-listed course with other programs. (Prerequisite: at least semester 4 standing. Additional prerequisites may apply depending on subject.)(May be repeated for credit if content changes.)

WGST-4000. Exploring the Feminist Voice

Students apply theoretical learning in Women's Studies to individual lived experiences and actions. Through writing and other modes of representation, they communicate their feminist ideas to target audiences. (Prerequisites: WGST-3590 (or WGST-3050) and WGST-3060 or consent of the instructor.)

WGST-4100. Women in Protest

This course examines women at the forefront of protest in historical and contemporary contexts. It analyzes gendered constructs of protest and social and political change. Students will study the role of women in protest movements such as suffrage, reproductive rights, anti-racism, labour rights, environmental justice, anti-globalization, and nationalist and religious movements. Case studies are explored in detail, with particular emphasis on primary-source material from women activists themselves. These studies are complemented by an examination of feminist, social movement, and protest theories. (Prerequisite: WGST-2510 or HIST-2510 and one 3000-level Women's and Gender Studies course or consent of the instructor.)

WGST-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual violence and bystander intervention, and they lead sexual violence prevention workshops to groups of students on campus. This course equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% or higher in KINE-3501/SOSC-3500/PSYC-3500/SJST-3500/SWRK-3500/SACR-3500/WGST-3500 and permission of the instructor by online application at bystanderinitiative.ca.) (Also offered as PSYC-4500, SACR-4500, SJST-4500, SOSC-4500, SWRK-4500). (This is an experiential learning course.)

WGST-4601. Seminar on Prostitution, Sexual Labour and Health

This course engages in a critical study of the conception and construction of prostitution/sex work and sexual labour and its impact on social determinants of health. Students will be required to examine and critically reflect on a variety of issues pertaining to adult consensual sex work and the impact of public policy on the health and well-being of people working in the sex industry. Substantive topics may include: policy and regulation; the construction of sex trafficking; stigmatization; politics and the media; violence and victimization; health and safety; customers; and organizing and advocacy. Course delivery may vary according to instructor preference. (Prerequisite: Semester 7 standing or above, or permission of instructor). (Cross-listed with WORK-4601 and SOSC-4601.)

WGST-4630. History of Gender and Sexuality

This course explores major themes in the history of gender and sexuality. These may include reproduction, contraception, and abortion; gender, race, and power; sexuality and the state; heterosexual relations and marriage; gay, lesbian, and transgender identities. Time period and geographical region will vary with the instructor.)(Prerequisite: Semester 5 or above standing and one of HIST-2500, or HIST-2510/WGST-2510 or permission of the instructor.)(Also offered as History HIST-4630.)

WGST-4900 Special Topics in Women's and Gender Studies

The content will vary to reflect student need and faculty expertise and may be offered as a cross-listed course with other programs. (Prerequisite: at least semester 5 standing and one WGST-**** course or

permission of the instructor. Additional prerequisites may apply depending on subject.) (May be repeated for credit if content changes.)

WGST-4990. Independent Study in Women's and Gender Studies

An independent research project that explores and applies advanced feminist theory. Applications must include: research question, preliminary reading list, and writing sample. Students must be prepared to present their research to an audience. (Prerequisites: Minimum grade of 80% in WGST-3590/ PHIL-3590 or WGST-3050 and WGST-3060 and minimum cumulative average of 75%.) (This course may be repeated for credit if topics are different.) Students must apply at uwindsor.ca/wgst/CoursesAndPrograms#IndependentStudy.

LANGUAGES, LITERATURES AND CULTURES/LANGUES, LITTÉRATURES ET CULTURES (LLC)

PROGRAM REGULATIONS

Greek and Roman Studies are devoted to the examination, analysis, and understanding of the languages, literature's, and history of the ancient Near East, Greece and Rome, and to an exploration of their cultural and linguistic legacies to modern society.

The Modern Languages program is devoted to the study and analysis of world languages in the context of their literary and cultural traditions. In addition to providing the opportunity to learn a new language and explore another culture, the Modern Languages Program focuses on Second Language Education, which explores the process through which a second language is learned. Such knowledge enables our students to become more effective language students and language teachers.

French Studies: The French language is an essential part of Canada's culture, not only for those who become teachers or translators, but also for those who enter the legal profession, the federal or provincial civil service, social work, business, or industry - in short, all walks of life.

Options in French Studies: Students wishing to take French as an option are free to select any course provided that they have demonstrated a sufficient command of the language, and/or sufficient preparation in literary studies.

Not all courses listed will be offered in each term. The programs reserve the right to limit enrolment in language courses and to place students in courses deemed appropriate to their level of language competence.

Native speakers must consult a program advisor for placement. All majors should plan their programs in consultation with an advisor.

PROGRAMS

GREEK AND ROMAN STUDIES

Honours Greek and Roman Studies (Greek or Latin Option)

Degree Requirements

Total courses: forty.

(a) twenty courses, consisting of GRST-1100 and GRST-1200; plus eighteen additional Greek and Roman Studies (GRST-), Greek and Roman History (GRHS-), Greek Language and Literature (GREK-), or Latin Language and Literature (LATN-) or the Ancient Greek Philosophy course PHIL-2730, including at least one in each of the following four areas:

- (i) Art and Archaeology: GRST-2120, GRST-2220, GRST-3020, GRST-4020;
- (ii) Greek and Roman History: GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, GRHS-3000, GRHS-4002;
- (iii) Literature: GRST-2110, GRST-2111, GRST-2210, GRST-2211, GRST-3010;
- (iv) Mythology and Religion: GRST-2030, GRST-3130, GRST-3230.

(b) two courses from Social Sciences;

(c) two courses from Arts or Science;

(d) two courses from any area of study, excluding Arts.

(e) GART-1500, GART-1510;

(f) four other courses from Arts, Languages, Social Sciences, or Science, including Greek and Roman Studies (GRST-), Greek and Roman History (GRHS-), Greek Language and Literature (GREK-), and Latin Language and Literature (LATN-);

(g) eight courses from any area of study, excluding Greek and Roman Studies (GRST-), Greek and Roman History (GRHS-), Greek Language and Literature (GREK-), and Latin Language and Literature (LATN-).

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Combined Honours Greek and Roman Studies

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) GRST-1100 and GRST-1200 plus eighteen other courses in Greek and Roman Studies (GRST-), Greek and Roman History (GRHS-), Greek (GREK-) or Latin (LATN-) Language and Literature, or the Ancient Greek Philosophy course PHIL-2730; m; and at least one course in each of the following four areas:

- (i) Art and Archaeology: GRST-2120, GRST-2220, GRST-3020, GRST-4020;

- (ii) Greek and Roman History: GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, GRHS-3000, GRHS-4002;
- (iii) Literature: GRST-2110, GRST-2111, GRST-2210, GRST-2211, GRST-3010;
- (iv) Mythology and Religion: GRST-2030, GRST-3130, GRST-3230.
- (b) Course requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510;
- (d) two courses from Social Sciences;
- (e) two courses from Arts or Science;
- (f) two courses from any area of study, excluding Arts.
- (g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirement (a) and (b), and any courses taken in the major area(s) of study.

Minor in Greek and Roman Studies

Greek and Roman Studies: six courses in Greek and Roman Studies (prefix GRST-, GRHS-, GREK-, LATN-), with no more than four at the 1000-level.

Major and Minor Concentrations - Bachelor of Arts and Science (BAS) - Greek and Roman Studies

Major Concentration:

GRST-1100, GRST-1200 at least one course each in any three of the following areas:

Art and Archaeology: GRST-2120, GRST-2220, GRST-3020, GRST-4020;

Greek and Roman History: GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, GRHS-3000, GRSH-4002;

Literature: GRST-2110, GRST-2111, GRST-2210, GRST-2211, GRST-3010;

Mythology and Religion: GRST-2030, GRST-3130, GRST-3230.

Plus, any seven Greek and Roman Studies courses (prefix GRST-, GRHS-, GREK-, LATN-)

Minor Concentration: six courses in Greek and Roman Studies (prefix GRST-, GRHS-, GREK-, LATN-) with no more than four at the 1000-level; and at least one at the 3000-level or above.

FRENCH STUDIES

French Studies Course Categories

Requirements for degree programs in French Studies make reference to the following groups of courses:

Preparatory French: FREN-1140.

French Language Training: FREN-1210, FREN-1220, FREN-2150, FREN-2210, FREN-2220, FREN-3150, FREN-3250.

Translation Courses: FREN-3280, FREN-3290.

Linguistics: FREN-2300, FREN-2310, FREN-3300, FREN-3320, FREN-3330.

French Literature: FREN-1410, FREN-2520, FREN-2530, FREN-2550, FREN-2570, FREN-3530, FREN-3540, FREN-3560, FREN-3570.

Franco-Canadian Literature: FREN-2840, FREN-3830, FREN-3850.

Franco-Canadian Culture: FREN-2700.

Francophone Culture: FREN-2810, FREN-2830

Modern French Culture: FREN-2600.

Special Topics: FREN-4000 to FREN-4960.

Directed Readings: FREN-4970, FREN-4980, FREN-4990.

General Bachelor of Arts in French Studies

Degree Requirements

Total courses: thirty.

- (a) five Literature courses: FREN-1410; plus one of FREN-2520, FREN-2530, FREN-2550, FREN-2570, FREN-3530, FREN-3540, one of FREN-3560, FREN-3580; and one of FREN-2840, FREN-3830, FREN-3850. Plus one more FREN (3000-level) literature course from the preceding list;
- (b) six Language Training courses: FREN-1210, and FREN-1220; FREN-2210, and FREN-2220; one of FREN-2150, FREN-3150; and one of FREN-3250, FREN-3280, FREN-3290;
- (c) three Linguistics courses: FREN-2300 and FREN-2310; and one of FREN-3300, FREN-3320, FREN-3330;
- (d) one Culture course: FREN-2600, FREN-2700, FREN-2810 or FREN-2830;
- (e) one additional course from any area in French Studies.
- (f) two courses from Social Sciences;
- (g) two courses from Arts or Science;
- (h) two courses from any area of study, excluding Arts.
- (i) GART-1500, GART-1510;
- (j) one of POLS-2035 or POLS-2055 [French];
- (k) five courses from any area of study, excluding French.

Courses used to calculate the major average are: courses listed under requirements (a) to (e), and any courses taken in the major area(s) of study.

All courses with the prefix FREN are taught entirely in French. Courses are three hours per week (3.00 credit hours) unless otherwise indicated. Not all courses are offered every year. Please contact the French Studies program at the Department of Languages, Literatures and Cultures office or its web site at www.uwindsor.ca/french to learn which courses will be offered in future years for program planning purposes. An antirequisite specified in the online course description lists a specific course or level of attainment which, if already successfully completed, does not permit registration for credit in the course.

Language training courses FREN-1140, FREN-1210, FREN-1220; FREN-2210, FREN-2210 must be taken in sequence. Students that begin the program at an advanced level because they possess native proficiency must complete the total number of French Studies course requirements by substituting other approved French Studies courses.

Honours Bachelor of Arts in French Studies (with/without Co-op)

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

- (a) eight Literature courses: FREN-1410 and FREN-3570; plus one of FREN-2520, FREN-2530, FREN-2550, FREN-2570, FREN-3530, FREN-3540, one of FREN-3560, FREN-3580, ; and one of FREN-2840, FREN-3830, FREN-3850. Plus three more FREN- literature courses from the preceding list, of which one must be a (3000-level) course;
- (b) seven Language Training courses: FREN-1210 and FREN-1220; FREN-2210, and FREN-2220; one of FREN-2150, FREN-3150 ; and two of FREN-3250, FREN-3280, FREN-3290;
- (c) four Linguistics courses: FREN-2300 and FREN-2310; and two of FREN-3300, FREN-3320, FREN-3330;
- (d) two Culture courses: FREN-2600, FREN-2700, FREN-2810, or FREN-2830;

- (e) one (3000-level) course from any area in French Studies.
- (f) one Special Topics (4000-level) course.
- (g) two courses from Social Sciences;
- (h) two courses from Arts or Science;
- (i) two courses from any area of study, excluding Arts;
- (j) GART-1500, GART-1510;
- (k) one course from any area of study, including French;
- (l) one of POLS-2035 or POLS-2055 [French];
- (m) seven courses from any area of study, excluding French.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a) to (f), and any courses taken in the major area(s) of study.

All courses with the prefix FREN are taught entirely in French. Courses are three hours per week (3.00 credit hours) unless otherwise indicated. Not all courses are offered every year. Please contact the French Studies program at the Department of Languages, Literatures and Cultures office or its web site at www.uwindsor.ca/french to learn which courses will be offered in future years for program planning purposes.

An anti-requisite specified in the online course description lists a specific course or level of attainment which, if already successfully completed, does not permit registration for credit in the course.

Language training courses FREN-1140, FREN-1210, FREN-1220; FREN-2210, FREN-2210 must be taken in sequence. Students that begin the program at an advanced level because they possess native proficiency must complete the total number of French Studies course requirements by substituting other approved French Studies courses.

Combined Honours French Studies Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) six Literature courses: FREN-1410, FREN-3570 plus one of FREN-2520, FREN-2530, FREN-2550, FREN-2570, FREN-3530, FREN-3540, one of FREN-3560, FREN-3580; and one of FREN-2840, FREN-3830, FREN-3850. Plus one more FREN (3000-level) literature course from the preceding list;
- (b) six Language Training courses: FREN-1210 and FREN-1220; FREN-2210, and FREN-2220; one of FREN-2150, FREN-3150; and one of FREN-3250, FREN-3280, FREN-3290;
- (c) three Linguistics courses: FREN-2300 and FREN-2310; and one of FREN-3300, FREN-3320, FREN-3330;
- (d) one Culture course: FREN-2600, FREN-2700, FREN-2810, or FREN-2830;

- (e) one Special Topics (4000-level) course.
- (f) Course requirements - Other Subject: courses used to calculate the major average in the other subject, as prescribed by that area of study.
- (g) GART-1500, GART-1510;
- (h) two courses from Social Sciences;
- (i) two courses from Arts or Science;
- (j) two courses from any area of study, excluding Arts.
- (k) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirement (a) to (f), and any courses taken in the major area(s) of study.

All courses with the prefix FREN are taught entirely in French. Courses are three hours per week (3.00 credit hours) unless otherwise indicated. Not all courses are offered every year. Please contact the French Studies program at the Department of Languages, Literatures and Cultures office or its web site at www.uwindsor.ca/french to learn which courses will be offered in future years for program planning purposes.

An anti-requisite specified in the online course description lists a specific course or level of attainment, which, if already successfully completed, does not permit registration for credit in the course.

Language training courses FREN-1140, FREN-1210, FREN-1220; FREN-2210, FREN-2210 must be taken in sequence. Students that begin the program at an advanced level because they possess native proficiency must complete the total number of French Studies course requirements by substituting other approved French Studies courses.

Concurrent General Bachelor of Arts (French Studies)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between Department of Languages, Literatures, and Cultures and the Faculty of Education. See Faculty of Education for program requirements.

Minor in French Studies

Required: a minimum of six French Studies courses, including FREN-1210, FREN-1220, FREN-2210, and FREN-2220; plus two courses that may be in Language Training, Translation, Linguistics, Literature or Culture.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - French Studies

Major Concentration: FREN-1210, FREN-1220, FREN-1410, FREN-2150 (or FREN-3150), FREN-2210, FREN-2220, FREN-2300, FREN-2310, plus one additional French Literature course, three courses from any area of French studies. At least one course must be in the literature or culture of Francophone Canada.

Minor Concentration: FREN-1210, FREN-1220, FREN-2210, and FREN-2220; plus two courses that may be in Language Training, Translation, Linguistics, Literature or Culture.

French Studies Outside of the University of Windsor

Students can immerse themselves in the French language and culture by spending their third year at the Université de Nice, France, in a program operated jointly with The University of Western Ontario, The University of Guelph and Memorial University, or can spend their third year at any of the French universities participating in the Ontario/Rhône-Alpes student exchange.

Students can also pursue studies in French at the Université du Québec à Montréal at the undergraduate level, for one or two semesters.

It is also possible to pursue studies in French at Quebec universities with the Summer Language Bursary Programme, or to study in Quebec for a year and be paid as a part-time, second-language monitor.

MODERN LANGUAGES

Honours Modern Languages (with year abroad)

(As of Fall 2024, there are no new admissions to the Honours Modern Languages (with year abroad) (Italian Stream).)

The Honours Modern Languages (with year abroad) program will offer students the possibility of completing an Honours degree in either German or Spanish. The Modern Languages Area Committee will determine whether transfer credit courses from other universities fulfill program requirements.

Degree Requirements

Total courses: forty

- (a) seven of the following: INCS-1200, INCS-1370, INCS-2200, INCS-2370, INCS-3200, INCS-3370, and INCS-4370
- (b) six language training courses in one language option area from the following: GRMN-1020, GRMN-2020, GRMN-3000, GRMN-3010, GRMN-4000, GRMN-4010 or ITLN-1020, ITLN-2020, ITLN-3000, ITLN-3010, SPAN-1020, SPAN-2020, SPAN-3000, SPAN-3010, SPAN-4010 (The level of required courses depends on a placement test. The 3000-level language training courses are compulsory for all students)*
- (c) one of the following courses: INCS-2020, INCS-2030, INCS-2350, INCS-3210, GRMN-2480, ITLN-2480, ITLN-3560, SPAN-2480
- (d) two of the following civilization courses in the chosen language option area: GRMN-2600 and GRMN-2610 or ITLN-2600 and ITLN-2610 or SPAN-2600 and SPAN-2610;
- (e) five pre-approved international courses taught in the target language in either “Literature” and/or “Linguistics” and/or “Culture” and/or “Civilization”, taken at a foreign university during the year abroad (see Notes below);
- (f) two “Directed Studies Abroad” Distance Education courses (INCS-3570 and INCS-3580) taken during the year abroad (see Note {3} below)
- (g) two Social Sciences courses
- (h) two Arts or two Sciences courses

- (i) two additional courses from Arts, Social Sciences or Science.
- (j) GART-1500, GART-1510
- (k) three international courses from a foreign university, in any area of study, including Modern Languages
- (l) additional courses from any area of study, excluding Modern Languages, to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirement (a) to (f), and any courses taken in the major area(s) of study.

* Students beginning the program at an advanced level must adhere to the following sequence of priorities in selecting their courses to replace the standard 6 language training course requirement.

1. Complete all available courses taught in the target language(s).
2. Complete additional courses in the chosen language option area(s).
3. Complete additional courses in Modern Languages

All courses must be selected in consultation with the program advisor.

Notes:

1. Students are required to take courses in distinct areas of concentration while abroad. They will have their choice of taking three pre-approved courses in either “Literature” and/or “Linguistics” and/or “Culture” and/or “Civilization”. The specific courses taken in an area depend upon the availability of courses in the area at the host university and the student’s program concentration. As well, all students will be required to take two advanced language-training courses. These are standard and available at any exchange partner university.
2. Students in the Honours program that are unable to take the required courses abroad, for any reason, will be permitted to transfer to the General or Honours with SLE programs. The modular design of the Modern Languages curriculum (a common first two years curriculum) permits this transfer to another program without any loss in time or additional costs to the student.
3. Students also will register for the “Directed Studies Abroad” Distance Education courses. Students on exchange will be required to attend specific cultural events (museums; art galleries, etc.), participate in assigned activities and write reports on their experiences.

Honours Modern Languages and Second-Language Education

*NOTE: Students who complete the requirements under "(b) Language Stream" as part of the successful completion of this degree are eligible for the Certificate in Second Language Education upon application at graduation.

For the Honours Modern Languages and Second Language Education, the Co-op option is only available for students in the Spanish stream.

Degree Requirements

Total courses: forty (Plus three work terms for students in the Spanish Stream Co-op program).

- (a) INCS-1200; INCS-2200; INCS-3200; INCS-3210; INCS-4200;
- (b) 17 course equivalents from the Language Stream or 18 course equivalents from the Intercultural Stream:
Language Stream:

- (i) six language training courses in one language option area from the following: GRMN-1020 (6.0 credits), GRMN-2020 (6.0 credits), GRMN-3000, GRMN-3010, GRMN-4000, GRMN-4010; or ITLN-1020 (6.0 credits), ITLN-2020 (6.0 credits), ITLN-3000, ITLN-3010, SPAN-1020 (6.0 credits), SPAN-2020 (6.0 credits), SPAN-3000, SPAN-3010, SPAN-4010. (The level of required courses depends on a placement test. The 3000-level language training courses are compulsory for all students.)**
- (ii) two of the following culture and civilization courses in the chosen language option area: GRMN-2600 and GRMN-2610; or ITLN-2600 and ITLN-2610; or SPAN-2600 and SPAN-2610;
- (iii) three additional courses from: INCS-2020, INCS-2030, INCS-2350, GRMN-2480, GRMN-2600, GRMN-2610, ITLN-2480, ITLN-2600, ITLN-2610, ITLN-3560, SPAN-2480, SPAN-2600, SPAN-2610
- (iv) INCS-1370; INCS-2370; INCS-3370; INCS-4370.

OR

Intercultural stream: GRMN-2600 or ASIA-2620; GRMN-2610; ITLN-2600 or ASIA-2640; ITLN-2610; SPAN-2600; SPAN-2610; ARAB-2610; ARAB-2620; GRMN-2480; ITLN-2480; SPAN-2480; INCS-4990 (6.0 credits); plus one of the following language pairs: GRMN-1020 (6.0 credits) and GRMN-2020 (6.0 credits); or ITLN-1020 (6.0 credits) and ITLN-2020 (6.0 credits); or SPAN-1020 (6.0 credits) and SPAN-2020 (6.0 credits).

- (c) two courses from Arts or Science;
- (d) two courses from Social Sciences;
- (e) two courses from any area of study, excluding Arts.
- (f) GART-1500, GART-1510;
- (g) Language stream: five more courses from any area of study, including Modern Languages; OR
Intercultural stream: four more courses from any area of study, including Modern Languages;
- (h) five courses from any area of study, excluding Modern Languages.

** Students beginning the program at an advanced level must adhere to the following sequence of priorities in selecting their courses to replace the standard 6 language training course requirement.

- (i) Complete all available courses taught in the target language.
- (ii) Complete two courses in another language offered by Languages, Literatures and Cultures in which the student has not had prior university-level training including: Arabic, French, German, Italian, Japanese, Ojibwe and Spanish;
- (iii) Complete additional courses in the chosen language option area.
- (iv) Complete additional courses in Modern Languages

All courses must be selected in consultation with the program advisor.

Co-op Students (Spanish Stream): GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a) to (d), and any courses taken in the major area(s) of study.

Combined Honours Modern Languages

(As of Fall 2024, there are no new admissions to the Combined Honours Modern Languages (Italian stream).)

(As of Winter 2025, there are no new admissions to the Combined Honours Modern Languages (German stream).)

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) INCS-1200, INCS-2200, INCS-1370, INCS-2370, INCS-3200, INCS-3370, and INCS-4370
- (b) six language training courses in one language option area from the following: GRMN-1020, GRMN-2020, GRMN-3000, GRMN-3010, GRMN-4000, GRMN-4010 or ITLN-1020, ITLN-2020, ITLN-3000, ITLN-3010, SPAN-1020, SPAN-2020, SPAN-3000, SPAN-3010, SPAN-4010 (The level of required courses depends on a placement test. The 3000-level language training courses are compulsory for all students)*
- (c) two culture or civilization courses in the chosen language option area: GRMN-2600 and GRMN-2610 or ITLN-2600 and ITLN-2610 or SPAN-2600 and SPAN-2610;
- (d) one courses from the following: INCS-2020, INCS-2030, INCS-2350, INCS-3210, GRMN-2480, ITLN-2480, ITLN-3560, SPAN-2480;
- (e) Course requirements - Other Subject: courses used to calculate the major average in the other subject, as prescribed by that area of study.
- (f) GART-1500, GART-1510;
- (g) two courses from Social Sciences;
- (h) two courses from Arts or Science;
- (i) two courses from any area of study, excluding Arts.
- (j) additional courses from any area of study to a total of forty courses

* Students beginning the program at an advanced level must adhere to the following sequence of priorities in selecting their courses to replace the standard 6 language training course requirement.

- (i) Complete all available courses taught in the target language(s).
- (ii) Complete additional courses in the chosen language option area(s).
- (iii) Complete additional courses in Modern Languages

All courses must be selected in consultation with the program advisor.

Courses used to calculate the major average are: courses listed under requirement (a) to (e), and any courses taken in the major area(s) of study.

Honours Modern Languages with Two Languages Option

(As of Fall 2024, there are no new admissions to the Honours Modern Languages with Two Languages (Italian stream).)

As of Winter 2025, there are no new admissions to the Honours Modern Languages with Two Languages (German stream).

*NOTE: Students who successfully complete this degree are eligible for the Certificate in Second Language Education upon application at graduation.

Degree Requirements

Total courses: forty.

- (a) INCS-1200, INCS-2200, INCS-1370, INCS-2370, INCS-3200, INCS-3370, and INCS-4370
- (b) six language training courses in each of two language option areas from the following: GRMN-1020, GRMN-2020, GRMN-3000, GRMN-3010, GRMN-4000, GRMN-4010 or ITLN-1020, ITLN-2020, ITLN-3000, ITLN-3010, SPAN-1020, SPAN-2020, SPAN-3000, SPAN-3010, SPAN-4010 (The level of required courses depends on a placement test. The 3000-level language training courses are compulsory for all students) *
- (c) two of the following culture and civilization courses in each of the two chosen language option areas: GRMN-2600 and GRMN-2610; or ITLN-2600 and ITLN-2610; or SPAN-2600 and SPAN-2610
- (d) one of the following courses: INCS-2020, INCS-2030, INCS-2350, INCS-3210, GRMN-2480, ITLN-2480, ITLN-3560, SPAN-2480
- (e) two courses from Social Sciences;
- (f) two courses from Arts or Science;
- (g) two courses from any area of study, excluding Arts.
- (h) GART-1500, GART-1510;
- (i) four courses from any area of study, including Modern Languages;
- (j) four courses from any area of study, excluding Modern Languages

* Students beginning the program at an advanced level must adhere to the following sequence of priorities in selecting their courses to replace the standard 6 language training course requirement.

- (i) Complete all available courses taught in the target language(s).
- (ii) Complete additional courses in the chosen language option area(s).
- (iii) Complete additional courses in Modern Languages

All courses must be selected in consultation with the program advisor

Courses used to calculate the major average are: courses listed under requirement (a) to (d), and any courses taken in the major area(s) of study.

Concurrent General Bachelor of Arts (Modern Languages with Second Language Education)/Bachelor of Education

Normally, direct admission will be to first year only.

This is a joint offering between Department of Languages, Literatures, and Cultures and the Faculty of Education. See Faculty of Education for program requirements.

Certificate in Second Language Education

Admission Requirements

Admission requirements are the same as those for the Honours Modern Languages program.

Total courses: eight.

- (a) INCS-1200, INCS-2200, INCS-3200, INCS-3210, INCS-4200;
- (b) one course from any area of Modern Languages, excluding language training courses;
- (c) plus any two language training courses in which the student does not have prior university level training (either Arabic, French, German, Italian, Spanish, Japanese or Ojibwe).

Native or heritage speakers of any of these languages must take two courses in a language with which they are not familiar.

NOTE: The Certificate in Second Language Education is not equivalent to nor does it provide the necessary qualification for professional certification by the Ontario College of Teachers.

Minor in Modern Languages (Concentration in Language)

Required Courses:

To complete the requirement for this minor, students normally will take the following language-training courses in one language-option area:

German: GRMN-1020*, GRMN-2020*, GRMN-3000, GRMN-3010;

Italian: ITLN-1020*, ITLN-2020*, ITLN-3000, ITLN-3010;

Spanish: SPAN-1020*, SPAN-2020*, SPAN-3000 and SPAN-3010.

NOTE: Students with a prior knowledge of the target language must meet with a Modern Languages counsellor before registering for a Minor in that language.

*Double-weighted course.

Minor in Modern Languages (Concentration in Language and Culture)

Required Courses:

(a) one of the following intensive language-training course*, or equivalent, in one language-option area (German: GRMN-1020; Italian: ITLN-1020; Spanish: SPAN-1020);

NOTE: Students with a prior knowledge of the target language must meet with a Modern Languages counsellor before registering for a Minor in that language.

(b) INCS-1370;

(c) two of the following culture and/or civilization courses in the chosen language option area: (German GRMN-2480, GRMN-2600, GRMN-2610; Italian ITLN-2480, ITLN-2600, ITLN-2610; Spanish SPAN-2480, SPAN-2600, SPAN-2610);

(d) one of INCS-2020 or INCS-2030.

NOTE: Modern Languages students may take a minor in a language other than their major. If courses in the minor also form part of the major, a substitution of these courses will be permitted with the approval of the Programme Co-ordinator.

*Double-weighted course.

Minor in Modern Languages (Concentration in Linguistics and Literature)

Required Courses: 6

(a) three linguistics courses as follows: INCS-1200, INCS-2200, INCS-3200

(b) three literature courses as follows: INCS-1370, INCS-2370, INCS-3370

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Modern Languages

(As of Fall 2024, there are no new admissions to the Major and Minor Concentrations- Bachelor of Interdisciplinary Arts and Science (IAS) Modern Languages (Italian stream).)

(As of Winter 2025, there are no new admissions to the Major and Minor Concentrations- Bachelor of Interdisciplinary Arts and Science (IAS) Modern Languages (German stream).)

Major Concentration: INCS-1200, INCS-2200, INCS-1370, INCS-2370; six language training courses in one language option area (the level of required courses depends on a placement test); two literature, culture or civilization courses in the area of the language option. Students entering the program at an advanced level must complete their language training requirements by selecting from among 3000- and 4000-level courses taught in the target language.

Minor Concentration: four language training courses in one language option area (the level of required courses depends on a placement test), plus two literature, culture or civilization courses in the area of the language option. Students entering the program at an advanced level must complete their language training requirements by selecting from among 3000- and 4000-level courses taught in the target language.

Minor Concentration - Bachelor of Interdisciplinary Arts and Science (IAS) - Linguistics and Literature

Minor Concentration: 6 courses

- (a) three linguistics courses as follows: INCS-1200, INCS-2200, INCS-3200
- (b) three literature courses as follows: INCS-1370, INCS-2370, INCS-3370

Minor in Arabic Studies

The Minor in Arabic Studies is offered in either a language intensive or culture intensive stream.

Required: a minimum of six courses. (Those with prior language proficiency cannot register ARAB-1100 and ARAB-1110 and will have to take ARAB-2100 and ARAB-2110 in their place.)

Language stream requirements:

(a) For students with little or no prior knowledge of spoken or written Arabic: ARAB-1100, ARAB-1110, ARAB-2100, ARAB-2110 and/or ARAB-2150 and up to TWO of the following: ARAB-2610, ARAB-2620, ARAB-3610, ARAB-3620, POLS-2350, POLS-3650, HIST-1130, HIST-2110, HIST-2120, HIST-3100, FREN-2830, FREN-3580.

(b) For students with prior knowledge of spoken or written Arabic: ARAB-2100, ARAB-2110, ARAB-2150 and any THREE of the following: ARAB-2610, ARAB-2620, ARAB-3610, ARAB-3620, POLS-2350, POLS-3650, HIST-1130, HIST-2110, HIST-2120, HIST-3100, FREN-2830, FREN-3580.

Culture stream requirements:

(a) ARAB-2610, ARAB-2620, ARAB-3610 and/or ARAB-3620, and up to THREE of the following: POLS-2350, POLS-3650, HIST-1130, HIST-2110, HIST-2120, HIST-3100, FREN-2830, FREN-3580.

Minor in Jewish Studies

Required Courses: A minimum of six Jewish Studies courses, including JWST-1200 and any five of the following: JWST-1100, JWST-1110, JWST-1700, JWST-2200, JWST-2350, JWST-2700, JWST-3700.

LANGUAGES, LITERATURES AND CULTURES/LANGUES, LITTÉRATURES ET CULTURES (LLC) COURSES

ARABIC STUDIES COURSES

ARAB-1100. Introduction to Arabic I

Introduces vocabulary and the basic elements of Arabic language structure. Students will acquire a basic level of expertise in the four communication skills: listening, speaking, reading and writing. (Only for students with no prior knowledge of Arabic.)

ARAB-1110. Introduction to Arabic II

This course is the continuation of “Introduction to Arabic I”. It is designed to increase vocabulary, enhance knowledge of the elements of Arabic language structure and provide additional oral (listening and speaking) and written (reading and writing) communication skills. (Prerequisite: ARAB-1100 or permission of instructor.)

ARAB-2100. Intermediate Arabic I

The course targets the four basic language skills of modern standard Arabic: listening, speaking, reading, and writing. Reading and writing assignments in this class will expose students to a large variety of vocabulary and topics in religion, culture, and politics. Students are expected to read, to report on written material in Arabic (newspapers, comics, magazines), and to listen to Arabic news and songs. The ultimate objective of the course is to help them to acquire and to apply language tasks such as paraphrasing and summarizing short texts, communicating their points of view in writing and speaking, as well as describing and narrating events. (Prerequisite: ARAB-1100 and ARAB-1110, or permission of instructor.)

ARAB-2110. Intermediate Arabic II

This course will serve as a continuation of Intermediate Arabic I with equal emphasis on speaking, reading, oral and aural skills. The course will cover advanced aspects of grammar and structure of modern written Arabic. Selected readings from contemporary Arabic culture and politics will be introduced into the curriculum and will serve as basis for reading and conversation. (Prerequisite: ARAB-2100, or permission of instructor.)

ARAB-2150. Oral Proficiency in Arabic I

A course designed to strengthen the student's competence in oral Arabic through intensive training at an intermediate level, in both oral expression and aural comprehension. (May not be taken for credit by native speakers of Arabic.) (Prerequisite: permission of instructor.) (This is an experiential learning course.)

ARAB-2610. Introduction to Arabic Culture

An interdisciplinary cultural studies course surveying the complex history that has shaped Arabic culture and the major forces that continue to effect changes in Arabic culture. (The course is offered in English.)

ARAB-2620. Modern Arabic Literature

A survey of modern Arabic literature (in English translation). Selected texts are studied as literature with constant reference to the social, cultural and political contexts in which they were written. Students are introduced to the major modern Arabic genres and discursive practices, with particular emphasis on poetry and fiction, as well as major Arabic literary and intellectual figures. (The course is offered in English.)

ARAB-3610. Literature and Film in North Africa and the Middle East

This course introduces students to North African and Middle Eastern film and literature as interrelated activities involved in the process of cultural production and consumption. It offers a structured elaboration of the social, political and cultural context in which Arabic cinema and literature have evolved and provides students with a critical introduction to the language of film and literary and cultural criticism.

ARAB-3620. Modern Arabic Poetry in Translation

This course will introduce students to modern Arabic poetry, its language, style, and themes. It will also highlight the influence of western poetic movements and schools on Arab poets.

ARAB-4010. Directed Studies in Arabic Language

This course is designed for students who wish to do independent research on any aspect of contemporary Arab literature and or to fulfill an Arabic language requirement.

ARAB-4020. Directed Studies in Arabic Culture

The course is designed for students who wish to do independent research on any aspect of contemporary Arab culture to fulfill a Minor in Arabic Studies requirement. (Pre-requisites: GART-1500 and GART-1510)

ARAB-4030. Directed Studies in Arabic Literature

These courses are designed for students who wish to do independent research on any aspect of contemporary Arab literature and or to fulfill an Arabic language requirement. (Pre-requisites: GART-1500 and GART-1510)

ASIAN STUDIES COURSES

ASIA-1100. Chinese for Beginners

This language training course introduces students to Mandarin Chinese. Students focus on learning essential vocabulary, practicing pronunciation with Pin Yin, understanding simple grammatical structures, and communicating effectively in Mandarin on a limited range of topics related to everyday situations. Students practice listening and speaking in real-life situations, learn to read and write Chinese characters, and examine how culture and language interact in China. In-class activities and course assignments aim to assist students as they develop the oral proficiency and confidence necessary to initiate simple conversations. Out-of-classroom experiences such as a field trip (to a local store for example) and guided interactions with native speakers supplement formal classroom instruction and provide ample opportunities for practical engagement. (Only for students with no or minimal previous background in spoken or written Mandarin.) (This is an experiential learning course).

ASIA-2620. Special Topics in Chinese Culture

This course will provide a topical introduction to Chinese culture. The topics may be either historical or contemporary. Topics may change from year to year. (Students may repeat the course for credit if the content changes.)

ASIA-2640. Special Topics in Chinese Literature

This course covers the development of modern Chinese literature in English translation. Classic works and literary characters will be classified and analyzed. Students will compare different writing genres and integrate them with the socio-cultural background of modern Chinese writers. Students will be expected to present their own perspectives through written papers and oral presentations. (Three lecture hours per week.)

ASIA-4090. Directed Readings in Asian Studies

(May be repeated for credit with approval of LLC.)

FRENCH STUDIES COURSES

All courses with the prefix FREN- are taught in French. Not all courses are offered every year. Courses are three hours a week (3.00 credit hours) unless otherwise indicated. Language and linguistics courses may require laboratory and/or field work.

An antirequisite is a specific course or level of attainment which, if already successfully completed, does not permit registration for credit in another desired course, or which may not be taken for credit concurrently with another course.

FREN-1120. French for Beginners

Designed for beginner students, the course emphasises the acquisition of basic reading and writing skills, aural comprehension and oral practice. (Antirequisites: Grade 10 French or higher.)

FREN-1130. Intermediate French I

This course targets further development of all four language skills (speaking, listening, reading, and writing) and introduces students to more advanced aspects of French grammar (Antirequisites: Grade 11 French or higher.) (Prerequisite: FREN-1120, Grade 10 French, or equivalent, or permission of instructor).

FREN-1140. Intermediate French II

Further training in grammar, reading and writing skills. Additional aural comprehension and oral practice. This course is equivalent to 12U French. (Antirequisite: 12U French or equivalent, or higher.) (Prerequisite: FREN-1130, Grade 11 French, or equivalent, or permission of instructor.)

FREN-1210. French Language Training I

A study of norms and functions of the French verb system, nouns, pronouns, and modifiers. Oral practice, pronunciation and composition. (Prerequisite: Grade 12“U” French or Français, or equivalent.) (Antirequisite: any previous 2000-level French language training courses.)

FREN-1220. French Language Training II

Further study of the norms and functions of the French verb system, nouns, pronouns, and modifiers. Development of reading comprehension. Oral practice, composition. (Prerequisite: Grade 12“U” French or Français, or equivalent.) (Antirequisite: any previous 2000-level French language training courses.)

FREN-1240. French for Law Professionals

In this course, students will build their general competence in French through listening, speaking, reading and writing activities. In particular, they will learn how to read and write different types of texts including memos, emails, reports, minutes of meetings, communiqués, etc. Some emphasis will be laid on terminology and collocations pertaining to the different branches of law including family, business, criminal, and labour law, as well as appropriate French lexicon to discuss the administration of law, contracts, obligations and ownership in the Canadian context. (Prerequisite: Grade 12U French)

FREN-1410. Introduction to Literary Studies

An introduction to the analysis of literary genres: poetry, drama and prose fiction. (Prerequisite: Grade 12“U” French or Français, or equivalent.) (Note: FREN-1410 is a prerequisite course for all literature courses in French Studies.)

FREN-2150. Oral Proficiency in French I

A course designed to strengthen the student's competence in oral French through intensive training at an intermediate level, in both oral expression and aural comprehension. (May not be taken for credit by native speakers of French.) (Prerequisite: permission of instructor.)

FREN-2210. French Language Training III

Effective oral and written communication; practice in the logical development of ideas; vocabulary expansion. (Prerequisites: FREN-1210 and FREN-1220.)

FREN-2220. French Language Training IV

Effective oral and written communication. Demonstration and discussion of the spoken and written codes, oral exercises, written practice. (Prerequisites: FREN-1210 and FREN-1220.)

FREN-2300. Introduction to Linguistics I

A survey of fundamental linguistic concepts and ideas of language. Language analysis at the first three levels of description: phonetics, phonology and morphology. (Prerequisites: FREN-1210 and FREN-1220, or permission of instructor.)

FREN-2310. Introduction to Linguistics II

Language analysis at the remaining levels of description: syntax, semantics, discourse analysis and pragmatics. A brief introduction to sociolinguistics, psycholinguistics and neurolinguistics. (Prerequisites: FREN-1210 and FREN-1220, or permission of instructor.)

FREN-2520. French Classicism

An introduction to the literature of seventeenth-century France and its principal doctrines. (Prerequisite: FREN-1410.)

FREN-2530. The French Enlightenment

An introduction to the literature and thought of eighteenth-century France. (Prerequisite: FREN-1410.)

FREN-2550. French Romanticism

A study of the romantic aesthetic through the poetry, prose, and drama of major romantic writers of the nineteenth century. (Prerequisite: FREN-1410.)

FREN-2570. Realism and Naturalism

A study of post-romantic prose writing in the nineteenth century. (Prerequisite: FREN-1410.)

FREN-2600. Modern French Culture

A general study of the patterned behaviour which constitutes the modern French cultural system, focusing on its intellectual, sociological, political, and religious aspects. Students will be required to read texts and will also avail themselves of the latest audiovisual technology. Prerequisites: FREN-1210.)

FREN-2700. Introduction to the Cultural Heritage of French Canada

An introduction to the francophone cultural experience in Canada. (Prerequisites: FREN-1210)

FREN-2810. Introduction to the Culture of Sub-Saharan Francophone Africa

An introduction to various cultures of sub-Saharan Francophone Africa from pre-colonial times to the present. Students will be required to read some historical texts and representative literature. Some television documentaries and films will also be viewed. (Prerequisites: FREN-1210)

FREN-2830. Introduction to Francophone Culture of the Maghreb and the Middle East

An introduction to contemporary francophone culture in North Africa (Morocco, Algeria, and Tunisia) and the Middle East (Lebanon), largely through the study of films, popular music, media, newspapers, art exhibits and/or television programs as well as theoretical works that formulate the (post)colonial discourse. (Prerequisites: FREN-1210).

FREN-2840. The Novel in Quebec and in Other Francophone Regions of Canada

From the novel of the land to the post-modern novel in Francophone Canada. (Prerequisite: FREN-1410.)

FREN-3150. Oral Proficiency in French II

A course designed to strengthen the student's competence in oral French through intensive training at an advanced level, both in oral expression and aural comprehension. (Prerequisite: permission of instructor.)

FREN-3250. Error Analysis

A course designed to strengthen the student's competence in French through an analysis of the three most common sources of errors: the differences between spoken and written French, the first language and the interlanguage (unfinished French grammar) of the student. (Prerequisites: FREN-2210 and FREN-2220, or FREN-2230.)

FREN-3280. Aspects of Translation I

A comparative analysis of French and English structures with special emphasis on translation processes. Accompanied by regular exercises in translation. (Prerequisites: FREN-2210 and FREN-2220, or FREN-2230.)

FREN-3290. Aspects of Translation II

A comparative analysis of French and English structures with special emphasis on questions of meaning related to the sentence and its context. Accompanied by regular exercises in translation. (Prerequisites: FREN-2210 and FREN-2220, or FREN-2230.)

FREN-3300. Issues in First and Second Language Acquisition and Teaching

An introduction to modern linguistic theories about language acquisition, followed by a comparative study of first and second language acquisition and a survey of second language teaching techniques highlighting the linguistic concepts underlying these techniques. (Prerequisite: FREN-2300 and FREN-2310.)

FREN-3320. The History of the French Language

This course will examine successive stages in the development and spread of the French language from Late Antiquity to the present. (Prerequisite: FREN-2300 and FREN-2310, or permission of instructor.)

FREN-3330. Sociolinguistic Aspects of French in Canada

A survey of the main characteristics of French in Canada with emphasis on its variations and varieties. Sociolinguistic concepts are introduced and discussed in relation to the situation of French in Canada. (Prerequisites: FREN-2300 and FREN-2310.)

FREN-3530. Poetry from Baudelaire to Surrealism

A study of post-romantic, modernist poetry from the mid-nineteenth century to the mid-twentieth century. (Prerequisite: FREN-1410.)

FREN-3540. The Modern Novel and Theatre

A study of modern theatre and of the novel from the turn of the century (1900) until the Nouveau Roman. (Prerequisite: FREN-1410.)

FREN-3560. Francophone Literatures of Sub-Saharan Africa and the French Caribbean

The post-modern aesthetic and writing in francophone countries of sub-Saharan Africa and the French Caribbean. (Prerequisite: FREN-1410.)

FREN-3570. Contemporary Critical Theory

An introduction to a variety of major critical approaches and their applications to the literary text. (Prerequisites: FREN-1410, plus two additional courses in literature.) (Note: FREN-3570 is a required course for students enrolled in an Honours Bachelor of Arts in French Studies, and will be of particular value to those intending to pursue a Master of Arts degree.)

FREN-3580. Francophone Literature of the Maghreb and the Middle East

Introduction to Francophone literature of the Maghreb (Morocco, Algeria, Tunisia) and the Middle East (Lebanon) (Prerequisite: FREN-1410)

FREN-3830. Drama in Quebec and in other Francophone Regions of Canada

A study of the main dramatic works in Francophone Canada. (Prerequisite: FREN-1410.)

FREN-3850. Poetry in Quebec and in other Francophone Regions of Canada

A study of the main works of poetry in Francophone Canada. (Prerequisite: FREN-1410.)

FREN-4340. The French Lexicon

Detailed examination of the morphological, semantic and sociolinguistic characteristics of the French lexicon. (Prerequisite: FREN-2310.)

FREN-4440. Phraseology: Theory and Applications

In this course, students will explore the theoretical aspects of phraseology and apply them to the French language. Different forms of prefabricated units or phrasemes (full idioms, semi-idioms, weak idioms, collocations, clichés, proverbs, formulaic expressions, etc.) will be studied and used to enhance students' linguistic competence. Insofar as phraseology is a universal feature of natural languages, students will also explore the challenges associated with the translation of various phrasemes. (Prerequisites: FREN-2300 and FREN 2310.)

FRENCH STUDIES SPECIAL TOPICS

FREN-4000 to FREN-4090. Special Topics

[Topics include: The Grotesque Body in the Modern French Novel (4000); Theories of Semantics (4310); Individual and Societal Bilingualism (4350)] Special topics courses include the 4000-series courses listed in the French Studies program. They cover language, linguistics and literature and may take the form of directed readings. (Prerequisites for special topics courses in language and linguistics: FREN-2300 and FREN-2310; for special topics courses in literature: FREN-1410; plus one additional course in literature.) (May be repeated for credit if content changes.)

FRENCH STUDIES DIRECTED READINGS

FREN-4970 to FREN-4990.

(Prerequisite: Permission of instructor.) (May be repeated for credit if content changes.)

GREEK LANGUAGE AND LITERATURE COURSES

GREK-1100. Introduction to Ancient Greek I

Designed to equip the beginner with the basic skills needed for reading ancient Greek literature, including the New Testament.

GREK-1101. Introduction to Ancient Greek II

Designed to equip the beginner with the basic skills needed for reading ancient Greek literature, including the New Testament. (Prerequisite: GREK-1100 or consent of instructor.)

GREK-2100. Intermediate Greek I

Review of vocabulary and grammar. Readings from classical prose, poetry, or the New Testament. (Prerequisite: GREK-1101 or consent of instructor.)

GREK-2101. Intermediate Greek II

Continuation of GREK-2100. (Prerequisite: GREK-2100 or consent of instructor.)

GREK-4100. Directed Readings in Greek Literature

Designed for the student who wishes to explore a special area of interest with the aid of a faculty advisor. (May be repeated for credit if content changes.) (Hours by arrangement.)

GREEK AND ROMAN HISTORY COURSES

GRHS-2100. Greek History I: To the End of the Classical Period

This course is an illustrated survey of the historical and social development of Greek civilization from the Neolithic period (circa 6000 BC) to the death of Alexander the Great (323 BC), with particular emphasis on the political history of Athens in the sixth through fourth centuries BC. Selected readings of Greek texts in translation examine particular events or themes in greater depth. (Prerequisite: semester 3 standing or above or permission of the instructor)

GRHS-2101. Greek History II: To the End of the Hellenistic Period

This course is an illustrated survey of the historical and social development of Greek civilization from the time of Alexander the Great's conquests (326-323 BC) to Rome's annexation of the last major Greek kingdom, Cleopatra's Egypt, in 30 BC. The continuing role of Greek cities under the Roman Empire can

also be examined. Selected readings of Greek texts in translation examine particular events or themes in greater depth. (Prerequisite: semester 3 standing or above or permission of the instructor)

GRHS-2200. Roman History I: To the End of the Republic

An exploration of Roman social and political history from Rome's earliest foundations to the collapse of the Republic (1000-27 BC). This will include a close examination of the Roman conquest of the Italian peninsula, the Punic Wars and Civil Wars, as well as the study of such important figures as Hannibal and Julius Caesar. (Prerequisite: semester 3 standing or above or permission of the instructor)

GRHS-2201. Roman History II: To the End of the Empire

An exploration of Roman social and political history from the establishment of the Empire by Augustus to its fall (27 BC - AD 476). This will include a close examination of the expansion and administration of the Empire and wars against the Parthians, Persians and Germans as well as the study of individual Emperors and other important literary and historical figures of the time. (Prerequisite: semester 3 standing or above or permission of the instructor)

GRHS-3000. Topics in Ancient History

This rotating topic course is an in-depth study of some aspect of ancient history that may be thematic or chronological in scope. Required readings usually consist of ancient sources in English translation and/or articles in modern scholarly journals than formal textbooks. (May be repeated for credit if content changes.) (Prerequisite: semester 3 standing or above or permission of the instructor).

GRHS-4002. Directed Readings in Ancient History

This directed reading course provides an advanced study of some aspect of Greco-Roman history that may be thematic or chronological in scope. The course is limited to Greek and Roman Studies majors in the final two years of their program. The particular topic and schedule of instruction in each case is to be determined by mutual agreement of instructor and student. (May be repeated for credit if content changes.) (Prerequisite: semester 3 standing or above or permission of the instructor).

GREEK AND ROMAN STUDIES COURSES

GRST-1100. Introduction to Greek Civilization

An introduction to the cultural values and achievements of the ancient Greeks. Topics will include geography, history, mythology and religion, language and literature, art and daily life. (Recommended for prospective Greek and Roman Studies majors.)

GRST-1200. Introduction to Roman Civilization

An introduction to the cultural values and achievements of the ancient Romans. Topics will include geography, history, mythology and religion, language and literature, art and daily life. (Recommended for prospective Greek and Roman Studies majors.)

GRST-2000. Topics in Classical Culture

A thematic examination of a single social historical topic in Greco-Roman antiquity. Topics may vary from year to year. (May be repeated for credit if content changes.)

GRST-2030. Religions of the Ancient World

An introduction to religions from the ancient Near East and Mediterranean, such as those of Mesopotamia, Egypt, Israel, Greece, and Italy. Topics may include the decline of paganism and polytheism and the rise of Christianity and monotheism, sacred texts and rituals, priests and other

religious personnel, and mystery religions and mysticism. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-2110. Greek Prose

An introduction to ancient Greek prose literature from the fifth century BC to the second century AD, with selected readings in translation. Authors may include historiographers, orators, philosophers, or novelists. Topics may vary from year to year. (May be repeated for credit if content changes.)

GRST-2111. Greek Poetry

An introduction to ancient Greek poetry from the eighth century BC to the second century AD, with selected readings in translation. Authors may include Homer, Hesiod, other early Greek poets, or dramatists (including those of tragedy, comedy, and the satyr play). Topics may vary from year to year. (May be repeated for credit if content changes.)

GRST-2120. Greek Art and Archaeology

A study of the artistic masterpieces and monuments of ancient Greece. Topics will include the search for Troy, the spirit of Greek sculpture, and Athens in the Golden Age. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-2210. Latin Prose

An introduction to ancient Latin prose literature from the third century BC to the second century AD, with selected readings in translation. Authors may include orators, historiographers, novelists, or philosophers. Topics may vary from year to year. (May be repeated for credit if content changes.)

GRST-2211. Latin Poetry

An introduction to ancient Latin poetry from the third century BC to the fourth century AD, with selected readings in translation. Authors may include dramatists, epic poets, elegists, or satirists. Topics may vary from year to year. (May be repeated for credit if content changes.)

GRST-2220. Roman Art and Archaeology

A study of the artistic masterpieces and monuments of ancient Rome. Topics will include the tombs of the Etruscans and treasures of Pompeii and Rome in the days of the Caesars. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3010. Topics in Classical Literature

An in-depth study of some aspect of ancient Greco-Roman literature that may be thematic or generic in scope. Topics may vary from year to year. (May be repeated for credit if content changes.) (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3011. The Ancient World on the Screen

An exploration of modern depictions of ancient Greece and/or Rome in movies and/or on television. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3012. Ancient Impacts on the Modern World

This course explores the reception and (re)interpretation of ancient Greco-Roman culture by, and in, the modern world in a variety of different media (e.g., literature, visual arts, architecture, film). Topics may vary from year to year. (May be repeated for credit if content changes.) (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3020. Topics in Ancient Material Culture

This rotating topics course provides an in-depth study of some aspect of ancient material culture that may be thematic or chronological in scope. Required readings more usually consist of ancient sources in English translation and/or articles in modern scholarly journals than formal textbooks. (May be repeated for credit if content changes.) (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3130. Greek Mythology

A study of the myths and legends of ancient Greece. Modern theories of myth will be used to analyze the Greek material. They study will include both literacy sources in translation and the portrayal of myth in visual art and in architecture. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-3230. Roman Mythology

A study of the myths and legends of ancient Rome. Modern theories of myth will be used to analyze the Roman material. The study will include both literary sources in translation and the portrayal of myth in visual art and in architecture. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-4000. Seminar in Classical Studies

An in-depth study of an aspect of Greco-Roman antiquity. Topics may vary from year to year. (Prerequisite: semester 3 standing or above or permission of the instructor).

GRST-4001. Directed Readings in Classical Civilization

Designed for the advanced student who wishes to explore a special area of interest with the aid of a faculty advisor. (May be repeated for credit if content changes.) (Hours by arrangement.)

GRST-4020. Practicum in Classical Archaeology

Students will participate in various aspects (e.g. digging, artifact processing and analysis) of the excavation of an ancient Greek or Roman site in Europe. They will also visit and report on several key archaeological sites in the region. (Note: this is a 6-credit-hour course.) (Prerequisites: Admission only by consent of instructor after an interview with the candidate. Experience in Greek and Roman Studies courses (numbered GRST-xxxx and/or GRHS-xxxx) is highly recommended, though not always essential. Given the nature of archaeological excavation abroad, the assembly of a team of hardworking, emotionally mature, and mutually compatible individuals is of paramount importance. All other factors being equal, preference will be given to Greek and Roman Studies majors over non-majors and to more senior students over more junior.) May be repeated for credit if content changes.

SECOND LANGUAGE EDUCATION COURSES

INCS-1200. Introduction to Language and Linguistics

An introduction to the scientific study of language, including language structure, sound systems, semantics, language origins, language families and language classification, (Required of all Modern Languages majors and recommended in the first year of study.)

INCS-2200. Language, Linguistics and Society

This course complements INCS-1200. The scientific study of language and its interaction with society: contextualized language use, discourse and text linguistics, social and regional variation, language and the brain, language processing, language acquisition, and writing systems. (Required of all Modern Languages majors. Recommended to take in sequence with INCS-1200)

INCS-3200. Theories of Language Acquisition

An introduction to current theories regarding how language is acquired, with a special focus on the acquisition of second and additional languages, and on the factors that play a role in the acquisition process. (Prerequisites: INCS-1200 or INCS-2200, or equivalent or consent of instructor.)

INCS-3210. Methodologies for Second Language Education

An introduction to current methods of second language teaching through an examination of curriculum development, lesson planning and classroom techniques. (Prerequisites: INCS-1200 and INCS-2200, or permission of instructor.)

INCS-4200. Second Language Education Practicum

SLE students will be required to design a second language education course for a specific clientele, deliver their curriculum and have that curriculum assessed critically. (Prerequisites: INCS-3200 and INCS-3210.) (This is an experiential learning course.)

INCS-4990. Internship in Intercultural Studies

The Internship will expose students to the services and activities available for recent immigrants by placing them in agencies where they will shadow mentors accommodating the needs of non-English-speakers. (The course is open to students in the Honours Modern Languages with Second Language Education (Intercultural Stream) at all levels, except the first year.) (6.0 credit courses.) (This is an experiential learning course).

GERMAN, ITALIAN AND SPANISH LITERATURE AND CULTURE COURSES

INCS-1370. Introduction to German, Italian, and Spanish Literature

A study of the history and culture of European civilization through salient works of German, Italian and Spanish literature (in English translation).

INCS-2370. German, Italian and Spanish Literary Traditions

A study of the forms and structures of German, Italian and Spanish literature (in English translation) including a survey of genres, styles and rhetorical figures.

INCS-3370. Applied Literary Criticism

A hands-on approach to selected theories used to analyze literary texts and films. Students will read and write literary criticism, with an aim to understanding the underlying questions, assumptions, interpretive possibilities and limitations of each theoretical approach. (Students cannot obtain credit for both INCS-3370 and the former INCS-4370.)

INCS-4370. Studies in German, Italian and Spanish Literary and Visual Culture

This course studies connections between the visual arts and literature in selected periods of Western culture from medieval to modern times. Special attention is paid to the social context of the periods in question, as well as stylistic implications. Interdisciplinary forays into adjacent fields such as architecture, music, psychology, and science may also be included. This is an advanced undergraduate course with special focus on critical methodologies and comparative research. Topics may vary from year to year. (Prerequisites: INCS-1370, INCS-2370 or approval of the instructor.)

CULTURE AND IDEAS COURSES

INCS-2020. Culture and Ideas: From the Black Death to the Enlightenment

An interdisciplinary, team-taught survey course focussing on major issues and achievements in European civilization from the late Middle Ages to the era of the Enlightenment, including literary, religious, and philosophical writings as well as art and music.

INCS-2030. Culture and Ideas: From the French Revolution to the Present

An interdisciplinary, team-taught survey course focussing on major issues and achievements in Europe and North America in the nineteenth, twentieth, and twenty-first centuries, including development in the visual arts, music, architecture, philosophy, religion, literature and science.

INCS-3570. Directed Studies Abroad I

This course will expose students to day-to-day situations, in order for them to complement and integrate traditional university learning with an immersion in real life situations. The intent is to stimulate an empirical attitude towards knowledge gained through experience. The focus of this course will be an in-depth analysis of differences and similarities between Canadian culture and the host culture. (Note: this is a Distance Education course offered in English which is available only to students on exchange through Windsor International at a location where English is not the local language.)

INCS-3580. Directed Studies Abroad II

This course is a continuation of Directed Studies Abroad I. It will expose students to day-to-day situations, in order for them to complement and integrate traditional university learning with an immersion in real life situations. The intent is to stimulate an empirical attitude towards knowledge gained through experience. The focus of this course will be an in-depth analysis of differences and similarities between Canadian culture and the host culture. (Note: this is a Distance Education course offered in English which is available only to students on exchange through Windsor International at a location where English is not the local language.)

INCS-4090. Directed Studies

Independent study for the advanced student who wishes to explore a specialized area of interest within the program under the supervision of a faculty member. (To be taken only under exceptional circumstances with the permission of the instructor and a program advisor. May be repeated for credit if the content is different. Hours and assignments by arrangement.)

INTERCULTURAL STUDIES COURSES

INCS-2350. To Auschwitz and Beyond: Reflections on the Meaning of the Holocaust

An examination of responses to key issues raised by the Holocaust as reflected in postwar culture both in Canada and abroad. (Also offered as Languages, Literatures and Cultures JWST-2350)

JEWISH STUDIES COURSES

JWST-1100. Hebrew for Beginners I

A brief introduction to the Semitic languages of which Hebrew is a prominent member, including a survey of the main epochs of the Hebrew language such as Biblical Hebrew, the Hebrew of medieval Spain, the renaissance of Hebrew in the 19th century and modern Hebrew. Elements of the language to be covered include the printed alphabet, the roots of Hebrew words, basic vocabulary and the structures

of sentences. Assignments will include writing basic words and reading elementary texts. No previous knowledge of Hebrew is required.

JWST-1200. Introduction to Jewish Civilization

This course will introduce basic Jewish thought and practices focussing on Jewish religious and cultural traditions from its earliest beginnings through the dramatic events of the last century. The course will examine Jewish perspectives on God, Torah, prayer, the afterlife, the Jewish life cycle, the holiday cycle of the Jewish year and Jewish identity.

JWST-1700. Introduction to Diaspora Studies: There's No Place Like Home

This course introduces students to diasporas-scattered populations living in exile from their ancestral homelands. The course focuses on the significance of migration, exile, belonging, and nostalgia (for ancestral homelands) for diasporas throughout the world. Students submit projects (incorporating oral histories, for example) on the diaspora of their choice. (Also offered as DIAS-1700 and POLS-1709.)

JWST-2200. Jewish Mysticism

The purpose of this course is to understand Jewish spirituality and mystical experience through various mystical traditions including Spanish Kabbalah, Lurianic Kabbalah, the Sabbatean heresy and Polish Hasidism.

JWST-2350. To Auschwitz and Beyond: Reflections on the Meaning of the Holocaust

An examination of responses to key issues raised by the Holocaust as reflected in postwar culture both in Canada and abroad. (Also offered as INCS-2350.)

JWST-2700. The Jewish Diaspora: Ancient to Modern

This course will acquaint students with the Jewish Diaspora over the centuries. The existence of the Jewish people as a dispersed people is central to understanding their diversity, shared identity and aspirations. Various major migrations and individual Jewish communities will be examined.

JWST-3700. Jews and the Modern World

This course will examine Judaism through the prism of modern intellectual and social movements which Jews have embraced and of which they often have been leaders. These include liberalism, socialism, capitalism, feminism and Zionism. Jewish contributions to the rise of the social sciences also will be examined.

LATIN LANGUAGE AND LITERATURE COURSES

LATN-1200. Introductory Latin I

Designed for the student with little or no background in Latin. Emphasis on attainment of reading skills prerequisite for Latin courses numbered 2000- and above, and for practical use in theology, philosophy, medieval studies, linguistics, and comparative literature.

LATN-1201. Introductory Latin II

Continuation of LATN-1200. (Prerequisite: LATN-1200 or consent of instructor.)

LATN-2200. Intermediate Latin I

Designed for students who have previously studied Latin. Review of forms, syntax and grammar. Selected passages from the works of Latin authors may be used. (Prerequisite: LATN-1201 or or consent of instructor.)

LATN-2201. Intermediate Latin II

Review of forms, syntax, and grammar. Selected passages from the works of Latin authors. (Prerequisite: LATN-2200 or consent of instructor.)

LATN-4200. Directed Readings in Latin Literature

Designed for the student who wishes to explore a special area of interest with the aid of a faculty advisor. (May be repeated for credit if content changes.) (Hours by arrangement.)

GERMAN LANGUAGE OPTION COURSES

Requirements for degree programs in German make reference to the following groups of courses:

German Language: GRMN-1020, GRMN-2020, GRMN-3000, GRMN-3010

German Literature: INCS-1370, INCS-2370, INCS-3370, INCS-4370

German Culture: GRMN-2600, GRMN-2610, GRMN-4900

GRMN-1020. Intensive German for Beginners

This intensive language-training course combines the content of two courses into a single term. Students will obtain credit for two courses. Note: 6 hours of class time per week. (Only for students with no prior knowledge of German.)

GRMN-1030. Present Day German Culture for Engineers

This course is especially designed for all Engineering students who are interested in contemporary German culture, civilization, and economic framework, also in view of job, placement or Co-op opportunities in Germany. The students will be exposed to intercultural issues and their implications. (Open only to Engineering students.)

GRMN-2020. Intensive Intermediate German

This intensive language-training course combines the content of two courses into a single term. Students will obtain credit for two courses. Note: 6 hours of class time per week. (Prerequisites: GRMN-1020, or permission of instructor.)

GRMN-2480. German Cinema

This course will cover the main periods of German cinema: expressionism of the 1920s, propaganda films of the Nazi era, East and West-German Cold War cinema and films of the post-reunification period. The focus will be on German film language and the historic and cultural traditions.

GRMN-2600. German Culture and Civilization I

An interdisciplinary introduction to political, social, and cultural developments in Germanic lands before 1815. (Taught in English. No prerequisites. May be repeated more than once if content changes.)

GRMN-2610. German Culture and Civilization II

An interdisciplinary introduction to political, social, and cultural developments in Germanic lands from 1815 onward. (Taught in English. No prerequisites. May be repeated more than once if content changes.)

GRMN-3000. Advanced German I

Further study of grammar and syntax. (Prerequisite: GRMN-2020 or permission of Program Advisor.)

GRMN-3010. Advanced German II

Continuation of GRMN-3000. (Prerequisite: GRMN-3000, or consent of a program advisor.)

GRMN-4000. Proficiency in German

Emphasis is placed on understanding a wide range of demanding and longer texts (press, literature, etc.) Students will enhance their ability to express themselves fluently and spontaneously. Students will use the target language flexibly and effectively for social, academic and professional purposes. Students will learn to communicate fluently in the target language using complex grammar structures as well as complex text production. (Prerequisite: GRMN-3010 or permission of instructor.)

GRMN-4010. Proficiency in Written German

This course seeks to consolidate and enhance writing and reading skills at an advanced level of proficiency. Topics of study may include: translation techniques, mastery of complex syntactical structures, study of disparate academic, journalistic and literary texts. (Prerequisite: GRMN-3010.)

GRMN-4900. Directed Readings in Germanic Studies

(Prerequisite: Consent of a program advisor.) (May be repeated for credit if content changes.)

ITALIAN LANGUAGE OPTION COURSES

Requirements for degree programs in Italian make reference to the following groups of courses:

Italian Language: ITLN-1020, ITLN-3000, ITLN-3010

Italian Literature: INCS-1370, INCS-2370, INCS-3370, INCS-4370, ITLN-4900

Italian Culture: ITLN-2480; ITLN-2600, ITLN-2610, ITLN-3560

ITLN-1020. Intensive Italian for Beginners

This intensive language-training course combined the content of two courses into a single term. Students will obtain credit for two courses. Note: 6 hours of class time per week. (Only for students with no prior knowledge of Italian.)

ITLN-2020. Intensive Intermediate Italian

This intensive language-training course combines the content of two courses into a single term. Students will obtain credit for two courses. Note: 6 hours of class time per week. (Prerequisites: ITLN-1020, or permission of instructor.)

ITLN-2480. Italian Cinema

The course takes the student on a journey through fifty years of Italian history using subtitled films representative of three pivotal periods. The course is taught in English.

ITLN-2600. Italian Culture and Civilization I

The cultural traditions of Italy from early times to the end of the Middle Ages. (Taught in English.) (Italian majors will be expected to do assigned work in Italian.)

ITLN-2610. Italian Culture and Civilization II

The cultural traditions of Italy from the Renaissance to modern times. (Taught in English.) (Italian majors will be expected to do assigned work in Italian.)

ITLN-3000. Advanced Italian I

Emphasis on reading, understanding and writing commentaries on short literary, historical and journalistic texts with the support of reference tools. (Prerequisite: ITLN-2020 or permission of Program Advisor.)

ITLN-3010. Advanced Italian II

Continuation of ITLN-3000. Emphasis on oral discussion of cultural and literary texts and written enhancement of idiomatic usage of the language with the support of appropriate tools. (Prerequisite: ITLN-3000 or permission of program advisor.)

ITLN-3560. Renaissance Ideals: Sculpting the Italian Mind

This course will focus on the contributions of the Italian renaissance to literature, philosophy, religion, visual arts, political science and the natural sciences. The course will be taught in English.

ITLN-4900. Directed Readings

Designed for the advanced student who wishes to explore a special area of interest in Italian literature. (May be repeated for credit if content changes.)

SPANISH LANGUAGE OPTION COURSES

Requirements for degree programs in Spanish make reference to the following groups of courses:

Spanish Language: SPAN-1020, SPAN-3000, SPAN-3010, SPAN-3300

Spanish Literature: INCS-1370, INCS-2370, INCS-3370, INCS-4370

Spanish Culture: SPAN-2600, SPAN-2610

SPAN-1020. Intensive Spanish for Beginners

This intensive language-training course combines the content of two courses into a single term. Students will obtain credit for two courses. Note: 6 hours of class time per week. (Only for students with no prior knowledge of Spanish.) (Antirequisites: SPAN-1010.)

SPAN-2020. Intensive Intermediate Spanish

This intensive language-training course combines the course content of two courses into a single term. Students will obtain credit for two courses. (6 credit hours; 6 hours of class time per week.) (Prerequisites: SPAN-1010, or SPAN-1020.)

SPAN-2480. Spanish Cinema

This course will study the cinema of Spain and/or Latin America. The focus will be on important film directors, such as Saura, Almodovar or Buñuel as well as the main issues covered by these films (e.g. youth culture, perception of women, literature and film, social analysis, etc.). The course will place the films into an historic, social and artistic context. The course is conducted in English with subtitled or dubbed films.

SPAN-2600. Culture and Civilization of Spain

Readings and discussion, in English, of topics from the history and culture of Spain.

SPAN-2610. Culture and Civilization of Spanish America

Readings and discussion, in English, of topics from the history and culture of Spanish America.

SPAN-3000. Advanced Spanish I

Further study of grammar and syntax. Written and oral exercises emphasizing subtle and/or particularly difficult grammar points. (Prerequisite: SPAN-2020 or permission of Program Advisor.)

SPAN-3010. Advanced Spanish II

Continuation of SPAN-3000. (Prerequisite: SPAN-3000 or permission of Program Advisor).

SPAN-3300. Language Training through Literature from Spain

A study of literary texts from Spain as a means to improve language mastery through advanced review of grammatical structures and enhancement of vocabulary. The course is conducted in Spanish. (Prerequisite: SPAN-3010 or permission of instructor.)

SPAN-4010. Proficiency in Written Spanish

This course seeks to consolidate and enhance writing and reading skills at an advanced level of proficiency. Topics of study may include: translation techniques, mastery of complex syntactical structures, study of disparate academic, journalistic and literary texts. (Prerequisite: SPAN-3010.)

SPAN-4900. Directed Study

(May be taken more than once if content changes.) (Prerequisites will vary depending on the focus of the course.)

PHILOSOPHY

PROGRAM REGULATIONS

Academic Advising: All students majoring in Philosophy or intending to declare a Minor in Philosophy will be assigned an academic advisor. Students should plan their programs in consultation with their advisors prior to course selection each term. Students planning to take a Philosophy course as an option are welcome to consult the instructor.

Either PHIL-1100 or PHIL-1120 is a good introduction to Philosophy in general.

AREAS OF STUDY

Most philosophy courses are intended for students majoring in other subjects who desire a well-rounded liberal arts education, as well as for philosophy majors. Students who might want to take more than one philosophy course are advised to check the prerequisites of courses numbered in the 2000s and 3000s. PHIL-1100 or PHIL-1120 are good introductions to philosophy in general.

PROGRAMS

General Philosophy

Degree Requirements

Total courses: thirty.

(a) A minimum of twelve Philosophy courses, at least ten of which must be 2000 level or above.

- 1) 1000-level: Any one of the following: PHIL-1100, PHIL-1120, PHIL-1290, PHIL-1300, PHIL-1350, PHIL-1600.
- 2) Ethical Theory: PHIL-2210.
- 3) History of Philosophy: All four of the following: PHIL-2730, PHIL-2760, PHIL-3760, and one of PHIL-4710 or PHIL-4720.

- 4) Systematic Philosophy: Any two of the following: PHIL-2300, PHIL-2500, PHIL-2540, PHIL-2570, PHIL-2610, PHIL-2620, PHIL-3520, PHIL-3590, PHIL-3600.
 - 5) Practical Philosophy: Any two of the following: PHIL-2220, PHIL-2360, PHIL-2380, PHIL-2550, PHIL-3190, PHIL-3230, PHIL-3290.
 - 6) Other Philosophy: Any two additional Philosophy courses (including any listed above that have not already been taken).
- (b) two courses from Social Sciences;
 - (c) two courses from Languages or Science;
 - (d) two courses from any area of study, excluding Arts.
 - (e) GART-1500, GART-1510;
 - (f) four courses from any area of study, including Philosophy;
 - (g) six other courses from any area of study, excluding Philosophy.

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Honours Philosophy (with/without Co-op)

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

- (a) A minimum of twenty Philosophy courses, at least eighteen of which must be 2000 level or above.
 - 1) 1000-level: Any one of the following: PHIL-1100, PHIL-1120, PHIL-1290, PHIL-1300, PHIL-1350, PHIL-1600.
 - 2) Ethical Theory: PHIL-2210.
 - 3) History of Philosophy: All five of the following: PHIL-2730, PHIL-2760, PHIL-3760, PHIL-4710, PHIL-4720.
 - 4) Systematic Philosophy: Any two of the following: PHIL-2300, PHIL-2500, PHIL-2540, PHIL-2570, PHIL-2610, PHIL-2620, PHIL-3520, PHIL-3590, PHIL-3600
 - 5) Practical Philosophy: Any two of the following: PHIL-2220, PHIL-2360, PHIL-2380, PHIL-2550, PHIL-3190, PHIL-3230, PHIL-3290
 - 6) Honours Seminar: PHIL-4910.
 - 7) Other Philosophy: Any eight additional Philosophy courses (including any listed above that have not already been taken), at least three of which must be at the 3000 level or above.
- (b) two courses from Social Sciences;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Arts.
- (e) GART-1500, GART-1510;
- (f) four other courses from any area of study, including Philosophy;
- (g) eight other courses from any area of study, excluding Philosophy.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Combined Honours Philosophy Programs

A student may combine Philosophy with any other area of study that also permits Combined Honours Programs.

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) A minimum of sixteen Philosophy courses, at least fourteen of which must be 2000 level or above.
 - 1) 1000-level: Any one of the following: PHIL-1100, PHIL-1120, PHIL-1290, PHIL-1300, PHIL-1350, PHIL-1600.
 - 2) Ethical Theory: PHIL-2210.
 - 3) History of Philosophy: All five of the following: PHIL-2730, PHIL-2760, PHIL-3760, PHIL-4710, PHIL-4720.
 - 4) Systematic Philosophy: Any two of the following: PHIL-2300, PHIL-2500, PHIL-2540, PHIL-2570, PHIL-2610, PHIL-2620, PHIL-3520, PHIL-3590, PHIL-3600.
 - 5) Practical Philosophy: Any two of the following: PHIL-2220, PHIL-2360, 2380, 2550, 3190, 3230, 3290.
 - 6) Honours seminar: PHIL-4910.
 - 7) Other Philosophy: Any four additional Philosophy courses (including any listed above that have not already been taken), at least two of which must be at the 3000 level or above.
- (b) Course Requirements-Other subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510;
- (d) two courses from Social Sciences;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Arts.
- (g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Certificate in Critical Reasoning, Ethics and Law

Degree Requirements

- a. A total of 8 courses from the following three areas: 1) Reason (critical thinking, logic, argumentation); 2) Ethics (and morality); 3) Law (social, political, and legal philosophy).
- b. At least two courses from the section called **'Reason'**, at least two courses from the section called **'Ethics'**, and at least two courses from the section called **'Law'**.
- c. At least two courses at the 3000-4000 level (can be from any areas and can also satisfy the requirements listed in 'b' above).
- d. Minimum GPA: B- (70%) with no individual grades below C- (60%).

1) Reason (critical thinking, logic, argumentation)

PHIL 1600: Reasoning Skills
PHIL 2550: Knowledge, Science and Society
PHIL 2610: Argumentation
PHIL 2620: Symbolic Logic
PHIL 2660: Reasoning About Weird Things
PHIL 3590: Women, Knowledge, and Reality
PHIL 3600: Theory of Argumentation

2. Ethics (and morality)

PHIL 1350: Culture, Health, and Social Justice on Turtle Island
PHIL 2210: Introduction to Ethics
PHIL 2250: Ethics of Life, Death, and Healthcare
PHIL 2270: Environmental Ethics
PHIL 2280: Technology, Human Values, and the Environment
PHIL 3290: Animals and Ethics

3. Law (social, political and legal philosophy)

PHIL 2220: Introduction to Social and Political
PHIL 2260: Law, Punishment and Morality
PHIL 2300: Indigenous Philosophies of the Americas
PHIL 2360: Feminist Philosophies
PHIL 2380: Social Diversity, Identity, and Race
PHIL 3190: Social Pathologies
PHIL 3230: Human Rights and Global Justice
PHIL 4260 Legal Philosophy

Courses used to calculate the major average are:

All of the eight courses taken to satisfy the Certificate requirements.

Minor in Philosophy

Required: six Philosophy courses, including PHIL-1100, with no more than two at the 1000-level, and at least one at the 3000-level or above.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Philosophy

Major Concentration:

- (a) PHIL-1100
- (b) at least one of PHIL-2540, PHIL-2550, or PHIL-2570
- (c) PHIL-2730
- (d) PHIL-2760
- (e) at least one of PHIL-4710, PHIL-4720 or PHIL-4730
- (f) one of PHIL-2600, PHIL-2610, PHIL-2620
- (g) three additional 2000-level or above Philosophy courses
- (h) two additional 3000-level or above Philosophy courses
- (i) PHIL-4910

Minor Concentration: six Philosophy courses, including PHIL-1100 and at least one Philosophy course at the 3000-level or above. No more than two Philosophy courses at the 1000-level.

PHILOSOPHY COURSES

All courses listed are three hours a week unless otherwise indicated. Not all courses are offered each term or each academic year.

Please note the middle digit of course numbers denote specific topics or areas of study.

PHIL-1100. Introduction to Western Philosophy

An introduction to philosophy through the study of major figures and movements in the Western philosophical tradition. The figures and themes selected for any given year will be chosen by the instructor.

PHIL-1120. Philosophy and Human Nature

What is human nature? How do we think of ourselves as human beings? The focus of the course will be theories of human nature that have been put forward in Western philosophy. Some non-Western Philosophical sources may be used.

PHIL-1290. Contemporary Moral Issues

A critical examination of philosophical arguments about controversial moral issues. Readings will be chosen by the instructor on issues connected with one or several areas such as: biomedical ethics, euthanasia, suicide, environmental ethics, the treatment of animals, war and violence, pornography, censorship. Some non-Western Philosophical sources may be used.

PHIL-1300. Philosophy and Popular Culture

A philosophical inquiry into one or more of the more important contemporary cultural forms and phenomena. Topics may vary and may include popular music, television, virtual reality, sexual roles and stereotypes, or other topics.

PHIL-1350. Culture, Health, and Social Justice on Turtle Island

This course explores the theory, research, and professional expectations regarding cultural competency, safety, and humility with respect to the nursing and healthcare of Indigenous people and communities. Students will investigate how colonialism figures prominently in the health disparities of contemporary Indigenous communities. This course emphasizes cultural competency, safety, and humility as part of an ongoing professional journey.

PHIL-1600. Reasoning Skills

An explanation of, and practice in, the basic knowledge, skills and attitudes which are essential components of reasoning well. Topics include: the role of language; evaluating sources (including from the internet); analyzing, evaluating and diagramming arguments; inference strength; writing an extended piece of reasoning. (1.5 lecture, 1.5 lab hour per week)

PHIL-1800-1890. Special Topics

Special topics courses will be offered occasionally, as resources allow, to meet a demonstrated academic need not satisfied by the regular course offerings. Interested students should inquire in the Philosophy office.) (May be repeated for credit if content changes.)

PHIL-2210. Introduction to Ethics

A survey of the main contending theoretical positions on such basic questions of ethics as: Are all moral values and norms subjective or objective, relative or absolute? What makes right actions right? What is the good life for human beings?

PHIL-2220. Introduction to Social and Political Philosophy

An examination of some of the main contending theories about the nature of society and the state, or of some of the central controversies in social and political theory. (Prerequisite: Semester 3 or above standing; or consent of the instructor). (Also offered as POLS-2220.)

PHIL-2240. Business Ethics

An introduction to some central ethical notions (e.g., justice, the common good, moral vs. legal obligation); application of these issues and concepts to cases drawn from the experiences of business men and women (concerned with such issues as corporate responsibility, conflict of interest, honesty in advertising, preferential hiring, corporate responsibility for environmental externalities).

PHIL-2250. Ethics of Life, Death, and Health Care

The course will focus on the ethical issues arising from human mortality and vulnerability to sickness. Problems to be explored will vary from year to year and may include: the relation between mortality and the value of life, the ethics of life-extension, the legitimacy of suicide, physician assisted or not, the ethics of human reproduction, allocating scarce medical resources in an ageing population, and the ethics of genetic engineering.

PHIL-2260. Law, Punishment and Morality

An introduction to the philosophical issues related to understanding the nature of law and legal obligation, the relation between law and morality, and the purpose of punishment. The theoretical points and distinctions will be illustrated by their applications to particular current issues. (Prerequisite: semester 3 or above standing, or consent of the instructor.)

PHIL-2270. Environmental Ethics

What ethical obligations do we have to the non-human environment? The course examines various answers to that question. Topics may include: animal rights, the moral status of non-human life, the intrinsic value of ecosystems, the importance of wilderness, deep ecology, eco-feminism, economic development, environmentalism, and politics.

PHIL-2280. Technology, Human Values and the Environment

An exploration of the philosophically important ethical concepts of human nature, freedom, progress, the good life, moral responsibility, and the environment as these relate to advances in technology. Topics may include: pollution, mass production, the commodification of nature, new technologies (e.g., biotechnology, nanotechnology).

PHIL 2300. Indigenous Philosophy of the Americas

An introduction to the philosophical thought associated with the narratives, culture, and traditions of the Indigenous people in North, Central, and South America. Topics include (but are not limited to): creation stories, Indigenous responses to European 'discovery,' legal reasoning concerning indigenous people/communities, subjects of scientific examination, indigenous epistemology, environmental concerns, identity, activism, and the effects of colonialism (such as residential schools, land allotment/reserves, the 60's Scoop, and cultural appropriation.) (Prerequisite: Semester 3 standing.)

PHIL-2360. Feminist Philosophies

An examination of key philosophical themes in feminism and philosophical debates among feminists. The themes and subjects of debate addressed may include sexism and oppression; feminist identity; the political significance of language, personal appearance, and pornography; feminist ethics; and feminist theories of knowledge. (Prerequisite: Semester 3 or above standing; or consent of the instructor. Can be taken as an Arts credit) (Also offered as Women's and Gender Studies WGST-2360)

PHIL-2380. Social Identity, Diversity and Race

This course explores the philosophical significance of social identity and the value of diversity with particular attention to issues of race and ethnicity. Philosophical issues to be examined may include: the scientific and socio-political nature of race categories; the status and effectiveness of minority rights in liberal democracy; problems arising from the intersection of race and ethnicity with other political dimensions such as gender and class; the status of general philosophical values across diverse cultures. (Prerequisite: semester 3 or above standing.)

PHIL-2400. Philosophy of Religion

An examination of the philosophical problems involved with religious belief and language. Can the existence of God be proven? Can the non-existence of God be proven? Can claims to religious knowledge be legitimized? Is there a unique logic of religious language that is cognitively meaningful? Is there any basis for claims about life after death? What is the nature of faith? These are the sorts of questions which are dealt with in this course. (Prerequisite: Semester 3 or above standing.)

PHIL-2430. Philosophy of Art

Aesthetics is concerned with problems which arise in the appreciation of objects which are deemed to have aesthetic value. Problems which may be raised in this course include the nature of aesthetic experience and aesthetic objects such as works of art and nature, as well as problems related to aesthetic value and judgment. (Prerequisite: Semester 3 or above standing.)

PHIL-2500. Metaphysics

An examination of fundamental questions about the nature of reality. What kinds of things are real; what distinguishes the real from the ideal, or the real from the illusory? Are there abstract entities (e.g., numbers)? The nature of necessity and possibility, essence and existence. (Prerequisite: Semester 3 or above standing; or consent of the instructor.)

PHIL-2520. Existentialism

A study of the views of some of the major existentialists. Figures studied may include Kierkegaard, Nietzsche, Sartre, Merleau-Ponty, Camus, and Jaspers. (Prerequisite: Semester 3 or above standing.)

PHIL-2530. Mind, Action, and Personal Identity

An examination of: contemporary views of the nature of mind and its relationship to body; whether human action is free, determined, or both; the relationship between a theory of personal identity and the answers to the preceding questions. (Prerequisite: Semester 3 or above standing.)

PHIL-2540. Theory of Knowledge

An examination of the nature of knowledge, with topics such as: definitions of knowledge, accounts of its structure, the extent and limits of knowledge, the relationship between experience and knowledge, the bases of rational or justified belief formation. (Prerequisite: Semester 3 or above standing; or consent of the instructor.)

PHIL-2550. Knowledge, Science, and Society

The course explores the relationship between what individuals know and their participation in society, including as members of scientific communities. Topics may include: the ways communities rather than individuals can hold knowledge; how cognitive authority depends on a person's membership in, and social position in, society; the role of testimony in knowledge; how the legal system creates knowledge; the roles of gender, race, class, and culture in knowledge; and the ethical implications of knowledge. (Prerequisite: semester 3 or above standing.)

PHIL-2570. Philosophy of Science

What is a scientific explanation? A theory? How does observation relate to theory? Do theories describe reality, or are they just conventional tools? The course examines answers to these and similar questions, and the general conceptions of science behind the answers. (Prerequisite: Semester 3 or above standing.)

PHIL-2600. Fallacies and Biases

The objective is to develop the ability to discriminate between good and bad reasons found in everyday settings, using tools of argumentation theory. A variety of errors of reasoning such as those involving cognitive biases and/or fallacies are explained, and the skills needed to identify them are introduced. The basic tools for analyzing arguments are presented and put to use. Material for analysis is drawn from social media, newspapers, current periodicals, and other sources of actual arguments. (Prerequisite: Semester 3 or above standing; or consent of the instructor.)

PHIL-2610. Argumentation

The objective is to develop the ability to analyze and evaluate extended arguments found in the public media, books and articles, and to construct a well-argued case. (Prerequisite: PHIL-2600 or PHIL-1600 and semester 3 or above standing; or consent of the instructor.)

PHIL-2620. Symbolic Logic

The course covers propositional logic as well as an introduction to the basic concepts of predicate logic. Topics include the construction of symbolic representation of natural language sentences, semantic methods for evaluating symbol formulas, and methods of constructing deductions or proofs. (Prerequisite: Semester 3 or above standing, or permission of the instructor. Antirequisite for non-Philosophy majors: COMP-2310, MATH-1020.)

PHIL-2660. Reasoning about Weird Things

How to evaluate extraordinary claims, such as claims about psychic phenomena (e.g. ESP), subliminal messages, crop circles, and water divining. The course may include topics such as: the limits of personal experience as a source of evidence, expert opinion, assessment of studies, scientific method. (Prerequisite: Semester 3 or above standing; or consent of instructor.)

PHIL-2730. Ancient Greek Philosophy

The course is a survey of major thinkers and themes in Greek philosophy with particular emphasis on Plato and Aristotle but may include attention to Pre-Socratic and post-Aristotelian thinkers. The course will concentrate on the main developments in Greek philosophy, including metaphysics, epistemology, politics, and ethics.

PHIL-2760. Early Modern Philosophy

The course will examine the development and major problems of rationalist and empiricist philosophy during the historical period of the rise of modern natural science. It will emphasize the metaphysical and epistemological changes introduced into Western philosophy during this period. Thinkers studied will

include Descartes and Hume. Other thinkers examined may include one or more of Bacon, Locke, Berkeley, Spinoza, and Leibniz.

PHIL-2800-PHIL-2890. Special Topics

Special Topics courses will be offered occasionally, as resources allow, to meet a demonstrated academic need, where that need cannot be satisfied by any of the regular course offerings. Interested students should inquire in the Philosophy office. (Prerequisites: Semester 3 or above standing or permission of an advisor in Philosophy.) (May be repeated for credit if content changes.)

PHIL-3190. Social Pathologies

The course examines the emergence of pathological forms of social life that systematically undermine human interaction, distort social communication, and falsify individual and group consciousness. The course may explore the work of major social thinkers such as Rousseau, Hegel, Marx, Lukacs, Weber, Schmidt, Freud, Adorno, Marcuse, Arendt, Habermas and Honneth or investigate one or more specific forms of modern social pathologies such as racism, gender inequality, colonialism, extreme poverty, the destruction of the environment. (Prerequisite: PHIL-2210 or permission of the instructor.) (Also offered as POLS-3190.)

PHIL-3210. Advanced Topics in Ethical Theory

This course will examine issues in ethical theory at an advanced level. Topics may include detailed and critical examination of ethical theories, rigorous exploration of the differences between ethics and other kinds of normative practices and theories, meta-ethical questions regarding the nature of the good, or the relation between ethics, politics and other aspects of social life. The authors studied may be wide ranging, depending on the particular focus of the instructor. (Prerequisite PHIL-2210)

PHIL-3230. Human Rights and Global Justice

The course will focus on the meaning and nature of human rights and their relationship to global justice. Topics may include: the historical development of human rights doctrines, their relationship to classical citizenship rights, the relationship between universal human rights and culturally distinct life ways, relationship between legal/moral principles, material reality, and different conceptions of global justice, the strengths and limitations of human rights as principles to advance global justice. (Prerequisite: Semester 3 or above standing, or permission of the instructor.) (Also offered as POLS-3620.)

PHIL-3290. Animals Ethics

The course examines philosophical views about our relationship to animals and the relation of these views to the evaluation of moral principles and ethical theories, including notions of justice and rights. It may cover such topics as: attitudes towards animals, animal awareness and autonomy, whether moral consideration should be extended to animals, whether animals have rights. (Prerequisites: Semester 3 standing and at least one prior Philosophy course, or permission of the instructor.)

PHIL-3300. Environmental Philosophy

This is an advanced philosophical exploration of some of the key intersections between humanity and the environment. The focus will be on articulating, understanding and evaluating important relations between the human and the non-human environment. Issues covered may include: the philosophy of nature, technology and environment, science and environment, metaphysics and environment, ecofeminism, radical ecology, and environmental politics. (Prerequisites: Semester 3 standing and at least one Philosophy course, or permission of the instructor)

PHIL-3420. Philosophy of Education

A critical examination of theories about the nature, goals and values of education. The approach of the course may be historical, contemporary or a combination. (Prerequisites: Semester 3 or above standing and at least one prior Philosophy course, or consent of the instructor.)

PHIL-3520. Philosophy and Language

This course will introduce students to philosophical conceptions of language. Its focus may range from an historical overview of the philosophy of language, from either analytic or continental perspectives. Thinkers covered may include Ludwig Wittgenstein, A. J. Ayer, Robert Brandom or Hans Georg Gadamer. (Prerequisite: Fifth semester standing).

PHIL-3590. Women, Knowledge and Reality

An exploration of feminist theories about knowledge and reality that inform and are informed by scholarship in Women's Studies. Students examine how gender might affect identity, reasoning, objectivity, and evidence, and in turn, how such variations might affect feminist political practices. (Prerequisites: Two courses at the 2000-level or above from Women's and Gender Studies and/or Philosophy and at least semester 5 standing.) (Also offered as Women's and Gender Studies WGST-3590.)

PHIL-3600. Argumentation Theory

Topics may include: the nature and uses of argument; the evaluation of argument; arguments and argumentation; the relations between argument and rhetoric, logic, and pragmatics; linguistic theories of argument; ethics and epistemology related to argument; the role of argument in philosophy. (Prerequisite: PHIL-2600 or PHIL-2610, or consent of the instructor.)

PHIL-3700. Reason and Revolution: The Enlightenment.

The Enlightenment ushers in a new era in modern philosophy whose tenets are the autonomy of reason in the face of prejudice, individual dignity as the foundation for social justice, moral progress through human perfectibility, and the scientific explanation of the world of nature. This course explores the emergence and development of these ideas in the work of prominent representatives of the Scottish, French and German Enlightenment such as Hume, Smith, Reid, Rousseau, Voltaire, Diderot, D'Alembert, Lessing, Kant, Wollstonecraft, and Herder. (At least third semester standing, and one philosophy course with a middle digit of seven, or permission of the instructor.)

PHIL-3760. Kant

A study of the critical philosophical writings of Immanuel Kant. Topics may include Kant's theories about: the limits of human knowledge, how knowledge in mathematics and the natural sciences is possible, whether it is possible to have moral knowledge, whether it is possible to have religious knowledge. (Prerequisite: PHIL-2760, or consent of the instructor.)

PHIL-3780. Nineteenth Century Philosophy: System and Freedom

Various nineteenth century thinkers may be studied in this course, from either the pragmatist or European traditions, including Hegel, Feuerbach, Marx, Kierkegaard, Nietzsche, but also Dilthey, Schopenhauer, Comte, Mill, Peirce and others. (Prerequisite: PHIL-1100 or PHIL-1120, or at least one 2000-level Philosophy course, or consent of the instructor.)

PHIL-3800-PHIL-3890. Special Topics

Special Topics courses will be offered occasionally, as resources allow, to meet a demonstrated academic need, where that need cannot be satisfied by any of the regular course offerings. Interested students should inquire in the Philosophy office. (May be repeated for credit if content changes.)

PHIL-4000 to PHIL-4100. Senior Seminars

Senior seminars are the undergraduate sections of M.A. courses. (Normally open only to Philosophy majors in the final year of their program. Consent of the instructor is required. Consult a program advisor during the term preceding planned registration.)

PHIL-4260. Philosophy of Law

The objective of this course is to introduce the student to contemporary issues concerning the philosophy of law, to include European and Indigenous law. Particular emphasis will be placed upon the presupposed relation of concepts to society, including European and Indigenous. The course will examine such issues as the difference and relation of legitimacy to legality, the relation of legal analysis to social needs, the relation of morality and ethicality to the content of legal rules and legal reasoning. (Prerequisite: Final Year of Honour's B.A or by instructor permission) (Cross-listed with PHIL-8260.)

PHIL-4710. Recent Continental Philosophy

A study of significant developments in recent French Continental thought. The content of the course will vary according to the instructor's interests and background. Traditions that might be examined include existential phenomenology, Marxism, deconstruction, and post-structuralism. (Prerequisite: PHIL-1100 or PHIL-1120, at least one 2000-level or above Philosophy course, and semester 5 or above standing.)

PHIL-4720. Analytic or Pragmatist Philosophy

Advanced study of themes and trends in Analytic or Pragmatist philosophy. Ordinarily, the topic will rotate on a yearly basis between Analytic Philosophy, in which logic, language, and scientific evidence play central roles and Pragmatist Philosophy. (Prerequisite: PHIL-1100, or PHIL-1120, and at least one 2000-level or above Philosophy course, and semester 5 or above standing, or permission of instructor.) (Cross-listed with PHIL-8720.)

PHIL-4760. Advanced Studies in Ancient or Early Modern Philosophy

An in-depth investigation of a philosopher, text, or movement from either the Ancient or Early Modern period. Topics may include individual dialogues or texts of figures such as Plato, Aristotle, Seneca, Descartes or Hume. Or movements such as the Greek Sophists, Stoics, or British Empiricists. (Prerequisite: PHIL-2730).

PHIL-4770. Hegel and German Idealism

A study of early 19th century philosophy centered on the idealism of G.W.F. Hegel, focusing on such problems as the nature of the dialectic, the notion of absolute spirit, and the Hegelian conception of philosophy. (Prerequisite: PHIL-3760, or consent of the instructor.)

PHIL-4910. Honours Seminar

The aim of the seminar is to give students a solid historical background in a given area of philosophy (e.g. ethics, epistemology, metaphysics). A philosophical theme is traced through a number of key figures in the history of philosophy. (Open only to four-year Honours in Philosophy students in their final year.)

POLITICAL SCIENCE

PROGRAMS

General Political Science

Degree Requirements

Total courses: thirty.

- (a) POLS-1000, POLS-1300 and POLS-1600;
- (b) nine additional courses Political Science including at least three at the 3000-level or above. (Note: students interested in switching to Honours Political Science should take SOSC-2500, POLS-2750, and one of POLS-2510 or POLS-2520)
- (c) two courses from Arts;
- (d) two courses from Languages or Science;
- (e) two courses from any area of study, excluding Social Sciences.
- (f) GART-1500, GART-1510;
- (g) five courses from any area of study, including Political Science;
- (h) five courses from any area of study, excluding Political Science.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Subfields (students are strongly encouraged to take at least one course from each subfield)

Canadian Politics

2000-level: POLS-2010, POLS-2110, POLS-2130, POLS-2640

3000-level: POLS-3090, POLS-3200, POLS-3230, POLS-3260

Comparative Politics

2000-level: POLS-2320, POLS-2330, POLS-3350, POLS-2410, POLS-2440

3000-level: POLS-3460, POLS-3650, POLS-3670

4000-level: POLS-4310, POLS-4340

International Relations and Development Studies

1000-level: POLS-1709

2000-level: POLS-2490, POLS-2670, POLS-2680

3000-level: POLS-3540, POLS-3550, POLS-3560, POLS-3600, POLS-3630

4000-level: POLS-4610, POLS-4620, POLS-4640, POLS-4650

Political Theory, Culture and Religion

2000-level: POLS-2510, POLS-2520, POLS-2600, POLS-2610

3000-level: POLS-3519, POLS-3720, POLS-3780, POLS-3790

Public Administration, Law and Policy

2000-level: POLS-2120, POLS-2140, POLS-2200, POLS-2210

3000-level: POLS-3140, POLS-3210, POLS-3240, POLS-3610, POLS-3920, POLS-3990

4000-level: POLS-4210, POLS-4220, and POLS-4920 (taken concurrently)

Honours Political Science

Degree Requirements

Total courses: forty.

(a) POLS-1000, POLS-1300, POLS-1600 and POLS-2750;

(b) one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5]

(c) fourteen additional Political Science courses, including at least two at the 3000-level and three at the 4000-level.

(d) two courses from Arts;

(e) two courses from Languages or Science;

(f) two courses from any area of study, excluding Social Sciences.

(g) GART-1500, GART-1510, SOSC-2500;

(h) six courses from any area of study, including Political Science;

(i) six courses from any area of study, excluding Political Science.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Subfields (students are strongly encouraged to take at least one course from each subfield)

POLS-4210, POLS-4220, POLS-4920 and POLS-3920 (taken concurrently)

Honours Political Science (Co-op Education)

Degree Requirements

Total courses: forty. (Plus three work terms).

- (a) POLS-1000, POLS-1300, POLS-1600, POLS-2015 and POLS-2750;
- (b) one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5]
- (c) thirteen additional Political Science courses, including at least two at the 3000-level and three at the 4000-level.
- (d) two courses from Arts;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510, SOSC-2500;
- (h) six courses from any area of study, including Political Science;
- (i) six courses from any area of study, excluding Political Science.
- (j) GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II) and GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Honours Political Science (with Thesis)

Degree Requirements

Total courses: forty.

- (a) POLS-1000, POLS-1300, POLS-1600, POLS-2750, POLS-4970 and POLS-4980;
- (b) one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5];
- (c) twelve additional Political Science courses, including at least two at the 3000-level and one other at the 4000-level.
- (d) two courses from Arts;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510, SOSC-2500;
- (h) six courses from any area of study, including Political Science;
- (i) six courses from any area of study, excluding Political Science.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Students maintaining cumulative and major averages of 80% upon beginning semester 7 will complete an undergraduate thesis under the supervision of a faculty member in the department during semesters 7 and 8 of the program through successful completion of the courses POLS-4970 and POLS-4980.

Honours Political Science with French Specialization

Degree Requirements

Total courses: forty.

(a) University of Windsor [14 courses]:

(i) POLS-1000, POLS-1300, POLS-1600 and POLS-2750;

(ii) POLS-2035, POLS-2055 [French];

(iii) one of POLS-2510 or POLS-2520 [to be taken in Semester 3,4 or 5]

(iv) seven additional Political Science courses, including at least two at the 3000-level and three at the 4000-level.

(b) University of Ottawa [5 courses]:

POL2507. Introduction à la pensée politique

POL3514. Vie politique en Asie

POL3525. Pouvoir municipal au Canada

POL3526. Les femmes et la politique

POL3533. Politique et medias

POL3540. Vie politique aux États-Unis

POL3542. Vie politique en Europe occidentale

POL3544. Vie politique en Afrique

Or other approved course at the 2000-level or above

OR Five Political Science Courses in French taken on exchange or a letter of permission at a French-speaking university with the advanced approval of the department.

(c) two courses from Arts;

(d) two courses from Languages or Science;

(e) two courses from any area of study, excluding Social Sciences.

(f) GART-1500, GART-1510, SOSC-2500;

(g) FREN-1210, FREN-1220, FREN-2210, FREN-2220 and FREN-2700;

(h) one of FREN-2530, FREN-2600, FREN-2810 or FREN-2830;

(i) three courses from any area of study, including Political Science;

(j) three courses from any area of study, excluding Political Science.

Courses used to calculate the major average are: course listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Suggested Program Sequencing

Year 1 [Semester 1]

GART-1500. Effective Writing I

FREN-1210. French Language Training I [French]

POLS-1000. Introduction to Canadian Government and Politics

POLS-1300. Comparative Politics or POLS-1600. World Politics

Honours Law and Politics (with Thesis)

Degree requirements

Total courses: forty

- (a) POLS-1000, POLS-1300, POLS-1600 and POLS-2750;
- (b) one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5];
- (c) POLS-2140 and POLS-3140;
- (d) one of POLS-2680, POLS-3600, POLS-3620/PHIL-3230, or POLS-3630
- (e) three of POLS-2010, POLS-2120, POLS-2200, POLS-2210, POLS-3090, POLS-3210, POLS-3230, POLS-3240, and POLS-3260;
- (f) nine additional Political Science courses, including POLS-4970, POLS-4980 and one other at the 4000-level;
- (g) two courses from Arts;
- (h) two courses from Languages or Science;
- (i) two courses from any area of study, excluding Social Sciences;
- (j) GART-1500, GART-1510, SOSOC-2500, PHIL-1600, and PHIL-2610;
- (k) one of GART-2090 or PHIL-2210;
- (l) two of PHIL-2260, HIST-2870, SACR-2620, WGST-3100, and WORK-2000;
- (m) three courses from any area of study, including Political Science;
- (n) three courses from any area of study, excluding Political Science.

Courses used to calculate the major average are: courses listed under requirements (a) to (f), and any courses taken in the major area(s) of study.

Description of thesis option (if applicable): Students maintaining cumulative and major averages of 80% upon beginning semester 7 will complete an undergraduate thesis under the supervision of a faculty member in the department during semesters 7 and 8 of the program through successful completion of the courses POLS-4970 and POLS-4980.

Honours International Relations and Development Studies

Degree Requirements

Total courses: forty.

- (a) POLS-1000, POLS-1300, POLS-1600, POLS-2640 or 2670, POLS-2750, POLS-3540 or POLS-3550, POLS-3600, POLS-4610, POLS-4620;
- (b) HIST-1230, HIST-1240;
- (c) One of POLS-2510 or POLS-2520

- (d) Three of POLS-2300, POLS-2320, POLS-2330, POLS-2350, POLS-2410, POLS-2440, POLS-2450, POLS-2490, POLS-2600, POLS-2610, POLS-2640 or POLS-2670 (if not taken under requirements for (a)), POLS-2680;
- (e) Two of POLS-3350, POLS-3460, POLS-3540 or POLS-3550 (if not taken under requirements for (a)), POLS-3560, POLS-3610, POLS-3620/PHIL-3230, POLS-3630, POLS-3650, POLS-3670, POLS-3720;
- (f) One of POLS-4310, POLS-4340, POLS-4410, POLS-4420, POLS-4430, POLS-4640, POLS-4650, POLS-4950, POLS-4960;
- (g) ECON-1100 or ECON-2000, ECON-1110 or ECON-2010 (students pursuing an Economics Minor for requirement (i) may take two additional elective courses under requirement (j) below);
- (h) GART-1500, GART-1510, SOSC-2500;
- (i) Minor in one of: Arabic Studies; Business Administration; Communication, Media, and Film; Economics; Entrepreneurship; French Studies; Geography; History; Jewish Studies; Latin American Studies; Modern Languages; Philosophy; Sociology; Women's and Gender Studies; Indigenous Studies; Race and Ethnicity Studies. (Minors consist of 6 courses, but note that some courses may require prerequisites that are not part of the Minor; students are strongly encouraged to seek academic guidance from the academic advisor in the appropriate department);
- (j) Eleven courses from any area of study, at least five of which must be outside Political Science

Courses used to calculate the major average are: courses listed under requirements (a) to (f) and any courses taken in the major area(s) of study.

Honours International Relations and Development Studies (with Thesis)

Degree requirements

Total courses: forty.

- (a) POLS-1000, POLS-1300, POLS-1600, POLS-2640 or 2670, POLS-2750, POLS-3540 or POLS-3550, POLS-3600, POLS-4610, POLS-4620, POLS-4970, POLS-4980;
- (b) HIST-1230, HIST-1240;
- (c) One of POLS-2510, or POLS-2520;
- (d) Three of POLS-2300, POLS-2320, POLS-2330, POLS-2350, POLS-2410, POLS-2440, POLS-2450, POLS-2490, POLS-2600, POLS-2610, POLS-2640 or POLS-2670 (if not taken under requirements for (a)), POLS-2680;
- (e) Two of POLS-3350, POLS-3460, POLS-3540 or POLS-3550 (if not taken under requirements for (a)), POLS-3560, POLS-3610, POLS-3620/PHIL-3230, POLS-3630, POLS-3650, POLS-3670, POLS-3720, POLS-4310, POLS-4340, POLS-4410, POLS-4420, POLS-4430, POLS-4640, POLS-4650, POLS-4950, POLS-4960;
- (f) ECON-1100 or ECON-2000, ECON-1110 or ECON-2010 (students pursuing an Economics Minor for requirement (h) may take two additional elective courses under requirement (i) below);
- (g) GART-1500, GART-1510, SOSC-2500;
- (h) Minor in one of: Arabic Studies; Business Administration; Communication, Media, and Film; Economics; Entrepreneurship; French Studies; Geography; History; Jewish Studies; Latin American Studies; Modern Languages; Philosophy; Sociology; Women's and Gender Studies; Indigenous Studies; Race and Ethnicity Studies. (Minors consist of 6 courses, but note that some courses may require prerequisites that are not part of the Minor; students are strongly encouraged to seek academic guidance from the academic advisor in the appropriate department);
- (i) Ten courses from any area of study, at least five of which must be outside Political Science

Courses used to calculate the major average are: courses listed under requirements (a) to (e), and any courses taken in the major area(s) of study.

Students maintaining cumulative and major averages of 80% upon beginning semester 7 will complete an undergraduate thesis under the supervision of a faculty member in the department during semesters 7 and 8 of the program through successful completion of the courses POLS-4970 and POLS-4980.

Combined Honours Political Science Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) POLS-1000, POLS-1300, POLS-1600, and POLS-2750; one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5]; and ten additional courses, including at least three at the 4000-level.
- (b) Course requirements - Other Subject; courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510, SOSC-2500;
- (d) two courses from Arts;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Subfields (students are strongly encouraged to take at least one course from each subfield)

Canadian Politics

POLS-2010, POLS-2110, POLS-2130, POLS-2640
POLS-3090, POLS-3200, POLS-3230, POLS-3260

Comparative Politics

POLS-2320, POLS-2330, POLS-3350, POLS-2410, POLS-2440
POLS-3460, POLS-3650, POLS-3670
POLS-4310, POLS-4340

International Relations and Development Studies

POLS-1709
POLS-2490, POLS-2670, POLS-2680
POLS-3540, POLS-3550, POLS-3560, POLS-3600, POLS-3630
POLS-4610, POLS-4620, POLS-4640, POLS-4650

Political Theory, Culture and Religion
POLS-2510, POLS-2520, POLS-2600, POLS-2610
POLS-3519, POLS-3720, POLS-3780

Public Administration, Law and Policy
POLS-2120, POLS-2140, POLS-2200, POLS-2210f
POLS-3140, POLS-3210, POLS-3240, POLS-3610, POLS-3990
POLS-4210, POLS-4220, POLS-4920 and POLS-4920 (taken concurrently)

Combined Honours Political Science Programs with Thesis in Political Science

Degree requirements

Total courses: forty.

(a) POLS-1000, POLS-1300, POLS-1600, POLS-2750, POLS-4970 and POLS-4980; one of POLS-2510 or POLS-2520 [should be taken in Semester 3, 4 or 5]; and eight additional courses, including at least one other at the 4000-level.

(b) Course requirements - Other Subject; courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500, GART-1510, SOSC-2500;

(d) two courses from Arts;

(e) two courses from Languages or Science;

(f) two courses from any area of study, excluding Social Sciences.

(g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Students maintaining cumulative and major averages of 80% upon beginning semester 7 will complete an undergraduate thesis under the supervision of a faculty member in the department during semesters 7 and 8 of the program through successful completion of the courses POLS-4970 and POLS-4980.

Honours Business Administration and Political Science (with/without thesis and with/without Specialization)

This is a joint offering between the Department of Political Science and the Odette School of Business. See Odette School of Business for details.

Concurrent General Bachelor of Arts (Political Science)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between Political Science and the Faculty of Education. See Faculty of Education for program requirements.

Certificate in Law and Politics

Admission Requirements

Admission requirements are the same as those for the Honours Political Science program.

Requirements

Total courses: Eight

- a) POLS-1000, POLS-1600, and PHIL-1600;
- b) POLS-2140 and POLS-3140;
- c) One of POLS-3630 or POLS-3620/PHIL-3230;
- d) Two of PHIL 2210, PHIL-2260, SACR-2600, SACR-2620, HIST-2870, WGST-3100, WORK- 2000, POLS-2000, POLS-2120, POLS-2200, POLS-2210, POLS-3000, POLS-3230, POLS-4000, POLS-4210, POLS-4220, INCS-2350.

Certificate in North American Studies

Admission Requirements

For domestic students: Minimum admission requirements for undergraduate degrees.

For International/Exchange students: Successful completion of at least one year of undergraduate study at an accredited degree-granting institution and clear competence in English for academic purposes. Positive recommendation for international students from the home university (if currently enrolled elsewhere).

Requirements

Total courses: ten

- (a) POLS-1000, POLS-2320 , POLS-3350, , POLS-3550;
- (b) Two of POLS-2640; POLS-2010; POLS-3610; POLS-4340; POLS-4650;
- (c) Two of HIST-2430; HIST-2440; HIST-2470; HIST-2620; HIST-3490; HIST-3620; HIST-3630
- (d) One of SACR-2280; SACR-3330; SACR-3390

Certificate in Public Administration

Admission Requirements

Admission requirements are the same as those for the Honours Political Science program.

Requirements

Total courses: eight

- (a) POLS-1000, POLS-2200, POLS-2210:
- (b) ECON-1100 and ECON-1110;
- (c) Three of POLS 2000; POLS 2120; POLS 2130; POLS 2140; POLS 2320; POLS 2750; POLS 3000; POLS 3090; POLS 3140; POLS 3200; POLS 3210; POLS 3230; POLS 3260; POLS 3920, POLS 4000; POLS 4110; POLS 4210; POLS 4220; POLS 4310, POLS 4920.

Minor in Political Science

Requirements

- (a) POLS-1000;
- (b) one of POLS-1300 or POLS-1600;
- (c) four Political Science courses at the 2000 level or above.

To be awarded a Minor in Political Science: Students must obtain an overall minimum average of 60% of the Political Science courses taken to fulfil the Minor.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS)- Political Science

Major Concentration: 12 courses including

Maximum of two 1000-level courses in Political Science

- (a) Must take either POLS-2510 or POLS-2520
- (b) At least two 3000-level courses in Political Science
- (c) At least three 4000-level course in Political Science

*Students are encouraged to take POLS-1000 and closely review prerequisites for other Political Science courses to ensure appropriate planning of their program of study.

Minor Concentration: 6 courses including,

- (a) Maximum of two 1000-level courses in Political Science
- (b) Must take either POLS-2510 or POLS-2520
- (c) At least one 3000-level or 4000-level course in Political Science

*Students are encouraged to take POLS-1000 and closely review prerequisites for other Political Science courses to ensure appropriate planning of their program of study.

POLITICAL SCIENCE COURSES

Political Science POLS-1000, POLS-1300, and POLS-1600 are required of all general and four-year Honours students. It is recommended that these be taken in the first year or as corequisite with 2000-level courses. Four-year Honours students are advised where possible to complete SOSC-2500 and POLS-2750 during their second year. Non-majors wishing to enrol in particular courses may do so except where specific prerequisites are stated. Not all courses will necessarily be offered each year. All courses are three hours a week unless otherwise indicated.

POLS-1000. Introduction to Canadian Government and Politics

An introduction to the politics and government of Canada. The course will focus on political culture, the constitution, federalism, the executive, parliament, public service, courts, political parties, interest groups, and elections. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

POLS-1300. Comparative Politics in a Changing World

Introduces students to issues such as democracy, authoritarianism, nationalism, political culture, and how political power is organized. The course focuses on the democratic states of the West, but also

examines non-democratic states such as China and the transitional democracies of Eastern Europe. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

POLS-1600. Introduction to International Relations

An examination of competing perspectives on international relations and of such critical themes as power, security, war, imperialism, nationalism, interdependence, development and underdevelopment, human rights, environmental concerns, and the quest for a new world order. (3 lecture hours or 2 lecture hours, 1 tutorial hour a week.)

POLS-1709. Introduction to Diaspora Studies: There's No Place Like Home

This course introduces students to diasporas-scattered populations living in exile from their ancestral homelands. The course focuses on the significance of migration, exile, belonging, and nostalgia (for ancestral homelands) for diasporas throughout the world. Students submit projects (incorporating oral histories, for example) on the diaspora of their choice. (Also offered as Diaspora Studies DIAS-1700 and Languages, Literatures and Cultures JWST-1700.)

POLS 2000. Indigenous Policy and Constitutional Relationships

This course introduces students to Canadian Indigenous policy and the legal Constitutional relationship between Indigenous Peoples and the Crown in a modern context. To guide the discussions, students will engage research and scholarship that critically examines the policy history and its impact in Canada. To encourage critical thinking, the course will encourage students to examine different legal policy eras and areas relating to policy theory. Students will also be encouraged to reflect on their own ideas while examining policy implications.

POLS-2010. Current Issues in Canadian Politics

An examination of one or more current issues in Canadian politics, for example, energy and resources, the environment, native peoples, aging, women's rights, urban problems, and health care. (Prerequisite: one of POLS-1000 or POLS-1300.)

POLS-2015. From University to Work

This course draws on resources from across the university, community partners, online platforms, and in academic literature, to provide students with opportunities for career development. Students will gain strategies for job search, resume preparation, networking, online profiles, career planning, and interviews. Students will create and conduct informational interviews and debate critical issues in the labour market for university students and graduates.

POLS-2035. Quebec Politics and Society [French]

This course, which is taught in French, introduces students to political life in the province of Quebec, with a focus on the structure and functions of governing institutions, political culture and ideology, and the origins of key political traditions and practices. Topics may include the origins and evolution of Québécois nationalism, the unique position of Quebec in Canadian federalism, provincial policy initiatives to protect and extend the French language in the public sphere, and external relations with Canada and the international community.

POLS-2045. Issues in Quebec Politics [French]

This course, which is taught in French, examines major historical and contemporary political issues in the province of Quebec. Topics may include the patriation of the Canadian constitution, the Quiet Revolution, the FLQ crisis, referenda on Quebec sovereignty, and current public policy issues such as immigration and the environment.

POLS-2055. Contemporary Canadian Political Issues [French]

This course, which is taught in French, examines contemporary issues in Canadian politics. Topics may include, for example, constitutional change, Aboriginal peoples, demographic shifts, the environment, health care and immigration.

POLS-2065. The Post-Communist Transformations

This course introduces the students to the politics in post-communist states of Eastern and Central Europe and Eurasia, focusing on such topics as the rise and fall of communism, transitions to democracy and market economy, democratic backsliding, the origins and dynamics of ethnic and regional conflicts, the migrant crisis, entry into NATO, the European Union and the Eurasian Economic Community, and relations with other countries, including the United States, Russia and China.

POLS-2110. Women and Politics

An introduction to the principal themes in the study of women in Canadian politics. Topics may include: feminist theory, women in Canadian political institutions, the status of women in the Canadian economy, and gender equality rights in the Charter. (Also offered as Women's and Gender Studies WGST-2110).

POLS-2120. Environmental Policy and Politics

The course examines the domestic and international context of environmental policy-making in Canada. Topics examined may include global warming, Great Lakes pollution, and endangered species.

POLS-2130. Public Opinion, Mass Media and Canadian Democracy

An evaluation of the relationship between public opinion and democratic politics, how opinions, beliefs and attitudes are shaped by the family, educational system, peer groups, and in particular, mass media. Particular attention will be devoted to the role of the mass media in influencing public opinion and public policy.

POLS-2140. Legal Process in Canada

An introduction to the legal system in Canada, including the sources of Canadian law, the general concepts of constitutional and administrative law, the court structure, and the study and practice of law. (Prerequisite: one of POLS-1000, POLS-1300, or POLS-2120)

POLS-2200. Introduction to Public Administration

This course introduces students to the political science sub-field of public administration. Building on classical theories of organization, it examines the institutions of government, the dynamics of public sector management, and the relationship between elected officials and administrators in the political system. (Prerequisite: one of POLS-1000 or POLS-2120, consent of instructor.)

POLS-2210. Canadian Public Administration and Policy

An introduction to the processes of public policy formation in Canada. Includes an analysis of political/bureaucratic relationships, decision making theory, and the role of interest groups in the context of selected contemporary policy issues. (Prerequisite: POLS-2200 or consent of instructor.)

POLS-2220. Introduction to Social and Political Philosophy

An examination of some of the main contending theories about the nature of society and the state, or of some of the central controversies in social and political theory. (Prerequisite: Semester 3 or above standing; or consent of the instructor). (Also offered as PHIL-2220.)

POLS-2300. Space, Place, and Scale: Foundations of Human Geography

An introduction to foundational concepts and approaches in the study of human geography, emphasizing the way social, political, economic, and environmental systems shape and are shaped by patterns of geographic and spatial organization.

POLS-2320. Government and Politics of the United States

The organization and structure of national government in the United States, with emphasis upon congressional/executive relationships, political parties, and the electoral process.

POLS-2330. Politics of the Developing World

An examination of the politics of developing areas, with a focus on economic and political development, ethnic conflict and the role of overseas development assistance in building government institutions. In given years, emphasis may be on Africa, Asia or Latin America and the Caribbean.

POLS-2350. Government and Politics in the Middle East

The course provides an overview of the politics of the contemporary Middle East. Particular attention will be paid to state and regime formation, the legitimacy of Middle Eastern governments, state society interaction, the nature of the opposition, and prospects for democratization and improvements to human rights.

POLS-2410. Contemporary African Politics

Characteristic domestic and international problems of African states south of the Sahara, including resource scarcity, ethnic diversity, political stability, and relations with the Great Powers.

POLS-2440. Government and Politics in Europe

Examines contemporary issues such as democratic development, nationalism, and regionalism, immigration and racism, the status of women, social welfare programs, and the consolidation and expansion of the European Union.

POLS-2450. Contemporary Issues in International Relations

This class will focus on some of the key contemporary issues in international relations. Students are expected to have some background knowledge of world politics, particularly developments in the last few decades. Issues to be examined may include economic globalization and its effects, the future of the state system, capitalism (and its challengers) as a model of economic production, development assistance, the US role in global politics, Iran's nuclear program, and climate change. [The pre-requisite for the class is POLS-1600 (Introduction to International Relations)].

POLS-2480. The Political Economy of Mass Media

This course will explore the role of media as a political force in democratic societies. Corporate media's role in politics and governance is the starting point for looking at what role media play in North American political culture. Communication policy, the role of public relations and advertising, and the exercise of power among the media. political realm and the general public are examined.

POLS-2490. Political Economy of Agriculture and Food

Critical examination of shifts in the political economy of agriculture and food, focusing on political, economic, social, and environmental changes occurring in and affecting agro-food production and consumption systems.

POLS-2510. Classical Political Thought

An introduction to the history of political thought from the ancient Greeks to the end of the Middle Ages. Topics may include human nature, justice, natural law, and the relationship between Church and State. (Prerequisites: POLS-1000 and one of POLS-1300 or POLS-1600.)

POLS-2520. Modern Political Thought

Toward the new science of politics from Machiavelli to Rousseau and the French Revolution.

POLS-2550. The Politics of Music

This course will explore the relationship between music and politics. Historical perspectives and critical popular culture theory will inform a look at the rise of politically themed music, how the music industry deals with political themes in music, music and social movements, and music as hate politics, music and patriotism.

POLS-2600. Politics, History, and Asian Religions

An introduction to Hinduism, Sikhism, Jainism, Buddhism, Taoism, Confucianism, and Shinto, with attention to their role in history and politics.

POLS-2610. Politics, History, and Western Religions

An introduction to Judaism, Zoroastrianism, Christianity, Islam, and BaHai, with attention to their role in history and politics.

POLS-2640. Introduction to Canadian Foreign Policy

An overview of the formulation and trends of Canadian foreign policy from World War I to the present, together with an examination of the domestic and external determinants of Canadian foreign policy and of the foreign policy making process. (Prerequisite: POLS-1000, or POLS-1600, or consent of instructor.)

POLS-2670. Strategic Studies

An examination of the theories, tools, and concepts that explain war and how international violence can be used for political ends. The focus will be primarily on the modern state system, especially on the post-WWII environment. Among topics to be addressed are theories of war, deterrence, arms control, the "democratic peace" thesis, and proliferation of weapons of mass destruction. (Prerequisite: POLS-1600 or consent of the instructor.)

POLS-2680. International Organizations

An introduction to the problems and possibilities of international Co-operation and global governance among states and non-state actors. The course will provide a survey of various international organizations. These may include the United Nations, NATO, the European Union, and NAFTA. The role of non-governmental organizations in world politics is also examined. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-2700. Information Searching and Analysis

This course is designed to help students become better at analyzing and critiquing information from a variety of sources. We will take a critical look at internet searching and learn to use those resources in more intelligent ways. The focus will be on researching a topic through both the internet and more traditional sources. Students will learn how to assess the information contained in websites and how to assess a variety of things which appear as information.

POLS-2750. Introduction to Research Methods

Introduces students to quantitative and qualitative social research. Looks at how surveys and focus groups are used and abused for political and commercial purposes. Examines what field and archival

research can teach us about human behaviour and social, political, and economic trends. (Prerequisite: SOSC-2500.)

POLS-2880. Selected Topics: Current Political Issues

Selected topics based on current political issues. Topics may vary from year to year. (May be repeated for credit if content changes.)

POLS-3000. Indigenous Treaties and Land Claims

This course introduces students to Indigenous agreements surrounding both relationships and land, while connecting to a modern context. Building on the Indigenous Policies course, students will be introduced to the history of treaty-making in Canada and the evolution to the modern processes while critically examining the shifting relationship between Indigenous Peoples and the Crown. The course examines the competing interests and strategies for conflict resolution in the context of both historic and contemporary treaties. Students will also be encouraged to apply these findings to Canada and the Northern communities in particular. (Prerequisite: One 2000-level Political Science course.)

POLS-3090. Canadian Provincial Government

A comparative study of provincial governments and politics in Canada including an examination of the powers exercised by provinces, the institutions of provincial government and the behaviour of provincial electorates and politicians. In given terms, Ontario, Quebec, the Atlantic or the Western provinces may be given particular attention. (Prerequisite: POLS-1000 or consent of instructor.)

POLS-3140. Constitutional Law and Politics in Canada

The nature and purpose of constitution and major issues in Canadian constitutional politics. Topics may include judicial review, the development of human rights law in Canada, and the impact of the Charter of Rights on Canadian politics and government. (Prerequisite: POLS-2140 or consent of instructor.)

POLS-3190. Social Pathologies

The course examines the emergence of pathological forms of social life that systematically undermine human interaction, distort social communication, and falsify individual and group consciousness. The course may explore the work of major social thinkers such as Rousseau, Hegel, Marx, Lukacs, Weber, Schmidt, Freud, Adorno, Marcuse, Arendt, Habermas and Honneth or investigate one or more specific forms of modern social pathologies such as racism, gender inequality, colonialism, extreme poverty, the destruction of the environment. (Prerequisite: PHIL-2210 or permission of the instructor). (Also offered as PHIL-3190.)

POLS-3200. Political Parties and Elections

An analysis of the development and functions of parties and of the social, psychological, and political influences on voting in Canada.

POLS-3210. The Legislative Process

An introduction to representative democracy, parliamentary behaviour, and legislative process. May include role-playing exercises and a simulation of the Federal House of Commons.

POLS-3230. Government and Business

An introduction to the intricate relationship of government to business. Included are: government services to business; business and policy development; and regulation and/or de-regulation and regulatory agencies. (Prerequisite: POLS-1000 or consent of instructor.)

POLS-3240. Public Infrastructure

This course examines the role of the public sector in the ownership and operation of major capital facilities for transportation, water, sanitation, electric power, health care and education. Topics include alternative funding mechanisms, environmental impacts and regulations, public consultation and the influence of political interest groups, and the role of infrastructure in the economy. The course also provides an introduction to analytical methods used to support infrastructure decision-making.

POLS-3260. Local Government

An introduction to the politics and administration of local government. Topics include local political structure, relationships between municipalities and other levels of government, public policy-making, and current challenges facing local officials. (Prerequisite: POLS-1000)

POLS-3300. Psychoactive Substance Use and Social Policy

This course provides a critical exploration of social factors affecting our understanding of psychoactive substances (e.g., alcohol, tobacco, cannabis, opiates, cocaine, psilocybin, club drugs, etc.), their use, relevant social policy and how these have changed over time. Course delivery may vary according to instructor preference. (Prerequisite: Semester 5 standing or above, or permission of instructor). (Antirequisite: SACR-3710) (Also offered as SOSC-3300).

POLS-3350. Political Geography

A systematic examination of the relationship between politics, power, and geography, with focus on the political meanings, uses, and representations of geographic space, and the significance of geography for understanding the organization and exercise of political power at local, regional, and global scales. (prerequisites: POLS-2300).

POLS-3460. Asian Government and Politics

Comparative analysis of institutions and political processes of Southeast Asia, South Asia, China, or Japan.

POLS-3519. Topics in Political Thought

The study of selected topics in political thought and theory. Students are recommended to take POLS-2510 or POLS-2520 before taking this course.

POLS-3540. Political Problems of Economic Development

The course takes a comprehensive approach to the study of economic development, drawing connections between theory (including development paradigms) and practice. In given years, the focus may be on South-East Asia, Central Asia, Africa, China, Eastern Europe, or Latin America. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-3550. Political Economy of International Trade

An examination of the most prevalent dilemmas facing the global trading system. The main focus is on the World Trade Organization and its global agreements on goods, agriculture, services and intellectual property. Additional topics include regional trade blocs, international trade in money, foreign direct investment, and environmental and labour issues. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-3560. Theories of International Political Economy

An examination of the major theoretical perspectives in the field of international political economy. This course will cover both classical and modern theories, including mercantilism, liberalism, Marxism, feminism and post-modernism. (Prerequisite: POLS-1600 or consent of Instructor.)

POLS-3600. International Conflict and Its Resolution

The nature of conflict and how it is managed in the international community; explicit and tacit bargaining strategies and techniques of conflict resolution. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-3610. U.S. Foreign Policy

The United States policy-making process and the substance of policy in relation to the former communist world, developing countries, and allies such as Canada and Western Europe.

POLS-3620. Human Rights and Global Justice

The course will focus on the meaning and nature of human rights and their relationship to global justice. Topics may include: the historical development of human rights doctrines, their relationship to classical citizenship rights, the relationship between universal human rights and culturally distinct life ways, relationship between legal/moral principles, material reality, and different conceptions of global justice, the strengths and limitations of human rights as principles to advance global justice. (Prerequisite: Semester 3 or above standing, or permission of the instructor.)(Also offered as PHIL-3230.)

POLS-3630. Principles of International Law

An introduction to the role of international law in international relations, this course will consider the role of justice in the international system and will examine the basic principles of modern international law, including sources, subjects, and procedures. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-3650. The Middle East in International Relations

The nature and causes of the various conflicts in the region, the role of outside powers and international organizations, and the prospects for conflict resolution. (Prerequisite: POLS-1600 or consent of instructor.)

POLS-3670. The Politics of the European Union

Examines the development and operation of the European Union. Key issues on the agenda of the European Union are examined, including: the introduction of the single currency; the development of a common foreign and security policy; and the possible enlargement of the European Union. The extent to which the European Union challenges existing state structures is examined throughout the course.

POLS-3720. Religious Fundamentalism and Politics

A study of the modern concept of religious fundamentalism, with case studies of the interface of fundamentalism and politics in North America, Europe, Africa and Asia.

POLS-3780. Promotional Culture and Democracy

This course focuses on the role promotional culture plays in democratic processes. Moving beyond classical conceptions of propaganda, promotional culture incorporates a range of tactics and strategies used to persuade citizens or sell to consumers. While political and issue advertising play increasingly large roles, the interplay between journalism and promotional culture will also be a nexus of concern for the course. (Prerequisite: POLS-1000)

POLS-3920. Public Service Management Internship Seminar

A critical examination of selected theories and concepts applicable to research and management practices in the public sector. (Admission by consent of a program advisor.) (Must be taken concurrently with POLS-4920.)

POLS-3990. Practicum in Government and Politics

Practical work in the office of an elected or appointed official, with oral and written reports to the supervising faculty member. (To be taken only with permission of instructor and a program advisor in Political Science.) (This is an experiential learning course.)

POLS-4000. Indigenous Nation-Building: Traditional Governance in a Modern Era

Indigenous governance and development strategies in a modern context. To guide the discussions, students will be introduced to the research and work of the Harvard Project on American Indian Economic Development and concepts that support Indigenous Nation-building. To encourage critical thinking, the course will examine where these theories and strategies work well and where they may not and why. Students will also be encouraged to apply these findings to Canada and the Northern communities in particular.

POLS-4210. Seminar in Canadian Public Policy

A detailed analysis of the Canadian public policy process. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4220. Seminar in Public Policy Analysis

A survey of the evaluative side of public policy including formulation, adoption, program operations and evaluation techniques. (Restricted to Semester 7 and 8 Political Science majors.)

POLS-4310. Seminar in Comparative Politics

A comparative examination of national political systems emphasizing areas such as political culture, political parties, elites, and interest groups. In given terms, the focus may be on industrialized or developing countries. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4340. Seminar in Politics of the United States

An analysis of selected topics in United States politics and government. May include an examination of foreign perspectives on U.S. politics, Canadian-U.S. relations, parties and elections, civil liberties and civil rights, or other important topics in United States politics. (Restricted to Semester 7 and 8 Political Science majors.)

POLS-4410. The New Scramble for African Resources

This course examines the evolving political and economic relationships between countries in Sub-Saharan Africa and the rest of the world. As Africa moves from a "forgotten" continent to a "rising" one in the eyes of foreign policy analysts and the global business community, this course re-examines Africa's role in international relations and international security. Through the lens of the "new scramble for Africa", the course will examine contemporary issues such as land, oil and minerals before focusing specifically on case studies of Africa's changing relations with the world. (Prerequisites: POLS-1600, POLS-2410 or consent of instructor. Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4420. Politics and Security in Russia and Eurasia

This course examines the politics of and security issues facing the Russian Federation, the five Central Asian Republics of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan and Uzbekistan, and the Caucasian Republics of Georgia, Armenia and Azerbaijan. For the purposes of this course, the role and influence of Turkey, Iran, China and the United States on the politics and security of these Eurasian states will also be considered. The approach taken in this course is inter-disciplinary, drawing heavily from the fields of political science, history, and economics. The students will be introduced to political, economic and social issues affecting the region and taught how to research these issues through the lens of historical analysis

and political economy. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS 4430. Collective Action and Contentious Politics

This course explores the conditions and processes shaping protests, riots, revolutions, and other forms of contentious politics. The course examines major theories about revolutions and social movements and considers competing explanations for the emergence of collective action. Particular attention is paid to the conditions under which people do or do not rebel and various aspects of the strategic interaction between social movements and states, and the determinants of movement outcomes. The students will read theoretical works and review several cases of revolutions and social movements in both democratic and nondemocratic state settings, thinking through parallels and differences among them. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4610. Seminar in Theories of International Relations

A survey of competing perspectives and approaches employed in the contemporary study of international relations. (Restricted to Semester 7 and 8 International Relations majors)

POLS-4620. Interdisciplinary Approaches to Research in International Relations

A research oriented seminar that will encourage the use of interdisciplinary perspectives in the examination of selected problems in international relations. (Restricted to Semester 7 and 8 International Relations majors.)

POLS-4640. International Political Economy

An overview of the major theoretical perspectives and issues in international political economy. Issues addressed may include: international trade, foreign investment and multinational corporations, international monetary institutions, and crisis and change in the international system. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4650. Seminar in Globalization

A critical overview of major theories, debates, and case studies related to the politics of globalization. Specific topics addressed may include changes in the nature of state sovereignty, the creation and regulation of a global economy, and cultural change and resistance. (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors. Students are recommended to take POLS-2300 before taking this course).

POLS-4880. Selected Topics in Political Science

Topics of current interest which may vary from year to year. Topics include: China and India; Information Searching and Analysis; Third World International Relations. (May be repeated for credit with the permission of a program advisor in Political Science.) (Restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors.)

POLS-4920. Public Service Management Internship Practicum

Supervised work experience in a public service management environment. (Admission only by consent of program advisor.) (Offered on a Pass/Non-pass basis only.) (Must be taken concurrently with POLS-3920) (This is an experiential learning course.)

POLS-4950. Advanced Topics in Canadian Foreign Policy

This seminar will focus on issues that are driving the contemporary Canadian foreign policy agenda. Members of the seminar will read and discuss recent research on topics including Canada's defence and security policy, trade and aid policies, environmental record, as well as more recent foreign policy

initiatives. Students are expected to learn through active participation in the class. Students are also expected to have some background knowledge of both Canadian history and Canadian government and politics. The course is restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors. Students must have taken POLS-1600 (Introduction to International Relations) before taking this course. While not a pre-requisite, it is also recommended that students take POLS-2640 (Introduction to Canadian Foreign Policy) before this class, although the instructor will permit students into the course without it.

POLS-4960. Advanced Topics in International Security

This seminar will focus on issues that are driving the contemporary fields of strategic and security studies. Members of the seminar will read and discuss recent research on topics including Canadian and American defence and security policy, proliferation, the arms trade, energy security, and changes in military strategy. Students are expected to learn through active participation in the class. Students are also expected to have some background knowledge of global politics and some understanding of recent conflict. The course is restricted to Semester 7 and 8 Political Science majors and Semester 7 and 8 International Relations majors. [Students must have taken POLS-1600 (Introduction to International Relations) before taking this class. While not a pre-requisite, it is also recommended that students take POLS-2670 (Strategic Studies) before this class, although the instructor will permit students into the course without it.]

POLS-4970. Political Science Thesis 1: Research Design

This course provides students instruction and guidance in identifying, designing, and planning an original, independent research project, resulting in the development of a research proposal under the supervision of the course instructor and a faculty supervisor. The course includes both regular individual meetings with the faculty supervisor and seminar meetings with the course instructor to discuss issues related to research planning and design, including but not limited to developing a research question and methodology, constructing a literature review, conducting research ethically, and collecting, organizing, and analyzing data. (Prerequisites: POLS-2750 and Semester 7 or 8 standing in a Political Science or International Relations program; a cumulative average of at least 80%; a major average of at least 80%; and consent of the course instructor.)

POLS-4980. Political Science Thesis 2: Writing and Presentation

This course builds on the research design students develop in POLS-4970. Students complete an undergraduate thesis under individual faculty supervision, and present the results in written and oral formats. (Prerequisite: POLS-4970 and consent of the course instructor.)

POLS-4990. Directed Reading in an Approved Special Field

Intended for students with special interest in areas not covered in sufficient depth by other courses. (To be taken only with permission of instructor and a program advisor in Political Science.) (May be repeated for credit if content changes.)

PSYCHOLOGY

PROGRAMS

General Psychology

Degree Requirements

Total courses: thirty.

- (a) ten courses, including PSYC-1150 and PSYC-1160, and at least two 3000-level courses.
- (b) two courses from Arts;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Social Sciences.
- (e) GART-1500, GART-1510;
- (f) SOSC-2500;
- (g) five courses from any area of study, including Psychology;
- (h) six courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, four psychology courses.

Third Year: two 3000-level psychology courses, two additional psychology courses.

General Child Psychology

Degree Requirements

Total courses: thirty

- (a) ten courses including PSYC-1150, PSYC-1160, PSYC-2230; at least four courses from the following list: PSYC-2240, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270; three additional courses
- (b) two courses from Arts;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Social Sciences.
- (e) GART-1500, GART-1510;
- (f) SOSC-2500;
- (g) five courses from any area of study, including Psychology;
- (h) six courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2230, one of: PSYC-2240, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270; two additional psychology courses.

Third Year: three of: PSYC-2240, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270; one additional psychology course.

Honours Psychology (with/without Co-op)

This program is intended for students who wish to study the discipline of psychology over a four-year period, including those who might wish to study at the graduate level in professions or disciplines other than psychology.

Degree Requirements

Total courses: forty. (Plus three work terms for students in the Co-op program).

(a) eighteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3350 or PSYC-3530 or PSYC-3580. The total number of courses must include at least four 3000-level courses and two 4000-level courses.

(b) two courses from Arts;

(c) two courses from Languages or Science;

(d) two courses from any area of study, excluding Social Sciences.

(e) GART-1500, GART-1510;

(f) SOSC-2500;

(g) five courses from any area of study, including Psychology;

(h) eight courses from any area of study, excluding Psychology.

Co-op Students: GART-2980 (Co-op Work Term I), GART-3980 (Co-op Work Term II), GART-4980 (Co-op Work Term III)

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, three additional psychology courses.

Third Year: PSYC-3200, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two additional 3000-level psychology courses, two additional psychology courses.

Fourth Year: two 4000-level courses, four additional psychology courses.

Honours Psychology with Thesis

This program is oriented primarily toward students with a serious interest in psychological research who intend to study at the graduate level in psychology. Students taking this program should be able to do independent research (thesis) work, and have competence in statistics and research methods. In the fourth year, the program requires completion within a two-term period (Fall and Winter terms only) of a thesis. The thesis is an independent research study, completed in conjunction with a research advisor.

Entry to the fourth year thesis course, PSYC-4960, requires a cumulative course average of at least 77% and a Psychology major course average of at least 80%.

Degree Requirements

Total courses: forty.

(a) eighteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3130, PSYC-3200, PSYC-3310, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4960 and PSYC-4970. The total number of courses must include at least four 3000-level courses and four 4000-level courses

(b) two courses from Arts;

(c) two courses from Languages or Science;

(d) two courses from any area of study, excluding Social Sciences.

(e) GART-1500, GART-1510;

(f) SOSC-2500;

(g) five courses from any area of study, including Psychology;

(h) eight courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, three additional psychology courses.

Third Year: PSYC-3130, PSYC-3200, PSYC-3310, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two additional psychology courses.

Fourth Year: PSYC-4960 and PSYC-4970, two 4000-level courses, two additional psychology courses.

Honours Psychology – Interdisciplinary Health Science (IHS) Stream

Degree requirements:

Total courses: 40

(a) eighteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3350 or PSYC-3530 or PSYC-3580. The total number of courses must include at least four 3000-level courses and two 4000-level courses.

(b) two courses from Arts;

(c) two courses from Languages or Science;

(d) two courses from any area of study, excluding Social Sciences.

(e) GART-1500, GART-1510;

(f) SOSC-2500;

(g) three IHS core courses (IHSC-1000, IHSC-3000, IHSC-4000)

(h) eight courses from one selected IHS concentration

(i) two courses from any area of study, including psychology

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Developmental Psychology

This program is intended for students who wish to study the discipline of life span developmental psychology (child, adolescent, and/or adult development) over a four-year period, including those who might wish to study at the graduate level in professions or disciplines other than psychology.

Degree Requirements

Total courses: forty.

- (a) eighteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4270, and at least two 2000-level courses, two 3000-level courses, and one 4000-level courses from the following list: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280.
- (b) two courses from Arts;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Social Sciences.
- (e) GART-1500, GART-1510;
- (f) SOSC-2500;
- (g) five courses from any area of study, including Psychology;
- (h) eight courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two of: PSYC-2230, PSYC-2240, PSYC-2250; one additional psychology course.

Third Year: PSYC-3200, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two of: PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270; two additional psychology courses.

Fourth Year: PSYC-4270, two of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280; three additional psychology courses.

Honours Developmental Psychology with Thesis

This program is oriented primarily toward students with a serious interest in psychological research who intend to study at the graduate level in psychology. Students taking this program should be able to do independent research (thesis) work and have competence in statistics and research methods. In the fourth year, the program requires completion within a two-term period (Fall and Winter terms only) of a thesis. The thesis is an independent research study, completed in conjunction with a research advisor. Entry to the fourth-year thesis course, PSYC-4960, requires a cumulative course average of at least 77% and a Psychology major course average of at least 80%.

Degree Requirements

Total courses: forty.

- (a) eighteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3130, PSYC-3200, PSYC-3310, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4270, PSYC-4960 and PSYC-4970; and at least two 2000-

level courses, two 3000-level courses, and one 4000-level courses from the following list: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280.

- (b) two courses from Arts;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Social Sciences.
- (e) GART-1500, GART-1510;
- (f) SOSC-2500;
- (g) five courses from any area of study, including Psychology;
- (h) eight courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two of: PSYC-2230, PSYC-2240, PSYC-2250; one additional psychology course.

Third Year: PSYC-3130, PSYC-3200, PSYC-3310, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two of: PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270.

Fourth Year: PSYC-4270, PSYC-4960, PSYC-4970, two of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280; one additional psychology course.

BSc Honours Program in Behaviour, Cognition and Neuroscience (with/without thesis)

This is a joint program between the Department of Psychology and the Department of Integrative Biology. See the Department of Integrative Biology for program requirements.

Combined Honours Psychology Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) fourteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4270 and at least two 2000-level courses, two 3000-level courses, and one 4000-level course from the following list; PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280.

(b) Course Requirements – Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500, GART-1510;

- (d) SOSC-2500;
- (e) two courses from Arts;
- (f) two courses from Languages or Science;
- (g) two courses from any area of study, excluding Social Sciences.
- (h) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two additional psychology courses.

Third Year: PSYC-3200, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two additional 3000-level psychology courses.

Fourth Year: two 4000-level psychology courses, three additional psychology courses.

Combined Honours Programs in Psychology with Thesis

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) fourteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3310; plus PSYC-3130 or an equivalent statistics course from another area of study; plus one of PSYC-3350, PSYC-3530 or PSYC-3580; and PSYC-4960 and PSYC-4970. The total number of Psychology courses must include at least four 3000-level courses. Entry to the fourth year thesis course, PSYC-4960, requires a cumulative course averages of at least 77% and a Psychology major course average of at least 80%.

(b) Course requirements – Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

€ GART-1500, GART-1510;

(d) SOSC-2500;

€ two courses from Arts;

(f) two courses from Languages or Science;

(g) two courses from any area of study, excluding Social Sciences.

(h) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two additional psychology courses.

Third Year: PSYC-3130 or equivalent, PSYC-3200, PSYC-3310, one of: PSYC-3350 or PSYC-3530 or PSYC-3580.

Fourth Year: PSYC-4960, PSYC-4970, five additional psychology courses.

Combined Honours Programs in Developmental Psychology

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) fourteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4270, and six of: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280. The total number of Psychology courses must include at least four 3000-level courses and two 4000-level courses.

(b) Course requirements – Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500, GART-1510;

(d) SOSC-2500;

(e) two courses from Arts;

(f) two courses from Languages or Science;

(g) two courses from any area of study, excluding Social Sciences.

(h) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two of: PSYC-2230, PSYC-2240, PSYC-2250.

Third Year: PSYC-3200, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; two of: PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270.

Fourth Year: PSYC-4270, one of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280; one of: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280; two additional psychology courses.

the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) fourteen courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3130 or an equivalent statistics course from another area of study, PSYC-3200, PSYC-3310, PSYC-3350 or PSYC-3530 or PSYC-3580, PSYC-4270, PSYC-4960, PSYC-4970, and four of: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280. The total number of Psychology courses must include at least four 3000-level courses. Entry to the fourth-year thesis course, PSYC-4960, requires a cumulative course average of at least 77% and a Psychology major course average of at least 80%.

(b) Course requirements – Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

€ GART-1500, GART-1510;

(d) SOSC-2500;

€ two courses from Arts;

(f) two courses from Languages or Science;

(g) two courses from any area of study, excluding Social Sciences.

(h) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: GART-1500, GART-1510, PSYC-1150, PSYC-1160.

Second Year: SOSC-2500, PSYC-2300, two of: PSYC-2230, PSYC-2240, PSYC-2250.

Third Year: PSYC-3130 or equivalent, PSYC-3200, PSYC-3310, one of: PSYC-3350 or PSYC-3530 or PSYC-3580; one of: PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270.

Fourth Year: PSYC-4270, PSYC-4960, PSYC-4970, one of: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280.

Concurrent General Bachelor of Arts (Psychology)/Bachelor of Education/Diploma in Early Childhood Education

Direct admissions from high school only.

This is a joint offering between Psychology and the Faculty of Education. See Faculty of Education for program requirements.

General Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway

Students are strongly advised to enrol in this program in the Summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements

Total courses: fifteen, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 15 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Psychology Undergraduate Program Chair (or designate) will identify a substitute course requirement.

- (a) seven courses, including PSYC-1150, two 3000-level courses; and four 2000, 3000 or 4000-level courses (excluding PSYC-2230).
- (b) two courses from Arts, Languages or Science;
- (c) one course from any area of study, excluding Social Sciences.
- (d) SOSC-2500;
- (e) four courses from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: PSYC-1150, SOSC-2500, three 2000, 3000 or 4000-level psychology courses, two courses from Arts, Languages or Science; one course from any area of study, excluding Social Sciences; two courses from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Fourth Year: one 2000, 3000 or 4000 level psychology course, two 3000-level psychology courses; two courses from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

General Child Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway

Students are strongly advised to enrol in this program in the Summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements

Total courses: fifteen, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 15 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Psychology Undergraduate Program Chair (or designate) will identify a substitute course requirement.

- (a) seven courses, including PSYC-1150, PSYC-2240, PSYC-3240, PSYC-3270, three 2000, 3000 or 4000 level courses (excluding PSYC-2230).
- (b) two courses from Arts, Languages or Science;
- (c) one course from any area of study, excluding Social Sciences.
- (d) SOSC-2500;
- (e) four courses from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: PSYC-1150, PSYC-2240, SOSC-2500, three 2000, 3000 or 4000-level psychology courses, two courses from Arts, Languages or Science, one course from any area of study, excluding Social Sciences, one course from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).
Fourth Year: PSYC-3240, PSYC-3270, three courses from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Honours Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway

Students are strongly advised to enrol in this program in the Summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements

Total courses: twenty, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Psychology Undergraduate Program Chair (or designate) will identify a substitute course requirement.

- (a) eleven courses, including PSYC-1150, PSYC-2300, PSYC-3200, one of: PSYC-3350, PSYC-3530, PSYC-3580; two 3000-level courses, three 4000-level courses, two additional 2000, 3000 or 4000-level courses (excluding PSYC-2230).
- (b) two courses from Arts, Languages or Science;
- (c) one course from any area of study, excluding Social Sciences.
- (d) SOSC-2500;
- (e) five courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: SOSC-2500, PSYC-1150, PSYC-2300, two 2000, 3000 or 4000-level psychology courses (excluding PSYC-2230), two courses from Arts, Languages or Science, one course from any area of study, excluding Social Sciences, two courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Fourth Year: PSYC-3200, one of PSYC-3350, PSYC-3530 or PSYC-3580; two 3000-level psychology courses, three 4000-level psychology courses, three courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Honours Psychology with Thesis for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates-Degree Completion Pathway

Students are strongly advised to enrol in this program in the summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements:

Total courses: twenty, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Psychology Undergraduate Program Chair (or designate) will identify a substitute course requirement.

- (a) eleven courses including PSYC-1150, PSYC-2300, PSYC-3130, PSYC-3200, PSYC-3310, one of: PSYC-3350, PSYC-3530, PSYC-3580; PSYC-4960, PSYC-4970, one 4000-level course, two 2000-, 3000- or 4000-level courses (excluding PSYC-2230). Entry to the fourth-year thesis course, PSYC-4960, requires a cumulative course average of at least 77% and a Psychology major course average of at least 80%.
- (b) two courses from Arts, Languages or Science.
- (c) one course from any area of study, excluding Social Sciences
- (d) SOSC-2500
- (e) five courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: SOSC-2500, PSYC-1150, PSYC-2300, PSYC-3200, PSYC-3310, one of: PSYC-3350, PSYC-3530, PSYC-3580, two courses from Arts, Languages or Science, one course from any area of study, excluding Social Sciences, one course from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Fourth Year: PSYC-3130, PSYC-4960, PSYC-4970, one 4000-level psychology course, two 2000, 3000 or 4000 level psychology courses (excluding PSYC-2230), four courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Honours Developmental Psychology for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway

Students are strongly advised to enrol in this program in the Summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements

Total courses: twenty, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Psychology Undergraduate Program Chair (or designate) will identify a substitute course requirement.

(a) eleven courses including PSYC-1150, one of: PSYC-2240 or PSYC-2250; PSYC-2300, PSYC-3200, one of: PSYC-3350, PSYC-3530, PSYC-3580; two of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280; two 3000-level courses, one 4000-level course, one 2000-, 3000-, or 4000-level course (excluding PSYC-2230).

(b) two courses from Arts, Languages or Science;

€ one course from any area of study, excluding Social Sciences.

(d) SOSC-2500;

€ five courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: SOSC-2500, PSYC-1150, one of: PSYC-2240 or PSYC-2250; PSYC-2300, PSYC-3200, one of: PSYC-3350, PSYC-3530, PSYC-3580, one 2000-, 3000-, or 4000-level psychology course (excluding PSYC-2230), two courses from Languages or Science, one course from any area of study, including Psychology (excluding PSYC-1160, PSYC-2230).

Fourth Year: two of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280, one additional 4000-level course, two 3000-level psychology courses, one course from any area of study, excluding Social Sciences, four courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Honours Developmental Psychology with Thesis for Ontario College Child and Youth Care (formerly Child and Youth Worker) Program Graduates – Degree Completion Pathway

Students are strongly advised to enrol in this program in the Summer semester so they can complete at least two of the required Year 1 courses before the Fall semester.

Students are strongly advised to consult with a Psychology academic advisor before registering for courses in this program.

Degree Requirements

Total courses: twenty, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care (formerly Child and Youth Worker) diploma with the following stipulation:

In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. (d) SOSC-2500;

(e) five courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequence

Third Year: SOSC-2500, PSYC-1150, one of: PSYC-2240 or PSYC-2250; PSYC-2300, PSYC-3200, one of: PSYC-3350, PSYC-3530, PSYC-3580; PSYC-3310, two courses from Arts, Languages or Science, one course from any area of study, excluding Social Sciences.

Fourth Year: PSYC-3130, PSYC-4960, PSYC-4970, two of: PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, PSYC-4280, five courses from any area of study, including Psychology (excluding: PSYC-1160, PSYC-2230).

Bachelor of Arts in Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program from Fanshawe College, Lambton College or St. Clair College

Students interested in this degree Completion Pathway will apply to Fanshawe College, Lambton College, or St. Clair College for admission into the Autism and Behavioural Sciences Post-Graduate Certificate program after having successfully completed 30 semester courses towards their Honours Bachelor of Arts in Psychology. Admission to the Autism and Behavioural Sciences Post-Graduate Certificate program is at the discretion of the College. Students who have successfully completed the Autism and Behavioural Sciences Post-Graduate Certificate at Fanshawe College, Lambton College, or St. Clair College with a minimum 70% cumulative average are eligible to transfer 10 semester courses from the Post-Graduate Certificate program toward their Honours BA. A minimum course average of 60% is required for transfer credit to be granted. Students who receive the 10 semester transfer credit will be eligible to apply to graduate from their Honours BA in Psychology or Honours BA in Developmental Psychology, provided they meet the standing required for graduation from the program.

Degree Requirements

Total courses: thirty.

- (a) 10 psychology courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200.
- (b) two courses from Arts;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Social Sciences.
- (e) GART-1500, GART-1510;
- (f) SOSC-2500;
- (g) five courses from any area of study, including Psychology;
- (h) six courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Only University of Windsor courses will count towards the calculation of a student's major average. Transfer credits are not assigned a grade.

NOTE: Students who have completed the General BA in Psychology and subsequently decide to complete the Autism and Behavioural Science Post-Graduate Certificate at St. Clair College or Lambton College, may apply to the University for 10 semester transfer credits towards the Honours BA in Psychology as outlined above. Students who receive the 10 semester transfer credit will be eligible to apply to graduate with an Honours BA in Psychology, provided they meet degree requirements listed above and they meet the standing required for graduation from the program.

Bachelor of Arts in Developmental Psychology (Honours) with Autism and Behavioural Sciences (ABS) Post-Graduate Certificate program from Fanshawe College, Lambton College or St. Clair College

Students interested in this degree Completion Pathway will apply to Fanshawe College, Lambton College, or St. Clair College for admission into the Autism and Behavioural Sciences Post-Graduate Certificate program after having successfully completed 30 semester courses towards their Honours Bachelor of Arts in Developmental Psychology. Admission to the Autism and Behavioural Sciences Post-Graduate Certificate program is at the discretion of the College. Students who have successfully completed the Autism and Behavioural Sciences Post-Graduate Certificate at Fanshawe College, Lambton College, or St. Clair College with a minimum 70% cumulative average are eligible to transfer 10 semester courses from the Post-Graduate Certificate program toward their Honours BA. A minimum course average of 60% is required for transfer credit to be granted. Students who receive the 10 semester transfer credit will be eligible to apply to graduate from their Honours BA in Psychology or Honours BA in Developmental Psychology, provided they meet the standing required for graduation from the program.

Degree Requirements:

Total courses: thirty

(a) 10 courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, and at least two 2000-level courses and two 3000-level courses from the following list: PSYC-2230, PSYC-2240, PSYC-2250, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270.

(b) two courses from Arts;

(c) two courses from Languages or Science;

(d) two courses from any area of study, excluding Social Sciences.

(e) GART-1500, GART-1510;

(f) SOSC-2500;

(g) five courses from any area of study, including Psychology;

(h) six courses from any area of study, excluding Psychology.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Only University of Windsor courses will count towards the calculation of a student's major average. Transfer credits are not assigned a grade.

BA Honours in Disability Studies

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Combined Honours BA in Disability Studies

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Combined Honours BA in Disability Studies and Psychology

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Honours Bachelor of Social Work and Disability Studies

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

BA Honours Bachelor of Arts in Disability Studies for Ontario College Child and Youth Care (formerly Child and Youth Worker) - Degree Completion Pathway

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Honours Bachelor of Arts in Disability Studies for College of Applied Arts and Technology Graduates - Degree Completion Pathway

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Bachelor of Commerce (Honours Business Administration and Psychology) (with/without thesis and with/without Specialization)

This is a joint offering between Psychology and the Odette School of Business. See the Odette School of Business for program requirements.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Psychology (Thesis) and Psychology

Major Concentration - Psychology (With Thesis): PSYC-1150; PSYC-1160; PSYC-2300; PSYC-3130; PSYC-3200; PSYC-3310; PSYC-4960; PSYC-4970*; one of PSYC-3350, PSYC-3530, PSYC-3580; three additional Psychology courses. *PSYC-4960 and PSYC-4970 will take the place of ARSC-4990. Entry to the fourth year thesis course, PSYC-4960, requires a cumulative course average of at least 77% and a major course average of at least 80%. An additional course from FAHSS or Science will need to be completed.

Major Concentration - Psychology (Without Thesis): PSYC-1150; PSYC-1160; PSYC-2300; PSYC-3200; one of PSYC-3350, PSYC-3530, PSYC-3580; five additional 2000-, 3000- or 4000-level Psychology courses and two additional 3000- or 4000-level Psychology courses.

Minor Concentration: PSYC-1150; PSYC-1160; two 2000-level courses; one 3000-level course; one 4000-level course.

Recommended Course Sequence for the Minor Concentration

First Year: PSYC-1150, PSYC-1160.

Second Year: two 2000-level psychology courses.

Third Year: one 3000-level psychology course.

Fourth Year: one 4000-level psychology course.

Minor in Child Psychology

Requirements: Six courses in Psychology, including PSYC-1150, PSYC-1160, and four of PSYC-2230, PSYC-2240, PSYC-3220, PSYC-3230, PSYC-3240, PSYC-3270, PSYC-4220, PSYC-4230, PSYC-4240, PSYC-4250, and PSYC-4270.

Minor in Disability Studies

This is a joint offering between Psychology and Social Work. See Social Work for program requirements.

Minor in Psychology

Requirements: Six courses in Psychology, including PSYC-1150, PSYC-1160, and four courses at the 2000 level or above.

PSYCHOLOGY COURSES

Not all courses will be offered each year. All courses are three hours a week unless otherwise indicated.

Priority for registration in 3000- and 4000-level courses may be given to students with General Psychology Majors, Psychology Honours, Developmental Psychology Honours, or Combined Honours.

Note: With the exception of PSYC-1070, PSYC-1150 and PSYC-1160 are prerequisites for all other courses in Psychology. Some courses require additional prerequisites.

PSYC-1070. Positive Psychology

An introduction to theory and research pertaining to the study of positive psychology, the psychology of human strengths and coping resources. Selected topics include: happiness, living a meaningful and gratifying life, resilience, hardiness, emotional intelligence, optimism, hope, creativity and moral motivation.

PSYC-1150. Introduction to Psychology as a Behavioural Science

Introduction to selected areas in psychology including learning, perception, physiological psychology, emotion, and motivation.

PSYC-1160. Introduction to Psychology as a Social Science

Introduction to selected areas in psychology including developmental, social, personality, and clinical.

PSYC-2180. Everyday Conflicts and Their Resolution

Students design and practice techniques for resolving everyday conflicts with friends and co-workers effectively and respectfully, and without damaging interpersonal relationships. Students learn to focus on the problem, not the person; identify and respond to hidden agendas and subvert personal attacks. Pre-requisite: Semester 3 or above standing or permission of the instructor. (Also offered as SJST-2180, WORK-2180)

PSYC-2200. Introduction to Adjustment and Personality

A survey of major approaches to the study of personality with a particular focus on the processes involved in adjustment.

PSYC-2230. Developmental Psychology: The Child

The study of normal child development from conception to puberty, including physical, cognitive, and social development within the child's family, school, and cultural contexts. Specific topics include temperament, language development, intelligence testing, personality development, and parenting styles.

PSYC-2240. Developmental Psychology: Adolescence

The study of normal adolescent development from puberty to early adulthood. Topics include physical changes at puberty, cognitive and social development, and the impact of adolescent development within various contexts, including families, peer groups, and schools.

PSYC-2250. Developmental Psychology: Adulthood and Aging

The study of adult development including stages in adulthood, problems of aging, and issues related to death and dying.

PSYC-2280. Psychological Disorders

This course is a survey of psychopathology, with a focus on the structure and application of the Diagnostic and Statistical Manual (DSM) of Mental Disorders. Content to be covered will include historical and contemporary theory and research regarding the etiology and progression of pathology, including biological, psychological and socio-cultural understandings. Attention will also be given to critiques of classification schemes and diagnosis. Finally, implications for the treatment of specific disorders will be addressed. (Prerequisite: PSYC-1150 and PSYC-1160.)

PSYC-2300. Social Science Research Methods

Introduction to experimental and non-experimental research methods and designs commonly used in psychology and other social sciences (e.g., experiments, quasi-experiments, survey research, observational studies, content analysis). Includes conducting research exercises/projects dealing with social, personality, developmental, and/or educational issues, writing research reports, and consideration of research ethics. (2 lecture, 2 laboratory hours per week; limited enrolment.)

(Antirequisites: KINE-2700.)

PSYC-2360. Introduction to Social Psychology

An introduction to the theories, methods, findings, and problems associated with the study of the individual in the social context. Topics include social cognition; interpersonal behaviour (attraction, aggression, altruism); social attitudes, prejudice, and discrimination; social influence and group processes (conformity, leadership, intergroup relations). (Prerequisites: PSYC-1150 and PSYC-1160.)

PSYC-2400. Psychology of Sex and Gender

Review of philosophical, historical, theoretical, and research literature in the psychology of sex and gender. Topics include male/female stereotypes; similarities/differences based on research data; and current social issues.

PSYC-2560. Introduction to the Brain and Human Behaviour

Reviews basic research relating brain and behaviour with a focus on human functioning. Includes the study of neuronal and synaptic activity and results from current research and case histories which link human behaviour to basic neuroanatomical and biochemical brain systems.

PSYC-3100. Tutorial

Individual projects in specific areas of psychology. (May be repeated once for credit.) (Prerequisites: PSYC-1150, PSYC-1160, and four additional courses in Psychology.)

PSYC-3130. Advanced Statistics

Required for students anticipating honours thesis projects in their fourth year. One-way, two-way, and higher order ANOVA, repeated measures ANOVA, multiple comparisons, correlation and univariate regression, introduction to multivariate regression and the general linear model, with an emphasis on computer data analysis. (Prerequisite: SOSC-2500.) (Credit can only be obtained for one of PSYC-3130 or SACR-3080.) (2 lecture hours, 1 laboratory hour a week.)

PSYC-3200. Tests and Measurement

An introduction to basic concepts of psychological testing, with a focus on test development, measurement, and test evaluation. Standard tests used to assess personality, achievement, and aptitudes will be surveyed. (Prerequisite: SOSC-2500.)

PSYC-3220. Child Psychopathology

An overview of theory and research related to the assessment, diagnosis, and treatment of childhood and adolescent disorders. Risk factors, vulnerability to stress, and protective factors will be addressed in relation to adjustment disorders, conduct disorder, depression, and anxiety in children and adolescents. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-3230. Developmental Disabilities

An overview of theory and research related to the biological foundation of childhood and adolescent developmental disabilities. Mental retardation, sensory and motor impairments, learning disabilities, and

disorders with physical manifestations are included in the topics covered. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-3240. Educational Psychology

Psychology of the learning process and the variables that affect learning such as intelligence, motivation, attitudes, interpersonal relations, and cultural background. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-3270. Psychological Perspectives on Parenting

Contemporary theories and practices of parenting throughout the life cycle, with an emphasis on the psychological aspects of the family system. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-3300. Personality Theory and Research

Survey of personality theories and relevant research. Theories may include psychoanalytic, trait, behavioural, humanistic, cognitive, and biological. Some research topics relevant to personality theory will be outlined and illustrated with reference to selected content areas of personality.

PSYC-3310. Conducting Research in Psychology

Required for students anticipating honours thesis projects in their fourth year. Topics include: how to generate research ideas, philosophy and place of research in psychology, utilizing research advisors and supervision, using library resources, writing research reports, ethical issues in student research, planning effective research designs, dealing with participant recruitment and data collection, locating research measures, making data analysis decisions, using statistical packages such as SPSS, disseminating research ideas and findings. (Prerequisites: Prerequisite: 70% or greater in both PSYC-2300 and PSYC-3200; and consent of instructor or the Undergraduate Program Chair.)

PSYC-3330. Introduction to Clinical Psychology

This course surveys topics and issues in the field of clinical psychology, including biopsychosocial theories of functioning and dysfunction. Emphasis is placed on major approaches to assessment and treatment (e.g., humanistic, cognitive-behavioral, psychodynamic). The course also will cover the scientific basis for clinical psychology, as well as historical, ethical, professional, cultural and legal issues. Sub-specialties and contemporary issues are also addressed. (Prerequisite: PSYC-2280 or PSYC-3220)

PSYC-3340. Applied Social Psychology

The application of social psychology to solving social issues. Topics include improving job satisfaction and organizational life, promoting community health, meeting social welfare needs, dealing with environmental problems, improving educational systems, and addressing the issues of social justice and equality. The course may involve a fieldwork component. (Prerequisite: PSYC-2360.)

PSYC-3350. Human Sensation and Perception

The study of underlying mechanisms and processes of human sensation and perception, methods of measuring human sensory abilities, and the perceptual processes for integrating and interpreting such information. (Prerequisite: PSYC-2300) (2 lecture, 2 laboratory hours per week.)

PSYC-3370. Human Cognitive Neuroscience

Issues relevant to the brain and human behaviour. Recent research selected from areas of developmental, cognitive, and clinical neuropsychology. Introduction to cognitive neuroscience modelling. (Prerequisites: PSYC-1150, PSYC-1160, either PSYC-2560 or BIOL-2040 and three additional courses in Psychology.)

PSYC-3390. Health Psychology

Application of psychology to the areas of health promotion, prevention and treatment, and improvement of health-care delivery. Theory, research, and practice in health psychology and behavioural medicine will be examined. Specific areas of emphasis may include stress, illness, and coping; patient-practitioner interaction; adjustment to chronic illness; reproductive health issues; and cross-cultural conceptions of illness and healing. (Prerequisite: PSYC-2360 or Nursing students with at least semester 2 standing or consent of instructor.)

PSYC-3420. Culture and Psychology

This course examines psychological theory and research on the commonalities and variations in human behaviour within and across cultures. Topics may include individualism and collectivism, perspectives on the self, communication and interpersonal relations, intergroup relations, organizational behaviour, and the consequences of cross-cultural contact. (Prerequisite: PSYC-2360.)

PSYC-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at bystanderinitiative.ca) (Also offered as KINE-3501, SACR-3500, SJST-3500, SOSC-3500, SWRK-3500, and WGST-3500.)

PSYC-3530. Learning and Behaviour

Basic principles and theories of classical and operant conditioning and their application to human behaviour. (Prerequisite: PSYC-2300.) (2 lecture, 2 laboratory hours per week.)

PSYC-3550. Comparative Psychology

Introduction to animal behaviour from the viewpoint of its role in the natural life of the individual and the species. A synthesis of contributions by comparative psychologists, ethologists, ecologists, and zoologists. (Prerequisites: PSYC-1150, PSYC-1160, and four additional courses in Psychology.)

PSYC-3580. Cognitive Processes

A review of current contributions to the understanding of attentional, memory, problem solving, and reasoning processes. (Prerequisite: PSYC-2300) (3 lecture, 1 laboratory hours per week.)

PSYC-3700. Industrial-Organizational Psychology

The study of employees, workplaces, and organizations. Topics include job analysis and competency models, recruitment, selection, and decision making, performance management, training, group and team processes in organizations, employee attitudes, affect, and behaviour, motivation, leadership, productive and counterproductive work behaviour. (Prerequisites: PSYC-1150 and PSYC-1160; or Labour Studies students with at least Semester 4 standing; or consent of instructor.) (Also offered as WORK-3700.)

PSYC-4000. Selected Topics in Psychology

Seminar on a selected topic in psychology. Content will vary with instructor. (Prerequisites: PSYC-1150, PSYC-1160, four additional courses in Psychology, including courses as specified by the instructor.) (May be repeated for credit if content changes.)

PSYC-4150. History and Systems of Psychology

The emergence and development of psychology as a science. A review and evaluation of major systems of psychology, such as structuralism, functionalism, behaviourism, Gestalt psychology, and psychoanalysis. Emphasis will be placed on the contributions of the systems to contemporary theoretical conceptions and trends. (Prerequisites: PSYC-1150, PSYC-1160, and four additional courses in Psychology.)

S

PSYC-4220. Advanced Developmental Psychology: Emotional Development

This seminar examines issues related to emotional development from infancy through adult years. The experience, expression, and regulation of emotion will be discussed from various historical and academic perspectives. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-4230. Advanced Developmental Psychology: Cognitive Development

An examination of current theories, research methods, and findings in the area of cognitive development. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-4240. Advanced Developmental Psychology: Social Development

This seminar examines established and newly-emerging theories of development and their impact on social development research. Emphasis is placed on describing social developmental outcomes (e.g., gender, emotion, morality), and the influence of biological factors (e.g., temperament) and socialization agents (e.g., parents, media) on such outcomes. (Prerequisite: PSYC-2230 or PSYC-2240.)

PSYC-4250. Seminar in Developmental Psychology

Focus on a particular topic within the area of developmental psychology. Topics will vary from term to term. (May be repeated for credit.) (Prerequisites: PSYC-1150, PSYC-1160, PSYC-2230 and three additional courses in Psychology.)

PSYC-4270. Methods of Behavioural Change

Survey of theories and methods of behavioural change, including behavioural assessment and analysis, relaxation training, graduated exposure, contingency management, and cognitive restructuring. (Prerequisite: PSYC-3350 or PSYC-3530 or PSYC-3580.)

PSYC-4280. Practicum in Developmental Psychology

Supervised practicum in learning-based behaviour change strategies. Students will practice behavioural assessment and systematic remediation of clinical problems through application of operant techniques in community placements. (A 6.00 credit hour course.) (Restricted to 4th year Developmental Psychology majors with cumulative and major averages of at least 70%.) (Prerequisites: PSYC-4270, an application and interview, and consent of instructor.) (Antirequisite: PSYC-4290.) (1.5 lecture hours and 8 practicum hours per week.) (This is an experiential learning course.)

PSYC-4290. Practicum in Psychology

Supervised practicum in a university or community setting. Students will consolidate and enhance their knowledge about psychology and skills in connection with a specific project, activity, or task. The practicum experience may include the opportunity to be involved in some aspect of community change, peer counselling, or research, among other possibilities. (A 6.00 credit hour course.) (Prerequisites: application and interview, consent of instructor; restricted to 4th year Psychology majors with cumulative and major averages of at least 70%.) (Antirequisite: PSYC-4280.) (3 lecture hours and 8 practicum hours per week.) (This is an experiential learning course.)

PSYC-4300. Clinical and Counselling Psychology

The principles and techniques underlying clinical interviewing and modern psychotherapeutic methods. Emphasis will be placed upon the application of clinical interviewing and modern psychotherapeutic methods, as well as the application of clinical methods in clinics, hospitals, schools, mental health settings, and community agencies. (Prerequisites: PSYC-3330.)

PSYC-4320. Community Psychology

An examination of societal and environmental influences on the community and individual community members, the development of the community mental health movement, and current issues in theory, research, and practices in community psychology. Emphasis will be placed on prevention, crisis intervention, and effecting social change. An overview of community-based professional and volunteer services will be presented. Community responses to issues such as homelessness, suicide, and violence against women will be considered. (Prerequisite: PSYC-2360.) (This is an experiential learning course.)

PSYC-4330. Seminar in Law and Psychology

Issues in the interaction between law and psychology; discussion of the use/misuse/nonuse of behavioural sciences in the law; emphasis on how psychology can best be applied to family, criminal, and civil law. (Prerequisites: PSYC-1150, PSYC-1160, and four additional courses in Psychology.)

PSYC-4360. Seminar in Psychopathology

Focus on a particular topic within the area of abnormal behaviours. Topics will vary from term to term. (Prerequisites: PSYC-3330 and PSYC-2280)

PSYC-4400. Seminar in the Psychology of Women

An examination of the feminist critique of mainstream psychology research of the last century, of feminist approaches to research and theorizing, and applications of feminist psychology to the study of a number of topics in the psychology of women (e.g., mental health, violence against women, sexuality). (Prerequisite: PSYC-2400 or consent of instructor.)

PSYC-4410. Special Topics in Health Psychology

This specialized course is designed for students who wish to pursue their interests in health psychology in greater depth. The course will focus on a particular topic within the area of health psychology, and topics will vary from term to term, depending on the emphasis of the instructor. Possible special topics could include Women's Health, Personality and Health, and the Social Psychology of Health. (Prerequisite: PSYC-3390.) (May be repeated for credit if content changes.)

PSYC-4450. Stereotyping, Prejudice, and Discrimination

Psychological theory and research on stereotyping, prejudice, and discrimination; their formation and function; the role of individual and sociocultural factors in their development and maintenance; individual responses and psychological interventions. (Prerequisite: PSYC-2360.)

PSYC-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual assault and bystander intervention. Students co-facilitate the Bringing in the Bystander® In Person Prevention program for one or more small groups of students on campus. The practicum experience equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% or higher in KINE-3501/SOSC-3500/PSYC-3500/SJST-3500/SWRK-3500/SACR-3500/WGST-3500 and permission of the instructor by online application at bystanderinitiative.ca.) (Also offered as SACR-4500, SJST-4500, SOSC-4500, SWRK-4500, and WGST-4500.) (This is an experiential learning course.)

PSYC-4570. Comparative Cognition

Evidence of general and specialized cognitive processes in human and non-human organisms will be investigated. Topics to be covered include perception, attention, and memory, concept formation, ecological and evolutionary bases of cognitive processes. Current research on these and other topics will be reviewed and discussed in a seminar format. (Prerequisite: Any two of the following undergraduate courses or their equivalents from other universities: PSYC-3530, PSYC-3580 or PSYC-3350.) (Also offered as BIOL-8470; Cross-listed with PSYC-8570.)

PSYC-4750. Popular Literature in Psychology

This course will help students integrate some of the most popular and famous works of classical and contemporary literature with psychological theory and concepts. Students will recognize and critically analyze psychological themes as they appear in literary works. The course will focus on evaluation of literary themes, author biographies, and the major schools of psychological thought. Using short works of fiction and drama, students will study the authors and readings within the cultural and historical context of the field of psychology. (Prerequisites: PSYC-1150, PSYC-1160, and four additional courses in Psychology.)

PSYC-4960. Thesis: Seminar

Experience in conducting psychological research is viewed as necessary for graduate work in psychology. This course is designed to provide such experience through planning, developing, and writing a research proposal under individual faculty supervision. Group sessions on research ethics, procedures, writing, and data analysis. (Prerequisites: PSYC-2300; PSYC-3130 or equivalent; PSYC-3310; PSYC-3200; a cumulative average of at least 77%; a Psychology major average of at least 80%; and consent of instructor or Undergraduate Program Chair.) (Prerequisites for B.Sc. Honours Behaviour, Cognition and Neuroscience students: PSYC-2300; PSYC-3130 or equivalent; PSYC-3350, PSYC-3530, and PSYC-3580; an average of 80% or higher in Psychology courses; and consent of instructor or Undergraduate Program Chair.) Students must meet all requirements to be eligible for admission to the course.

PSYC-4970. Thesis: Research

Students will conduct and write an undergraduate thesis under individual faculty supervision. (The thesis is developed and begun while taking PSYC-4960). (Prerequisite: PSYC-4960.) (This is an experiential learning course.)

SOCIAL WORK

PROGRAMS

Honours Bachelor of Social Work

Degree Requirements

Total courses: 40

- (a) SWRK-1170, SWRK-1180, SWRK-2040, SWRK-2100, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), SWRK-4750 (12 credit hours).
- (b) GART-1500, GART-1510;
- (c) SOSC-2500;
- (d) Two courses from Science;
- (e) A minimum of six courses from one of the disciplines or programs of study listed below:
Communication Studies, Media, and Film, Labour Studies, Psychology, Sociology, Anthropology, History, Women's and Gender Studies, Political Science, Family and Social Relations, Diaspora Studies, and Disability Studies.
- (f) 9 courses from any area of study including Social Work courses.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Program Sequencing

Year 1: GART-1500, GART-1510, SWRK-1170, SWRK-1180, two science courses, two introductory courses from a social science discipline and two introductory courses from any area of study.

Year 2: SOSC-2500, SWRK-2040, SWRK-2100, and four courses at the 2000-4000 level from a social science discipline, plus three courses from any area of study.

Year 3: SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, plus four courses from any area of study including Social Work.

Year 4: SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730, SWRK-4750.

Phasing out of previous curriculum: Program advisors will determine appropriate exceptions for students who are completing their program under the previous curriculum and who fall out of sequence.

Honours Bachelor of Social Work and Disability Studies

This is a joint offering between Social Work and Psychology.

Degree Requirements

Total courses: 40

- (a) Social Work: SWRK-1170, SWRK-1180, SWRK-2040, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, SWRK-4230, SWRK-4300, SWRK-4730 (9.0 credit hours), SWRK-4310, SWRK-4750 (12 credit hours).
* Every effort will be made to ensure that Field Education I and II will allow the Combined Social Work and Disability Studies student to utilize their knowledge from both areas of study in the experiential learning process.
- (b) Disability Studies:
- (i) four discipline foundation courses: PSYC-1150, PSYC-1160, DISB/SJST-1000, SWRK-2100;
 - (ii) three Disability Studies or Disability Studies-Emphasis courses;
 - (iii) three human development courses: PSYC-2230, PSYC-2240, PSYC-2250
 - (iv) three Disability Studies courses: DISB-2010, DISB-3020, DISB-4010.
- (c) GART-1500, GART-1510;
- (d) two Science courses;
- (e) SOSC-2500;
- (f) three courses from any area of study, excluding social work and disability studies.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequencing:

Year 1: GART-1500, GART-1510, SWRK-1170, SWRK-1180, PSYC-1150, PSYC-1160, DISB/SJST-1000, one science course and two courses from any area of study.

Year 2: SWRK-2100, SWRK-2040, SOSC-2500, PSYC-2230, PSYC-2240, one science course, 3 Disability Studies Emphasis courses and one course from any area of study.

Year 3: SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, PSYC-2250, DISB-2010, DISB-3020, DISB-4010.

Year 4: SWRK-4230, SWRK-4300, SWRK-4730 (9.0 credit hours), SWRK-4310, SWRK-4750 (12 credit hours).

Honours Bachelor of Social Work and Women's Studies

This is a joint offering between Social Work and Women's and Gender Studies.

Degree Requirements

Total courses: 40

- (a) Social Work: SWRK-1170, SWRK-1180, SWRK-2040, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), and SWRK-4750 (12 credit hours).
- (b) Women' and Gender Studies:
- (i) WGST-1000, WGST-2500, WGST-3050 or WGST/PHIL-3590, WGST-3060;
 - (ii) five of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500;
 - (iii) SWRK/WGST-3550; one of SWRK/WGST-3470 WGST-3300 OR WGST-3850*;
 - (iv) three additional Women's and Gender Studies courses.
- (c) GART-1500, GART-1510;
- (d) SOSC-2500;
- (e) One science course;

- (f) Three courses from any area of study, excluding Social Work and Women's and Gender Studies. (It is recommended that these courses be from related disciplines)

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study..

*WGST-3850 may count as equivalent only when offered as a Walls to Bridges course under section code "75".

Program Sequencing

Year 1: (Ten courses) GART-1500, GART-1510, SWRK-1170, SWRK-1180, WGST-1000, WGST-2100 (or SACR-2100), WGST-XXXX (one Women's and Gender Studies course), one science course,; and two courses from any area of study, excluding Social Work and Women's and Gender Studies.

Year 2: (Ten Courses) SOSC-2500, SWRK-2040, WGST-2500; four of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST/WORK-2600, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500; two Women's and Gender Studies courses, and one course from any area of study, excluding Social Work and Women's and Gender Studies.

Year 3: (Ten courses) SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, WGST-3590 (or PHIL-3590 or WGST-3050), WGST-3060, SWRK/WGST-3550; and one of SWRK/WGST-3470 or WGST-3300 or WGST-3850*;

Year 4: SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), SWRK-4750 (12 credit hours).

Honours Bachelor of Social Work for University Graduates

Degree Requirements

Total courses: 20

(a) SWRK-2040, SWRK-2100, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), SWRK-4750 (12 credit hours).

(b) SOSC-2500 or equivalent;

(c) One course from any area of study

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Students who have previously taken SOSC-2500 or equivalent may substitute a social science course at the 2000-4000 or a 3000-4000 level social work course.

Phasing out of previous curriculum: Program advisors will determine appropriate exceptions for students who are completing their program under the previous curriculum and who fall out of sequence.

Program Sequencing

Year 1: SOSC-2500, SWRK-2040, SWRK-2100, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, one course from any area of study.

Year 2: SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9.0 credit hours), SWRK-4750 (12 credit hours).

Honours Bachelor of Social Work for Ontario Child and Youth Care Program Graduates

Students are strongly advised to consult with a Social Work academic advisor before registering for courses in this program.

Degree Requirements

Total courses: 20, plus a minimum of an Ontario College of Applied Arts and Technology Child and Youth Care diploma with the following stipulation: In cases where a student previously completed a university course or courses, the course(s) will not be used to fulfill the 20 course degree requirements if they were used by the College of Applied Arts and Technology to grant advanced standing in the diploma or certificate program. In such cases, the Social Work Undergraduate Program Coordinator (or designate) will identify a substitute course requirement.

- (a) SWRK-2040, SWRK-2100, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), SWRK-4750 (12 credit hours).
- (b) SOSC-2500 or equivalent;
- (c) One course from any area of study

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Students who have previously taken SOSC-2500 or equivalent may substitute a social science course at the 2000-4000 level or a 3000-4000 level social work course.

Phasing out of previous curriculum: Program advisors will determine appropriate exceptions for students who are completing their program under the previous curriculum and who fall out of sequence.

Program Sequencing

Year 1: SOSC-2500, SWRK-2040, SWRK-2100, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440, SWRK-3710, one course from any area of study.

Year 2: SWRK-4230, SWRK-4300, SWRK-4310, SWRK-4730 (9 credit hours), SWRK-4750 (12 credit hours).

Minor in Diaspora Studies

Requirements: Six courses: INCS-2360*, POLS-1709 and four of the following: ENGL-2210, ENGL-3210, ENGL-2220, ENGL-3220, PHIL-2550, CMAF-2450, HIST-3610, HIST-3620, PSYC-2360, PSYC-3420, PSYC-4450, SWRK-2100, SACR-2400, SACR-3330.

**This course is no longer offered.*

DIASPORA COURSES

DIAS-1700. Introduction to Diaspora Studies: There's No Place Like Home

This course introduces students to diasporas-scattered populations living in exile from their ancestral homelands. The course focuses on the significance of migration, exile, belonging, and nostalgia (for ancestral homelands) for diasporas throughout the world. Students submit projects (incorporating oral

histories, for example) on the diaspora of their choice. (Also offered as Political Science POLS-1709 and Languages, Literatures and Cultures JWST-1700)

SOCIAL WORK COURSES

Social Work courses SWRK-1170, SWRK-1180, SWRK-2040 and SWRK-2100 are open to all students in the University. Acceptance to the professional years (Years 3 and 4) of the B.S.W. program is required for registration in all other required 3000 and 4000 level courses. All Social Work elective courses in the professional program at the 3000 and 4000 level are restricted to senior level (i.e., beyond term 4) students in Social Work or cognate disciplines or require the permission of the instructor. Social Work majors will be given priority when registering for these courses.

All courses are three hours a week unless otherwise indicated.

****Note:** The term “Social Work major” includes combined majors in Social Work and another program.

Social Work electives can be taken interchangeably by Year 3 and Year 4 students, except where prerequisites have been identified.

Not all courses listed will necessarily be offered each year.

SWRK-1170. Meeting Human Needs through Social Welfare

This course examines the historical, philosophical and political aspects of the development and delivery of the Canadian Social Welfare System. Special attention will be focussed on ways to identify and assess the needs of, and services to, vulnerable populations within the context of social and cultural diversity.

SWRK-1180. Meeting Human Needs through Social Work

This course examines the ways in which social workers in generalist practice intervene to meet the needs of clients within the Canadian social welfare system. Attention will be paid to the development of an understanding of generalist social work practice within an ecological and systems perspective. This course provides an introduction to social work processes. Attention will be given to the needs of vulnerable and marginalized populations within traditional and alternative social work perspectives such as ecological, systems, strengths, feminist, and anti-oppressive practice. Students will gain an understanding of personal, professional, agency, and societal needs and values and how they influence social work practice. Students will be introduced to the generalist social work practice perspective within a problem-solving process that includes focused assessment, intervention, termination, and evaluation of practice. Ethical and professional issues such as confidentiality and accountability will be introduced.

SWRK-2000. Statistics for Social Workers

This online course is an introduction to statistics. Topics include measurement of variables, testing hypotheses, descriptive statistics, normal distribution, sampling, significance levels, and indicating appropriate quantitative analytical methods. Emphasis is given to how statistics can aid the social work practitioner. This course can also meet the statistics requirement for admission to the master’s program. (Semester 3 standing)

SWRK-2040. Issues and Perspectives in Social Welfare

Examines various ideologies that underpin the social welfare system and their impact on citizens, clients, communities, organizations, and society as a whole. The impact of these diverse perspectives on the different roles of social workers are examined with particular emphasis on value conflicts and how these conflicts shape and affect policies and programs. Further, the role and development of professional

ethics relative to social service delivery through social welfare systems are explored. (Prerequisites: SWRK-1170 and SWRK-1180 or permission of instructor.)

SWRK-2100. Social Work and Diversity

This course examines oppression and anti-oppressive social work practice from a broad ecological framework as they relate to social inequality and life circumstances. Various forms of oppression such as racism, ableism, antisemitism, heterosexism, and sexism are analyzed at the individual, cultural, and institutional level while applying the professional values and ethics of social work practice. The experiences, needs, and responses of populations that have been historically excluded, marginalized, and disadvantaged are examined. Students develop analytical and self-reflective skills as they relate to social work practice which fosters inclusion, participation, advocacy, and social justice. (Prerequisites: SWRK-1170 and SWRK-1180 or permission of instructor.)

SWRK-3120. Selected Topics in Social Work

Selected topics according to faculty and student interests may be offered. Topics may include issues related to social work practice, social welfare, or fields of practice. (May be repeated for credit if the course content differs.) (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3340. Social Work with Children

This course is designed to provide students with knowledge and understanding of social work practice with children. The focus is upon the development of a framework of knowledge for making practice decisions involving the child client. The design, implementation, and evaluation of alternative social work intervention strategies are included. The special set of techniques utilized in social work practice with children will be highlighted. (Open only to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3360. Theory and Practice of Social Work with Individuals

This course examines the knowledge base, principles and techniques of social work generalist practice and the use of social work values in the context of offering help focusing on individuals (micro-level). Included are the use of interpersonal relationships as a medium for helping and the use of theories of human interaction within various systems as a base for problem assessment. Emphasis will be on practice with individuals in their social context. (Must be taken prior to field education courses) (This is an experiential learning course).

SWRK-3370. Theory and Practice of Social Work with Small Groups

This course builds upon the generalist practice model of social work presented in SWRK-3360. It extends generalist social work concepts to small groups as client systems. Focus will be on analysis and application of generalist knowledge, values and skills for assessment and intervention with small groups. (Must be taken prior to field education courses) (Must be taken concurrently with SWRK-3360). (This is an experiential learning course).

SWRK-3380. Theory and Practice of Social Work with Families

This course builds upon the generalist model of social work practice. It extends generalist social work concepts to families as multi-client systems. Focus will be on analysis and application of generalist knowledge, values and skills for assessment and intervention with families. (Prerequisites SWRK-3360 and SWRK-3370) (Must be taken prior to or concurrently with SWRK-3710.) (This is an experiential learning course).

SWRK-3390. Theory and Practice of Social Work with Communities and Organizations

This course applies the generalist social work practice model at the macro level. It focuses on planning, implementing, and evaluating interventions with communities and human service organizations. Special emphasis will be placed on addressing the needs and issues of diverse, at-risk, and oppressed populations. (Prerequisite: SWRK-3360 and SWRK-3370.) (Must be taken prior to or concurrently with SWRK-3710.) (This is an experiential learning course).

SWRK-3440. Research I: Foundations of Social Work Research

This course will prepare students to critically analyze generalist social work practice research. Foundation principles of rational and empirical inquiry will be examined across the continuum of qualitative and quantitative research designs that can be appropriately used in various practice contexts. It aims to enable the practical interpretation of research used integratively in practice with diverse clients, particularly those at risk of being marginalized or oppressed. (Prerequisite: 3rd or 4th year Social Work Major or Combined Major in Social Work, or permission of instructor.)

SWRK-3470. Social Work and Violence

Examines aspects of violence in society, particularly against marginalized groups. The primary focus is on generalist social work intervention related to violence. (Open to senior students. Required course for Social Work/Women's and Gender Studies students; elective for BSW students. Pre-requisite: One Women's and Gender Studies (WGST-) course or permission of the instructor. (Also offered as WGST-3470.)

SWRK-3480. Professional Issues in Social Work

This course examines topics of current relevance for the profession of social work. Professional issues such as social control, suitability, ethical dilemmas, work-place issues of power, oppression and marginalization will be considered. The Social Work Code of Ethics will be used as the "lens" to explore case examples of situations that present professionals with ethical dilemmas, that challenge personal and professional values and require a sound grounding in professional ethical decision-making in the face of grave circumstances. Empowerment practice will serve as an integrative framework for the consideration of professional issues. (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at [bystander initiative.ca](http://bystanderinitiative.ca)) (Also offered as KINE-3501, PSYC-3500, SACR-3500, SJST-3500, SOSC-3500, and WGST-3500.)

SWRK-3550. Feminist Social Work Practice

This course prepares students to apply the principles, processes, and techniques of feminist social work practice. Required course for Social Work/Women's and Gender Studies students; elective for BSW students (Prerequisites: One Women's and Gender Studies (WGST-) course or permission of the instructor.) (Also offered as WGST-3550)

SWRK-3560. Serving Older People

The role of the social worker in such areas as institutionalization, community care and social support, separation and loss, family structures, and retirement, with emphasis on social policy as a determinant of

services and practice. (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3570. Child Welfare

Examines issues in the present structure and functioning of services for children. The rights of children and their need for services will be examined in relation to existing services, such as protection, adoption, foster care, health services, and compulsory education, with special attention to extra-family parenting responsibilities. (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3580. Social Work and Mental Health

This course focuses on social work practice in the field of mental health. It will integrate policy, practice and research to mental health issues across the life-span. The course will examine social work practice assessment and intervention techniques. Both chronic and acute mental health issues will be examined. Community-based care and institutional care perspectives will be presented. (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3600. Social Work and Substance Misuse.

Provides social work students with practice knowledge concerning the etiology, implications, and treatment issues related to addictions and substance abuse. Topics will include the history and consequences of addictions and substance abuse, addictions and the family, special at-risk groups, social policy and legal issues, medical and social-psychological aspects, and current research issues as well as the implications for intervention. (Open to senior students. Social Work Majors and Combined Majors in Social Work will be given registration priority.)

SWRK-3710. Field Education Preparation

The Field Education Preparation course (SWRK-3710) examines student progress in the social work program with the purpose of evaluating student readiness for a field practicum. Students will demonstrate the foundation level social work knowledge, skills, and values required to meet field education expectations and to ensure success in the field. The course integrates classroom and field learning through co-instructed learning sessions that include skill development facilitated by Field Learning Specialists with extensive practice experience, community resources training from community agencies and practicing professionals, exposure to service users, and assignments that require interaction with agencies and the community. This course will facilitate student development and growth on personal, professional, and civic levels. In addition, the course will ensure a smooth transition from the classroom setting into the field setting by demonstrating how connecting theory and practice results in successful individual, family, group, and community intervention. Finally, the course facilitates the development of professional, reflective, self-evaluating, and competent social workers. (Pre-requisites SWRK-3360 and SWRK-3370. Corequisites SWRK-3380 and SWRK-3390).(Contact Hours: 3.0) (This is an experiential learning course).

SWRK-4230. Social Policy and Social Welfare

This course introduces the student to the formulation and analysis of social policy. The student uses knowledge of social services as a basis for assessing and recommending changes in existing programs or services, and for introducing new services. Special attention is given to identifying policy gaps in services and unmet needs of vulnerable populations within the general practice framework. (Prerequisite: 4th year Social Work Major or Combined Major in Social Work, or permission of instructor.)

SWRK-4300. Integration Seminar I

The Integration Seminar I course is taken concurrently with the Field Education I course (SWRK-4730). This seminar course builds on the knowledge, skills, and values developed in the theory and practice courses SWRK-3360, 3370, 3380 & 3390, along with problem solving models covered in SWRK-3440 and SWRK-3710. The focus of learning for this course will be the application of concepts from theories and practice models to the process of assessment and intervention planning. The seminar enables students to integrate academic learning and field work experience to test and advance social work knowledge, values, and skills in preparation for professional social work practice. The course will provide students with opportunities to share their field placement experiences with the instructor and peers. This course will include classroom instruction, simulations, self-reflection, discussions, group sharing and problem solving, and presentations to facilitate the development of professional, reflective, self-evaluating, and competent social workers. (Prerequisites: SWRK-3710, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440) (Co-requisite: SWRK-4730) (This is an experiential learning course).

SWRK-4310. Integration Seminar II

The Integration Seminar II course is taken concurrently with the Field Education II course (SWRK-4750). This seminar course builds on the knowledge, skills, and values developed in Field Education I (SWRK-4730) and Integration Seminar I (SWRK-4300). The seminar enables students to integrate academic learning and field work experience to test and advance social work knowledge, values, and skills in preparation for professional social work practice. The course will provide students with opportunities to share their field placement experiences with the instructor and peers. Students will participate in a variety of activities, including self-reflection, discussions, group sharing and problem solving and presentations to facilitate the development of professional, reflective, self-evaluating, and competent social workers. Students will be expected to engage in critical reflection to integrate knowledge and skills from generalist practice into their own developing practice framework. (Pre-requisite: SWRK-4300, SWRK-4730) (Co-requisite: SWRK-4750). (This is an experiential learning course).

SWRK-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual assault and bystander intervention. Students co-facilitate the Bringing in the Bystander® In Person Prevention program for one or more small groups of students on campus. The practicum experience equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% or higher in KINE-3501/SOSC-3500/PSYC-3500/SJST-3500/SACR-3500/SWRK-3500/WGST-3500 and permission of the instructor by online application at bystanderinitiative.ca.) (Also offered as PSYC-4500, SACR-4500, SJST-4500, SOSC-4500, and WGST-4500.) (This is an experiential learning course.)

SWRK-4730. Field Education I

The Field Education I course examines student progress in the field practice component of the Bachelor of Social Work program with the purpose of evaluating student readiness for Field Education II. Students will demonstrate the foundation level social work knowledge, skills, and values required to meet field practice expectations and ensure success in Field Education II (SWRK-4750). This course integrates classroom and experiential learning through placement in a community organization. Under the supervision of professional social workers, students are expected to apply beginning level knowledge, skills, values and ethics to generalist social work practice in “real-life” situations. The objectives and competencies outlined in the Field Education I Learning Agreement are minimum expectations for all students. The course fosters professional development wherein personal and professional skills are promoted in the interest of competent professional practice. Students will develop competence as an entry level professional in generalist social work practice within the four contexts of practice: organization, community, social work skills and professional context. Supported by Field Learning Specialists with extensive practice experience and professional social workers, students will develop substantive understanding of social work knowledge, values and skills and demonstrate an

understanding of and commitment to the principles which underlie professional social work practice. This course operates as a practicum three days a week in the Fall semester. (Prerequisites: SWRK-3710, SWRK-3360, SWRK-3370, SWRK-3380, SWRK-3390, SWRK-3440) (Co-requisite: SWRK-4230, SWRK-4300). (Credit weight 9) (This is an experiential learning course.)

SWRK-4750. Field Education II

The Field Education II course (SWRK-4750) examines student progress in the field practice component of the Bachelor of Social Work program with the purpose of evaluating student readiness for professional social work practice. This course takes place in the approved field education agency in which the student successfully completed Field Education I (SWRK-4730). Under the continuing supervision of professional social workers, students are expected to develop competencies that go beyond the generic base acquired during Field Education I (SWRK-4730). Students are expected to build upon the knowledge, values and skills acquired in Field Education I to move along the continuum from beginning level social work knowledge to an increasingly complex level of skill development in generalist social work practice. The objectives and competencies outlined in the Field Education II Learning Agreement are minimum expectations for all students. Students will apply professional skills and techniques as well as analytical competence to work with direct and indirect systems in an agency/community setting to develop an understanding of the relationships between human behaviour and societal processes. Students will demonstrate self-awareness and self-discipline sufficient to enable students to apply their knowledge, values, and skills when working with client systems. Supported by Field Learning Specialists, this course will result in the development of critical thinking skills and an inquiring interest in professional issues and knowledge, along with a commitment to the ethical principles of Social Work and the development of a professional identity. This course operates as a practicum four days a week in the Winter semester. (Prerequisites: SWRK-4730, SWRK-4300) (Co-requisite SWRK-4310) (Credit weight 12) (This is an experiential learning course.)

SCHOOL OF CREATIVE ARTS

MUSIC PROGRAM REGULATIONS

Advanced Standing Examinations: Upon admission to a Music program a student may petition to write advanced standing examinations in MUSC-1120, MUSC-1130, MUSC-2120, MUSC-2220, MUSC-2230, MUSC-3220, MUSC-3230, and MUSP-1110.

Program Approval: BMus students and Concurrent Bachelor of Music/Education students must have their programs approved by an advisor prior to registration. All applications for graduation will be subject to approval and such approval will be granted only when the academic program completed is identical with that previously approved by the academic advisor in consultation with the student.

Keyboard Proficiency Requirement: Keyboard skill is a valuable tool for learning in all aspects of music, and is an asset for careers in music. Students in the BMus program are required to demonstrate this skill by meeting a keyboard proficiency requirement within core music courses (Basic and Advanced Skills). The requirement includes playing scales, chords, arpeggios; sight reading and keyboard harmony practices.

Concert/Recital Viewing Policy: Attendance at a significant number of live musical performances will enrich students' musical experience and contribute to applied musical and academic success. Therefore, a Concert/Recital Viewing Requirement is included in applied lessons syllabi. This policy applies to all full-time students in BMus programs during each year of registration.

AREAS OF STUDY

Requirements for programs in Music make reference to the following groups of courses:

Areas of Study-Academic

History and Literature (Musicology): MUSC-1260, MUSC-1270, MUSC-2270, MUSC-2470, MUSC-3170, MUSC-3260, MUSC-3270, MUSC-3460, MUSC-4260, MUSC-4360, MUSC-4370, MUSC-4470, MUSC-4940.
Theory and Composition: MUSC-1020, MUSC-1120, MUSC-1130, MUSC-2120, MUSC-2220, MUSC-2230, MUSC-2630, MUSC-3220, MUSC-3230, MUSC-3630, MUSC-4120, MUSC-4320, MUSC-4360, MUSC-4370, MUSC 4470.

Methods and Pedagogy (Music Education): MUSC-2390, MUSC-2480, MUSC-2490, MUSC-2550, MUSC-2690, MUSC-2790, MUSC-2850, MUSC-4580, MUSC-4840, MUSC-4850.

Areas of Study-Performance

Performance Studies: MUSP-1110.

Ensembles: MUSP-2100, MUSP-2200, MUSP-2400, MUSP-2700, MUSP-3100.

Performance Instruction - For Bachelor of Music programs (Comprehensive, Music Education, or 5 Year Concurrent Bachelor of Music/Music Education).

The following courses offer performance instruction as a 3.00 credit hour course (1-hour lesson a week). Course requirements include a fifteen-minute examination before a faculty jury at the end of each term

of study, as well as the attainment of an appropriate level of achievement. Students should consult the SoCA Performance Area Coordinator for specific details regarding curricula for these examinations.

These courses are available to Bachelor of Music students with the approval of a program advisor in SoCA-Music. These students will elect their major instrument at the time of their admission.

Students classical/concert private lessons who have completed four semesters of study in courses MUSP-3470 – MUSP-3690 may complete their degree requirements in private lesson study by enrolling in courses MUSP-3710 or MUSP-3410 (Jazz/Pop). Students may audition for courses MUSP-3710 prior to completing four semesters of study in courses MUSP-3470 – MUSP-3690. Please contact the SoCA Performance Area Coordinator for details regarding regulations and registration. Students may audition for BMus program in either classical/concert or jazz/pop idioms.

Performance courses are intended to be taken in consecutive semesters. Any interruption in study must be followed by an audition for re-entry into the performance course sequence. The audition will be scheduled in consultation with the Performance Area Coordinator at the beginning of the semester.

Students registered in applied lessons courses who auditioned for BMus programs by DVD, Skype, or FaceTime may be required to perform a confirming audition during the first week of classes.

Private instruction courses may be repeated for credit.

3.00 Credit Course Instrument

MUSP-3470*	Voice
MUSP-3480*	Piano
MUSP-3490	Organ
MUSP-3510	Harpsichord
MUSP-3520*	Flute
MUSP-3530	Oboe
MUSP-3540*	Clarinet
MUSP-3550*	Saxophone
MUSP-3560*	Bassoon
MUSP-3570*	French Horn
MUSP-3580*	Trumpet
MUSP-3590*	Trombone
MUSP-3610*	Euphonium
MUSP-3620*	Tuba
MUSP-3630*	Violin
MUSP-3640	Viola
MUSP-3650	Cello
MUSP-3660*	Double Bass
MUSP-3670*	Percussion
MUSP-3680	Harp
MUSP-3690*	Classical Guitar
MUSP-3710*	Applied Jazz/Pop

*This is an experiential learning course.

The following courses offer weekly performance instruction and participation in a group master class. As part of this course, students take weekly private lessons for which there is a private lesson fee. Course

requirements include a performance examination before a faculty jury at the end of each term of study, as well as the achievement of the appropriate Level of Achievement. Students should consult the Music Office for specific details regarding curricula for these examinations.

It is the responsibility of the student to arrange for a qualifying audition by contacting the Music Office or Performance Area Coordinator no later than the end of the first week of classes. Students who fail to do so will relinquish their right to attend such classes and must complete the normal procedure for dropping a course as outlined on the Student Information System. The audition for entry to these courses is equivalent to that for the MUSP-3000 performance series. Private instruction courses are intended to be taken in consecutive semesters. Any interruption in study must be followed by an audition for re-entry into the performance course sequence. The audition will be scheduled in consultation with the Performance Area Coordinator at the beginning of the semester.

Bachelor of Music students may also opt to take Performance Instruction courses in any secondary instrument/voice of their choice, classical or jazz/pop. These courses involve the MUSP-2000 performance series and may be taken in addition to, not in replacement for the required MUSP-3000 performance series. The courses may not be taken by Bachelor of Music students to meet the specific degree requirements in Performance Studies.

Applied instruction courses may be repeated for credit.

3.00 Credit Course	Instrument
MUSP-2470*	Voice
MUSP-2480*	Piano
MUSP-2490	Organ
MUSP-2510	Harpsichord
MUSP-2520*	Flute
MUSP-2530	Oboe
MUSP-2540	Clarinet

MUSP-2710*	Applied Jazz/Pop

*This is an experiential learning course.

For 2000 level lessons, the student may select an hour private lesson course or a 30 minute lesson course. Cost recovery fees are attached to 2000 level lessons courses.

VISUAL ARTS - PROGRAM REGULATIONS

Visual Arts General Information

Transfer Students: Students who have taken art courses at other post-secondary institutions and desire credit for basic courses in Visual Arts may be required to submit a portfolio of their own work for evaluation by Visual Arts, together with an official transcript of their record and catalogues describing the courses taken, all of which must be submitted no later than two weeks before the first day of classes.

Visual Arts Program Requirements

- 1) It is strongly recommended that MACS-2050 and MACS-2150 be taken by students in Year 1 of the BFA in Visual Arts.
- 2) It is strongly recommended that Visual Arts students take VSAR-1050, VSAR-1060, VSAR-1070, and VSAR-1080 in Year 1.
- 3) Fourth-year BFA. students will be required to participate in the B.F.A. Candidates' Exhibit. The selection of work to be exhibited is to be made with the approval of the student's instructor in Studio Practice II.

Visual Arts and the Built Environment

Note: Students admitted to the BFA in Visual Arts and the Built Environment (VABE) program are also required to apply for a US study visa in consultation with the University of Detroit Mercy (UDM), in order to attend and complete courses at the UDM School of Architecture. Admission to the VABE program does not guarantee the granting of a study visa by the US government. Continuation in the VABE program requires that a study visa is granted by the US government.

Areas of Study

Requirements for degree programs in Visual Arts make reference to the following groups of courses:
Basic Courses: VSAR-1050, VSAR-1060, VSAR-1070, VSAR-1080, and Media Art Histories/Visual Culture MACS-2050, and MACS-2150.

Drawing/Printmaking: VSAR-2030, VSAR-2230, VSAR-3030, VSAR-3260, VSAR-3650, VSAR-3860, VSAR-3900.

Inter-media Practices: VSAR-3830, VSAR-3840, VSAR-3710, VSAR-3850, VSAR-3860, VSAR-3650, VSAR-3900

Internship: VSAR-3800

Painting: VSAR-2130, VSAR-3130, VSAR-3650, VSAR-3900.

Photography: VSAR-2530, VSAR-2900, VSAR-3460, VSAR-3470, VSAR-3480, VSAR-3650, VSAR-3900

Sculpture/Built Environment: VSAR-2330, VSAR-2550, VSAR-3330, VSAR-3710, VSAR-3850, VSAR-3650, VSAR-3850, VSAR-3900.

Time-Based: VSAR-2430, VSAR-2450, VSAR-2630, VSAR-3430, VSAR-3450, VSAR-3630, FVSAR-3650, VSAR-3900

PROGRAMS

Bachelor of Fine Arts in Film Production

This is a joint program between Communication, Media, and Film and the School of Creative Arts.

Degree requirements:

Total courses: 40

- (a) FILM-1001 and FILM-1900;
- (b) FILM-1100, FILM-1110, FILM-2100, FILM-3100, FILM-4100, FILM-4105
- (c) FILM-2200, FILM-2300, FILM-2400, FILM-2500, and FILM-2600;
- (d) two of CMAF-2400, CMAF-2410, or CMAF-3430;
- (e) four of, FILM-3200, FILM-3300, FILM-3400, FILM-3600, and FILM-3700
- (f) FILM-4900;
- (g) two courses from Social Sciences;
- (h) two courses from Languages or Science;
- (i) GART-1500 and GART-1510;
- (j) two courses from any area of study, excluding Arts;
- (k) six courses from any area of study, including FILM;
- (l) six courses from any area of study, excluding FILM

Courses used to calculate the major average are: Courses listed under requirements (a) to (f), and any courses taken in the major area of study (FILM).

Honours Bachelor of Arts in Music

Admission Requirements

No audition is required to enrol in this degree though students may require an audition/faculty screening for performance courses such as ensembles and private lessons.

Other Regulations

Music courses whose second digit is 0 may not count towards this degree.

Degree Requirements

Total courses: forty

- (a) twenty courses, consisting of MUSC-1120, MUSC-1130, MUSC-2120, MUSC-2130, MUSC-1260, MUSC-1270, MUSC 2480; four Ensemble courses; two courses in Applied Music (lessons); seven additional Music courses, including six at the 2000-level or above from History and Literature (Musicology) Theory and Composition and/or Music Education.
- (b) two courses from Social Sciences;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, excluding Arts.
- (e) GART-1500, GART-1510;
- (f) six courses from any area of study, including Music.
- (g) six courses from any area of study, excluding Music (GART-2100 is strongly recommended).

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Honours Bachelor of Music

Admission Requirements

In addition to meeting the regular requirements for admission to the University, admission to Bachelor of Music programs is conditional upon a successful audition evaluated by faculty members in Music. The audition will consist of a performance of at least ten minutes' length on the student's major instrument, showing a grasp of basic proficiency in a variety of musical styles and historical time periods.

Candidates should contact a program advisor in Music for specific requirements in the various performance media. If an accompanist from Music is required, four weeks' prior notice must be given to the Music office, and an accompanist's fee will be charged. Candidates auditioning in Voice or Orchestral Instruments must perform at least one selection with accompaniment. Candidates should apply for an audition on-line at www.uwindsor.ca/music/audition-requirements.

Other Regulations

Music courses whose second digit is 0 may not count toward the B.Mus. degree.

Degree Requirements

Total courses: forty.

- (a) History and Literature (Musicology/Ethnomusicology): four courses, consisting of MUSC-1260, MUSC-1270; and 2 additional History and Literature courses.
- (b) Theory and Composition: four courses, consisting of MUSC-1120, MUSC-1130, MUSC-2120, and MUSC-2130-
- (c) Performance Studies: six courses, consisting of one course from the series MUSP-3470 to MUSP-3690, or MUSP-3710 (taken six times).
- (d) Ensembles: Six courses from MUSP-2100, MUSP-2200, MUSP-2400, or MUSP-3100 (Ensemble courses are repeatable for credit).
- (e) Conducting: one course, MUSC 2480
- (f) three additional courses in History and Literature (Musicology), Theory and Composition or Music Education plus four additional Music courses
- (g) GART-1500, GART-1510;
- (h) six courses from any area of study, excluding Music.
- (i) four courses from any area of study, including Music.

In addition to a common core of Music courses, B Mus.-students may pursue one of a number of different concentrations including Performance, Musicology, and Theory Composition (including Technology). Other concentrations may be pursued, within the limit of faculty resources. Recommended Programs of Study with Suggested Course Sequences for these concentrations are available through Music.

Courses used to calculate the major average are: courses listed under requirements (a) to (g), and any courses taken in the major area(s) of study.

Combined BA Honours Music Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once

the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty

Other Regulations

Music courses whose second digit is 0 may not count towards this degree.

Degree requirements:

(a) Music: seventeen courses consisting of MUSC-1120, MUSC-1130, MUSC-1260, MUSC-1270, MUSC-2120, MUSC-2130; four semesters of Ensemble courses; four Academic Music courses (History and Literature, Music Theory/Composition, and/or Music Education); plus three additional Music courses.

(b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500 and GART-1510

(d) Other courses, as required, from any area of study to a total of forty courses.

Concurrent Bachelor of Music Education/ Bachelor of Education

Direct admissions from high school only.

This is a joint offering between the School of Creative Arts and the Faculty of Education. See Faculty of Education for program requirements.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Music

Minor Concentration: MUSC-1120, MUSC-1130, MUSC-1260, MUSC-1270, plus two additional Music courses (for a total of six credits)

Major Concentration: MUSC-1120, MUSC-1130, MUSC-1260, MUSC-1270, MUSC-3460, seven courses at the 2000-level or above, including two MUSC-series courses, two MUSP-series courses, and two Music History and Literature (Musicology) courses.

Minor in Music

Six courses, including 2 courses in the area of Music History and Literature (Musicology); 2 courses in the area of Music Theory and Composition; plus two other music courses with the exception of private instruction courses. (3000 level series)

*consult course descriptions for information regarding prerequisites.

General BA in Visual Arts

Note: As of Fall 2013 there are no direct admissions from High School, with the exception of students enrolled in the Concurrent Bachelor of Arts (Visual Arts General)/Bachelor of Education program. All other students will be applying directly to the Honours program.

Degree Requirements

Total courses: thirty.

- (a) Visual Arts - sixteen courses: VSAR-1050, VSAR-1060, VSAR-1070 and VSAR-1080, and eight other studio courses numbered VSAR-2030 through VSAR-3900 plus MACS-2050, MACS-2150 and two additional MACS courses at the 2000 or 3000 level.
- (b) two courses from Social Sciences;
- (c) two courses from Languages or Science;
- (d) two courses from any area of study, including Arts.
- (e) GART-1500, GART-1510;
- (f) INCS-2020, INCS-2030;
- (g) four more courses from any area of study, including Visual Arts.

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study.

Combined BA Honours Visual Arts Programs

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) seventeen courses consisting of Studio Fundamentals VSAR-1050, VSAR-1060, VSAR-1070 and VSAR-1080, plus nine other studio courses numbered VSAR-2030 through VSAR-3900 and/or Cinema Arts and/or Film courses numbered CNMA-2XXX through CNMA-4XXX or FILM-2XXX through FILM-4XXX. At least four courses must be at the 3000-level plus the following Media Art Histories/Visual Culture courses: MACS-2050, one additional MACS course at the 2000 level, plus one MACS course at the 3000 or 4000 level.
- (b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) GART-1500, GART-1510;
- (d) two courses from Social Sciences;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, including Arts.
- (g) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) to (b), and any courses taken in the major area(s) of study.

Bachelor of Fine Arts in Visual Arts

Degree Requirements

Total courses: forty.

(a) VSAR: twenty courses (66 course credits) as follows: VSAR-1050, VSAR-1060, VSAR-1070, VSAR-1080; one of VSAR-3830 or VSAR-3840; VSAR-4800 (6.0 credits), VSAR-4810 (6.0 credits), VSAR-4900 and VSAR-4910; plus at least three 2000-level courses in three other separate areas; five additional 3000-level courses in at least three separate areas; and three additional courses at the 2000 or 3000 level (courses beginning either with a VSAR- or a MACS).

Media Art Histories/Visual Culture: six courses (18 course credits) as follows: MACS-2050, MACS-2150, plus four MACS, one of which has to be at the 4000-level.

(b) three courses from Social Sciences, Humanities or Arts (excluding Visual Arts);

(c) two courses from Languages or Science;

(d) five courses from any area of study, including Visual Arts.

(e) GART-1500, GART-1510:

Courses used to calculate the major average are: courses listed under requirement (a) and any courses taken in the major area(s) of study. Students must maintain a 76% major average to enroll in advanced courses: VSAR-4800; VSAR-4810; VSAR-4900; VSAR-4910 in year 4. Students whose average drops below this average can:

(a) be allowed to continue in the BFA program on a conditional basis, subject to re-evaluation;

(b) be allowed to transfer to the general Bachelor of Arts-Visual Arts program.

Consult a program advisor in Visual Arts for details regarding portfolio requirements and procedures.

Bachelor of Fine Arts in Visual Arts and the Built Environment (VABE)

In accordance with US government regulations, the VABE program is open only to Canadian citizens legally permitted to commute to the United States. International Visa students interested in the architecture program at the University of Detroit Mercy must apply directly to that institution.

Note: Students admitted to the BFA in Visual Arts and the Built Environment (VABE) program are also required to apply for a US study visa in consultation with the University of Detroit Mercy (UDM), in order to attend and complete courses at the UDM School of Architecture. Admission to the VABE program does not guarantee the granting of a study visa by the US government. Continuation in the VABE program requires that a study visa is granted by the US government.

Students enrolled in the program may be eligible to apply to the fourth year of the architecture program at the University of Detroit Mercy (UDM), following completion of their third year in the VABE program. Students admitted to the fourth year of the UDM program would graduate with a General BA in Visual Arts from the University of Windsor. Students who continue to the fourth year of the Windsor program would graduate with a BFA in Visual Arts and the Built Environment. Students who successfully complete the fourth year of the UDM architecture program can graduate with a B.Sc. in Architecture or be eligible for admission to UDM's professional program in Architecture (M.Arch.).

Degree Requirements

Total courses: forty-four

(a) School of Creative Arts:

- (i) VSAR-1050, VSAR-1070, VSAR-1080, VABE-1100 (6.0 credit course), VABE-1200 (6.0 credit course); one of VSAR-3830 or VSAR-3840;
- (ii) VSAR-4800 (6.0 credit course), VSAR-4810 (6.0 credit course), and VSAR-4910;
- (iii) VABE-2130, VABE-4600
- (iv) two additional 3000-level studio courses in the same subject area;
- (v) plus MACS-1500, MACS-2050, MACS-2150, MACS-3910, and any one of: MACS-2500 or MACS-4520
- (vi) two other Art History courses, one of which has to be at the 4000-level;
- (vii) a successful VABE portfolio evaluation.*

(b) School of Architecture:

- (i) Professions: VABE-1190/ARCH1190, VABE-1290/ARCH1290 (each 1.5 credit courses)
- (ii) 4 Design Studio courses: VABE-2300/ARCH1300, VABE-2400/ARCH1400, VABE-3100/ARCH2100, VABE-3200/ARCH2200;
- (iii) Visual Communication: VABE-2110/ARCH 1211, VABE-2210/ARCH2110
- (iv) Building Structures modules: VABE-2640/ARCH2640, VABE-2840/ARCH2840;
- (v) Building Environment modules: VABE-2260/ARCH2260, VABE-2860/ARCH2860;
- (vi) Building Construction modules: VABE-2680/ARCH2680, VABE-2880/ARCH2880;
- (v) Co-op Training Prep: VABE-3000/CEC-300 or VSAR-3800 Visual Arts Internship

(c) two Social Science courses

(d) one Science course

(e) two additional courses from Arts excluding Visual Arts

(f) GART-1500 and GART-1510; DRAM-2100, PHIL-1100, and MATH-1780 or MATH-1760

Courses used to calculate the major average are: courses listed under requirements (a) to (b), and any courses taken in the major area(s) of study.

*Portfolio Evaluation: A third year gallery exhibition, and for students who pursue a BSc in Architecture from UDM, a successful portfolio evaluation is required. The portfolio evaluation takes place at the beginning of semester six, after the student has gained credit in VSAR-1050, VSAR-1070, VSAR-1080, MACS-1500, VABE-1100, VABE-1200, VABE-2300/ARCH1300, VABE-2400/ARCH1400, VABE-3100/ARCH2100, and is enrolled in VABE-3200/ARCH2200.

Those students seeking to pursue a BSc in Architecture from the UDM after their third year are encouraged to consult a VABE Advisor on what courses are transferable. Students who opt to graduate after year 3 and enter the UDM BSc program will receive a BA in Visual Arts. For these students, the VA studio course requirements in the BA will be replaced by the architecture studio courses taken at UDM. Acceptable substitutes for BA requirements INCS-2020 and INCS-2030 will include any two Social Sciences courses taken under the option requirements for the VABE program.

Program Sequencing

YEAR 1

Fall

University of Windsor

MACS-1500, VABE-1100, VSAR-1070, MATH-1780 or MATH-1760

University of Detroit Mercy (taken at UDM campus)
VABE-1190/ARCH1190

Winter

University of Windsor
DRAM-2100, VSAR-1050, VABE-1200, VABE-2130

University of Detroit Mercy (taken at UDM campus)
VABE-1290/ARCH1290

YEAR 2

Fall

University of Windsor
VSAR-1080, GART-1500, MACS-2050

University of Detroit Mercy (taken at UDM campus)
VABE-2160/ARCH2160, VABE-2300/ARCH1300, VABE-2330/ARCH2330

Winter

University of Windsor
GART-1510, MACS-2150, MACS-3910

University of Detroit Mercy (taken at UDM campus)
VABE-1160/ARCH1160
VABE-2400/ARCH1400
VABE-2430/ARCH2430

YEAR 3

Fall

University of Windsor
VSAR-3850, MACS-4560, PHIL-1100
1 Social Science Elective

University of Detroit Mercy (taken at UDM campus)
VABE-3100/ARCH2100, VABE-3000/CEC-300* Co-op Training Prep. or VSAR-3800 Visual Arts Internship.

NOTE: * VABE-3000 is only needed if a student is planning to enter the UDM B.Sc. Architectural Program after their 3rd year. Students who do not complete the Co-op preparation course will need to substitute this requirement with VSAR-3800 Visual Arts Internship.

Winter

University of Windsor
2 Arts courses, excluding Visual Arts courses, 1 Social Sciences courses, 1 Science course

University of Detroit Mercy (taken at UDM campus)
VABE-3200/ARCH2200

YEAR 4

Fall

University of Windsor

VSAR-3XXX Studio course, VSAR-4800, VSAR-4910, MACS-XXXX Art History course

Winter

University of Windsor

VSAR-3XXX Studio course, VSAR-3830 or VSAR-3840, VSAR-4810, MACS-4XXX

Concurrent General Bachelor of Arts (Visual Art)/Bachelor of Education

Direct admissions from high school only.

This is a joint offering between the School of Creative Arts and the Faculty of Education. See Faculty of Education for program requirements.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Visual Art

Major Concentration: VSAR-1050, VSAR-1060, VSAR-1070 and VSAR-1080, MACS-2150; seven additional Visual Arts courses at the 2000 level or above including three 3000-level or above courses.

Minor Concentrations: VSAR-1050, VSAR-1060, VSAR-1070, VSAR-1080 and MACS-2150; one additional Visual arts course at the 2000 level.

Minor in Media Art History/Visual Culture

Requirements: six courses, including two of VSAR-1050, VSAR-1060, VSAR-1070, VSAR-1080; plus MACS-2050, and two additional MACS courses.

SCHOOL OF CREATIVE ARTS COURSES

ART HISTORY COURSES

Not all courses listed will necessarily be offered each year. Prerequisites for all Art History courses are waived for non-Visual Arts majors. Art History courses are three hours a week unless otherwise indicated.

MACS-2050. Art and Material Culture

Art and Material Culture. In this course, we explore different traditions of making through the lens of materials and technologies. We ask: how do cultures from different times and places create using the technologies and materials available to them? How do objects, structures, and spaces reflect the values and ideas of their moment of creation? How do materials impact the conceptual and technological

development of creative processes in art, design and architecture? (This is an experiential learning course.)

MACS-2150. Art and Visual Culture

How have people from different cultures and time periods perceived the world and how have they represented their perceptions of it? In this course, we will explore histories of vision, and depictions of space including the development of perspectival rendering. We also consider perspective in its more commonplace usage: point of view as well as shifting theories about how we perceive the world through visual means. We will explore the differences between representation and self-representation as they relate to questions of appropriation.

MACS-2200. The Planned City as a Work of Art

The city as a grand plan has always been both an idea and an ideal in the West. This course will trace the development of the city envisioned as a single, unified construct, often with a specific purpose in mind. From the ancient world of Athens and Rome to Medieval Siena and Renaissance Florence through to the 19th century in Europe and North America, these great urban visions continue to influence how we live. (Prerequisites: MACS-2050 and MACS-2150.)

MACS-2500. Stories of the City

This course examines how cities are imagined, dreamed, planned, described, and remembered. Students explore urban cultures, legends, scenes, and structures to discern how the spaces and rhythms of city life are expressed through its literature, visual arts, films, sounds, architectures and other media. While the course addresses urban disasters and achievements, it also investigates the everydayness of urban existence. Classes respond with theoretical, creative and community-based research projects that foster conversation and involvement with citizens.

MACS-2600. History of Photography

This course addresses the history of photography from a social and aesthetic perspective. With the invention of photography in the nineteenth century, debates about subjectivity, truth, memory and difference were radically re-framed. This course follows the emergence of photography in 1839 through its development in the twentieth century, exploring its documentary and aesthetic roles in relation to specific socio-historical contexts. The significance of technological innovations to image creation will also be addressed.

MACS-2850. Learning by Living in an International Urban Setting

This course develops the capability to describe and reflect upon the everyday rhythms and challenges of learning in a new culture and urban environment and finding expressive ways to communicate the experiences and challenges of learning to others. As an exploration of living in a city outside Canada students will examine films, literature, music, theatre, or other expressive forms that reflect its urban life. Students will write weekly blogs about their own experiences, perceptions and understanding of Italian culture and living abroad. Using old and new media, they will engage in a regular process of designing, drafting, and redrafting stories and relating interesting experiences from their time abroad that may be shared with their classmates, colleagues, family, and friends within an electronic portfolio. As managers of their own e-portfolios, students will develop a learning record designed to exceed the limits of the course. Regular assessment of the e-portfolio and its entries may be carried out by a small team of faculty at Windsor. (Permission of the Instructor is required.) (Prerequisites: GART-1500 and GART-1510.) (Also offered as VSAR-2850.)

MACS-3450. Contemporary Art

This course offers an overview of the major movements and aesthetic concerns in art from the 1960s to the present. The course charts the shifting boundaries of contemporary art including the impact of street art, new media, craft and design on art practices in the late 20th and early 21st centuries. Topics focus on the relationship between contemporary art production and the social, economic and cultural shifts that inform new movements. As most contemporary art strives to foster discussion and debate, students learn how to assess which themes and movements align with their own interests. Research and writing strategies focus on the development of informed critical language around contemporary art practices. (Prerequisites: MACS-2450; or semester 4 standing for non-majors.)

MACS-3620. Contemporary Issues in Photography

This course will provide an examination of the theoretical debates and key writings on photography in the modern and contemporary contexts. Critical areas to be discussed include photographic realism, documentary and narrative forms, digital reconfiguration, intermediality, gender and identity, space and place. The role of the photograph will be explored in relation to conditions in contemporary art and society to provide a broader context for interrogating photographic image-making. (Pre-requisites for Visual Arts majors: MACS 2140 and MACS 2150; pre-requisites for non-majors: semester 4 standing)

MACS-3700. Media Art Histories

This course surveys artistic practices and theoretical models that have emerged from the intersecting histories of art, media, science, and technology. These interwoven histories are explored through case studies of visual artists, filmmakers, musicians, and architects working between disciplinary and technological boundaries. Students will investigate ways in which these artists and practitioners have developed strategies across time to promote, test, evade, and challenge the social roles and forms of emerging media and technology. Pre-requisites for Visual Arts majors: MACS 2140 and 2150; prerequisites for non-majors: semester 4 standing.)

MACS-3910. Contemporary Architecture

A survey of the roots of contemporary architectural theory through an examination of representative structures since the Industrial Revolution. Students will be introduced to those individuals who have played a central role in the development of architectural thought in North America. (Prerequisites for Visual Arts majors: MACS-2050 and MACS-2150.) (3 lecture hours a week.)

MACS-4500. Border Culture

This course addresses the role of borders in contemporary global culture as both physical boundaries and affective conditions. In the context of the Windsor-Detroit border, students from the University of Windsor compare viewpoints based upon the experience of living in a border culture. Seminars and field trips address borders from a number of perspectives and contexts. Students look to historical and contemporary ideas about borders that have been articulated in various disciplines: from political theory and cultural geography, to urban planning, art, literature, architectural and spatial theory. (Open to majors and non-majors.) (Prerequisites: MACS-2050 and MACS-2150 for all Visual Arts Majors and semester 4 standing for non-majors.) (Also offered as CMAF-4500)

MACS-4520. Urban Ecologies

This course examines cities as a complex field of cultural, social, linguistic, technological, and architectural objects, activities, relationships, and experiences. Students investigate different ecological models of city life to contemplate tensions between the active and static, material and immaterial, porous and impermeable character of cities. In classroom seminars and research practice, students discuss and debate a range of theoretical models and develop creative strategies to probe the natural, physical, artistic, cultural, acoustic, and medial ecologies of cities. (Open to majors and non-majors.) (Prerequisites: Semester 4 standing.)

MACS-4560. Special Topics

A course based on group encounters with special topics in Media Arts and Culture which will be considered through readings, discussions, papers, and museum and gallery trips. May be repeated for credit with permission. (Prerequisites: Restricted to MACS majors with semester 5 standing and MACS 2450.)

FILM COURSES

FILM courses are jointly offered with the Department of Communication, Media, and Film.

FILM-1001. Film Studies I

An introduction to basic concepts in film theory and aesthetics. A study of the history of film with a focus on the dominant artistic and commercial forms, theoretical analyses, genre classifications, and evolving technologies. (3-4 lecture or lab hours per week as determined by the instructor.) (Credit cannot be obtained for both FILM-1001 and CMAF-1400.)

FILM-1100. Film Production I

A study of the art and craft of film production through lectures and hands-on exercises. A survey of the stages of production, key artistic roles, and concepts of visualization and cinematic storytelling. (2 lecture hours and 1 laboratory hour per week.) (Credit cannot be obtained for both FILM-1100 and CMAF-1120.)

FILM-1110. Film Production II

A study of fundamental artistic and technical film production skills in all stages of production and post-production. Practical learning exercises build upon the artistic work created by students of Film Production I and students complete all phases of production of a short film project. (2 lecture hours and 1 laboratory hour per week) (Prerequisite: FILM-1100 or CMAF-1120.) (Credit cannot be obtained for both FILM-1110 and CMAF-1130.)

FILM-1900. Film Business and Professional Practice I

A study and practice of behavioural skills such as active listening, conflict resolution, running effective meetings, addressing ethics, etc., relevant to the film industry. A team environment will be used as we study interpersonal dynamics as they relate to roles in film production. (Open only to BFA Film Production majors.) (3 lecture hours a week.)

FILM-2000. Special Topics in Film

Special Topics course of an area in Film studies determined by the instructor. (Prerequisite: FILM-1110; or CMAF-1130) (May be repeated for credit if topic differs.)

FILM-2050. Experimental Film and Video

This course examines experimental processes in film, video and sound and provides a technical and critical foundation in each medium. Focus will be given to the basic events and artists central to the historical development of this genre as well as its contemporary practitioners. Based on screenings and various exercises, students will craft projects that explore the potential of these artistic forms in challenging the norms and conventions of mainstream cultural production. (Prerequisite: FILM-1110 or CMAF-1130.) (2 lecture hours and 1 laboratory hour per week). (Credit cannot be obtained for both FILM-2050 and CMAF-2150.)

FILM-2100. Film Production III

An intermediate study of the practical considerations and creative strategies employed in film production and post-production. Areas of focus include narrative techniques and production methods. Activities include conceiving and creating short films. (Prerequisite: FILM-1110 or CMAF-1130.) (2 lecture hours and 1 laboratory hour per week.)(Credit cannot be obtained for both FILM-2100 and CMAF-2310.)

FILM-2200. Documentary Production I

An introduction to documentary storytelling techniques and production methods through the creation of a short documentary film. Focus is on competencies in all phases of documentary film production. (Prerequisite: FILM-1110 or CMAF-1130.) (1.5 lecture hours and 1.5 laboratory hours per week.) (Credit cannot be obtained for both FILM-2200 and CMAF-2320.)

FILM-2300. Screenwriting I

An introduction to the craft of screenwriting with an emphasis on core concepts such as structure, character development, plot, theme, tone and dialogue. Writing exercises focus on the skills necessary to translate visual and story ideas into script format. (Prerequisite: FILM-1110 or CMAF-1130.) (2 lecture hours and 1 laboratory hour per week.) (Credit cannot be obtained for both FILM-2300 and CMAF-2200.)

FILM-2400. Cinematography I

An introduction to theories and methods of cinematography that covers traditional and contemporary camera technology, techniques, and lighting. (Prerequisites: FILM-1110 or CMAF-1130.) (Credit cannot be obtained for both FILM-2400 and CMAF-3140.)

FILM-2500. Sound I

An introduction to the artistic, theoretical, and technical aspects of film sound through all phases of the film sound process. (Prerequisite: FILM-1110 or CMAF-1130.) (2 lecture hours and 1 laboratory hour per week.)(Credit cannot be obtained for both FILM-2500 and CMAF-2090.)

FILM-2600. Film-Editing I

An introduction to the art, craft, and technology of film editing through a series of practical exercises that cover a variety of styles and genres. (Prerequisites: FILM-1110 or CMAF-1130.) (1.5 lecture hours and 1.5 laboratory hours per week.) (Credit cannot be obtained for both FILM-2600 and CMAF-3090.)

FILM-3100. Film Production IV

An intermediate to advanced study of the creative approach and technical practice of film production drawing on scripts developed in Screenwriting I or Screenwriting II. Students engage a hands-on, practiced-based integration of film theory, artistic, and technical knowledge. (Prerequisite: FILM-2100; or CMAF-2310) (Credit cannot be obtained for both FILM-3100 and CMAF-3310.)

FILM-3200. Documentary Production II

An intermediate study of key artistic, craft, and narrative concepts associated with documentary film. Through the production of a short film, students explore approaches to documentary authorship, professional practice, and ethics. (Prerequisite: FILM-2200 or CMAF-2320.) (1.5 lecture hours and 1.5 laboratory hours per week.) (Credit cannot be obtained for both FILM-3200 and CMAF-3320.)

FILM-3300. Screenwriting II

An intermediate study of scriptwriting to develop and refine writing and visual storytelling skills. A workshop-based approach that includes peer review, pitch presentations, and analysis of texts. (Prerequisites: FILM-2300 or CMAF-2200.) (Credit cannot be obtained for both FILM-3300 and CMAF-3200.)

FILM-3400. Cinematography II

An intermediate study of cinematography with a focus on technical knowledge in film lighting, camera operation, camera support, and grip techniques. (Prerequisites: FILM-2400.) (Credit cannot be obtained for both FILM-3400 and CMAF-3100.)

FILM-3600. Film-Editing II

An intermediate study of the historical, aesthetic, and theoretical aspects of film editing and post-production. Topics may include film editing technique, narrative construction, and post-production skills. (Prerequisites: FILM-2600) (1.5 lecture hours and 1.5 laboratory hours per week.) (Credit cannot be obtained for both FILM-3600 and CMAF-3270.)

FILM-3700. Directing

A study of the art and craft of film directing. Hands-on activities will focus on screen language and the relationship between a director, creative collaborators, and actors or subjects. (Prerequisites: Semester 5 standing and FILM-2100 or CMAF-2310. (Credit cannot be obtained for both FILM-3700 and CMAF-3170.)

FILM-3800. Producing

A project-based study of pre-production and planning processes for film production, within an examination of the roles and responsibilities of the production department. Topics covered may include budgeting, resource planning, logistics, and regulatory issues. (Prerequisites: Semester 5 standing and FILM-2100 or CMAF-2310) (Credit cannot be obtained for both FILM-3800 and CMAF-3230.) (This is an experiential learning course.)

FILM-4000. Special Topics in Film

Special Topics course of an area in Film studies determined by the instructor. (Prerequisite: FILM-3100; or CMAF-3310) (May be repeated for credit if the topic differs.)

FILM-4100. Film Production V

An advanced capstone and project-based study that develops professional capacities in all phases of the production process and synthesizes theoretical and practical learning. Students develop writing and storytelling skills in an advanced, workshop-based study of narratology to cultivate a short film script, documentary, or animation treatment. These texts will form the basis of the study of pre-production and planning processes for film production. (Open only to BFA Film Production majors). (Prerequisite: FILM-3100 or CMAF-3310.) (Credit cannot be obtained for both FILM-4100 and CMAF-4280.) (This is an experiential learning course.)

FILM-4105. Film Production VI

An advanced capstone production course that draws on the scripts and treatments developed in FILM-4100. Students enter the production phase and create films that showcase their production skills as they study of the art, technology, and professional practice of film post-production using contemporary professional protocols and workflows. (Open only to BFA Film Production majors) (Prerequisite: FILM-4100 and Semester 7 standing) (Credit cannot be obtained for both FILM-4105 and CMAF-4280.) (This is an experiential learning course.)

FILM-4110. Commercial and Industrial Film Production

A project-based study of industrial film genres such as advertisements, training, and industrial videos, corporate film, and social media assets. Topics may include client management, brand research, and professional communication. (Prerequisite: FILM-2100 or CMAF-2310) (2 lecture hours and 1 laboratory hour per week.) (Credit cannot be obtained for both FILM-4110 and CMAF-4240.) (This is an experiential learning course.)

FILM-4400. Cinematography III

An advanced, project-based study of the art and technology as well as the professional practice of cinematography with a focus on technical, conceptual, and aesthetic lighting skills for both studio and field locations. (Prerequisite: FILM-3400; or CMAF-3100.) (Credit cannot be obtained for both FILM-4400 and CMAF-4150.)

FILM-4900. Film Business and Professional Practice II

A study of the scope and nature of the Canadian film industry, with a focus on professional, business, and interpersonal skills necessary for entry into the media industry workplace. Topics may include career pathway identification, self-marketing, professional communication, and the respectful workplace. (Open only to BFA Film Production majors or by permission of the instructor.) (Prerequisite: Semester 7 standing.)

FILM-4910. Film Marketing

This course introduces students to marketing fundamentals in all phases of film production related to the market realities of distributing a film for an audience. Topics may include audience taste, market viability and current trends, distribution strategy, emerging platforms and channels, pricing and promotion. (Prerequisite: Semester 7 standing and FILM-2100; or Semester 7 standing and CMAF-3310 and one of: CMAF-3230 or CMAF-3320 or CMAF-3820.) (Credit cannot be obtained for both FILM-4910 and CMAF-4230.)

MUSIC COURSES

Not all courses listed will necessarily be offered each term. All courses are three hours a week (for 3.0 credit hours) unless otherwise indicated.

All Music courses except those whose middle digit is 0 may require consent of the instructor for enrollment.

MUSC-1020. Fundamentals of Music and Sound

An investigation of the principles, vocabulary and concepts of musical and sonic art forms, including the physical nature of sound, technologies for sound recording and processing, music notation, and basic elements of musical and sonic design.

MUSC-1120. Music Theory and Musicianship I

An integrated study of music theory and musicianship skills focusing on the application of musical rudiments as well as basic harmonic and contrapuntal elements in a range of musical genres.

MUSC-1130. Music Theory and Musicianship II

Examination and application of diatonic harmonic, contrapuntal and rhythmic musical language with a focus on chord construction, harmonic progressions, and song forms in a range of musical genres. (Prerequisite: MUSC-1120)

MUSC-1260. Music History and Literature I

Musical styles from the Middle Ages to about 1750. (Prerequisite: admission to the B. Mus., or B.A. (Music) programs or consent of the instructor.)

MUSC-1270. Music History and Literature II

Musical styles from about 1750 to the present day. (Prerequisite: MUSC-1260 or consent of the instructor.)

MUSC-1470. Special Topics in Music

Special study of an area of music chosen by the instructor. May be repeated for credit.

MUSC-2120. Music Theory and Musicianship III

Examination and application of chromatic harmonic, contrapuntal, and rhythmic musical language in a range of musical genres. This course will further develop the practical skill sets and knowledge covered in MUSC-1130. (Prerequisite: MUSC-1130.)

MUSC-2130. Music Theory and Musicianship IV

Building upon the topics of MUSC-2120, this course is an examination and application of advanced chromatic (including tonicizations and modulatory structures), harmonic, contrapuntal, and formal musical language in a range of musical genres. (Prerequisite: MUSC-2120)

MUSC-2220. Basic Skills I

Intensive drills in ear training, sight singing, dictation, and basic keyboard. (Admission by examination or consent of the instructor.) (Should be taken concurrently with MUSC-1120.) (1.50 credit hour course.)

MUSC-2230. Basic Skills II

Continuation of MUSC-2220, which is prerequisite. (Should be taken concurrently with MUSC-1130.) (1.50 credit hour course.)

MUSC-2270. Studies in Baroque Music

Special studies in the history and literature of Baroque music, to be arranged by the instructor. (Prerequisites: MUSC-1260, MUSC-1270.)

MUSC-2390. Woodwind Techniques

Fundamental techniques of woodwind instruments and their application in teaching beginners. Rental instruments are available. (Prerequisite: MUSC-1130)

MUSC-2470. Analysis of Jazz Styles

A stylistic study of major jazz innovators through the analysis of solo transcriptions and recordings. (Prerequisite: consent of the instructor.)

MUSC-2480. Basic Conducting I

Instruction in baton technique and the conducting of choral and instrumental ensembles.

MUSC-2490. Basic Conducting II

Instruction in score preparation and rehearsal techniques for vocal and instrumental ensembles. (Prerequisite: MUSC-2480.)

MUSC-2550. Vocal Techniques

Introduction to working with children's and adolescent voices. Topics include physiology of the voice, tonal placement, care of the teenage voice, the boy's changing voice, solo and group singing. (2 lecture hours a week and one laboratory hour a week.)

MUSC-2630. Sonic Art

An introduction to techniques for producing music and sound-based art, including sound recording, editing and processing, sample-based timbre design, soundscape composition, and MIDI-based electronica. (Also offered as VSAR-2630.) (Lab fees may apply.) (1.5 lecture hours and 1.5 lab hours per week.)

MUSC-2690. Percussion Techniques

Fundamental techniques of percussion instruments and their application in teaching beginners. (Prerequisite: MUSC-1130)

MUSC-2790. Brass Techniques

Fundamental techniques of brass instruments and their application in teaching beginners. Rental instruments are available. (Prerequisite: MUSC-1130)

MUSC-2850. Foundations of Music Learning and Teaching

An introduction to the philosophical, sociological, and historical foundations of teaching music. The nature and value of music education will be examined through discourse and reflective thought, with an emphasis on developing critical thinking skills and building a framework for a personal philosophy of music education. (Prerequisite: enrolment in the B.Mus., B.A. (Music) degrees, or permission of the instructor.)

MUSC-2900. Special Topics in Music

Special study of an area of music chosen by the instructor. May be repeated for credit.

MUSC-3170. Film Music

Exploration of the ways in which film music mediates perceptions of the visual. Includes focus on development of critical listening and interpretive skills using a number of (mostly) Hollywood films as principal texts while introducing a number of political, aesthetic and historical issues. (Prerequisites: MUSC-1260 and MUSC-1270).

MUSC-3200. Music and Politics

This course will focus on the intersection of music and politics. Students will deconstruct and analyze music in order to understand its political meaning and effect. We will examine music in various social, ideological and political formations, while also dealing with themes that concern musical nationalism, censorship, artistic freedom, ideological domination, propaganda. The course will explore genres such as protest songs, film scores, symphonic and other art music genres as well as various popular music forms. Finally, we will examine audience perception and identification, study the contributions of various composers and explore their political motivations while pursuing the structures and political interests behind music's production. (Prerequisites: MUSC-1260 and MUSC-1270).

MUSC-3220. Advanced Skills I

Intensive drills in ear training, sight singing, keyboard harmony, dictation, and improvisation. (Prerequisites: MUSC-2230 and MUSC-1130 and successful completion of the Keyboard Proficiency Requirement.) (Should be taken concurrently with MUSC-2120.) (1.50 credit hour course.)

MUSC-3230. Advanced Skills II

Continuation of MUSC-3220, which is prerequisite. (1.50 credit hour course.)

MUSC-3260. Studies in Classical Music

Special studies in the history and literature of Classical music, to be arranged by the instructor. (Prerequisites: MUSC-1260 and MUSC-1270.)

MUSC-3270. Studies in Romantic Music

Special studies in the history and literature of Romantic music, to be arranged by the instructor. (Prerequisites: MUSC-1260 and MUSC-1270.)

MUSC-3460. Introduction to Ethnomusicology

Exploration of music cultures of the world within an ethnomusicological framework, including critical analysis of the discourse surrounding “world music” and conventional understanding of “local” and “global”. (Prerequisite: MUSC-1260 and MUSC-1270 or consent of the instructor.)

MUSC-3630. Advanced Sonic Art

An in-depth study of techniques for creating advanced sound-based art. Selected topics of study may include sound synthesis, electroacoustic music composition, sound installation, multimedia performance, and soundtracks for film and video. (Pre-requisite: VSAR-2630 or MUSC-2630 or permission of the instructor.) (Also offered as VSAR-3630) (May be repeated for credit.) (Lab fees may apply.)

MUSC-4120. Music Theory Seminar I

Two- and three-part species counterpoint.

MUSC-4260. Studies in Twentieth-Century Music

Special studies in the history and literature of twentieth-century music, to be arranged by the instructor. (Prerequisites: MUSC-1260 and MUSC-1270.)

MUSC-4270. Studies in the Music of North American Culture

Selected studies that focus on Canadian and/or American musical culture with a special emphasis on transnational ideals and values, to be arranged by the instructor. (Prerequisites: MUSC-1260 and MUSC-1270; or consent of instructor.)

MUSC-4320. New Music Workshop

This course focuses on the composition, analysis, performance, and studio recording of new music. Students work individually and in groups on a series of projects, thus building a portfolio of work over the course of the semester. Projects may include the composition of new pieces, the performance of new repertoire (including student work), analytical papers that explore an aspect of new music or an individual piece, new media projects with a sound component, and interdisciplinary projects undertaken in collaboration with students from other departments. (May be repeated for credit.) (Prerequisites: MUSC-2130 or consent of the instructor.)

MUSC-4360. Directed Studies in Music I

Advanced study in a selected area of music. (May be repeated for credit.) (Prerequisite: permission of a program advisor in Music.)

MUSC-4370. Directed Studies in Music II

Continuation of MUSC-4360, which is prerequisite. (May be repeated for credit.)

MUSC-4470. Special Topics in Music

Special study of an area of music chosen by the instructor. May be repeated for credit.

MUSC-4580. Conducting Seminar I

Advanced studies in choral or orchestral conducting. The student will serve as assistant conductor of an ensemble, with practical experience in rehearsal technique, score study, literature, and stylistic analysis. (Prerequisite: MUSC-2490 and consent of the instructor.)

MUSC-4840. Seminar in Elementary Music Education

Seminar in the critical examination of curriculum materials, teaching methods, and methodological approaches appropriate to elementary grades K-6; observation of music teaching in the school classroom. (Prerequisites: MUSC-2850.) (This is an experiential learning course).

MUSC-4850. Seminar in Secondary Music Education

Seminar in the critical examination of techniques for building and maintaining a successful high school music program, including development of musical skills and discussion of materials and performance literature appropriate to Grades 6-12; observation of music teaching in the school classroom. (Prerequisites: MUSC-1130, MUSC-2230 MUSC-2480 and MUSC-2850.) (This is an experiential learning course.)

MUSC-4910. Graduation Project

Independent research or creative activity in the student's individual area of emphasis. The project may take the form of a major research paper, recital of original compositions, or other appropriate vehicle. (Prerequisite: permission of a programme advisor in Music.)

MUSC-4940. Critical Issues in Music Education

A critical examination of recent developments and issues in the philosophy, theory, history, and sociology of music education. Emphasis will be placed on the development of critical thinking skills needed for application in reflective practice. (Pre-requisite: MUSC-2850).

MUSIC PERFORMANCE STUDIES COURSES

All students registered in Performance Study courses (except MUSP-2700) may be required to perform a confirming audition during the first week of classes. For courses in Performance Instruction, see "Areas of Study-Performance".

MUSP-1110. Guitar Techniques

Basic techniques for use with music groups. Chord charts, rhythm graphs, traditional note forms, and guitar accompaniment for individual and group singing. Students must supply their own instrument. (3.0 credit hour course.) (Open to Music Education students only)

MUSP-2100. University Singers

Performance of literature of various styles from all periods. (Normally 4 hours a week.) (May be repeated for credit.) (This is an experiential learning course.)

MUSP-2200. University Wind Ensemble

Performance of major works of the band and wind ensemble literature by groups of various sizes. Performances at University convocations, high school assemblies, and University concerts. (Normally 4 hours a week.) (May be repeated for credit.) (This is an experiential learning course.)

MUSP-2400. Jazz Ensemble

Performance of works arranged for standard jazz band instrumentation. (Normally 4 hours a week.) (May be repeated for credit.) (This is an experiential learning course.)

MUSP-2700. Community Choir

Membership open to everyone without audition. Rehearsals one evening a week, and normally one concert given during the term. (Normally 2.5 hours a week.) (May not count toward the B.Mus. degree.) (Offered on a pass/non-pass basis.) (May be repeated for credit.) (Offered on a pass/non-pass basis.)

MUSP-3100. Chamber Choir

Selected literature suitable for performance by a small choir. (Prerequisite: 2 terms of MUSP-2100, or MUSP-2200, or consent of instructor.) (May be repeated for credit.) (Normally 4 hours week.) (This is an experiential learning course.)

MUSP-3720. Applied Composition (Western Classical)

The course is study in Western concert/classical music composition (though application of non-Western and non-classical elements may be explored) delivered through private weekly lessons. Students in the course complete original music projects as well as the generation of written scores and performance materials. The course will also include select preparatory literature and instrument performance practice studies. Repeatable for credit. (Prerequisite: MUSC-2130.) (This is an experiential learning course.)

MUSP-3730. Applied Composition/Arranging (Jazz/Pop)

The course is study in Jazz/Pop music composition/arranging (though application of non-Western and classical art music elements may be explored) delivered through private weekly lessons. Students in the course complete original music projects as well as the generation of written scores and performance materials. The course will also include select preparatory literature and instrument performance practice studies. Repeatable for credit. (Prerequisite: MUSC-2130.) (This is an experiential learning course.)

MUSP-3930. Recital I

Public presentation of a recital of approximately forty minutes in playing time on the student's major instrument. Repertoire performed must show a variety of styles and time periods. (Prerequisite: permission of the applied lessons instructor and Performance Area Coordinator) (This is an experiential learning course.)

MUSP-4000. Special Topics in Music Performance

Special study of an area of applied music (performance) chosen by the instructor. May be repeated for credit.

MUSP-4930. Recital II

Public presentation of a recital of one hour in playing time on the student's major instrument. Repertoire performed must show a variety of styles and time periods. (Prerequisite: MUSP-3930.) (This is an experiential learning course.)

MUSIC PERFORMANCE COURSES

See Music Program Regulations.

VISUAL ARTS COURSES

Not all courses listed will necessarily be offered each year. Studio courses are either three hours a week or six hours a week, depending on the medium and level of study. See below for details. Art History courses are three hours a week unless otherwise indicated. Prerequisites for all Art History courses are waived for non-Visual Arts major.

Studio Courses: VSAR-1050, VSAR-1060, VSAR-1070, VSAR-1080, VSAR-2030, VSAR-2130, VSAR-2230, VSAR-2330, VSAR-2430, VSAR-2450, VSAR-2530, VSAR-2550, VSAR-2630, VSAR-2850, VSAR-2900, VSAR-3030, VSAR-3130, VSAR-3260, VSAR-3330, VSAR-3430, VSAR-3450, VSAR-3460, VSAR-3470, VSAR-3480, VSAR-3830, VSAR-3840, VSAR-3850, and VSAR-3860.

VSAR-1050. Studio Practice and Ideas/Space

An investigation of the principles, vocabulary and concepts of space-based art, including but not limited to sculpture and installation. Using traditional and contemporary materials, processes and practices, students will gain knowledge and experience through the exploration of the creative possibilities of three-dimensional space. (Lab Fees may apply.)

VSAR-1060. Studio Practice and Ideas/Image

An introduction to the fundamental skills and critical concepts of visual perception and production common to all areas of 2 dimensional image-making. Basic principles of composition and design, light and pigment-based colour theory, as these apply to painting, photo-based processes, and print production. Their use and application will be explored within the contemporary art context. Class projects may involve inter-disciplinarity between these media. Studio assignments are combined with related critical theory, historical practice and current strategies.

VSAR-1070. Studio Practice and Ideas/Drawing

An investigation of a variety of drawing processes, materials and concepts in a studio environment that fosters exploration. (Lab fees may apply.)

VSAR-1080. Studio Practice and Ideas/Time-Based

An investigation of the principles, vocabulary and concepts of time-based arts including digital media. Students will gain knowledge of the creative possibilities of emerging technologies and will develop a basic understanding of methods, tools and techniques of time-based media.

VSAR-2030. Introductory Drawing

Media, techniques, vocabulary, and concepts of drawing, including the human figure and other subject matter. Development of drawing skills with exposure to more complex drawing situations, approaches, and points of view. Emphasis on a variety of materials (traditional and non-traditional). (Prerequisites: VSAR-1070) (Lab fees may apply.)

VSAR-2130. Introductory Painting

Introduction to traditional and contemporary painting concerns, problems in rendering three-dimensional form in space and organization of the two-dimensional surface. (VSAR-1060 and VSAR-1070) (Lab fees may apply.)

VSAR-2230. Introductory Printmaking

Introductory and intermediate techniques of contemporary printmaking/printmedia practice (Prerequisites: VSAR-1060 or VSAR-1070.) (Lab fees may apply.)

VSAR-2330. Introductory Sculpture

An introduction to the various concepts and processes of contemporary sculpture practice. Issues will be addressed through group discussion and practical application. (Prerequisites: VSAR-1050) (Lab fees may apply.)

VSAR-2430. Introductory Time-Based Art

An investigation of the principles, vocabulary and concepts of time-based art. Emphasis is on exploring the potential of video for art projects as well as for community action in an experimental and critical environment. Assignments and screenings will stimulate students to explore issues inherent to time-based strategies in contemporary art as well as give a background to its brief history. (Prerequisites: VSAR-1080 or permission of the instructor.) (Lab fees may apply.)

VSAR-2450. Digital Media and Design

This course introduces students to the tools used to create art in virtual space, skills that assist in cross-over activity between art and design, and the history and investigation of the social, cultural and aesthetic issues pertinent to digital art making. (Prerequisites: VSAR-1060) (Lab fees may apply.)

VSAR-2530. Introductory Photography

This introductory course in film and chemical photographic processes provides an opportunity for students to explore techniques and concepts within the medium of photography. Students will learn the basic technical skills of operating cameras, processing film, and making black and white prints, through a series of concerns specific to photography. (Prerequisites: MACS-1500 or on VSAR course at the 1000 level). Students must have access to a 35mm adjustable film camera to complete this course.) (Lab fees may apply.)

VSAR-2550. From 2D to 3D - Playing with Space

How do we experience space? What are the elements that animate and activate a space? How have artists used space to communicate and investigate current issues within culture and society? From subtle cues such as temperature and smell, to the more obvious such as colour, texture, sound and construction, students will investigate the sensory, narrative and critical aspects of installation where space itself becomes our medium. In this studio-based course, students will bridge the gap between 2D image and 3D structure as an introduction to the processes used by artists to explore and manipulate space. Students will also look at current debates surrounding installation art and the gallery as “white cube.” This course is not limited to any particular medium, and students may respond in any medium offered within the School of Creative Arts. (Prerequisite: MACS-1500 or on VSAR course at the 1000-level.)

VSAR-2630. Sonic Art

An introduction to techniques for producing music and sound-based art, including sound recording, editing and processing, sample-based timbre design, soundscape composition, and MIDI-based electronica. (Also offered as MUSC-2630.) (Lab fees may apply.) (1.5 lecture hours and 1.5 lab hours per week.)

VSAR-2850. Learning by Living in an International Urban Setting

This course develops the capability to describe and reflect upon the everyday rhythms and challenges of learning in a new culture and urban environment and finding expressive ways to communicate the experiences and challenges of learning to others. As an exploration of living in a city outside Canada students will examine films, literature, music, theatre, or other expressive forms that reflect its urban life. Students will write weekly blogs about their own experiences, perceptions and understanding of Italian culture and living abroad. Using old and new media, they will engage in a regular process of designing, drafting, and redrafting stories and relating interesting experiences from their time abroad that may be shared with their classmates, colleagues, family, and friends within an electronic portfolio. As managers of their own e-portfolios, students will develop a learning record designed to exceed the limits of the course. Regular assessment of the e-portfolio and its entries may be carried out by a small team of faculty at Windsor. (Permission of the Instructor is required.) (Prerequisites: GART-1500 and GART-1510.) (Also offered as MACS-2850.)

VSAR-2900. Introductory Photography: Digital

An applied photography course concentrating on digital imaging processes, including camera operation for high quality digital image capture, colour use, image processing, and printing. The course offers an introduction to the elements of digital photography, concentrating on digital image capture, image processing using Adobe Photoshop and Bridge, colour management, and an introduction to scanning and printing. Various types of digital cameras are discussed. Critiques, presentations and readings assist students to expand their analytical and creative skills. (Pre-requisites: Macs-1500 or on VSAR course at the 1000 level) (Lab fees may apply.)

VSAR-3030. Drawing

Advanced problems in drawing, emphasizing individual directions, concepts, and various media. (Prerequisite: VSAR-2030.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3130. Painting

Development of the concepts and painting skills encountered in VSAR-2130. Exploration of the creative potential, range, and flexibility of non-traditional techniques, forms and media. (Prerequisites: VSAR-2130.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3260. Printmaking

Continued development of contemporary printmaking practice. Further investigation of process-oriented issue-based image making, with emphasis on student's chosen direction. Students are encouraged to expand their analytical, experimental and creative skills. (May be repeated for credit.) (Prerequisites: one 2000-level printmaking course.) (Lab fees may apply.)

VSAR-3330. Sculpture

An in-depth study of concepts and processes as they pertain to contemporary sculpture practice. Issues will be addressed through group discussion and practical application. (Prerequisites: VSAR-2330.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3430. Time-Based Art

This course explores time-based media in more complex and demanding projects than VSAR-2430. Projects may include experimental video, animation, video installation, audio projects, documentary and performance art. This studio course encourages the thoughtful engagement of complex ideas through visual and/or audio means within issues in visual culture and contemporary art practices. (Prerequisite: VSAR-2430 or VSAR-2630 or VSAR-2450) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3450. Digital Media and Interactivity

This course introduces students to the basic concepts and tools of interactive multimedia as a creative medium. Students will experiment with interactive structures for creative content development using digital images, sound, text, etc. for disk-based delivery environments. The acquisition of the technical knowledge will be grounded within an exploration of aesthetic and social issues. (May be repeated for credit.) (Prerequisite: any of the following: VSAR-2450, VSAR-2430, VSAR-2630, VSAR-2900, VSAR-3430, VSAR-3470) (Lab fees may apply.)

VSAR-3460. Documentary Photography

This course is a concentrated investigation of the historic codification of the photograph as document and the current implications for this form of representation. Issues of photographic objectivity and truth will be examined in relation to the role of documentary photography as a tool of political and social

advocacy. Students will produce a body of photographic work, with learning supported by lectures and critiques. (Lab fees may apply.) (Pre-requisites: VSAR-2530 or VSAR-2900)

VSAR-3470. Photography: Sequence and Context

This course is an intensive investigation into photographic representation. The course will concentrate on the properties of individual photographs and the meanings created when they are combined into groups, series and sequences. Photographic books, slide shows, magazine layouts, blogs, exhibitions, and installations are explored as means of developing visual fluency and coherent self-expression. Critical readings and class discussions will enlist a wide range of theoretical approaches. Students will create an independent body of work based on course material. (Lab fees may apply.) (Pre-requisites: VSAR-2530 or VSAR-2900)

VSAR-3480. Photography: Concept and Production

An applied exploration of current critical issues in photography. Students will explore, discuss and produce photographic work that addresses the current theme of the course. Themes will vary but may include: Decoding the Portrait, the City and the Land, the Vernacular, the Street and the Studio, Space and Place, Representation and Appropriation, and Gender and Landscapes. Students will produce a body of work and learning will be supported by lectures and critiques. (Lab fees may apply.) (Prerequisites: VSAR-2530 or VSAR-2900)

VSAR-3630. Advanced Sonic Art

An in-depth study of techniques for creating advanced sound-based art. Selected topics of study may include sound synthesis, electroacoustic music composition, sound installation, multimedia performance, and soundtracks for film and video. (Pre-requisite: VSAR-2630 or MUSC-2630 or permission of the instructor.) (Also offered as MUSC-3630.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3650. Independent Studio

Individual work on specific projects under the guidance of an instructor. (Prerequisite: one 3000-numbered studio course in the subject desired and consent of instructor.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-3710. Art in Public Spaces

This studio practice course investigates concepts and processes by which artists work in public spaces. It considers intersections of ideas and disciplines that humanize the built environment while challenging and invigorating public spaces. Students will research, propose, and develop works of public art for civic squares, sculpture parks, back alleys, neighbourhoods, parking spaces, provincial parks, public beaches, lakes, rivers or other areas. Where possible, projects may also be executed in specific public spaces. Through location-driven research processes, students will uncover the uniqueness of space and place by exploring and exploiting each proposed location. This course is not limited to any particular medium, and students may respond in any medium offered within the School of Creative Arts. (Prerequisite: one "VSAR-" course at the 2000-level.)

VSAR-3800. Visual Art Internship

Practical work experience in organizations such as art centres, galleries, artists' studios, community organizations, and arts-related professional businesses. (Offered on a Pass/Non-Pass basis.) (Restricted to B.F.A. Visual Arts Majors and to Visual Art Combined Honours students with an average of 75% (B) or better, and with permission of the Visual Arts Internship Coordinator.) (100 hours total, 80 hours working in the community.) Students are signed-in to the course by the Coordinator, rather than registering on-line. May not be repeated for credit. (This is an experiential learning course.)

VSAR-3830. Inter-Media Practices - Processes

A studio/seminar course providing the basis for an interwoven art practice in an interdisciplinary context is developed through a critical approach to materials, issues, and art-making. Required readings/research pertinent to current issues are discussed in relation to studio production. Studio production integrating two or more Visual Arts' disciplines is expected. (Prerequisites: VSAR-2030, two 2000 level studios, and three 2000 or 3000 studios.)

VSAR-3840. Inter-Media Practices - Topics

A practice-oriented seminar focusing on topics central to the interdisciplinary art practice in contemporary social and cultural contexts. Issues within areas such as history, gender, race and technology are considered within the context of varying perspectives. Students' studio production is challenged within a contemporary interdisciplinary environment. The students' individual production will be expected to be situated within the larger art and social context. (Prerequisites: VSAR-2030, two 2000 level studios, and three 2000 or 3000 studios.)

VSAR-3850. Green Corridor

A cross-disciplinary course that investigates and proposes various strategies for the creation and realization of public environmentally-aware art projects. Course work contributes to the creation of a City of Windsor/University of Windsor Green Corridor. Projects are generated in conjunction with community-based research and involvement with special interest groups. Students will be involved in the research and development of concepts evolving from discussions and participation in series of lecture/seminars. Areas of investigation during the course will include environmental study and impact, the social and political functions of public art in contemporary culture, the public creative process, the importance of public education in the development of community-based projects, marketing of public art and environmental awareness. (Prerequisites: at least Semester 5 and in good standing, or graduate student.) (May be repeated for credit with permission of instructor.)

VSAR-3860. Bioart: Contemporary Art and the Life Sciences

This course is a visual art and science crossover lab intended for students from various disciplines to foster interdisciplinary exploration of the intersections between art and the life sciences through hands-on laboratory protocols, critical readings, theoretical writing, and the production of contemporary artwork. No previous experience in the biological sciences is required. (Prerequisites: One 2000 level studio) (May be repeated for credit.) (Lab fees may apply.) (Students outside of the School of Visual Arts require permission of the instructor to enrol.)

VSAR-3900. Studies in the Visual Arts

Special projects, topics or cross-disciplinary undertakings in the Visual Arts, organized periodically. Specific information on course content will be available from Visual Arts (Prerequisites: consent of instructor.) (May be repeated for credit.) (Lab fees may apply.)

VSAR-4800. Studio Practice I

The advanced student is given wide range to work in a chosen medium to synthesize accumulated knowledge and experience with individual critique provided by the instructor. (Prerequisites: 14 studio courses which must include VSAR-3830 or VSAR-3840 plus three 3000-level courses in the same or related area.) (double credit weight)

VSAR-4810. Studio Practice II

The advanced student is given wide range to work in a chosen medium to synthesize accumulated knowledge and experience with individual critique provided by the instructor. (Prerequisite: VSAR-4800.) (double credit weight)

VSAR-4900. Seminar

Investigation of professional practice and contemporary developments in the arts may include group discussion, visits to galleries, projects, lectures, written assignments. (Restricted to students registered in 4000-level Studio Practice courses in the B.F.A. program only.) (Lab fees may apply.)

VSAR-4910. Critical Issues

Development of an understanding of issues which have been addressed by contemporary artists and critics contextualized in history and artistic practices with an emphasis on individual students' concerns. (Restricted to students registered in 4000-level Studio Practice courses or permission of the instructor.) (Lab fees may apply.)

VISUAL ARTS AND THE BUILT ENVIRONMENT (VABE) COURSES

VABE-1100. Architectural Design I

An introduction to the fundamental skills and critical concepts of visual perception and production common to all areas of 2-dimensional image-making. Basic principles of composition and design, light and pigment-based colour theory, as these apply to painting, photo-based processes, and print production. Their use and application will be explored within the contemporary art context. Class projects may involve interdisciplinarity between these media. Studio assignments are combined with related critical theory, historical practice and current strategies. The lab is intended to introduce students to design concept of form, space, composition, in two and three dimensions, and how they relate to human experiences. Students are introduced to the principles of design and the design process as a foundation for architectural design. (6 lecture hours and 6 laboratory hours per week.) (6.0 credit course) (Credit will not be granted for VSAR-1060 if taken subsequently to VABE-1100.) (Restricted to students in the Visual Arts and the Built Environment program.) (This is an experiential learning course).

VABE-1160/ARCH1160. Computer Graphics

An introduction to computer graphics. This course utilizes Autodesk's AutoCAD and Revit on IBM compatible hardware. The course stresses three dimensional digital modeling as a primary method of communication and design and includes elements of computer visualization techniques. Students acquire hands-on experience through a series of laboratory exercises and individual projects. (Taken at the University of Detroit Mercy.)

VABE-1190/ARCH1190. Introduction to Architecture I

An Introduction to Architecture is offered to first year VABE students to create awareness of the profession of architecture. The course looks at the history of the profession; how architecture is practiced; how the profession is changing; current issues with the architectural profession; and ethical concerns facing a practitioner today. The course gives students a broad based back-ground into architecture before they have an opportunity to be engaged in practice. (Taken at the University of Detroit Mercy.) (Open to VABE students only.). (This is an experiential learning course).

VABE-1200. Architectural Design II

Students are introduced to media, techniques, vocabulary, and concepts of drawing, as well as principles directly related to the design of buildings and spatial experience. Students will be exposed to complex drawing situations with an emphasis on a variety of materials. During the lab there will be several short term, intense projects that focus on architectural design and will include the study of exterior spaces, space programming, materiality, and constructability. (Prerequisites: VSAR-1070, VABE-1100.) (6.0 credit course) (Lab fees may apply.) (This is an experiential learning course.)

VABE-1290/ARCH1290. Introduction to Architecture II

This is a continuation of Introduction to Architecture I offered to first year VABE students to create awareness of the profession of architecture. The course looks at the history of the profession; how architecture is practiced; how the profession is changing; current issues with the architectural profession; and ethical concerns facing a practitioner today. The course gives students a broad based back-ground into architecture before they have an opportunity to be engaged in practice. (Taken at the University of Detroit Mercy.) (Open to VABE students only) (This is an experiential learning course).

VABE-2110/ARCH1211. Visual Communications II

This course is a second-year class that is designed to develop the student's abilities in architectural graphic analysis and presentation techniques. This course builds on the experience gained from Architecture Design I and II, by introducing the student to methods of digital modeling, virtual simulation, representation and fabrication. Students also learn techniques of rendering through modeling virtual three-dimensional environments complete with materials and environmental lighting effects. (Taken at University of Detroit Mercy as ARCH 1211. Open to VABE students only).

VABE-2130. Principles of Structural Behaviour

An analysis of known structural systems in terms of spatial behavior in non-mathematical terms. The basic approaches to structure, proper scale of use and the effects of various materials, geometry and construction techniques are integrated into the course content. Illustrated lectures covering buildings from ancient to modern are used to demonstrate structural principles.

VABE-2150/ARCH-2150. Construction I

This course is the first in a two-semester sequence covering building materials, methods of construction, and assemblies. The goals of Construction I are to explore the form and expression of buildings through their construction systems; to develop a basic understanding of materials and methods of construction; and to investigate the inherent relationship between constructing an idea and its construction. Topics covered include site work, concrete, masonry, metals, woods and plastics, doors and windows, vertical transportation systems, glass, overall building assemblies, and systems integration. (Taken at University of Detroit Mercy as ARCH 2150. Open to VABE students only). (This is an experiential learning course).

VABE-2160/ARCH-2160. 3D Computer Graphics

This course in computer aided design uses primarily Autodesk 3D Studio software. The emphasis is on visualization and design in three dimensions. Students learn how to assemble complex three-dimensional, digital architectural landscapes equipped with real-life attributes of light, building materials, etc. These objects are rendered and animated to facilitate the needs of the design process as well as complex graphic presentations. Additional post-processing and graphic software is introduced. (Taken at the University of Detroit Mercy.)

VABE-2210/ARCH-2110. Visual Communications III

This course is the third in sequence of Visual Communications courses, building on the experience gained from Architecture Design I and II, that is designed to develop the student's abilities in architectural graphic analysis and presentation techniques. This course will use Computer Aided Design and Building Information Technology tools to analyze, interpret and illustrate building construction at different levels of detail. The class will support lessons from the Construction II course and Architecture Design courses. (Taken at University of Detroit Mercy as ARCH 2110. Open to VABE students only).

VABE-2250/ARCH-2250. Construction II

This course is the second in a two-semester sequence covering building materials, methods of construction, and assemblies. In Construction II principles, materials, and methods of architectural

construction are examined as they relate to the exterior enclosure systems of buildings. An analysis of materials and systems, including: damp proofing, waterproofing, curtain walls, windows, glass and glazing, sealants and joint design, moisture and heat control is undertaken. Codes and standards are considered for their effects on the technical aspects of the construction process. The importance of maintaining the integrity of exterior enclosure systems is stressed. (Taken at University of Detroit Mercy as ARCH 2250. Open to VABE students only). (This is an experiential learning course).

VABE-2300/ARCH1300. Architectural Design III

Design III is intended to transfer ideas explored in first year into their architectural applications while introducing students to the design of simple buildings and spaces as a creative integration of multiple systems i.e. concept, site, function, structure, mechanical systems, accessibility, materials and codes. The overall intent is to give students the opportunity to understand and explore in more detail how various systems inform, integrate and coordinate the design of architectural form and space. This term focuses on the issues of the integration of form and structure and the issue of materiality/constructability. (Prerequisites: VABE-1200) (Taken at the University of Detroit Mercy.) (This is an experiential learning course).

VABE-2330/ARCH-2330. Structures I

Analysis of structures. This course teaches the mathematical calculation of structures through lectures, and individual problem assignments. It focuses on resolution of forces; reaction; forces in frames and trusses; and forces in frames with beams. Also examined are characteristics of structural materials and structural components: shear and bending movements, flexural and shear stresses, combined stresses, principal stresses, combined bending and axial loads and stresses, deflection, continuity in structures. Light weight wood framing is presented as is wood as a structural material. (Prerequisites: VABE-2130) (Taken at the University of Detroit Mercy.)

VABE-2400/ARCH-1400. Architectural Design IV

Design IV is a continuation of studies begun in Design III. It is intended to further develop the student's ability to design buildings and building complexes within the context of integrated multiple systems. The issues of focus for this term also include sustainability, environmental systems and the design of a totally integrated project. (Prerequisites: VABE-2300) (Taken at the University of Detroit Mercy.) (This is an experiential learning course.)

VABE-2430/ARCH-2430. Structures II

This second course in structures focuses on principles of design of simple structures. Primarily studied are the design of beams, columns, trusses, built-up components and foundations in standard structural materials, steel and concrete. Related building construction techniques as well as lateral and seismic loading are also presented. (Prerequisites: VABE-2330) (Taken at the University of Detroit Mercy.)

VABE-2640/ARCH-2640. Building Structures I

Building Structures I is a module in a course of study focused on the impact of gravitational forces in architectural projects. It is intended to build upon the theory and physics background established in VABE-2130 Principles of Structural Behaviour to explore elementary structural systems, typically deployed in small-scale architectural works. The course covers gravity loads, load path analysis, and foundations and soil mechanics, in addition to wood, steel, and masonry structural systems. These systems are explored through presentations, readings and dynamic, hands-on laboratory work. (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-2660/ARCH-2660. Building Environment I

Building Environment I is a module in a course of study focused on the impact of environmental forces in architectural projects. It is intended to build upon the theory and physics background established in VABE-2130 Principals of Structural Behavior to explore the appropriate selection of passive heating, cooling, ventilation and daylighting systems, focused on deployment in small-scale architectural works. The course also introduces plumbing systems. These systems are explored through presentations, readings and dynamic, hands-on laboratory work (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-2680/ARCH-2680. Building Construction I

Building Construction I is a module in a course of study focused on the underlying principles involved in the appropriate selection of building materials and building envelope components in architectural projects. It is intended to build upon the theory and physics background established in VABE-2130 Principals of Structural Behaviour to explore assemblage and material strategies, typically deployed in a small-scale architectural work, including fire protection concepts. These systems are explored through presentations, readings and dynamic, hands-on laboratory work (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-2840/ARCH-2840. Building Structures II

Building Structures II is a module in a course of study focused on the impact of seismic and lateral forces in architectural projects. It is intended to build upon the background established in VABE-2640 Building Structures I to explore more advanced structural systems, typically deployed in mid-rise and high-rise architectural works, including lateral forces. This course will also explore the evaluation, selection and application of an appropriate structural system. These systems are explored through presentations, readings and dynamic, hands-on laboratory work (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-2860/ARCH-2860. Building Environment II

Building Environment II is a module in a course of study focused on the impact of environmental forces in architectural projects. It is intended to build upon the background established in VABE-2660 Building Environment I to explore the appropriate selection of active environmental control systems, indoor air quality, moisture, vapor and energy transfer, communication and security systems, and renewable energy systems focused on deployment in mid-rise architectural works. These systems are explored through presentations, readings and dynamic, hands-on laboratory work (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-2880/ARCH-2880. Building Construction II

Building Construction II is a module in a course of study focused on the appropriate selection of the components of assemblage and materiality in architectural projects. It is intended to build upon the background from the VABE-2680 Building Construction I to explore envelope assemblage and material strategies for performance, aesthetics and durability, 9-09-09 vertical transportation, life safety and building codes, plumbing codes and restroom design, and accessibility and universal design, typically deployed in a mid-rise architectural work. The systems are considered through the lenses of environmental impact and reuse. These systems are explored through presentations, readings and dynamic, hands-on laboratory work. (Taken at University of Detroit Mercy. Open to Visual Arts and the Built Environment students only).

VABE-3000/ARCH3000. Co-op Training Presentation

This course prepares students for the Co-op experience. Topics covered include the Career Development Model and the Cooperative Education Model including job search & job readiness, learning objectives, resume writing, and practice interviews. This course offers students the opportunity to learn about the

profession of architecture and its practice. Students must also collaborate on a group exhibition in the School of Creative Arts Gallery and develop and deliver a hard copy individual portfolio documenting their pedagogical art and design work. (Open to 3rd year VABE students only) (Course delivered at the University of Detroit Mercy with the full participation of a concluding exhibition at the University of Windsor.) (This is an experiential learning course).

VABE-3100/ARCH2100. Architectural Design 5

This is the first of a series of studio courses that combines students from the third and fourth years into a common studio to explore a particular project type and theme. These projects change from term to term. Project types include: housing, civic buildings, urban design, retail, office, health care and manufacturing buildings, etc. Themes include: community design, architectural competitions, historic preservation, electronic design, sustainable design, representation, design-build, and architectural theory. It is the intent of these studios to broaden and deepen the student's design skills and experiences while preparing them for the Master's Studios. (Prerequisites: VABE-2400) (Taken at the University of Detroit Mercy.) (This is an experiential learning course).

VABE-3200/ARCH2200. Architectural Design 6

Design VI is a continuation of studies begun in Design V and is the second part of the combined third and fourth year common senior studio series. The projects change from term to term and students explore different project types and themes. Project types include: housing, civic buildings, urban design, retail, office, health care and manufacturing buildings, etc. Themes include: community design, architectural competitions, historic preservation, electronic design, sustainable design, representation, design-build, and architectural theory. It is the intent of these studios to broaden and deepen the student's design skills and experiences while preparing them for the Master's Studios. (Prerequisites: VABE-3100) (Taken at the University of Detroit Mercy.) (This is an experiential learning course.)

VABE-4600. Space in Acoustics and Light

This course focuses on the spatial impact and design of acoustics, lighting, and relevant regulatory building code standards in Canada (NBC and OBC). The significance of lighting and acoustical phenomena on human experience and impact of all three systems on building performance are discussed. The course also addresses issues of life safety regulations, universal design, and fire protection. These themes are considered through the lenses of environmental impact, re-use, and human experience. Exploration of the topics is through presentations, readings, case studies, hands-on laboratory work, and on-site examples.

SOCIOLOGY AND CRIMINOLOGY

PROGRAM INFORMATION

CRIMINOLOGY

Criminology examines criminal activity, legal issues, and the criminal justice system, focusing on the social causes and consequences of crime, illegalities, harms, and regulation. Topics covered typically include: victimology, penology, the environment, white collar crime, policing, security, surveillance, drugs, media and culture, deviance, youth, gender, law, and policy. It provides rigorous training in analytical and communication skills, social research techniques and design, research ethics, and theory. The program is comprehensive, research driven, and attentive to global and local issues. It fosters critical thinking, and experiential learning.

FAMILY AND SOCIAL RELATIONS PROGRAMS

This interdisciplinary program, unique in Canada, developed by leading world-class researchers, provides practical and theoretical insights into changes affecting families and social responses to those changes. Students explore child studies, sexuality, and sexual health (domestic and international), family history and change, marriage dynamics, women's issues, changing gender roles, and aging. The program combines courses from a variety of disciplines including sociology, psychology, social work, history, and women's studies. Family and Social Relations prepares students for careers in child and youth human services, counselling/rehabilitation, community advocacy, case management, and a variety of other related career paths.

Teaching Family and Social Relations

Students intending to teach Family and Social Relations at the Intermediate -Senior level in the school system are advised to take the following courses as a part of the Family and Social Relations program: ECON-1100, PSYC-2230, PSYC-2240, PSYC-2400, PSYC-3270, SACR-2040, SACR-2050, SACR-3290, SACR-4510.

SOCIOLOGY

Sociology is the study of societies, social life, and social change. It investigates social, cultural and demographic issues in Canada and around the world. Topics covered include: sexuality, popular culture, inequality, migration, race, ethnicity, class, gender, values, health, family dynamics, law, social movements, institutions, and community. A degree in sociology provides rigorous training in fundamental research, analytical, and communication skills, research ethics, social research techniques and design, and theory. Program Strengths: comprehensive; fosters critical thinking; research-driven; attentive to global, national, and local dynamics and issues.

PROGRAMS

Honours Criminology

Degree Requirements

Total courses: forty.

- (a) SACR-1100, SACR-2910, SACR-2900, SACR-2600, SACR-2620, SACR-3080, SACR-3900;
- (b) In order to proceed in the Criminology program, the following are required: a minimum final grade of 70% in both SACR-2600 and SACR-2620. Those who do not meet these requirements will automatically be enrolled in the Sociology BA (Hons.) program, given that the degree requirements for the Sociology and Criminology programs are consistent through the second year of the programs. Students are thereafter able to change their major from Sociology to a different program if desired.
- (c) two of SACR-2200, SACR-2040, SACR-2050, BIOL-2063, SACR-2280, SACR-2400, SACR-2100, SSACR-3050, FRSC-3231, SACR-3270, SACR-3290, SACR-3150, SACR-3390, SACR-3400, SACR-3410, SACR-3500, SACR-3520, SACR-3530, SACR-3540
- (d) SACR-3560 or SACR-3730 or SACR-3910
- (e) three of SACR-3610, SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3500, SACR-3740, SACR-3820, and SACR-3710;
- (f) two 4000-level courses, including one of SACR-4210, SACR-4510, SACR-4910, SACR-4600, SACR-4610, SACR-4620, SACR-4640, SACR-4650, SACR-4670
- (g) two courses from Arts;
- (h) two courses from Languages or Science;
- (i) two courses from any area of study, excluding Social Sciences.
- (j) GART-1500, GART-1510;
- (k) SOSC-2500;
- (l) seven courses from Arts, Languages, Social Sciences, including Sociology
- (m) nine courses from any area of study, excluding Sociology.

Courses used to calculate the major average are: courses listed under requirements (a) to (e), and any courses taken in the major area(s) of study.

Recommended Courses:

Anthropology: FRSC-3231

History: HIST-1240, HIST-2440, HIST-2470, HIST-2500, HIST-2510, HIST-2470

Labour Studies: WORK-1000, WORK-2000

Philosophy: PHIL-2210, PHIL-1290, PHIL-2260

Political Science: POLS-1000, POLS-1300, POLS-1600, POLS-2110, POLS-2130, POLS-2140, POLS-2210, POLS-2670, POLS-2680, POLS-3090, POLS-3140, POLS-3210

Psychology: PSYC-1150, PSYC-1160, PSYC-2200, PSYC-2230, PSYC-2240, PSYC-2360, PSYC-3330, PSYC-3220, PSYC-3300, PSYC-2280

Women Studies: WGST-1000, WGST-2200, WGST-2700, WGST-3100, WGST-3300

Notes:

1) Students interested in government service should include French language courses in their studies; other non-English language courses also are recommended.

Combined Honours Criminology Programs

To combine Criminology with Sociology, see Combined Honours in Sociology and Criminology below.

An Honours Criminology Degree can be combined with a specialization in another subject (e.g., psychology, political science, etc.). In order to proceed in the Criminology program, the following are

required: a minimum final grade of 70% in both SACR-2600 and SACR-2620. Note: the minimum course grades identified only apply to the Criminology component of Combined Criminology BA programs.

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

((a) Criminology: fifteen courses including SACR-1100, SACR-2910, SACR-2900, SACR-2600, SACR-2620, SACR-3080, SACR-3900; SACR-3730 or SACR-3910 or SACR-3560; three of SACR-3610, SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3500, SACR-3740, SACR-3820, and SACR-3710; two 4000-level courses, including one of SACR-4210, SACR-4500, SACR-4910, SACR-4600, SACR-4610, SACR-4620, SACR-4640, SACR-4650, SACR-4670; and two of any other Sociology (SACR-) courses. (b) In order to proceed in the Criminology program, the following are required: a minimum final grade of 70% in both SACR-2600 and SACR-2620. Those who do not meet these requirements will automatically be enrolled in the Sociology BA (Hons.) program, given that the degree requirements for the Sociology and Criminology programs are consistent through the second year of the programs. Students are thereafter able to change their major from Sociology to a different program if desired. (c) Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(d) GART-1500, GART-1510;

(e) SOSC-2500;

(f) two courses from Arts;

(g) two courses from Languages or Science;

(h) two courses from any area of study, excluding Social Sciences.

(i) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) to (b), and any courses taken in the major area(s) of study.

Notes:

1) Students interested in government service should include French language courses among their options; other non-English language courses also are recommended.

2) Students are encouraged to closely review prerequisites for other courses to ensure appropriate planning of their program of study.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Criminology

Major Concentration: SACR-1100; two of , SACR-3270, SACR-3330, SACR-3390, SACR-3520, SACR-3530, SACR-3540; SACR-2910; SACR-2900; SACR-2600; SACR-2620; SACR-3900; SACR-3730 or SACR-3910; three of SACR-3610, SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3500,

SACR-3740, and SACR-3820, and SACR-3710; two 4000-level courses, including one of SACR-4210, SACR-4510, SACR-4910, SACR-4600, SACR-4610, SACR-4640, SACR-4650, SACR-4670.

In order to proceed in the Criminology program, the following are required: a minimum final grade of 70% in both SACR-2600 and SACR-2620. Those who do not meet these requirements will automatically be enrolled in the Sociology BA (Hons.) program, given that the degree requirements for the Sociology and Criminology programs are consistent through the second year of the programs. Students are thereafter able to change their major from Sociology to a different program if desired.

Minor Concentration: No Minor Concentration offered.

General Family and Social Relations

Degree Requirements

Total courses: thirty.

- (a) SACR-1100, SACR-2040; SACR-2050; SACR-2900; one of SACR-3900, SACR-3900, or WGST-3060*;
- (b) one of HIST-2500, HIST-2510, PSYC-2400*, WGST-1000.
- (c) five further courses, from among: SACR-3290, SACR-4090, SACR-4610, SACR-2100, SACR-3050, SACR-4510, SACR-3520, SACR-3530, SACR-3540, SACR-4080, WGST-2200, WGST-3100, PSYC-2230, PSYC-2240, PSYC-3270, SWRK-1170, SWRK-1180.
- (d) two courses from Arts;
- (e) two courses from Languages or Science;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510;
- (h) SOSC-2500 (or equivalent);
- (i) PSYC-1150 and PSYC-1160 if required as a prerequisite for courses chosen above: otherwise, two Social Science courses;
- (j) WGST-1000 if required as a prerequisite for courses chosen above; otherwise, a Social Science course;
- (k) additional courses from any area of study, including any course listed above not used to fulfill other requirements, to a total of thirty.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

*NOTE: PSYC-1150 and PSYC-1160 are prerequisites for further courses in Psychology. WGST-1000 is a prerequisite for further courses in Women's and Gender Studies.

Honours Family and Social Relations

Degree Requirements

Total courses: forty.

- (a) SACR-1100, SACR-2040, SACR-2050, SACR-2900 (or equivalent), SACR-3080, one of SACR-3900, SACR-4160, WGST-3060;
- (b) one of PSYC-2400, SACR-3010, , HIST-2500, HIST-2510, WGST-1000;
- (c) three courses in the family, in sexuality or in gender:

Family Courses: SACR-3290, SACR-4090**, SACR-4610**; SACR-3050, SACR-4510, HIST-3630, WGST-3100;

Gender Courses: three from among those not chosen under (b) above, or from the following: SACR-3530, SACR-3540, SACR-4080**, WGST-2200, WGST-3100. If not selected under (b), WGST-1000 must be chosen here.

(d) six further courses selected from those not chosen above, or from the following: PSYC-2230, PSYC-2240, PSYC-3270, SWRK-1170, SWRK-1180, SACR-4960.**

(e) two courses from Arts;

(f) two courses from Languages or Science;

(g) two courses from any area of study, excluding Social Sciences.

(h) GART-1500, GART-1510;

(i) SOSC-2500 (or equivalent);

(j) PSYC-1150 and PSYC-1160, if required as a prerequisite for courses chosen above: otherwise, two Social Science courses;

(k) WGST-1000, if required as a prerequisite for courses chosen above, but not used as part of a concentration in gender; otherwise, a Social Science course;

(l) additional courses from any area of study, including any course listed above not used to fulfil requirements (h) to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) to (d), and any courses taken in the major area(s) of study.

Note: PSYC-1150 and PSYC-1160 are prerequisites for further courses in Psychology. WGST-1000 is a prerequisite for further courses in Women's and Gender Studies.

** Highly recommended for those considering graduate work.

Family and Social Relations Honours students interested in graduate studies in Sociology should include the following courses in their program: SACR-2910, SACR-3910, plus one of SACR-4050 or SACR-4080.

Combined Honours Family and Social Relations

Not available for a Combined Honours degree with Sociology.

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

(a) Family and Social Relations: thirteen courses, consisting of:

(i) SACR-1100, SACR-2040, SACR-2050, SACR-2900 (or equivalent), one of SACR-3900, SACR-3900, SACR-4160, or WGST-3060;*

(ii) one of PSYC-2400*, , , HIST-2500, HIST-2510, WGST-1000***;

(iii) three courses from one of the following areas:

Family: SACR-3290, SACR-4090**, SACR-4610**; SACR-3050, SACR-4510**, WGST-3100*;

Gender: SACR-3520, SACR-3530, SACR-3540, SACR-4080**, WGST-2200*, WGST-3100*.

(iv) four courses from those not selected above, or from the following: PSYC-2230*, PSYC-2240*, PSYC-3270*, SWRK-1170, SWRK-1180, SACR-4960**

(b) Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) GART-1500, GART-1510;

(d) SOSC-2500 (or equivalent)

(e) two courses from Arts;

(f) two courses from Languages or Science;

(g) two courses from any area of study, excluding Social Sciences.

(h) additional courses from any area of study to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) to (b), and any courses taken in the major area(s) of study.

PSYC-1150 and PSYC-1160 are prerequisites for further courses in Psychology.

WGST-1000 is a prerequisite for further courses in Women's and Gender Studies.

** Highly recommended for those considering graduate work.

***Students who plan to take additional Women's and Gender Studies courses must take this course.

Note: Family and Social Relations Honours students interested in graduate studies in Sociology should include the following courses in their program: SACR-2910, SACR-3910, plus one of SACR-4050 or SACR-4080.

Minor in Family and Social Relations

Six of: SACR-2040, SACR-2050, SACR-3050, SACR-3010, SACR-3290, SACR-4090, SACR-4290, and SACR-4510.

General Sociology

Degree Requirements

Total courses: thirty.

(a) SACR-1100, SACR-2200, SACR-2900, SACR-2910, SACR-3900, SACR-3910 or SACR-3560.

(b) three Sociology (SACR-) courses at the 3000 or 4000 level

(c) one additional Sociology (SACR-)course;

(d) two courses from Arts;

(e) two courses from Languages or Science;

(f) two courses from any area of study, excluding Social Sciences.

(g) GART-1500, GART-1510;

(h) six courses from any area of study, including Sociology (SACR-);

(i) six courses from any area of study, excluding Sociology (SACR-).

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Honours Sociology

Degree Requirements

Total courses: forty.

- (a) SACR-1100, SACR-2200, SACR-2900, SACR-2910, SACR-3080, SACR-3900, and SACR-3910 or SACR-3560;
- (b) four Sociology (SACR-) courses at the 3000 level (excluding SACR- Criminology courses listed under*)
- (c) two Sociology (SACR*) courses at the 4000 level (excluding SACR- Criminology courses listed under*)
- (d) two additional Sociology (SACR-) courses (excluding SACR- Criminology courses listed under*)
- (e) two courses from Arts;
- (f) two courses from Languages or Science;
- (g) two courses from any area of study, excluding Social Sciences.
- (h) GART-1500, GART-1510;
- (i) SOSC-2500;
- (j) seven courses from Arts, Languages, or Social Sciences, including Sociology (SACR-XXXX);
- (k) nine courses from any area of study, excluding Sociology (SACR-XXXX).

Courses used to calculate the major average are: courses listed under requirements (a) to (d), and any courses taken in the major area(s) of study.

* SACR- Criminology courses: SACR-2600, SACR-2620, SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3710, SACR-3730, SACR-3740, SACR-4600, SACR-4610, SACR-4640, SACR-4650, SACR-4670 and SACR-4910.

Combined Honours Sociology Programs

To combine Sociology with Criminology, see Combined Honours in Sociology and Criminology below.

Program Regulation

Students in combined programs must complete all courses used to calculate the major average for both subject areas, and GART-1500 and GART-1510. They must also complete the degree requirements, in the order presented to a total of forty courses. Example: If the total course requirements add up to 43 once the requirements for the second subject area are included, the degree requirements are to be completed in the order presented, until the student reaches a total of 40 courses.

Degree Requirements

Total courses: forty.

- (a) SACR-110, SACR-2200, SACR-2900, SACR-2910, SACR-3080, SACR-3900, and SACR-3910 or SACR-3560;
- (b) four Sociology (SACR-) courses at the 3000 level (excluding SACR- Criminology courses listed under*);
- (c) two Sociology (SACR-) courses at the 4000 level (excluding SACR- Criminology courses listed under*);
- (d) two additional Sociology (SACR-) courses (excluding SACR- Criminology courses listed under*)

*SACR- Criminology courses: SACR-2600, SACR-2620, SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3710, SACR-3730, SACR-3740, SACR-4600, SACR-4610, SACR-4640, SACR-4650, SACR-4670, and SACR-4910

Course Requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

- (e) GART-1500, GART-1510;
- (f) SOSC-2500 (or equivalent);
- (g) two courses from Arts;
- (h) two courses from Languages or Science;
- (i) two courses from any area of study, excluding Social Sciences.
- (j) additional courses from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirement (a) and (b), and any courses taken in the major area(s) of study..

Combined Honours in Sociology and Criminology

Degree Requirements

Total courses: forty.

- (a) SACR-1100, SACR-2200, SACR-2600, SACR-2620, SACR-2900, SACR-2910, and SACR-3080 or SACR-3900*
- (b) In order to proceed in the Criminology program, the following are required: a minimum final grade of 70% in both SACR-2600 and SACR-2620. Those who do not meet these requirements will automatically be enrolled in the Sociology BA (Hons.) program, given that the degree requirements for the Sociology and Criminology programs are consistent through the second year of the programs. Students are thereafter able to change their major from Sociology to a different program if desired.
- (c) SACR-3560 or SACR-3730 or SACR-3910
- (d) four of SACR-2040, SACR-2050, BIOL-2063, SACR-2280, SACR-2400, SACR-2100, SACR-3010, SACR-3050, FRSC-3231, SACR-3270, SACR-3290, SACR-3330, SACR-3150, SACR-3390, SACR-3400, SACR-3410, SACR-3500, SACR-3520, SACR-3530, SACR-3540
- (e) one of SACR-4050, SACR-4080, SACR-4160, SACR-4220, SACR-4290, and SACR-4510
- (f) four of FRSC-3231, SACR-3610, SACR-3620, SACR-3630; SACR-3650, SACR-3670, SACR-3680, SACR-3700, SACR-3710, SACR-3740, and SACR-3820
- (g) one of SACR-4210, SACR-4600, SACR-4610, SACR-4620, SACR-4640, SACR-4650, SACR-4670, SACR-4910
- (h) two courses from Arts;
- (i) two courses from Languages or Science;
- (j) two courses from any area of study, excluding Social Sciences.
- (k) GART-1500, GART-1510;
- (l) SOSC-2500;
- (m) seven courses from Arts, Languages, or Social Sciences, including Sociology (SACR-);
- (n) 6 courses from any area of study, excluding Sociology and Criminology (SACR-) courses until the student reaches a total of 40 courses.

Courses used to calculate the major average are: courses listed under requirement (a) to (g), and any courses taken in the major area(s) of study.

*Students considering graduate schools that require training in both qualitative and statistical methods or careers in data analysis are advised to take both SACR-3080 and SACR-3900.

Minor in Sociology

Required: six Sociology courses, including SACR-1100 and five courses at the 2000 level or above.

Minor in Anthropology

Required: six courses, including SACR-1100; SACR-2200; BIOL-2063; and three of FRSC-3231, SACR-3150, SACR-3390, SACR-3560 or SACR-3910, FRSC-4120.

SOCIOLOGY AND CRIMINOLOGY COURSES

Not all courses listed will necessarily be offered each year. All courses are three hours a week unless otherwise indicated.

SACR-1100. Foundations of Social Life

This course will introduce students to the key concepts, theories, and methods appropriate to Sociology, and Criminology. Focus will be on application of issues important to studying social life using multiple perspectives while exercising the sociological imagination. Topics may include discussion of culture, gender, social stratification, race and ethnicity, family, and crime and deviance.

SACR-1110. Introduction to Family and Social Relations

This course introduces students to the field of family and social relations. It includes introduction to family processes, the legal and social contexts of family life, and definitional issues related to family, childhood, and an ageing population.

SACR-2040. Sociology of Families

Sociological perspectives on cross-cultural variations and changes in family forms. Topics may include discussion of marriage, kinship, family structure and organization of intimate relationships.

(Prerequisites: third semester standing.)

SACR-2050. Sociology of Sexualities

An analysis of sexual differentiation, sex role acquisition, sexual attitudes, sexual behaviour, and the sex structure of Canadian society. (Prerequisites: third semester standing.)

SACR-2100. Gender, Sexuality and Social Justice

This course examines the personal and cultural meanings of sexual and gender identities in Canada today. Students consider how sexual and gender identities are created and experienced in conjunction with other identities such as race/ethnicity, social class, and (dis)ability and explore social justice activism that challenges the personal, social, political, and economic inequities based on these identities. Topics may include: transgender, intersex, and non-binary perspectives, Indigenous and queer people of colour activism, 2SLGBTQIA+ identities, feminist online resistance, disability and desirability, colonialism and the sex/gender binary, and the social construction of sex, gender, and sexuality. (Also offered as WGST-2100.)

(Prerequisites: WGST-1000.)

SACR-2160. Education and Society

This course employs sociological perspectives on education as central to social reproduction (in the transmission of knowledge, skills and values), as well as its place within broader social struggles and the creation and maintenance of social inequalities. Central theories are reviewed in light of empirical studies. Topics may include: schools as agents of socialization, stratification in education, social mobility,

schooling and the labour market, cross-cultural educational practices, alternative forms of schooling, peer group influence, higher education, teacher-student relations, apprenticeships, arts-training, and the challenges associated with school violence. (Prerequisites: third semester standing.)

SACR-2170. Religion and Society

This course investigates religion as a social institution, examining beliefs, symbols, relations and practices. Central theories and methods are reviewed in light of historical and cross-cultural variations. Interactions with culture, education, family, community, the economy, and politics are considered. Topics may include: the sacred and the profane, secularization, myth, totemism, cults, fundamentalisms, integration, exclusion, violence, new religions and/or new age movements. (Prerequisites: third semester standing.)

SACR-2200. Social Dilemmas: Social Science Perspectives

This course will examine major sociological issues facing countries today, such as economic inequality, political polarization, racism and racialization, immigration, human rights, education, media, globalization, incarceration, precarious work, gender and family, and climate change. It will explore how social science research measures and tracks changes in these areas. It will examine, for example, how different ideologies, ethical frameworks, and political positions on these issues address these issues, and how public policies, popular media, and politicians use social science research. (Prerequisite: second-semester standing).

SACR-2280. Class, Wealth and Power in Canada

The study of structured social inequality. The existence of class and power structures and their effects on the lives of Canadians. The relation of different forms of inequality based on class, ethnicity, and gender. The various strategies people employ to respond to inequality. (Prerequisites: third semester standing.)

SACR-2400. Introduction to Race and Ethnicity

An introduction to race and ethnic relations, with global and Canadian perspectives, which may draw on both sociological and anthropological literature. Topics may include Canadian cultural, indigenous, ethnic and racial identities; multiculturalism; im/migration and integration; separatist movements; pursuit of collective rights; transnationalism and diaspora. (Prerequisites: third semester standing.)

SACR-2600. Introduction to Criminology

Theories and research in crime causation, the nature and extent of crime, and policy responses. (Prerequisites: SACR-1100)

SACR-2620. Introduction to Criminal Justice

This course will examine the creation and administration of law and justice. Topics may include: legal systems, legal and justice professionals, civil and criminal law, courts and sanctions. Focus of the course will vary by instructor. (Prerequisites: SACR-1100)

SACR-2900. Researching Social Life

Introduction to social research with focus on guiding students through the research process. This includes: constructing a research problem; formulating research questions; conducting a literature review; evaluating journal articles; understanding research ethics; and becoming familiar with quantitative and qualitative research methods. At the end of the course, it is expected that students will obtain a Research Ethics Certificate (TCPS2). (Prerequisites: SACR-1100; students must be in semester 3 of their program to register for this course).

SACR-2910. Theorizing Social Life

This course introduces students to theoretical work by focusing on classical social theorists such as Marx, Weber, and Durkheim and showing how classical approaches inform contemporary social analysis. Students learn how to interpret and persuasively appropriate theory, think conceptually, reflect on the basic assumptions of social analysis, and assess explanations. Topics covered typically include approaches to social order and change, modernity, ways of conceptualizing society and social life, methodology, institutional dynamics, class, inequality, and culture (Prerequisites: SACR-1100 ; students must be in Semester 3 of their program to register for this course).

SACR-3010. Sociology of Childhood

This course explores the experience of childhood as a moment within the human life cycle, yet one subject to great variation according to the family and social context. Students will become familiar with ongoing debates about the nature of children and childhood, the concept of socialization, the role and place of children in family, social, and economic life, as well as children's own agency in shaping their lived experience. (Prerequisites: SACR-2040 and semester 5 or higher standing.)

SACR-3050. Sexuality and Health

Contemporary topics in sexuality and health examined from Canadian and international perspectives, such as HIV and AIDS, sexual health movements, and the social construction of sexual dysfunction. (Prerequisite: SACR-2050 and semester 5 or higher standing)

SACR-3080. Intermediate Statistics

Basic inferential statistics, including estimation, confidence intervals, and hypothesis testing. Also included is the application of computer packages to selected statistical problems. (Prerequisite: SOSC-2500, SACR-2900 (or equivalent), and semester 5 or higher standing.) (Credit can only be obtained for one of PSYC-3130 or SACR-3080.) (2 lecture hours, 1 laboratory hour a week.)

SACR-3150. On Death and Dying

A critical exploration of topics related to death and dying. Topics covered may include: historical and cross-cultural perspectives on dying and death; memorial and commemoration; palliative care and medical aid in dying; death and popular culture; genocide and mass deaths; pandemics; the construction and medicalization of death; and death planning. Course delivery may vary according to instructor preference. (Pre-requisites: Semester 5 or higher standing or permission of instructor). (Cross-listed with SOSC-3150)

SACR-3270. Social Movements

An examination of theories and case studies of world revolutions, class struggles, and various social movements, such as the feminist, gay and lesbian, labour, native, ecological, and other movements. (Also offered as WORK-3270.) (Prerequisites: SACR-1100 or WORK-1000 and semester 5 or higher standing.) (Credit can only be obtained for either SACR-3270 or WORK-3270.)

SACR-3290. Contemporary Families

Examines the empirical sociological literature on families and their formation in the context of postwar change with emphasis on the Canadian experience, including key demographic trends such as the rise of cohabitation and two-earner families, and changes in divorce rates. (Prerequisites: SACR-2040 or SACR-3010 and semester 5 or higher standing)

SACR-3330. Crimes of the State: Genocide, War Crimes and Ethnic Cleansing

This course examines complex issues related to genocide, war crimes, ethnic cleansing and other related crimes of the state in comparative contexts and considers the possibilities and constraints of

international law and humanitarian intervention in detecting and preventing future mass atrocities. (Prerequisites: SACR-2400 and semester 5 or higher standing.)

SACR-3390. Refugees, Borders, and Human Rights

Who are refugees, illegal migrants and asylum seekers? Where do asylum seekers come from and why? What do states do about them? Which agencies, actors and interest groups engage with refugees? What are the links between refugees and nationalism and racism, borders, immigration policies and attitudes, state sovereignty, diaspora and transnationalism, human rights and cultural identities? How do we understand borders, boundaries, and biopolitics in our contemporary world? This course provides the student with the analytical skills to interpret historical and contemporary claims, vested interests and local, regional and global complexities of these issues. (Prerequisites: one of SACR-2200 or SACR-2400, and semester 5 or higher standing.)

SACR-3400. Food and Global Sustainability

This course offers a comparative examination of the emergence of a global food system and its implications for culture, environment, working conditions, health, and population movements. (Prerequisites: one of SACR-1100 or SACR-2200 and semester 5 or higher standing or instructor's consent.)

SACR-3410. Human-Animal Studies

A sociologically-informed examination of the growing field of human-animal studies, focusing on the effects of social, legal, political, economic, technological, and cultural change on our relations with and representations of nonhuman animals. Topics covered may include examining the socio-political constructions of animals, policies governing the (ab)use of animals, consumptive practices involving animals, use of animals for leisure and entertainment, and intersectional conceptions of social, environmental and species justice. (Prerequisites: semester 5 or higher standing.)

SACR-3500. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at bystanderinitiative.ca) (Also offered as KINE-3501, PSYC-3500, SOSC-3500, SJST-3500, SWRK-3500, and WGST-3500.)

SACR-3520. Citizenship, Rights, and Social Justice

An examination of the impact of the 'global' on social and economic processes, human rights and struggles over rights in specific locales worldwide. Topics may include: gender-based violence, poverty and 'development', children's rights, changing labour practices; human rights principles and institutions; and cultural and political struggles for rights in European, North American, and post-colonial settings (Prerequisite: one of SACR-2200, SACR-2400 or SACR-2910 and semester 5 or higher standing or instructor's consent.)

SACR-3530. Women, Power, and the Environment

This course focuses on environmental issues as they affect women across cultures. It provides a feminist critical analysis of the power relations in modern societies that cause environmental degradation and examines the theories, policies, and institutions that contribute to unsustainable practices. Emphasis is placed on the women-nature debate within various environmental social movements and the historical role women have played as activists. (Also offered as Women's and Gender Studies WGST-3530.)

(Prerequisite: Semester 5 or higher standing and one course at the 2000-level or above from Women's and Gender Studies.)

SACR-3540. Home, Work and Leisure in the Digital Age

An intersectional exploration of how home, work and leisure are reproduced through space-time relations that are organized and augmented by mobile technologies. Topics may include an investigation of the home as a contested racialized and gendered workspace, remote and mobile technologies in identity practices, history making and community-building, or the changing meaning of mobility for workers under globalization. (Also offered as Sociology WGST-3540.) (Prerequisites: SACR-1100 or WGST-1000 and semester 5 or higher standing.)

SACR-3560. Cultural Theory

Through a selective examination of social theory, this seminar examines key ideas that inform identities and reflect contemporary issues. Topics may include: race, culture and ethnicity, colonial and post-colonial theory. (Prerequisite: SACR-2900 and SACR 2910 and semester 5 or higher standing.)

SACR-3610. Youth in Conflict with the Law

The course covers theories of delinquency causation, the youth justice system, Youth Criminal Justice Act, prevention, and treatment programs. (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing.)

SACR-3620. Victimology

Victimology is a subfield of criminology that focuses on victims within the study of crime. Topics explored may include: victimology patterns, the process and aftermath of the victimization experience, the involvement and treatment of victims in the criminal justice system, legal remedies and services available to victims, restorative justice initiatives, and victims' rights. (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing.)

SACR-3630. Penology

Study of the correctional institution including the impact of prison on inmates, the prison subculture, prison architecture, and administration, special institutions, and the assessment of education, occupational, recreational, and treatment programs. (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing.)

SACR-3650. Green Criminology

This course will introduce undergraduate students to green criminology, a new and growing sub-field within criminology examining harms (criminal and otherwise) perpetrated against the environment and human and non-human animals. It examines the conceptual and theoretical developments within this field, as well as specific substantive harms, the various layers of actors involved, and the potentials and limitations of regulation. (Prerequisites: SACR-2600, SACR-2620 and semester 5 or higher standing.)

SACR-3670. White Collar Crime

This course focuses on criminal and non-criminal harms perpetrated by powerful individuals, organizations, and institutions. Topics covered may include political corruption, genocide, environmental crime, workplace injury and death, food contamination, stock market manipulation and various other kinds of fraud. The development and enforcement of criminal, administrative, and civil law will be examined along with different theoretical perspectives on this specific type of criminal behaviour. (Prerequisites: SACR-2600, SACR-2620 and semester 5 or higher standing)

SACR-3680. Policing and Security

This course will provide an overview of the development of public policing and security in Canadian society. Topics will include the history, development, organization, role and mandate of public policing. The course will also introduce students to the concept of security and will cover interpretive models for assessing how policing and security are governed and practiced both in Canada and internationally (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing).

SACR-3700. Selected Topics in Criminology

Course content varies by instructor and can be taken more than once if content changes. Details about the course will be made available through the department. (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing.)

SACR-3710. Drugs and Society

Using a sociological perspective, this course aims to provide a foundation for the critical understanding of drugs and society. In particular, this course explores the various processes (i.e., social, cultural, political, economic) that shape our understanding of and policies towards drugs and drug use in historical and contemporary society. (Prerequisites: SACR-2600, SACR-2620, and semester 5 or higher standing.)

SACR-3730. Contemporary Criminological Theory

A review of modern theoretical approaches in criminology. (Prerequisites: SACR-2910, SACR-2900, SACR-2600 and SACR-2620 and semester 5 or higher standing.)

SACR-3740. Crime, Media and Culture

This course explores the relationships between crime, crime control, media and popular culture by focusing on the theoretical understanding of the interplay between crime, media and culture, how crime and crime control are represented through various forms of media, and the potential effects of various media on crime and crime control policy. Focus and topics may vary by instructor. (Prerequisite: SACR-2600; SACR-2620; and semester 5 or higher standing).

SACR-3820. Surveillance and Society

The course provides an overview of surveillance in contemporary society. Substantive topics may include surveillance in relation to national security, covert police activities, social media, consumers, workplace, biometrics and inequality, social sorting, privacy, and privacy law/regulation. Focus of the course will vary by instructor. (Prerequisites: SACR-2600; SACR-2620; and semester 5 or higher standing).

SACR-3900. Qualitative Approaches to Social and Cultural Research

An exploration and application of interpretive research strategies. Student will be taught to employ various techniques as they bear on real world issues and research questions. Techniques may include for example, participant observation, historical comparative analysis, oral histories, interviewing, cultural and discourse analysis. Students are expected to hold their TCPS certificate and learn to apply ethical issues specific to the interpretive and qualitative methodologies employed in the course. (Prerequisites: SACR-2900 (or equivalent), SACR-2910, and semester 5 or higher standing)

SACR-3910. Contemporary Social Theory

Investigates influential contemporary approaches to understanding and explaining social life. Emphasis is placed on epistemology, ontology and normativity, and on critically evaluating and creatively using theory. Theories covered may include Symbolic Interactionism, Structural-Functionalism, Phenomenology, Structuralism, Neo-Marxism, Psychoanalysis, Feminism, Postmodernism, and Postcolonialism among others. (Prerequisite: SACR-2910, SACR-2900 (or equivalent), and semester 5 or higher standing.)

SACR-3970. Selected Topics in Sociology

Course content will vary by instructor. This course may be taken more than once if content changes. (Prerequisites: semester 5 or higher standing.)

SACR-4050. Advanced Seminar in Social Theory

An exploration of contemporary social theory as it bears on sociology and related disciplines. Theoretical approaches examined will vary by instructor. (Prerequisite: SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4080. Advanced Seminar in Feminism

This course explores contemporary feminist thought; it includes the application of feminist theories to the understanding of social issues, political engagement and cultural struggles. Key topics may include diversity and identities, globalization, the politics of pleasure, reproductive politics, gender, sexualities, and social movements. (Prerequisite: SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4090. Advanced Seminar in Family, Gender and Culture

A critical examination of key issues and debates in multiple family forms and relations in contemporary society. The course will adopt a cross-cultural approach examining and analyzing family forms and processes with emphasis on the intersectionalities of gender, culture, age, ethnicity, and class. (Prerequisites: SACR-2040, SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4160. Survey Research Capstone

The design, implementation, and analysis of sample surveys of topical and timely issues related to social life. (Prerequisite: SACR-2900 (or equivalent), SACR-3080, and three 2000 or 3000-level courses; a minimum of 73% in the program; semester 7 or higher standing, and permission of the instructor) (3 lecture hours, or 2 lecture hours, one tutorial/laboratory hour a week.)

SACR-4210. Special Topics in Sociology and Criminology

Topics may vary by instructor; consult the departmental website for details. (Prerequisites: SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.) (May be repeated for credit if content changes.)

SACR-4220. Advanced Seminar on Race and Ethnicity

This course explores theoretical approaches to race and ethnicity with a focus on political and cultural struggles and issues encountered by racialized and ethnic minorities. Topics may include: multicultural politics, anti-racist strategies, transnational and diasporic mobilization, and in intersectionality. (Prerequisites: SACR-2400; SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4290. Advanced Seminar in Family Studies

Discussion of major themes in family theory, which may include explanations for family forms, functioning, processes and structure. (Prerequisites SACR-2040, SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4500. Practicum in Social Change

Supervised practicum in a university setting. Students consolidate and enhance their knowledge of sexual assault and bystander intervention. Students co-facilitate the Bringing in the Bystander® In Person Prevention program for one or more small groups of students on campus. The practicum experience

equips students to deliver educational content on sensitive issues. (Prerequisite: Final mark of 75% in KINE-3501, SOSC-3500/PSYC-3500/SJST-3500/SACR-3500/SWRK-3500/WGST-3500 and permission of the instructor.) (Also offered as PSYC-4500, SJST-4500, SOSC-4500, SWRK-4500, and WGST-4500.) (This is an experiential learning course.)

SACR-4510. Advanced Seminar in Sexualities and Identities

A critical engagement with the historical, contemporary and newly burgeoning sociological approaches to sexualities and sexual identities. The course will adopt a cross-cultural approach in examining and analyzing human sexualities, with emphasis on the intersectionalities of other forms of inequality such as gender, race, ethnicity, disability, and class. Topics may vary from year to year. (Prerequisite: SACR-2050, SACR-3910 or SACR-3560 or SACR-3730; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4600. Advanced Seminar in Deviance and Social Issues: Policies and Debates

Using relevant theory and research, this course engages in a critical exploration of policies and debates concerning deviance and social issues. Substantive topics will vary by instructor. (Prerequisites: SACR-2600, SACR-3910 or SACR-3730 or SACR-3560; SACR-3900 or SACR-3080 and semester 7 or higher standing, or consent of instructor.)

SACR-4610. Advanced Seminar in Law and Social Policy

This course explores theory and research concerned with legal and government policies and their impact on individuals, social institutions and society. Substantive topics will vary by instructor. (Prerequisites: SACR-3910 or SACR-3730 or SACR-3560; SACR-3900 or SACR-3080 and semester 7 or higher standing; at least one 3000-level course from the 3000-level criminology course selection or consent of instructor.)

SACR 4620. Advanced Seminar in Policing, Security, and Surveillance

This course explores theory and research about 21st Century developments in policing, security, and surveillance. Topics may cover intelligence-gathering, pre-crime, fusion centres, social media policing, body-worn cameras, artificial intelligence/predictive policing, and big data surveillance by public and private agencies. (Prerequisites: SACR-2600; SACR-2620; SACR-3820 or SACR-3680 or SACR-3730; SACR-3910 or SACR-3080, and semester 7 or higher standing.)

SACR-4640. Advanced Seminar in Sociology of Law

An investigation of theory and research in the sociology of law. Topics may include the social construction of law, the legal profession, law and social change, legal consciousness, law as governance, legal avoidance, moral regulation, and popular representations of law. Criminal and other forms of law will be discussed in relation to these topics. Focus of the course will vary by instructor. (Prerequisites: SACR-3910 or SACR-3730 or SACR-3560; SACR-3900 or SACR-3080 and semester 7 or higher standing; at least one 3000-level course from the 3000-level criminology course selection; or consent of instructor.)

SACR-4650. Advanced Seminar in Gender, Law, and Crime

This course will examine the ways gender intersects with the law and crime. It focuses on the importance of taking gender into consideration in understanding offending and victimization, the development and impacts of legislation, and the work of the criminal justice system. Focus of the course will vary by instructor. (Prerequisites: SACR-3910 or SACR-3730 or SACR-3560; SACR-3900 or SACR-3080 and semester 7 or higher standing; at least one 3000-level course from the 3000-level criminology course selection; or consent of instructor.)

SACR-4670. Criminology Professional Development Internship

This course provides students in the Criminology program with the opportunity to apply learned concepts and theory to a practical setting and to become further familiarized with an area related to Criminology. Students will be placed in organizations in the Windsor-Essex region related to their area of interest within Criminology (e.g., the law, corrections, etc.) and will be expected to dedicate a total of 100 hours to both the in-class learning and practicum components of the course. Additionally, students will be required to complete assignments as assigned by the instructor. This course is open to Criminology majors only. (Prerequisites: SACR-2600, SACR-2620, SACR-3730 or SACR-3910 or SACR-3560, semester 7 or higher standing, and minimum major average of 73%.)

SACR-4910. Advanced Seminar in Criminology

This course exposes students to advanced criminological topics through the lens of the instructor's current research. Practical and/or theoretical implications of the research within local, national, global and/or cyberspace communities will be examined. Topics will vary by instructor. (Prerequisites: SACR-2600; SACR -2620; SACR-3910 or SACR-3730 or SACR-3560; SACR-3900 or SACR-3080 and semester 7 or higher standing; at least one 3000-level course from the 3000-level criminology course selection; or consent of instructor.)

SACR-4960. Honours Essay

Independent research or internship conducted under the supervision of an individual faculty member. (Prerequisites: SACR-3910 or SACR-3560 or SACR-3730, SACR-3080; SACR-3900 and semester 7 or higher standing; or consent of instructor.)

ODETTE SCHOOL OF BUSINESS

BUSINESS PROGRAM REGULATIONS

FOR ALL SPECIALIZATIONS

Students in the thesis option must complete BUSR-4950 and BUSR-4990. Students who have enrolled in BUSR-4990 prior to Winter 2018 may substitute BUSR-4950 with a fourth-year research-based independent study course.

Co-operative Education Program Regulations

The Business Administration Co-op Program integrates 3 four-month, paid, full-time, career related work terms. By combining semesters of study with career-related positions, students acquire valuable professional experience in the workplace.

Students can apply for the Business Administration Co-op Program either directly out of their Grade 12 (or equivalent) Year, or in the Fall term of their second year of study in either the Co-operative option is only available for the Bachelor of Commerce (Honours) Business Administration program or the Bachelor of Commerce (Honours) Business Administration and Computer Science program.

Admission to the Program is competitive. Students applying directly out of grade 12 (or equivalent) year will be admitted based on academic achievement (typically, a minimum of 78% is required). Second-year, term one must have a minimum major average of 70%, a minimum cumulative average of 65%, and no more than one outstanding grade below 50%.

Post-admission, co-op stream students must maintain a major average of 70% or better, a cumulative average of 65% or better and cannot have more than one outstanding grade below 50%. One probationary term will be granted for students with a minimum major average of 65%, a minimum cumulative average of 60% and no more than one outstanding grade below 50%.

Once students have accepted an offer of employment for a work term, they must remain in the co-op program until they have completed their work term requirements. Failure to complete the work term and/or work term requirements (as per the work term course outline) will result in a non-pass grade for that work term course, and they may be required to withdraw from the co-op stream. The co-op fee for the work term is non-refundable.

The deadline to withdraw from the co-op program and receive a fee refund for the current study term is the 1st Friday of classes. Students in the fall of second year have an extended withdrawal deadline date provided by Co-operative Education & Workplace Partnerships.

Students who choose to withdraw from the co-op program, cannot re-join the co-op program at a future date.

All co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Co-operative Education and Workplace Partnerships office using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged

to seek co-op employment outside of the advertised postings by completing a guided job search process in partnership with their coordinator at Co-operative Education and Workplace Partnerships.

Students must successfully complete three work terms to be eligible for the co-op designation. Although we strive to provide co-op opportunities to all our students, placements are not guaranteed as students must be selected for employment by the employer.

Business and Business/Computer Science Co-op students must remain full-time students and typically follow a standardized work/study sequence schedule. Faculty advisors can assist with course scheduling. Work/study sequence changes are possible and must be approved by the WIL Coordinator and faculty advisor.

Year of Study	Fall Term	Winter Term	Summer Term
Year 1	Study term 1	Study term 2	Off
Year 2	Study term 3	Study term 4	Work term 1
Year 3	Study term 5	Work term 2	Study term 6
Year 4	Work term 3	Study term 7	Study term 8

Professional and Certificate Courses

Designated courses in the Management and Labour Studies area meet the educational requirements for achieving Professional Designation by the Human Resources Professionals Association of Ontario (HRPAO). Consult with a Faculty Advisor in Management and Labour Studies for details. The Michigan State Board of Accounting accepts graduates of the program with a major in accounting for the Certificate Examination. The Institute of Chartered Accountants of Ontario, the Society of Management Accountants of Ontario and the Certified General Accountants' Association of Ontario grant graduates of the Bachelor of Commerce program credits towards professional certification for the satisfactory completion of certain Business Administration courses. A faculty advisor in Accounting should be consulted with respect to the specific exemptions available.

PROGRAMS

Honours Business Administration (with/without Thesis; with/without Co-op; with/without Specialization)

The purpose of the Bachelor of Commerce program is to develop educated people with a grounding in business ideas and techniques which will help equip them for positions of responsibility in industry and commerce. The program is designed to provide the broad outlook needed in modern business, and accordingly stresses general procedures and methods of attack on problems. Students are guided toward independent study, and they are encouraged to grapple with business problems on their own. The objective is to give students an awareness of the position and significance of business in the world today.

Degree Requirements

Total courses: forty or 120 credits or forty three (129 credits) for Co-op Option.

(a) ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, FINA-2700, MGMT-3000, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000,

STEN-3970, STEN-4980; eight additional business courses or BUSR-4950, BUSR-4990 (6.0 credit course), and five additional business courses.

(b) ECON-1100, ECON-1110, MATH-1980/1250/1720/1760 (or equivalents);

(c) six additional courses from outside of the Odette School of Business Administration;

(d) six courses from any area of study including Business.

Students wishing a stronger Mathematics background should take MATH-1720 in addition to MATH-1980.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

This program cannot be completed through Distance Education.

Suggested Program Sequencing

YEAR 1

First Term

ECON-1100

MATH-1980/1250/1720/1760 (or equivalents)

STEN-1000

MGMT-1000 or MKTG-1310

One course from outside of Business Administration

Second Term

ECON-1110

ACCT-1510

MSCI-1000

MKTG-1310 or MGMT-1000

One course from outside of Business Administration

YEAR 2

First Term

MGMT-2400

ACCT-2550

FINA-2700

MSCI-2020

One course from outside of Business Administration

Second Term

MGMT-2430

FINA-2710

MSCI-2130

MSCI-2200

One course from within or outside of Business Administration

YEAR 3

First Term

MGMT-3000
MSCI-3310 or MSCI-3410
Three courses (Consult a faculty advisor).

Second Term
STEN-3970
Four courses. (Consult a faculty advisor).

YEAR 4

First and Second Terms
STEN-4980 and nine additional courses. (Consult a faculty advisor.)

Honours Business Administration Co-operative Education Program (with/without Thesis; with/without Co-op; and with/without Specialization)

Degree Requirements

Total courses: forty or 120 credits, plus three Co-op work terms

- (a) ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980; STEN-2050, STEN-3050, STEN-4050; eight additional business courses or BUSR-4950, BUSR-4990 (6.0 credit course), and five additional business courses.
- (b) ECON-1100, ECON-1110, MATH-1980/1250/1720/1760 (or equivalents);
- (c) six additional courses from outside of the Odette School of Business Administration;
- (d) six courses from any area of study including Business.

Students wishing a stronger Mathematics background or wishing to concentrate in finance should take MATH-1720 in addition to MATH-1980.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

This program cannot be completed through Distance Education.

Work experience obtained with C.A. firms and other designated organizations will count toward work experience required for obtaining a C.A. designation. Students in the C.A. stream will be given credit for work experience earned since September 1, 1997 with an office approved for the training of C.A. students.

Honours Business Administration and Economics (with/without Thesis; with/without Specialization)

The University of Windsor offers an Interdisciplinary Program leading to the Honours Business Administration and Economics. The objective of the program is to prepare students for the growing demand for graduates trained in Business with a strong Economics background. The program combines both the core of the Bachelor of Commerce program and the core of the Bachelor of Arts Economics program while allowing the student to use flexible course requirements to gain additional training in Economics.

Degree Requirements

Total course equivalents: minimum forty* (120 credits)

- a) Business 16 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980
- b) Business 7 courses: Seven business electives, alternatively, students in the Thesis Option will complete BUSR-4950, BUSR-4990 (6.0 credit course), and four additional business courses.
- c) Economics 13 courses: ECON-1100, ECON-1110, ECON-2120 (or STAT-2950), ECON-2210, ECON-2220, ECON-2310 and ECON-2320; plus six additional economics courses, at least 4 of which have to be at the 3000 level or above.
- d) Mathematics 1 course: MATH-1980/1250/1720/1760 (or equivalent);
- e) Statistics 1 course: MSCI-2020 or STAT-2910 (or STAT-2920)
- f) 2 courses from any area of study.

Courses used to calculate the major average are: The courses listed in sections a), b) c) and any courses taken in the major area of study.

*Students in this program may pursue any specialization offered by the Odette School of Business. This may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

*Students pursuing both a specialization and Thesis option may require more than 40 courses to be completed in order to meet all program, specialization and thesis requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

Recommended Course Sequencing for Honours Business Administration and Economics programs

Students who desire to specialize may need to modify this recommended sequence. These students should consult a Business academic advisor for an optimal sequence of courses.

One Economics course, 2000+ level

YEAR 4

First Term
Two Economics courses, 3000+ level
Three Business courses

Second Term
STEN-4980
Two Business courses
Two Economics courses, 3000+ level

Notes:

- 1) Non-specified courses taken in the Odette School of Business Administration should be chosen in consultation with the appropriate Area Chairperson and will lead to some specialization.
- 2) Non-specified courses taken in Economics should likewise be chosen in consultation with an advisor.
- 3) Credit may not be obtained for both of MGMT-3440 and ECON-3530.
- 4) Students who wish to accelerate their programs by taking courses in Summer must seek academic advising in the appropriate area.

Honours Business Administration and Mathematics (with/without Thesis; with/without Specialization)

Degree Requirements

Total courses: minimum forty* (120 credits)

- a) Business 20 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, FINA-2700, MGMT-3000, FINA-2710, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980; five additional business courses OR BUSR-4950 (3 credits), BUSR-4990 (6 credits) and two additional business courses for Thesis Option,
- b) Mathematics and Statistics 14 courses: MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-1020, MATH-2780, MATH-2790, MATH-2250, MATH-2251, MATH-3580, MATH-3581, MATH-3590, MATH-3200, STAT-2920, STAT-2950.
- c) Two courses from ACSC-3980, FINA 4720*, MATH 3960, MATH-3960, and STAT-3960.
- d) Economics 2 courses: ECON-1100, ECON-1110
- e) Computer Science 2 courses: COMP-1400, COMP-1410

*Note: Those who take FINA-4720 must complete the pre-requisite of FINA-3710 as one of the “five additional business courses” as described in section (a).

Courses used to calculate the major average are: courses listed under requirements (a) to (d), and any courses taken in the major area(s) of study

*Students in this program may pursue any specialization offered by the Odette School of Business. This may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

*Students pursuing both a specialization and Thesis option may require more than 40 courses to be completed in order to meet all program, specialization and thesis requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

Honours Mathematics with Finance Concentration

This is a joint offering between the Department of Mathematics and Statistics and the Odette School of Business. See Department of Mathematics and Statistics for details.

Honours Business Administration and Political Science (with/without thesis; with/without Specialization)

Degree requirements

Total courses: minimum 40 courses* (120 credits)

- a. Business - 16 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980.
- b. Business Non-Thesis stream: 7 additional Business courses.
OR
Business Thesis stream: BUSR-4950 (3 credits) and BUSR-4990 (6 credits) and 4 additional Business courses.
- c. Political Science - 5 courses: POLS-1000, POLS-1300, POLS-1600, POLS-2520 and POLS-2750.

- d. Five Political Science courses, 2000-level or above.
- e. Political Science Non-Thesis stream: Three Political Science course, 4000-level or above.
OR
Political Science Thesis Stream*: POLS-4970, POLS-4980, and one Political Science course, 4000-level or above.
- f. Economics 2 courses: ECON-1100, ECON-1110
- g. Mathematics 1 course: MATH-1980/1250/1720/1760 (or equivalents)
- h. Statistics 1 course: SOSC-2500 or MSCI-2020 or equivalent

*Students maintaining a minimum cumulative 80% average and a minimum 80% average in Political Science courses upon beginning semester 7 may complete a Political Science undergraduate thesis under the supervision of a faculty member in the department. The thesis requires successful completion of the courses POLS-4970 and POLS-4980 during semesters 7 and 8 of the program.

**Students in this program may pursue any specialization offered by the Odette School of Business. This may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

**Students pursuing both a specialization and Thesis option may require more than 40 courses to be completed in order to meet all program, specialization and thesis requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

Courses used to calculate the major average are: The courses listed in sections (a)-(e) and any courses taken in the major areas of study will be used to calculate the major average.

Suggested Course Sequencing

YEAR 1

First Term

ECON-1100
MATH-1980/1250/1720/1760 (or equivalents)
POLS-1000
MGMT-1000
STEN-1000

Second Term

ECON-1110
POLS-1600
ACCT-1510
MKTG-1310
MSCI-1000

YEAR 2

First Term

SOSC-2500 or MSCI-2020 or equivalent
ACCT-2550
MGMT-2400

FINA-2700
POLS-1300

Second Term
POLS-2750 or POLS-2520
MGMT-2430
FINA-2710
MSCI-2130
MSCI-2200

YEAR 3

First Term
POLS-2750 or POLS-2520
Two Political Science courses, 2000-level or above.
MGMT-3000
STEN-3970

Second Term
MSCI-3310 or MSCI-3410
One Business course
Three Political Science courses, 2000-level or above.

YEAR 4

First Term
POLS-4970 (if accepted into thesis stream) and one Political Science course, 4000-level or above,
Two Political Science course, 4000-level or above. (if in non-thesis stream)
Three Business courses

Second Term
STEN-4980
POLS-4980 (if accepted into thesis stream)
One Political Science course, 4000-level or above.(if in non-thesis stream)
Three Business courses

Honours Business Administration and Psychology (with/without thesis; with/without Specialization)

Degree Requirements

Total courses: minimum 40 courses*(120 credits)

- a) Business 23 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-1000, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980, and 7 additional Business courses
- b) Psychology 13 courses, including PSYC-1150, PSYC-1160, PSYC-2300, PSYC-3200, PSYC-3700. The total number of Psychology courses must include at least four 3000-level Psychology courses and two 4000-level Psychology courses.

- c) Economics 2 courses: ECON-1100, ECON-1110
- d) Mathematics 1 course: MATH-1980/1250/1720/1760 (or equivalents);
- e) Statistics 1 course: SOSC-2500 or MSCI-2020

A thesis option is available through the Odette School of Business or the Department of Psychology. For Business thesis option, students will complete BUSR-4950 (3 credits) and BUSR-4990 (6 credits). For Psychology thesis option, students will complete PSYC-4960 and PSYC-4970.

Courses used to calculate the major average are: courses listed in under (a) and (b) and any courses taken in the major area(s) of study.

*Students in this program may pursue any specialization offered by the Odette School of Business. This may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

*Students pursuing both a specialization and Thesis option may require more than 40 courses to be completed in order to meet all program, specialization and thesis requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

STEN-4980

Honours Business Administration and Women's and Gender Studies (with/without thesis; with/without Specialization)

Degree Requirements

Total courses: minimum 40 courses*(120 credits)

- a) Business 23 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-1000, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980, and 7 additional Business courses
- b) Women's and Gender Studies 13 courses: WGST-1000, WGST/WORK-2600, WGST-3050 or WGST/PHIL-3590, WGST-3060; 4 of WGST/SACR-2100, WGST-2200, WGST/SJST-2350, WGST-2380, WGST-3000, or KINE-3501/PSYC/SACR/SJST/SOSC/SWRK/WGST-3500, two of WGST-4000, WGST-4XXX, WGST/PSYC/SACR/SJST/SOSC/SWRK-4500; three of WGST-3100, WGST-3300, WGST/PSYC/SACR/SOSC/SWRK-3500, WORK-2000, WORK/PSYC/SJST-2180, WORK/CMAF/DRAM/SJST-2700.
- c) Economics two courses: ECON-1100, ECON-1110
- d) Mathematics one course: MATH-1980/1250/1720/1760 (or equivalents);
- e) Statistics one course: SOSC-2500 or MSCI-2020

A thesis option is available through the Odette School of Business.
For Business thesis option, students will complete BUSR-4950 (3 credits) and BUSR-4990 (6 credits).

Courses used to calculate the major average are: courses listed in under (a) and (b) and any courses taken in the major area(s) of study.

Courses used to calculate the major average are: courses listed in under (a) and (b) and any courses taken in the major area(s) of study.

*Students in this program may pursue any specialization offered by the Odette School of Business. This may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

*Students pursuing both a specialization and Thesis option may require more than 40 courses to be completed in order to meet all program, specialization and thesis requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

Note: Experiential Learning is available for students who complete the Bystander Initiative course WGST/PSYC/SACR/SJST/SOSC/SWRK-4500 which is one of three options needed to satisfy the fourth-year requirement in Women's and Gender Studies.

Honours Business Administration for Baccalaureate Degree Holders

Admission Requirements

Students may obtain the degree of Bachelor of Commerce having previously completed a baccalaureate degree with a cumulative average of 67% or better in an area other than Business Administration. Normally this average will be calculated based on the grades achieved in the last 20 courses of that degree.

Advanced standing may be granted to a maximum of four 1000 or 2000 level Business Administration courses provided that such courses were passed with a minimum grade of 60% and are beyond the student's initial degree requirements. If the courses were part of the initial degree, the student must substitute for such courses by taking additional Business courses.

Applicants to the Honours Business Administration for Baccalaureate Degree Holders must have completed at least one university-level mathematics course prior to entry into the program. Applicants who do not present a university mathematics course will be required to take MATH-1980 (Mathematics for Business) as indicated in the Recommended Sequence for this program. Applicants who do not possess a Grade 12 "U" or equivalent mathematics course prior to entry to this program will be required to complete a Grade 12 "U" mathematics course, or its equivalent, prior to graduation from the program.

Students with degrees from universities and colleges outside Canada may be required to complete additional courses.

Degree Requirements

Total courses: minimum twenty-four courses

a) ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970 and STEN-4980; plus four additional business courses.

b) ECON-1100, ECON-1110, and MATH-1980/1250/1720/1760 (or equivalents). (Students who have not previously completed these requirements prior to entry into the program, should do so as early as possible to meet the prerequisites for various business courses.)

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

*Students in this program may pursue any specialization offered by the Odette School of Business. This will require more than 24 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

This program cannot be completed through Distance Education.

Fourth Term

MGMT-3000

FINA-2710

MSCI-3310 or MSCI-3410

STEN-3970

One other Business course

Fifth Term

STEN-4980

Three other Business courses. (Consult a faculty advisor).

Notes:

For the purpose of the above recommended sequence, Intersession and Summer Session are treated as one term.

The maximum load for students in this program is six courses in each of the Fall and Winter terms and five courses over both Intersession and Summer Session.

Any specializations offered by the Odette School of Business may be taken in conjunction with any Bachelor of Commerce program. Some combinations may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option.

SPECIALIZATION OPTIONS

Any specializations offered by the Odette School of Business may be taken in conjunction with any Bachelor of Commerce program. Some combinations may require more than 40 courses to be completed in order to meet all program and specialization requirements. Students are encouraged to seek academic advising from the Odette School of Business before pursuing this option. Specializations appear on the degree parchment.

An additional specialization may be taken with approval from the Odette School of Business.

NOTE: Where an area permits, a student may be able to substitute a Special Topics or other approved course offered by the Odette School of Business for one of the courses in the Specialization (excluding the gate-in and capstone courses) with the approval of the Area Chair.

Specialization in Accounting

To be eligible for the Accounting Specialization, students must receive a minimum grade of 65% in each gate-in course ACCT-1510 and ACCT-2550, an overall minimum average of 67% in ACCT-2510, ACCT-2520, ACCT-3520, ACCT-3560, ACCT-3580, ACCT-3600, ACCT-3610 and ACCT-4570 and a minimum grade of 70% in the capstone course ACCT-4570.

Specialization in Human Resources

To be eligible for the Human Resources specialization, students must receive a minimum grade of 65% in the gate-in course MGMT-2430, an overall minimum average of 70% in MGMT-3420, MGMT-3440, MGMT-4410, MGMT-4510, MGMT-4520, MGMT-4850 plus any 2 of MGMT-3830, MGMT-4450, MGMT-4480, MGMT-4490, and MGMT-4810, or MGMT 4910 and a minimum grade of 70% in the capstone course MGMT-4850.

Specialization in Human Resources (Honours Business Administration and Political Science ONLY)

To be eligible for the Human Resources specialization for students in the Honours Business Administration and Political Science program, students must receive a minimum grade of 65% in the gate-in course MGMT-2430, an overall minimum average of 70% in MGMT-3420, MGMT-3440, MGMT-4410, MGMT-4510, MGMT-4520, MGMT-4850 plus any 1 of MGMT-3830, MGMT-4450, MGMT-4480, MGMT-4490, and MGMT-4810, or MGMT 4910 and a minimum grade of 70% in the capstone course MGMT-4850.

Specialization in Human Resources Management and Industrial Organizational Psychology (Honours Business Administration and Psychology ONLY)

To be eligible for the Human Resources Management and Industrial Organizational Psychology specialization for students in the Honours Business Administration and Psychology program, students must receive a minimum grade of 65% in the gate-in course MGMT-2430, an overall minimum average of 70% in MGMT-3420, MGMT-3440, MGMT-4410, MGMT-4510, MGMT-4520, MGMT-4850 plus any 1 of MGMT-3830, MGMT-4450, MGMT-4480, MGMT-4490, and MGMT-4810, or MGMT 4910 and a minimum grade of 70% in the capstone course MGMT-4850.

Specialization in Finance

To be eligible for the Finance specialization, students must receive a minimum grade of 65% in the gate-in course FINA-2710, an overall minimum average of 67% in FINA-3710, FINA-4740 and any 3* of FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910, and a minimum grade of 67% in the capstone course FINA-4740.

*Students who successfully complete the CSC exam (1 and 2) will be able to substitute this completion for one of the 3 specialization courses FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910. Students who successfully complete the CFA Level 1 exam will be able to substitute this completion for 2 of the 4 specialization courses FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910. The substitutions above apply only toward the finance specialization and do not apply in any way toward their Bachelor of Commerce degree requirements. It is the student's responsibility to bring forward the appropriate documentation in a timely manner in order to receive the above noted substitutions.

Specialization in Business Analytics and Supply Chain Management

To be eligible for the Business Analytics and Supply Chain Management specialization, students must take MSCI-3410. Students must also receive a minimum grade of 65% in each of the gate-in courses MSCI-2200 and MSCI-2130; an overall minimum average of 67% in the capstone course MSCI-4230 or MSCI-4310 or MSCI-4980 and any 5 of MSCI-2230, MSCI-2250, MSCI-3050, MSCI-3110, MSCI-3120, MSCI-3200, MSCI-3230, MSCI-3310, MSCI-4230, MSCI-4240, MSCI-4310, MSCI-4910, MSCI-4950, MSCI-4980, and MKTG-3390 including at least two of MSCI-3050, MSCI-3200, MSCI-3310, MSCI-4310, MSCI-4980, MKTG-3390, and at least two of MSCI-2230, MSCI-2250, MSCI-3110, MSCI-3120, MSCI-3230, MSCI-4230, MSCI-4240; and a minimum grade of 67% in the capstone course MSCI-4230 or MSCI-4310 or MSCI-4980.

Specialization in Business Analytics and Supply Chain Management (Honours Business Administration and Computer Science ONLY)

To be eligible for the Supply Chain and Business Analytics and Supply Chain Management specialization, students must take MSCI-3410. Students must also receive a minimum grade of 65% in the gate-in course MSCI-2200; an overall minimum average of 67% in the capstone course MSCI- 4230 or MSCI-4310 or MSCI-4980 and any 5 of MSCI-2230, MSCI-2250, MSCI-3050, MSCI-3110, MSCI-3120, MSCI-3200, MSCI-3230, MSCI-3310, MSCI-4230, MSCI-4240, MSCI-4310, MSCI-4910, MSCI-4950, MSCI-4980, and MKTG-3390 including at least two of MSCI-3050, MSCI-3200, MSCI-3310, MSCI-4310,

MSCI-4980, MKTG-3390, and at least two of MSCI-2230, MSCI-2250, MSCI-3110, MSCI-3120, MSCI-3230, MSCI-4230, MSCI-4240; and a minimum grade of 67% in the capstone course MSCI-4230 or MSCI-4310 or MSCI-4980.

Specialization in Marketing

To be eligible for the Marketing specialization, students must receive a minimum grade of 65% in each gate-in course MKTG-1310 and MKTG-2320, an overall minimum average of 67% in MKTG-3320, MKTG-3340, MKTG-4390 and any 4 of MKTG-3350, MKTG-3370, MKTG-3380, MKTG-3390, MKTG-4330, MKTG-4350, MKTG-4360, MKTG-4370, MKTG-4380, MKTG-4410, MKTG-4450 and MKTG-4910, and a minimum grade of 67% in the capstone course MKTG-4390.

Specialization in Strategy and Entrepreneurship

To be eligible for the Strategy and Entrepreneurship specialization, students must receive a minimum of 65% in each gate-in course (STEN-1000 and STEN-2900) as well as a minimum average of 67% in STEN-2900, one of STEN-3900 and STEN-3910, and any four of STEN-3930, STEN-4900, STEN-4910, STEN-4930, STEN-4950, STEN-4960, and MGMT-4450. The choice of four courses must include one of STEN-4930, STEN-4950, and STEN-4960, and students must receive a minimum of 70% in this capstone course.

Specialization in International Business

To graduate with the International Business Specialization, students are strongly recommended to take part in a formal exchange program through the Exchange Office at the University of Windsor or International Co-op program. Students must receive a minimum grade of 65% in each gate-in course MGMT-2430, FINA-2700, and MKTG-2320 a minimum average of 67% in 5 courses from MGMT-3830, FINA-3710, FINA-3790, MKTG-4350, MKTG-4380, STEN-3930, and STEN-4900, and a minimum grade of 70% in one capstone course option of MKTG-4350, MKTG-4380, or STEN-4900. Students may receive a maximum credit of 1 course towards this specialization (excluding gate-in) for taking a fourth-year special topics course with permission from the undergraduate program director.

Students may receive a maximum credit of 1 course towards the International Business Specialization (excluding gate-in) for engaging in an international exchange program, an international co-op program, or an international study tour. Students may receive a maximum credit of 1 course towards the International Business Specialization (excluding gate-in or capstone) for: ECON-3730, ECON-3740, POLS-2330, POLS-2490, POLS-3230, POLS-3540, POLS-3550, POLS-3560, POLS-3600, GRMN-3000, ITLN-3000, SPAN-3000.

DEGREE COMPLETION PATHWAYS FOR COLLEGE OF APPLIED ARTS AND TECHNOLOGY GRADUATES

Admissions Requirements

Students are admissible to the Honours Business Administration degree completion pathways following degree of a CAAT college (or equivalents) diploma program previously completed with a cumulative average of 80% (A- or 3.5/4) or better for the fast-track or 70% (B-) or better for the non-fast track option.

Honours Business Administration for 3-year CAAT (or equivalent) Diploma Holders in any area other than Business

Degree requirements (list remaining courses required for completion of degree program):

Total courses: 28*

(a) 25 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980; and 8 additional business courses or BUSR-4950, BUSR-4990 (6 credits) and 5 additional business courses.

(b) 3 courses: ECON-1100, ECON-1110, and MATH-1980/1250/1720/1760 (or equivalents).

*Possible Additional Course Requirements:

- Applicants who do not possess a Grade 12“U” or equivalent mathematics course prior to entry to this program will be required to complete MATH-1780.
- Students with diplomas from colleges outside Canada may be required to complete additional courses.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average

Suggested Course Sequence

Year 1

Fall: ECON-1100, MATH-1980/1250/1720/1760 (or equivalents), MGMT-1000, MSCI-1000, STEN-1000

Winter: ECON-1110, ACCT-1510, MGMT-2400, MSCI-2020, MKTG-1310

Summer: MGMT-2430, MSCI-2130, MSCI-2200, FINA-2700

Year 2

Fall: ACCT-2550, MGMT-3000, FINA-2710, MSCI-3310 or MSCI-3410, STEN-3970

Winter: STEN-4980, 4 Business courses

Summer: 4 business courses

Honours Business Administration for 3-year CAAT (or equivalent) Diploma Holders in any area in Business

Degree Requirements

Total courses: 20*

a) 19 courses: ACCT-1510, ACCT-2550, MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-2020, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980; and 8 additional business courses or BUSR-4950, BUSR-4990 (6 credits) and 5 additional business course.

b) MATH-1980/1250/1720/1760 (or equivalents);

*Possible Additional Course Requirements:

- Students with diplomas from colleges outside Canada may be required to complete additional courses.
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 8 courses: courses ECON-1100, ECON-1110, MGMT-1000, MGMT-2400, MGMT-2430, MSCI-1000, MKTG-1310, STEN-1000 from the University of Windsor.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average

Suggested Course Sequence

Year 1

Fall: MATH-1980/1250/1720/1760 (or equivalents), ACCT-1510, MGMT-3000, MSCI-2020, MSCI-2130

Winter: ACCT-2550, FINA-2700, MSCI-2200, STEN-3970, 1 business course

Summer: MSCI-3310 or MSCI-3410, FINA-2710, 3 Business courses

Year 2

Fall: STEN-4980, 4 Business courses

Honours Business Administration for 2 year CAAT (or equivalent) Diploma Holders in any area in Business

Degree Requirements

Total courses: 30*

a) 25 courses: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-1000, MSCI-2020, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980; and 8 additional business courses or BUSR-4950, BUSR-4990 (6 cr.) and five additional business course.

b) 3 courses: ECON-1100, ECON-1110, and MATH-1980/1250/1720/1760 (or equivalents)

c) 2 courses from any area of study including Business.

*Possible Additional Course Requirements:

- Students with diplomas from colleges outside Canada may be required to complete additional courses.

Suggested Course Sequence

Year 1

Fall: ECON-1100, MATH-1980/1250/1720/1760 (or equivalents), MGMT-1000, MSCI-1000, STEN-1000

Winter: ECON-1110, ACCT-1510, MGMT-2400, MSCI-2020, MKTG-1310

Year 2

Fall: ACCT-2550, MGMT-2430, MSCI-2130, MSCI-2200, FINA-2700,

Winter: MGMT-3000, FINA-2710, MSCI-3310 or MSCI-3410, STEN-3970, 1 business course

Year 3

Fall: 4 Business courses, 1 course from any area of study

Winter: STEN-4980, 3 Business courses, 1 courses from any area of study

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Bachelor of Commerce (Honours Business Administration) Program for 3-year Diploma Holders in Accounting from St. Clair College

Degree Requirements

Total courses: 20*

(a) 20 courses: ACCT-2550, FINA-2700, FINA-2710, MGMT-3000, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980; and 11 additional business courses.

Note: to be eligible for the Accounting Specialization, students must receive a minimum average grade of 67% in ACCT-2510, ACCT-2520, ACCT-3520, ACCT-3560, ACCT-3580, ACCT-3600, ACCT-3610, and a minimum grade of 70% in the capstone course ACCT-4570.

Students completing the CPA track must also complete ACCT-4590, ACCT-4600, and ACCT-4610.

*Possible Additional Course Requirements:

- To be eligible for the program, students must complete a 3-year Diploma in Accounting with a cumulative average of B (70%, 3.0-3.49/4).
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 11 courses: MATH-1980, ECON-1100, ECON-1110, ACCT-1510, MGMT-1000, MGMT-2400, MGMT-2430, MSCI-1000, MSCI-2020, MKTG-1310, STEN-1000.

Suggested Sequence (Accounting Specialization with CPA Track)

Year 1

Summer: ACCT-2510*, ACCT-2550, MSCI-2130, MSCI-2200, MGMT-3000

Fall: ACCT-2520*, ACCT-3560*, ACCT-3580*, ACCT-3600*, FINA-2700

Winter: ACCT-3520*, ACCT-3610*, FINA-2710, MSCI-3310 or MSCI-3410, STEN-3970

Year 2

Fall: ACCT-4570*, ACCT-4590*, ACCT-4600*, ACCT-4610*, STEN-4980

* For students not following the accounting specialization pathway, accounting courses must be replaced with alternate business courses.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Fast-Track Honours Business Administration Program for 3-year CAAT (or equivalent) Diploma Holders in any area in Business

Degree Requirements

Total courses: 17*

- a) 16 courses: ACCT-2550, MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-2020, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980; and 6 additional business courses.
b) MATH-1980/1250/1720/1760 (or equivalents).

*Possible Additional Course Requirements:

- To be eligible for the fast-track program, students must complete 3-year Diploma in Business with a cumulative average of A- (80%, 3.5/4) or better.
- Students with diplomas from colleges outside Canada may be required to complete additional courses.
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 9 courses: courses ECON-1100, ECON-1110, ACCT-1510, MGMT-1000, MGMT-2400, MGMT-2430, MSCI-1000, MKIG-1310, STEN-1000 from the University of Windsor.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Suggested Course Sequence

Year 1

Summer: MATH-1980/1250/1720/1760 (or equivalents), FINA-2700, MSCI-2020 or equivalents, ACCT-2550, MGMT-3000

Fall: FINA-2710, MSCI-2130, MSCI-2200, STEN-3970, 1 business course

Winter: MSCI-3310 or MSCI-3410, 4 Business courses

Year 2

Fall: STEN-4980 and 1 Business courses

Fast-Track (Honours Business Administration) Program for 3-year Diploma Holders in Accounting from St. Clair College

Degree Requirements

Total courses: 17*

- (a) 17 courses: FINA-2700, FINA-2710, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980; and 10 additional business courses.

Note: to be eligible for the Accounting Specialization, students must enroll in and receive a minimum average grade of 67% in ACCT-2520, ACCT-3520, ACCT-3560, ACCT-3580, ACCT-3610, ACCT-3600, and ACCT-4570 and a minimum grade of 70% in the capstone course ACCT-4570.

Students completing the CPA track must also complete ACCT-4600, ACCT-4610, and ACCT-4590.

*Possible Additional Course Requirements:

- To be eligible for the fast-track program, students must complete a 3-year Diploma in Accounting with a cumulative average of A- (80%, 3.5/4) or better.

- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 14 courses: MATH-1980, ECON-1100, ECON-1110, ACCT-1510, ACCT-2510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, MSCI-1000, MSCI-2020, MKTG-1310, STEN-1000.

Suggested Course Sequence (Accounting Specialization with CPA Track)

Year 1

Summer: MSCI-2130 or equivalents, ACCT-2520*, ACCT-3560*, MSCI-2200, STEN-3970

Fall: FINA-2700, ACCT-3520*, ACCT-3580*, ACCT-3610*, MSCI-3310 or MSCI-3410

Winter: ACCT-3600*, FINA-2710, ACCT-4570*, ACCT-4590*, ACCT-4610*

Year 2

Fall: ACCT-4600*, STEN-4980

* For students not following the accounting specialization pathway, accounting courses must be replaced with alternate business courses.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Fast-Track Honours Business Administration Program for 3-year Diploma Holders in Human Resources from St. Clair College

Degree Requirements

Total courses: 17*

(a) 16 courses: FINA-2700, FINA-2710, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980; and 8 additional Business courses

(b) MATH-1980/1250/1720/1760 (or equivalents)

Note: to be eligible for Human Resources specialization, students must receive a minimum average grade of 70% in MGMT-4850, and one of MGMT-3830, MGMT-4450, MGMT-4480, MGMT-4810, and MGMT-4910 and a minimum grade of 70% in the capstone course MGMT-4850.

*Possible Additional Course Requirements:

- To be eligible for the fast-track program, students must complete a 3-year Diploma in Business with a cumulative average of A- (80%, 3.5/4) or better.
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 17 courses: ECON-1100, ECON-1110, ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, MGMT-3420, MGMT-3440, MGMT-4410, MGMT-4490, MGMT-4510, MGMT-4520, MSCI-1000, MKTG-1310, STEN-1000.

Suggested Course Sequence (With Human Resources Specialization)

Year 1

Summer: MATH-1980/1250/1720/1760 (or equivalents), FINA-2700, MSCI-2020 or equivalents, MSCI-2130, 1 MGMT- course

Fall: FINA-2710, MSCI-2200, STEN-3970, 1 MGMT- course, 1 business course

Winter: MSCI-3310 or MSCI-3410, 4 business courses

Year 2

Fall: MGMT-4850, STEN-4980

* For students not following the human resources specialization pathway, human resources courses must be replaced with alternate business courses.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Fast-Track Honours Business Administration Program for 3-year Diploma Holders in Marketing from St. Clair College

Degree Requirements

Total courses: 17*

a) 16 courses: ACCT-2550, MGMT-3000, FINA-2700, FINA-2710, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980, and 6 business courses.

b) MATH-1980/1250/1720/1760 (or equivalents).

Note: to be eligible for Marketing specialization, students must receive a minimum average grade of 67% in MKTG-3320, MKTG-3340 and a minimum grade of 67% in the capstone course MKTG-4390.

*Possible Additional Course Requirements:

- To be eligible for the fast-track program, students must complete 3-year Diploma in Marketing with a cumulative average of A- (80%, 3.5/4) or better.
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 14 courses: ECON-1100, ECON-1110, ACCT-1510, MGMT-1000, MGMT-2400, MGMT-2430, MSCI-1000, MKTG-1310, MKTG-2320, MKTG-3380, MKTG-3390, MKTG-4360, MKTG-4370, STEN-1000.

Suggested Course Sequence (with Marketing Specialization)

First Term

MATH-1980/1250/1720/1760 (or equivalents), MSCI-2130, MSCI-2020 or equivalents, ACCT-2550 FINA-2700

Second Term

MGMT-3000, FINA-2710, MSCI-2200, MKTG-3320, business course

Third Term

MSCI-3310, or MSCI-3410, MKTG-3340, STEN-3970, 2 business courses

Fourth Term

STEN-4980, MKTG-4390**

* For students not following the marketing specialization pathway, marketing courses must be replaced with alternate business courses.

**MKTG-4390 is typically only offered in Winter semester. Please consult a Business academic advisor when you begin this program to ensure proper sequencing.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Fast-Track Honours Business Administration Program for 3-year CAAT (or equivalent) Diploma Holders in Finance

Degree Requirements

Total courses: 17*

- a) 16 courses: MGMT-3000, FINA-2700, FINA-2710, MSCI-2130, MSCI-2020, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-3970, STEN-4980 and 7 business courses.
- b) MATH-1980/1250/1720/1760 (or equivalents)

Note: to be eligible for Finance specialization, students must receive a minimum average grade of 65% in the gate-in course FINA-2710, a minimum average grade of 67% in FINA-3710, FINA-4740 and any 4* of FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910 and a minimum grade of 67% in the capstone course FINA-4740.

*Students who successfully complete the CSC exam (1 & 2) will be able to substitute this completion for one of the 5 specialization courses FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910. Students who successfully complete the CFA Level 1 exam will be able to substitute this completion for 2 of the 4 specialization courses FINA-3720, FINA-3730, FINA-3780, FINA-3790, FINA-4720, FINA-4770, FINA-4780 and FINA-4910. The substitutions above only apply toward the finance specialization and do not apply in any way toward their Bachelor of Commerce degree requirements. It is the student's responsibility to bring forward the appropriate documentation in a timely manner in order to receive the above noted substitutions.

*Possible Additional Course Requirements:

- To be eligible for the fast-track program, students must complete 3-year Diploma in Finance with a cumulative average of A- (80%, 3.5/4) or better.
- Students enrolled in this program will not be given credit towards the Bachelor of Commerce degree for the following 10 courses: ECON-1100, ECON-1110, ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MSCI-1000, MKTG-1310, STEN-1000.

Courses used to calculate the major average are: The courses listed in (a) will be used to calculate the major average and all courses in the major area of study.

Suggested Course Sequence (with Finance Specialization)

Year 1

Summer: MATH-1980/1250/1720/1760 (or equivalents), FINA-2700, MSCI-2020 or equivalents, MSCI-2130, MGMT-3000

Fall: FINA-2710, MSCI-2200, STEN-3970, one business course
Winter: MSCI-3310 or MSCI-3410, FINA-3710, three FINA courses.

Year 2

Fall: FINA-4740, STEN-4980 and one FINA course.

* For students not following the finance specialization pathway, finance courses must be replaced with alternate business courses

Honours Business Administration for Students from Southwestern University Finance and Economics, China

Admission Requirements:

1. Academic Standard

Through this agreement, Southwestern University of Finance and Economics (SWUFE) and the University of Windsor offer a 1+3 collaborative program for undergraduate students. Students will study one year at SWUFE followed by three years of study or six (6) semesters at the University of Windsor. Students shall earn the required credit at SWUFE, and study at least one year at the Study Abroad Institute of SWUFE. Students must achieve a minimum of 70% average (or equivalent) of the required courses to be eligible for admission to the University of Windsor BComm; transfer credits will only be granted for courses with grades of 70% (or equivalent) and higher.

2. Language Skills

Students must provide proof of required minimum grade on an accepted English language test by one of the options below:

- IELTS: a minimum of 6.5 for undergraduate programs
- TOEFL (IBT): 83 with 20 for writing, 220 computer-based test
- ELIP: 75% in level 3 in English Language Improvement Program administered by UW.

3. Submission of Documents

- Completed application for admission
- Official transcript from SWUFE
- Proof of English Proficiency
- Recommendation Letter from SWUFE
- a Certificate from SWUFE representing that SWUFE has reviewed the application package and that the materials are complete and accurate to the best of their information

Degree Requirements

Total courses: Forty courses, consisting of a minimum of thirty (30) University of Windsor courses that must be completed and up to 10 University of Windsor courses that can be awarded transfer credits for Southwestern University of Finance and Economics courses taken.

If the student receives all 10 transfer credits, the following is the list of remaining courses required for completion of University of Windsor Honours Bachelor of Commerce in Business Administration program:

ACCT-1510. Principles of Financial Accounting
ACCT-2550. Principles of Managerial Accounting
MGMT-1000. Business Communications
MGMT-2400. Management and Organizational Life
MGMT-2430. Human Resources Management
FINA-2700. Business Finance I
MGMT-3000. Business Ethics in a Global Context
FINA-2710. Business Finance II
MSCI-1000. Intro to Bus Data Analysis Using Spreadsheet
MSCI-2020. Business Data Analysis
MSCI-2130. Introduction to Management Information Systems
MSCI-2200. Quantitative Decision Models I
MSCI-3310. Operations Management I or MSCI-3410 Supply Chain Management I: Introductions and Fundamentals
MKTG-1310. Principles of Marketing
STEN-1000. Introduction to Business
STEN-3970. The Law and Business Administration
STEN-4980. Strategic Management
Eight additional business courses
MATH-1760. Functions and Differential Calculus or MATH-1980
Four courses from any area of study, including Business

Courses used to calculate the major average are: ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2400, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200, MSCI-3310 or MSCI-3410, MKTG-1310, STEN-1000, STEN-3970, STEN-4980, plus the eight additional business courses, and any courses taken in the major area(s) of study.

For information on Course Equivalencies contact the Deans Office in the Odette School of Business.

Honours Business Administration (with/without thesis; with/without Co-op, and with any Specialization) for students from the Global Institute of Management and Economics (GIME) of Dongbei University of Finance and Economics

Admissions Requirements

Students will study one and a half years at the Global Institute of Management and Economics (GIME) of Dongbei University of Finance and Economics, followed by a two and a half academic-year or five (5) semesters at the University of Windsor. Students will normally study 5 courses each semester for a total of 10 courses for one academic year at the University of Windsor. Upon completing the study at the University of Windsor and achieving the required academic standards for graduation, students will receive the University of Windsor's Bachelor of Commerce degree.

For Students from the Global Institute of Management and Economics (GIME) of Dongbei University of Finance and Economics to be accepted into the 2nd year of the Program at University of Windsor, they must meet the following requirements:

1. Academic Standard

Students shall complete the required courses as specified in Appendix A, earn the required credit at GIME of DUFE, and study at least one and a half year at the GIME of DUFE. Students must achieve a minimum of 73% or B average (or equivalent) of the required courses to be eligible for admission to the Program at UW; transfer credits will only be granted for courses with grades of 70% or B - (or equivalent) and higher.

2. Language Skills

Students must provide a proof of required minimum grade on an accepted English language test by one of the options below:

- IELTS: a minimum of 6.5 for undergraduate programs
- TOEFL (IBT): 83 with 20 for writing, 220 computer-based test
- ELIP: 75% in level 3 in English Language Improvement Program administered by UW.

3. Submission of Documents

- Completed application for admission
- Official transcript from GIME of DUFE
- Proof of English Proficiency
- Recommendation Letter from GIME of DUFE
- a Certificate from GIME of DUFE representing that DUFE has reviewed the application package and that the materials are complete and accurate to the best of their information

Degree Requirements

Total courses: Forty courses, consisting of twenty-five (25) University of Windsor courses that must be completed and fifteen (15) University of Windsor courses that can be awarded transfer credits for GIME of DUFE courses taken.

Total courses: twenty-five (75 credits) or twenty-eight (84 credits) for Co-op Option.

a) ACCT-1510, ACCT-2550, MGMT-1000, MGMT-2430, MGMT-3000, FINA-2700, FINA-2710, MSCI- 1000, MSCI-2200, MSCI-3310 or MSCI-3410, STEN-1000, STEN-3970, STEN-4980; six additional business courses or BUSR-4950, BUSR-4990 (6.0 credit course), and three additional business courses.

b) One additional courses from outside of the Odette School of Business Administration; five courses from any area of study including Business.

c) For Co-op Students: STEN-2050, STEN-3050, and STEN-4050.

*GIME students are eligible for admission to specializations in Accounting, Human Resources, Finance, Supply Chain, Business Analytics, Marketing, Strategy, Entrepreneurship and any other specialization offered by the Bachelor of Commerce Program. Students interested in such specializations may consult a student advisor for guidance.

Honours Business Administration for students from Chitkara University, Punjab

Admissions Requirements

Students will study two years at the Chitkara University followed by four (4) semesters at the University of Windsor. Students will normally study 5 courses each semester for a total of 10 courses for one academic year at the University of Windsor. Upon completing the study at University of Windsor and achieving the required academic standards for graduation, students will receive the University of Windsor's Bachelor of

Commerce degree.

For Students to be accepted into the 3rd year of the Program at UW, they must meet the following requirements:

1. Academic Standard

Students shall complete the required courses as specified in Appendix A, earn the required credit at Chitkara, and study at least two years at the Chitkara University. Students will only be eligible for admission to the program pathway at the University of Windsor if they have successfully completed the required courses at Chitkara University each with a minimum B average (or equivalent).

2. Language Skills

Students must provide a proof of required minimum grade on an accepted English language test by one of the options below:

- IELTS: a minimum of 6.5 for undergraduate programs
- TOEFL (IBT): 83 with 20 for writing, 220 computer-based test
- ELIP: 75% in level 3 in English Language Improvement Program administered by UW.

3. Submission of Documents

- Completed application for admission
- Official transcript from the Chitkara University
- Proof of English Proficiency
- Recommendation Letter from the Chitkara University
- a Certificate from the Chitkara University representing that the Chitkara University has reviewed the application package and that the materials are complete and accurate to the best of their information

Degree Requirements

Total course equivalents: Forty courses, consisting of twenty (20) University of Windsor courses (60 credits) that must be completed, and twenty (20) University of Windsor courses awarded as block transfer credit following successfully completion of all required courses at Chitkara University with a minimum B average (or equivalent) overall.

a) Business 6 courses: MGMT-1000, MGMT-2400, MSCI-3310 or MSCI-3410, STEN-1000, STEN-3970, STEN-4980

b) Non-Business (6 courses): Six additional courses from outside of the Odette School of Business Administration

c) Business (6 course equivalents): six Business courses at the 2000 level or above; or two Business courses at the 2000 level or above, BUSR-4950, and BUSR-4990 (6.0 credit course) for thesis option

d) Business or Non-Business: 2 course equivalents from any area of study including Business.

Suggested Course Sequence

Year 1

Fall: MGMT-1000, STEN-1000, one of MSCI-3310 or MSCI-3410; two non-business courses

Winter: MGMT-2400, two business courses, two non-business courses

Year 2

Fall: STEN-3970, three business courses, one non-business course

Winter: STEN-4980, three business courses, one non-business course

Courses used to calculate the major average are: Courses listed under requirement (a) and (c), and any courses taken in the major area(s) of study.

NOTE: the following courses CANNOT be taken for credit in this program:

Business Courses: ACCT-1510, ACCT-2550, FINA-2000, FINA-2700, FINA-2710, MGMT-2430, MGMT-3000, MSCI-2020, MKTG-1310, STEN-2900, MSCI-1000, MSCI-2130, MSCI-2200

Non-Business Courses: ECON-1100, ECON-1110, ECON-2010, MATH-1980

Post Graduate Certificate in Accounting

Admission Requirements

Students entering the program must hold a baccalaureate degree from a recognized institution in any discipline, including Business, and must have obtained a cumulative average of 67% in the prior degree. Normally this average will be calculated based on the grades achieved in the last 20 courses of that degree.

Certificate Requirements

Total courses: Nineteen

(a) ECON-1100, ECON-1110, FINA-2700, FINA-2710, MSCI-2020, STEN-3970, ACCT-1510, ACCT-2510, ACCT-2520, ACCT-2550, ACCT-3520, ACCT-3560, ACCT-3580, ACCT-3600, ACCT-3610, ACCT-4570, ACCT-4590, ACCT-4600 and ACCT-4610.

*With permission of the Odette School of Business, students will be allowed to substitute another third- or fourth-year accounting course for any of the specified required accounting courses.

(b) Due to course prerequisites, students must have completed ECON-1100 Introduction to Economics I before ECON-1110, and MATH-1980 Mathematics for Business and FINA-2700 Business Finance I and any university-level Statistics course (such as MSCI-2020 Business Data Analysis) before taking FINA-2710 Business Finance II.

Note: A student who has previously completed the following course(s) or their equivalents, will be exempted from taking the corresponding courses, and will not be required to substitute for the exempted course(s).

The courses are:

ECON-1100. Introduction to Economics I

ECON-1110. Introduction to Economics II

ACCT-2520. Accounting Theory I
ACCT-3520. Accounting Theory II
ACCT-3560. Advanced Managerial Cost Accounting and Analysis
ACCT-3600. Auditing I
ACCT-3610. Taxation I
ACCT-4570. Advanced Accounting I

Certificate in Business Administration

Admission Requirements

Minimum admission requirements for undergraduate degrees.

This program is intended for part-time students. Courses are regular University credit courses and may be applied toward the Bachelor of Commerce degree.

Certificate Requirements

Total courses: 10

Required courses: ACCT-1510, ACCT-2550, MGMT-2400, FINA-2700, MKTG-1310, STEN-1000, plus 4 additional business courses.*

To be eligible to receive the Certificate in Business, a student must obtain a cumulative average of 60% or better.

In the event that an applicant has completed equivalent courses elsewhere, other courses may be substituted by the applicant with the consent of the Dean of the Odette School of Business Administration.

* NB: The Certificate in Business Administration is open to any student. Please note however that students must obtain the required prerequisite courses such as math and economics for some of the courses within the Certificate.

This program cannot be completed through Distance Education

Certificate in Human Resources

Admission Requirements

Admission requirements are the same as those for the Honours Business Administration degree. See Policy on Admission Requirements (Undergraduate) at www.uwindsor.ca/policies.

Certificate Requirements

Total courses: 11

a) Eleven Business* courses ACCT-1510, ACCT-2550, MGMT-2400, MGMT-2430, MGMT-3440, MGMT-3420, MGMT-4410, MGMT-4510, MGMT-4520, MGMT-4850 and STEN-1000

*The Certificate in Human Resources is open to any student. Please note that students must obtain the required prerequisite courses for some of the courses within the Certificate. For the purposes of this certificate, STEN 1000 may be taken concurrently with MGMT 2430.

Also required: 65% in MGMT-2430, 70% in MGMT-4850 and an average of 70% over all courses in the certificate.

Recommended Course Sequence (Non-Business Student):

Summer Semester:

MATH-1980
ECON-1100
MGMT-2430
STEN-1000

Fall Semester:

ACCT-1510
MGMT-3420
MGMT-3440
MGMT-2400

Winter Semester:

ACCT-2550
MGMT-4410
MGMT-4510
MGMT 4520
MGMT-4850

Recommended Course Sequence (BComm/MBA Graduates):

Fall Semester:

MGMT-3420
MGMT-3440
MGMT-4410

Winter Semester:

MGMT-4510
MGMT-4520
MGMT-4850

Minor in Business Administration

The Minor shall consist of: ACCT-1510, ACCT-2550, MGMT-2400, FINA-2700, MKTG-1310, STEN-1000. Students must obtain a minimum average grade of 60% in the courses applied to the Minor and a minimum grade of 60% in each business course applied to the minor.

*NB: The Minor in Business will be open to any undergraduate student. Please note however that students must obtain the required prerequisite courses such as math and economics for some of the courses within the Minor. This program cannot be completed through Distance Education.

Minor in Entrepreneurship

Total Courses: 6

STEN-1000, STEN-2900, STEN-3910, STEN-4930, STEN-4910 (STEN-4910 should be taken twice with different topics.)

Students must obtain a minimum grade of 60% in each business course applied to the minor.

ODETTE SCHOOL OF BUSINESS COURSES

Non-Business Students

- Business courses are restricted to Business students only, with the following exceptions:
- All students must have successfully completed STEN-1000 before being allowed to register in any 2000-level (or above) Business courses unless specifically stated otherwise in the course description or with the permission of the Odette School of Business.
- Business courses listed as part of the Business Minor are open to all students, as long as the student has completed the associated prerequisite courses.
- Specific Business courses required as part of a non-Business program are open only to students registered in that program unless approved by the Odette School of Business.
- Non-specific Business courses required or allowed as part of a non-Business program are open only to students registered in that program unless approved by the Odette School of Business.
- In addition to specific course prerequisites, non-Business students must be in semester 3 or above before taking any 2000-level Business courses, and are eligible to take 3000 or 4000-level Business courses only if they are in semester 5 or above, or unless specific arrangements have been made between the student's department and the Odette School of Business.
- Students registered in non-Business programs may have different course prerequisites or requirements as listed in the Business course descriptions. These students should consult with a Business School advisor before registering in Business courses.
- Under no circumstances will non-Business students be allowed to complete more than nine (9) Business courses.

Business Students

- Students registered in a four-year Business program must have successfully completed MGMT-1000 and STEN-1000 before being allowed to register in any 2000-level (or above) Business courses.
- Before being allowed to take any 3000-level Business courses, students registered in a four-year Business program must be in semester 4 or above, and have successfully completed all first-year core courses (ECON-1100, ECON-1110, MATH-1980, ACCT-1510, MGMT-1000, MSCI-1000, MSCI-2020, MKTG-1310 and STEN-1000)
- Before being allowed to take any 4000-level Business courses, students registered in a four-year Business program must be in semester 5 or above, and have successfully completed all first and second-year core courses (ECON-1100, ECON-1110, MATH-1980, ACCT-1510, ACCT-2550, MGMT-

1000, MGMT-2400, MGMT-2430, FINA-2700, FINA-2710, MSCI-1000, MSCI-2020, MSCI-2130, MSCI-2200 and MKTG-1310 and STEN-1000) before being allowed to take any 4000-level Business courses

- Students registered in other than four year Business programs may have different course prerequisites or requirements. These students should consult with a Business School advisor before registering in Business courses.

Pursuant to a grading policy set by the Odette School of Business: all first and second year Business courses will be graded to an average in the 60-70% range: all third year Business courses will be graded to an average of 65-75%; and, all fourth year Business courses will be graded to an average of 67-77%.

Courses below are listed according to the informal administrative units of the Faculty.

Not all courses listed will necessarily be offered in a particular term or year.

Special permission to enter courses without the stated prerequisites must be arranged with the Undergraduate Programs Office and the instructor involved.

Except as otherwise noted, there will be a minimum of thirty-six hours of class contact for all courses. All courses will be three hours a week unless otherwise indicated.

The following course descriptions list only the most advanced prerequisites for that course. It is assumed that students have also successfully completed the requirements for these prerequisites. Courses considered to be equivalent to the listed prerequisites will satisfy the prerequisite requirements.

BUSINESS RESEARCH AND THESIS COURSES

BUSR-4950. Research Based Independent Study

This course will cover methodology, application areas, and software training required to carry out independent research. Working one-on-one with an instructor in one of the current business disciplines of the Undergraduate Program e.g., accounting, management, labor studies, finance, management science, information systems, marketing, strategy, and entrepreneurship, the course will require a written critique of a research methodology from journal articles selected by the instructor; a written review of research methodology and a written literature review. (May be taken for credit twice before BUSR-4990 and once after a successful completion of BUSR-4990 with at least 85% grade if content is different.) (Pre-requisite: Semester 4 standing, and at least 75% cumulative average, 78% major average, and permission of the instructor and the Undergraduate Program Director.) (3.0 credit course)

BUSR-4990. Business Research Seminar and Thesis

In this cumulative 2-term course, the students will work closely with an individual faculty supervisor and receive training in the methods and skills of research in one of accounting, management, labour studies, finance, management science, information systems, marketing, strategy, and entrepreneurship. In the first term of this course, the students will identify a research topic, perform a review of the relevant scholarly literature, develop a research plan, write a research proposal, and make an oral presentation in an open research seminar. In the second term of this course, the students will implement the research plan, write the thesis, and revise the thesis according to the comments of the instructor and a faculty reader assigned by the Undergraduate Program Director. The reader will attend seminars, give comments and suggestions, and give opinions on the final grade on seminars in the first term and read the first revision and the final version of the thesis, give comments and suggestions, and give opinions on the final grade on thesis in the second term. (Prerequisite: At least Semester 6 standing, 75% cumulative

average, 78% major average, 85% average in BUSR-4950 offered by the instructor, and permission of the instructor and the Undergraduate Program Director.)

ACCOUNTING COURSES

ACCT-1510. Principles of Financial Accounting

An introduction to the theory and concepts of financial accounting including generally accepted accounting principles and issues as to classification, recognition, realization, measurement and the ethics of financial reporting. The emphasis of the course is from the perspective of the user of accounting information, allowing the student to become familiar with the information available and its content value. (Prerequisites: ECON-1100, MATH-1980/MATH-1250/ MATH-1720/ MATH-1760 (or equivalent) and STEN-1000).

ACCT-2510. Intro to Financial Accounting Theory

This is the first of 3 courses of intermediate accounting that presents the current developments in the theory of generally accepted accounting principles and CICA (Canadian Institute of Chartered Accountants) standards are introduced. An in-depth, theoretical examination of the determination, measurement, classification, and reporting of assets is presented. The conceptual framework of accounting is stressed. (Prerequisites: ACCT-1510. Business students must also have completed MGMT-1000).

ACCT-2520. Accounting Theory I

This is the second of three courses of intermediate accounting theory that provides an in-depth examination of the determination, measurement, classification and reporting of liabilities and owners' equity. Emphasis is given to the accounting use of the actuarial techniques in the accounting for bonds, pensions, and leases. Where applicable, the interpretation of accounting theory and concepts is presented for transaction analysis, measurement, and classification. The conceptual framework of accounting is stressed. (Prerequisite: ACCT-2510).

ACCT-2550. Principles of Managerial Accounting

An introduction into management's use of internal accounting information for planning, managing, controlling and evaluation of business operations. Topics include cost concepts and costing techniques (including activity-based costing), budgeting, cost-volume-profit analysis, standard costing, performance evaluation and product pricing. (Prerequisite ACCT-1510 or consent of instructor).

ACCT-3520. Accounting Theory II

This is the final course in the intermediate accounting theory sequence covering various special topics in financial accounting such as EPS, interperiod tax allocation, a rigorous study of accounting changes and error analysis and of the statement of cash flows, interim and segmented reporting. Financial statement analysis including business valuations will be covered, both from a quantitative and qualitative viewpoint and the concept and techniques of earnings management are also explored. Cases are used to integrate theory and practice. The conceptual framework of accounting is stressed (Prerequisite: ACCT-2520 or consent of the instructor.)

ACCT-3560. Advanced Managerial Cost Accounting and Analysis

This course is designed to focus on the role and use of accounting information in management decision making, and for formulating policy and strategy. The application of some of the advanced techniques for planning, controlling and performance evaluation will be discussed. Behavioural and ethical issues will be considered. (Prerequisite: ACCT-2550 with a minimum grade of 65%.)

ACCT-3580. Accounting Information Systems

The design and operation of manual and computerised accounting systems. The study of control environment, management and control of transactions and accounts, such as, accounts receivable, accounts payable and inventory. Emphasis will be given to the acquisition and input of information into accounting information systems; modes and methods of file structures and storage of accounting information; retrieval inquiry and report creation of information in files as well as financial statement preparation, analysis, and managerial decision making. Related issues such as audit trail, data retrieval, and data security will also be covered. (Prerequisite: ACCT-2550 and MSCI-2130.)

ACCT-3600. Auditing I

An introductory course designed to provide a broad foundation for all major aspects of auditing including ethical, legal, and statutory influences in the development of international and Canadian auditing standards. This course focuses on objectives, concepts, standards, strategies, processes, and communications relating to external audits. Other services provided by public accountants and current developments affecting auditing and the auditing profession are considered. (Pre-requisite ACCT-2510, Pre or co-requisite ACCT-3580.)

ACCT-3610. Taxation I

This is the first of two courses designed to examine the Income Tax Act. This course focuses on the determination of residency and of income for tax purposes. Other tax related topics such as tax planning concepts, and concepts underlying the Act will be discussed. (Prerequisite: ACCT-2510)

ACCT-4570. Advanced Accounting I

A study of concepts, standards and procedures underlying intercorporate investments including portfolio investments, investments involving significant influence, and investments involving control. The preparation of consolidated financial statements under a variety of circumstances is studied in detail. Other topical areas, such as foreign currency transactions and translation, consolidation procedures of foreign subsidiaries and joint ventures, governmental accounting and accounting for not-for-profit organisations will also be covered. (Prerequisite: ACCT-3520.)

ACCT-4580. Integration and Decision Making in Accounting

This case-based course integrates technical skills, theories and concepts learned in previous accounting courses. In an integrated disciplinary context, students evaluate and apply emerging and current models, design appropriate accounting structures and processes, document and communicate results to relevant users to at all times serve the public interest with an ethical mindset when delivering professional services. (Prerequisites: ACCT 3520, ACCT 3600, ACCT 3610 and ACCT 3560)

ACCT-4590. Advanced Topics in Managerial Accounting

An elective advanced topics course that explores the different types of organizational controls. It focuses on the key decisions that must be made in using controls, such as choices of performance measures, performance standards and targets, and performance-based incentives. Limitations of traditional financial performance measures are discussed (e.g., their tendency to make managers excessively short-term oriented) and recently developed approaches to deal with these shortcomings are analyzed (e.g., EVA, Balanced Scorecard). The course is designed to develop skills that are desirable in managers, management consultants, compensation consultants, financial specialists, or human resource specialists. The course is taught by the case method of instruction. The cases allow for the exploration of the management control issues in a broad range of settings such as start up firms, manufacturing firms, service organizations of different sizes. (Prerequisite: 4th year students only, or by permission of the instructor.)

ACCT-4600. Auditing II

This course is designed to provide an in-depth knowledge of the major aspects of auditing including ethical, legal, and statutory influences in the development of international and Canadian auditing standards. It will examine topics such as audit sampling; public accountants' communications to users of accounting and non-accounting information; and emerging issues in auditing. (Prerequisites: ACCT-3580 and ACCT-3600.)

ACCT-4610. Taxation II

This course will focus on the computation of taxable income for individuals and corporations, and determination of tax. Tax planning techniques in business in a variety of situations will be discussed and other topics such as the Goods and Services Tax will also be considered. (Prerequisite: ACCT-3610.)

ACCT-4620. EDP Auditing

This course is designed to focus on the integration of auditing concepts, standards and procedures in a computerized environment. It will examine EDP general and application controls, the similarities and differences between manual and EDP systems from the auditor's perspective, and will introduce computer-assisted audit techniques, and emerging technologies in EDP auditing. (Prerequisites: ACCT-3580 and ACCT-3600.)

ACCT-4910. Special Topics in Accounting

This is a seminar course covering major concepts or current problems or issues in the area of Accounting. The topic to be covered in a particular semester will vary and will be announced in the previous semester. Interested students should consult the Area Chair of Accounting. (May be repeated for credit towards the Bachelor of Commerce program if content is different, but credit will be granted at most twice towards the Marketing specialization.) (Prerequisite: Consent of instructor.)

ACCT-4950. Independent Study in Accounting

This course must be taken under the direct supervision of an accounting faculty member. (May be taken for credit twice if content is different.) (Prerequisite: consent of the instructor and Area Chair.)

FINANCE COURSES

FINA-2000. Personal Finance

This course provides an introduction to personal financial planning to non-Business students. Topics covered include: the planning process and goal setting, personal budgeting, spending and saving, assessing alternative sources of credit, debt management, basic tax planning, the fundamentals of investing, and financial planning information sources. The goals of the course are i) improving financial literacy and ii) empowering students to improve their personal financial security. (Pre-requisite: Grade 11 math or equivalent.) (May not be used for credit in any Business program.)

FINA-2700. Business Finance I

This course serves as an introduction to the area of business finance. The primary objective is to understand the fundamental concepts and principles of financial management of the business enterprise. After an introduction to the goal financial management, the course will cover the valuation of financial and real investments, risk and return, financial analysis, planning and control, and working capital management. International financial management will also be introduced. (Prerequisites: ACCT-1510, MATH-1980/MATH-1980/MATH-1250/ MATH-1720/ MATH-1760 or equivalent, and STEN-1000. Additional prerequisites for Business students: MGMT-1000 and MSCI-1000.)

FINA-2710. Business Finance II

This course focuses on long-term corporate financial decisions. The goal is to develop an understanding of the concepts and principles of the management of capital assets and resources. Topics include capital budgeting, cost of capital, capital structure, sources of long-term financing, and corporate risk management. (Prerequisites: MSCI-2020 (or equivalent) and FINA-2700.)

FINA-3710. Intermediate Finance

This is a recommended course for students wishing to continue in finance and compulsory for those aiming for a finance concentration. The course covers key topics in capital markets and corporate finance that lay the foundation for material to be covered in advanced finance courses. Areas covered include: fixed income markets and interest rate determination; raising funds in equity markets; the cost of capital; derivatives markets and applications to business finance; and the market for corporate control. (Prerequisite: FINA-2710.)

FINA-3720. Investments

Appraising bonds, preferred, and common stocks as vehicles for investment. The course also involves the study of alternative investments, the market setting, technical analysis, and securities legislation in Canada. (Prerequisite: FINA-2710.)

FINA-3730. Working Capital Management

A seminar in working capital management using case studies. Emphasis is placed on domestic and international cash management, control of accounts receivable, principles of inventory management, short and intermediate term financing. (Prerequisite: FINA-2710.) (This is an experiential learning course.)

FINA-3780. Financial Markets and Institutions

A central theme of this course is the management of Canadian financial institutions through the analysis of their assets and liabilities. This course examines different types of risk exposures faced by these institutions. With real-world examples, this course will also address the current institutional issues in the context of domestic and international financial markets. (Pre-requisite or co-requisite: FINA-3710.)

FINA-3790. International Financial Management

A study of international corporate financial management, international banking, and financial markets. Emphasis is placed on foreign exchange and exposure management. The financial problems and risks faced by multinational corporations and banks are also discussed. (Co-requisite: FINA-3710.)

FINA-4240. Financial Technologies

This course examines the business opportunities, challenges, and risks presented by current and emerging financial technologies (FinTech). An emphasis is placed on understanding the nature of these technologies and their implications for finance and for other disciplines being impacted by the growing importance of FinTech. Students will be challenged to explore course topics in some depth, develop their capacity to explain the nature of financial technologies, and improve their ability to guide organizations in the use of FinTech. (Prerequisite: one of MSCI-2230, FINA-3710, MSCI-3110, MSCI-3120, or MSCI-3230.) (Cross-listed with MSCI-4240)

FINA-4720. Portfolio Management

The shaping of portfolios to fulfill the needs of individuals and institutions including risk-return concepts, diversification, beta analysis, and market efficiency. (Prerequisite: FINA-3710.)

FINA-4740. Corporate Financial Strategy

A seminar course in long-term financial management. Particular attention is directed toward long-term sources of funds, the firm's capital structure, and the cost of the various sources of long-term funds. Principles are illustrated by means of case studies. (Prerequisite: FINA-3710.)

FINA-4770. Derivatives and Risk Management

An introduction to the use of options and futures with an emphasis on managing risk. Review of the markets and trading of equity and currency options; forwards and futures contracts; and options on futures. Principles of the valuation of options and futures. Application of hedging techniques under a variety of circumstances such as for personal investments, portfolio management, corporate risk management, foreign exchange risk management and agriculture. (Prerequisite: FINA-3710.)

FINA-4780. Institutional and Pension Fund Investment Management

The course will discuss performance evaluation; risk management; asset liability management of institutional investors such as pension funds and examine how investment decisions of institutional investors can be aligned with sustainability and Indigenous values that are consistent with their fiduciary responsibility and regulatory frameworks of Ontario and Canada. (Prerequisite: FINA-3710.)

FINA-4910. Special Topics in Finance

This is a seminar course covering major concepts or current problems or issues in the area of Finance. The topic to be covered in a particular semester will vary and will be announced in the previous semester. Interested students should consult the Area Chair of Finance. (May be taken for credit twice if content is different.) (Prerequisite: consent of the instructor.)

FINA-4950. Independent Study in Finance

The student, with the agreement of the instructor, will select, research and report on a topic. (Prerequisite: consent of the instructor and Area Chair.) (May be taken twice for credit if content is different.)

MANAGEMENT AND LABOUR STUDIES COURSES

MGMT-1000. Business Communications

Research has shown that effective communication skills are as necessary to career advancement as technical competence, work experience and academic qualifications. The importance of communication skills is not surprising when you consider that the average business manager spends 75-80% of the day communicating in one form or another. Thus, the focus of this course is to help you to sharpen your ability to communicate and manage conflict effectively - with individuals, within small groups, and with large audiences. This course stresses practical skill building for leaders. Time is spent on communication concepts and techniques, planning, organizing and making presentations, as well as the application of behavioural science theory to business communication and leadership. (Prerequisite or corequisite: STEN-1000) (Not open to non-Business students.)

MGMT-2400. Organizational Behaviour

This course provides an overview of the basics of management theory, coupled with a more applied view of how that theory may work in an organizational setting. It will build upon the understanding of strategic positioning and context provided by its new prerequisite Introduction to Business (STEN-1000) where stakeholders, the environment, and business issues provide the background for understanding the challenges facing today's manager. The course will provide some experiential opportunities to develop team and leadership skills, while looking at what affects the role of the individual and the group within the structure of the organization. An understanding of the influences upon and ways to motivate behaviour in organizations will be developed. (Prerequisite: STEN-1000. Business students must also have completed MGMT-1000) (This is an experiential learning course.)

MGMT-2430. Human Resources Management

Human Resources Management (HRM) is concerned with the management of people at work - a key responsibility of people at work - a key responsibility of every manager within an organization. Topics include: integrating HRM decision making within a business strategy, recruiting and selecting qualified employees, developing and evaluating human resources and retaining and motivating employees through compensation systems, labour relations, and quality of work life initiatives. In recognition of the importance of the increasingly global context to Canadian organizations, the course incorporates a continuing international focus. (Prerequisite: STEN-1000. Business students must also have completed MGMT-1000.)

MGMT-3000. Business Ethics in a Global Context

This required third year course examines ethical issues encountered in the management of business organizations operating domestically and globally. The course is designed to increase student awareness of the ethical dimension of business and to provide a decision-making model for resolving ethical dilemmas encountered in business operations. The course begins with an examination of the basic philosophical perspectives on ethical behaviour and then focuses on issues such as discrimination and employee equity, environmental effects of business activities and advertising ethics. The overall goal of the course is to contribute to the development of the moral manager. (Prerequisites: MGMT-2430.)

MGMT-3420. Compensation Management

This course is intended to give an understanding of the power of organizational rewards and managing this power for organizational effectiveness. This course entails an outline of the major concepts and principles of equitable reward design within organizations. Topics include the planning of salary and wages, pay equity, incentive pay, benefits, non-financial rewards, and the clarification of the linkages between rewards and desired behaviours. Special emphasis is given to reward system design and the evaluation of compensation program effectiveness. (Prerequisite: MGMT-2430.)

MGMT-3440. Labour-Management Relations

A comprehensive introduction to the dynamic world of labour and management relations focusing on the unionized sector. The problems, issues, and challenges growing out of the labour-management relationship are examined against a broad background of information, including: the differences between union and non-union workplaces; the development and operation of labour unions; the impact of labour legislation; the negotiation and administration of collective agreements; and the resolution of industrial conflict. Given the size and importance of this unionized workforce in Canada, the knowledge and skills developed in this course have wide application. (Prerequisite: MGMT-2430 or Semester 3 or above standing for students in the Labour Studies program.)

MGMT-3830. International Human Resources Management

The focus of this course is the management of people in the international context. Issues covered include culture, communication, and differences in the economic, social and legal environments as they affect people in organizations. Particular attention is paid to staffing, training, and compensating parent country nationals, host country nationals and third country nationals. (Prerequisites: MGMT-2430)

MGMT-4410. Training and Development

This course has an experiential focus: student teams are responsible for developing and presenting their own training programs. The focus of this course is on the three major aspects of training and development efforts: (1) needs assessment, (2) program development, and (3) evaluation. Course topics include the design of training programs, adult learning models, development managerial skills, and the design of effective workshops. This course has an experiential focus; student teams are responsible for development and presenting their own training programs. (Prerequisite: MGMT-2430.)

MGMT-4450. Organization Design

This course is designed to provide the student with an understanding of the importance of structure and processes in the analysis of modern complex organizations. It addresses how the internal structures should be changed, renewed, and adapted in view of external environmental threats and opportunities emanating from political, economic, social, legal, technological, and demographic changes. Topics include: organizational goals and effectiveness, structure and design, bureaucracy and life cycle, structural archetypes, information and control, power and politics, intergroup relations and conflict, structure-strategy relations and organizational renewal. This course utilizes the case method and other applied problem-solving skills in analyzing and evaluating organizational structures and processes. (Prerequisite: MGMT-2400.)

MGMT-4480. Labour Relations Law and Employment Legislation

Legislation, administrative agencies and courts play a significant role in shaping employer-employee relationships. This course aims to increase the knowledge and provide analytical skills to students who are interested in employment relationships in union and non-union workplaces. The course includes an analysis of labour relations law, employment standards law, the occupational health and safety law. Emphasis will be placed on Ontario laws. Lectures and case discussions will be used. (Prerequisite: MGMT-3440.)

MGMT-4490. Negotiations

Various aspects of union-management negotiations in the private and public sector will be discussed. A key aspect of the course is a bargaining simulation played by students assuming the role of union and management negotiators. Grievance arbitration and other dispute settlement procedures will also be discussed. Students will learn negotiation and conflict resolution skills relating to the union-management

relations. (Prerequisite: MGMT-2430 or Semester 3 or above standing for students in the Labour Studies program.)

MGMT-4510. Organizational Staffing

At the heart of the organizational staffing process is the forming of matches between people and jobs that will result in an effective workforce for the organization. The course identifies the key influences upon, and components of staffing and overviews such support activities as job analysis, external and internal recruitment, selection and the assessment of staffing effectiveness. The course goes on to examine the deployment processes that represent the end point of the person/job match. This match does may not be permanent, and so the course does go on to give consideration to equitable termination and outplacement practices which are required when people leave the organization. (Prerequisite: MGMT-2430.)

MGMT-4520. The Management of Organization Health, Wellness and Safety

Health and safety plays a prominent role in the development of a strong organizational culture and a productive workforce. This course emphasizes the key goal of managers and HR professionals to create, develop and nurture a culture that is fully aware of the importance of safety and the advantages of a proactive employee wellness culture, and is willing to take the necessary steps to achieve it. Students will evaluate practices in the areas of health, safety, security and Workers' Compensation and the importance of due diligence and meeting safety legislation. An emphasis in the course is the adoption of proactive programs of employee wellness and assistance, careful medical and safety testing and the implementation of strategies to minimize compensation costs and maximize compliance with safety guidelines. (Prerequisite: MGMT-2430.)

MGMT-4810. Diversity in the Workplace

This course will address the knowledge and skills managers must develop in meeting the opportunities and challenges created by the diversity in the labour force. It will draw on the literature from a number of disciplines in focussing on interpersonal relationships as managers interact with and work with persons who are different from themselves. The human rights legislation will provide the framework for discussions on managing and valuing diversity in terms of gender, age, race, religion, ability and other groups. The course will use lectures and case discussions on the role of union and management in implementing equity in the workplace. (Prerequisite: MGMT-2430 or Semester 3 or above standing for students in the Labour Studies program.)

MGMT-4850. Human Resources Planning

This course is concerned with planning of the human resources needs of organizations, focusing, in particular, on the role of the Human Resources Management function in this task. The objective is to provide an understanding of how the essential elements of the human resources planning process, in both unionized and non-unionized organizations, can be designed to match the wider organizational context. Topics include the assessment of human resources strategy and the application of planning principles to the different activity areas of human resources management, such as staffing, development and the management of diversity. An ongoing theme is the evaluation of how strategic human resources management contributes to organizational effectiveness. (Prerequisite: MGMT-3440.)

MGMT-4910. Special Topics in Management and Labour Studies

This is a seminar course covering major concepts or current problems or issues in the area of Management and Labour Studies. The topic to be covered in a particular semester will vary and will be announced in the previous semester. Interested students should consult the Area Chair of Management and Labour Studies. (Prerequisite: consent of the instructor.) (May be taken twice for credit if content is different.)

MGMT-4950. Independent Study in Management and Labour Studies

The student, with the agreement of the instructor, will select, research and report on a topic. (Prerequisite: consent of the instructor and Area Chair). (May be taken for credit twice if content is different.)

MANAGEMENT SCIENCE COURSES**MSCI-1000. Introduction to Business Data Analysis**

This course focuses on giving students the knowledge and skills to be used in a world in which spreadsheets are an integral part and which requires graduating business students to be proficient in its use. It also provides students with the knowledge and skills to be used in other courses in which spreadsheets' powers can play an important role in analyzing data and presenting information in a professional manner. This knowledge and skills include: effectively entering data on spreadsheets so that they can be efficiently manipulated and converted into relevant information, both numerical and graphical; and, creating and interpreting this relevant information in a professional manner. To accomplish this, students will learn how to create professional looking graphs and charts and how to use and apply various Excel functions and capabilities including pivot tables, filtering, sorting, merging, lookup formulas, conditional formulas, relative and absolute formulas, range labelling, descriptive statistics functions, probability functions and financial functions. (Prerequisite: Semester 2 standing or above.) (Corequisites: MATH-1980/ /MATH-1250/ MATH-1720/ MATH-1760 (or equivalent)

MSCI-2020. Business Data Analysis

Statistical inference in a business environment. Topics include one population inferences, two population inferences, analysis of variance, Chi-Square tests, linear regression and correlation. (Prerequisites: STEN-1000, MSCI-1000 and MATH-1980/ MATH-1250/ MATH-1720/ MATH-1760 (or equivalent).) (Cannot obtain credit for both MSCI-2020 and STAT-2910 if MSCI-2020 is taken after STAT-2910.)

MSCI-2130. Introduction to Management Information Systems

This course provides an overview of Management Information Systems (MIS). Topics include: various types of MIS such as Information Reporting Systems, Decision Support Systems, and Office Automation Systems; introduction to hardware and software technology; personal, functional and enterprise information systems; and the value added to an organization by MIS.(Prerequisite: STEN-1000. Business students must also have completed MGMT-1000 and MSCI-1000. Non-Business students must have completed COMP-1047 or COMP-1400 or its equivalent)

MSCI-2200. Quantitative Decision Models I

An introduction to the use of quantitative approaches to decision making. Topics include linear programming (model formulation and applications, computer solution, sensitivity analysis, and interpretation), transportation model, project management; PERT/CPM, inventory control. (Prerequisites: MSCI-2020 (or equivalent), and MATH-1980/ MATH-1250/ MATH-1720/ MATH-1760 (or equivalent). Business students must also have completed MGMT-1000.)

MSCI-2230. Introduction to Data Science for Business

This course provides an overview of the basic principles and approaches used to analyze and extract key insights from business data. All phases of the data science process will be examined in some depth including problem formulation, data acquisition, data modeling, model evaluation, and model deployment. Particular emphasis will be placed on expressing business problems in forms that can be addressed using data science tools and techniques. As an introduction to data science, this course

focuses on providing a broad survey of the field as a foundation for more advanced level courses. (Prerequisite: MSCI-2130 or COMP-1400.)

MSCI-2250. Introduction to Project Management

This course focuses on introducing students to the organizational, managerial, and technical constructs associated with program management. The PMI (Project Management Institute) specified knowledge areas of project management are explored, while introducing students to a wide array of tools and techniques that seasoned project managers use. Students are introduced to popular IT and analytical tools and explore how these tools help managers to more effectively manage projects. (Prerequisites: STEN-1000, Business students must also have completed MGMT-1000 and MSCI-1000. Non-Business students must have completed COMP-1047 or COMP-1400 or an equivalent).

MSCI-3050. Statistical Quality Design and Control

The course discusses some of the important statistical concepts and methods for quality design and improvement. Topics include: statistical process control, development and interpretation of different kinds of control charts for variable and attribute data, designs of experiment for product/process improvement. A software package may be required to simulate the operation of an actual process, and to illustrate the methodology. (Prerequisites: MSCI-2020 (or equivalent))

MSCI-3110. Introduction to Data Base Management

A study of the planning and design of data base systems in a business organization. Topics include: data concepts and modelling, data base planning, data structure and storage techniques, and data base design. A micro-computer-based data base software package will be used for regular assignments and team projects. (Prerequisite: MSCI-2130 or COMP-1400.)

MSCI-3120. Business Process and Data Analytics

This course integrates the macro (processes) and micro (data analysis) view of businesses. The first half of this course focuses on the concept and evolution of business process management (BPM) and its impact on organizations. Topics will include how organizations benefit from BPM to enhance its competitiveness, sustainability, innovation and growth; techniques and evolution of process mapping; workflow management; and enterprise applications. The second half of this course focuses on the data underlying business processes. Topics will include data visualization and predictive modeling techniques using state-of-the-art data analysis software. (Prerequisites: MSCI-2130 or COMP-1400.)

MSCI-3200. Quantitative Decision Models II

An introduction to the use of quantitative approaches to decision making under uncertainty. Topics include: inventory management under probabilistic demand, waiting line models or queues, computer simulation, decision analysis, multi-criteria decision making. (Prerequisite: MSCI-2200.)

MSCI-3230. Data Science Tools and Methods

This course offers an in-depth exploration of key tools and techniques used to assemble, analyze, and evaluate large business datasets obtained from diverse sources. Techniques for communicating the results of this analysis and techniques for introducing analytical models into business processes will also be examined. Students will develop the practical skills needed to acquire, manage, and analyze business data using current methodologies and software applications. (Prerequisite: MSCI-2230)

MSCI-3310. Operations Management I

An introduction to the problems and techniques encountered in the production of goods and services. Topics include: forecasting, capacity planning, facility location and layout, aggregate planning, inventories and materials requirement planning. (Prerequisite: MSCI-2200.)

MSCI-3410. Supply Chain Management I: Introduction and Fundamentals

This course introduces problems and techniques encountered in the management of supply chain. Topics include: supply chain performance, drivers, and metrics, design of distribution networks, uncertainties along the supply chain and demand forecasting, aggregate production planning, managing inventory under uncertainty, product availability and supply chain profitability. (Prerequisite: MSCI-2200.)

MSCI-4230. Business Analytics in Practice

In this course students will apply their business analytics knowledge and skills to the resolution of practical business problems in marketing, human resource management, supply chain management, accounting, finance, and other business related domains. Students will be challenged to analyze and understand business problems in these areas, formulate and evaluate data analytic models that can address these problems, acquire the data needed to support their models, and then refine and deploy these models within business settings. Emphasis will be placed on linking business analytic knowledge and skills to the problems encountered in specific business domains. (Prerequisites: MSCI-3110, MSCI-3120, and MSCI-3230)

MSCI-4240. Financial Technologies

This course examines the business opportunities, challenges, and risks presented by current and emerging financial technologies (FinTech) and how these technologies are reshaping the global financial order. An emphasis is placed on understanding the nature of financial technologies and their implications for finance and for other disciplines being impacted by the growing importance of FinTech. Students will be challenged to explore course topics in some depth, develop their capacity to explain the nature of financial technologies, and improve their ability to guide organizations in the use of FinTech. (Prerequisite: one of MSCI-2230, FINA-3710, MSCI-3110, MSCI-3120, or MSCI-3230.) (Cross-listed with FINA-4240)

MSCI-4310. Operations and Supply Chain Management II

The course explores other substantive and analytical issues in the planning and control of operations and supply chain management. Topics include: supply chain drivers and metrics, designing distribution networks and applications to online sales, designing global supply chain networks, sales and operations scheduling, and supply chain decisions such as transportation, sourcing, pricing, and revenue management. (Prerequisite: MSCI-3310 or MSCI-3410.)

MSCI-4910. Special Topics in Management Science

(May be taken for credit twice if content is different.) (Prerequisite: consent of the instructor.)

MSCI-4950. Independent Study in Management Science

(Prerequisite: consent of the instructor and Area Chair.) (May be taken for credit twice if content is different.) The student, with the agreement of the instructor, will select, research and report on a topic.

MSCI-4980. Modeling and Analysis in Management Science and Systems

This course is concerned with modelling, analysis and presentation of results using tools and techniques developed in the areas operations management, operations research, statistics and information systems. Problems are selected from case studies, simulation and real-life projects. A major part of the evaluation is based on team and individual reports and presentations. (Prerequisite: MSCI-3310 or MACI-3410.)

MARKETING COURSES

MKTG-1310. Principles of Marketing

An introduction to the principles, concepts and techniques of marketing. A significant objective of the course is the development of a basic understanding of the marketing process and its role in the organization, in the economy, and in global markets.

MKTG-2320. Marketing Problems-Applications and Decisions

The application of concepts and techniques in marketing through the use of cases and simulation gaming. The course will apply the concepts learned in MKTG-1310, Principles of Marketing, in a managerial, decision-making format. (Prerequisites: MGMT -1000 and MKTG-1310 Pre or corequisite: FINA-2700.)

MKTG-3320. Research Methods in Marketing

The use of analytical methods to improve the efficiency of the marketing operations of companies and other organizations with emphasis on the development of a broad understanding of the uses and methods of research as applied to marketing. (Prerequisite: MSCI-2020 and MKTG-1310.)

MKTG-3340. Consumer Behaviour

An analysis of consumer and buyer behaviour and their implications for marketing decisions. The course examines theories of, and research in, consumer behaviour through cases and group projects. (Prerequisite: MKTG-1310.)

MKTG-3350. Distribution and Marketing Channels

The subject of marketing channels deals with the flow of ownership of a product from manufacturer to final user. Major topics include principles of marketing channel design, the types and roles of wholesalers and retailers, the impact of the other elements of the marketing mix, and issues in marketing channel management, such as power, conflict and legal concerns. (Prerequisite: MKTG-2320).

MKTG-3370. Quantitative Analysis for Marketing Decisions

The application of quantitative techniques to marketing problems and strategy. (Prerequisite: MSCI-2020 and MKTG-1310.)

MKTG-3380. Retail Marketing Management

An introduction to retailing concepts and the examination of various managerial issues related to retailing, including retail marketing strategy formulation, customer care and service, product assortments, retailer-supplier relations, pricing, inventory control, and location and layout decisions. (Prerequisite: MKTG-2320.)

MKTG-3390. Logistics and Supply Chain Management

The planning, implementing and controlling of logistics activities associated with the flow of goods and related information, from the raw materials stage to the end user. This course discusses the fundamentals of business logistics and supply chain management, including transportation, order management, warehousing, reverse distribution, logistics information technology, and the impacts of product, price and promotion. (Prerequisite: MKTG-1310 or permission of instructor.)

MKTG-4320. Brand Management

This course delves into the pivotal role of brand equity in driving organizational success. Through a blend of theoretical models and real-world applications, students gain a deep understanding of how to create and execute brand strategies. This course not only explores the principles of brand building but also equips students with practical skills essential for effective brand management. By examining consumer behaviour and insights, marketplace trends, brand essence and brand elements, students will learn to

Identify opportunities and determine strategies and programs to best position the brand to foster consumer loyalty and market differentiation. (Prerequisite: MTKG 1310 and MKTG 2320.)

MKTG-4330. Digital Marketing

This course covers the fundamentals of digital marketing, including content marketing, social media marketing, email marketing, digital advertising, search engine optimization, and digital analytics. Through these topics, students will learn the art of creating and distributing valuable, relevant, and consistent content, and will examine the use of social media platforms to connect with an audience, build brand awareness, increase sales, and drive website traffic. Students will explore how to create effective email campaigns that engage subscribers, promote loyalty, and increase conversions. The course will explore online advertising options and the creation of effective ad campaigns for target audiences. The course will also cover the fundamentals of how search engines work to improve website visibility and ranking, as well as how to measure, manage, and analyze digital marketing campaigns to understand their effectiveness and make data-driven decisions. Students will learn how to integrate these components into a cohesive digital marketing strategy. (Prerequisites: MSCI-2130 and MKTG-2320). (Prerequisites: MSCI-2130 and MKTG-2320).

MKTG-4350. International Marketing

This course is concerned with the problems and opportunities of marketing in foreign environments. It will focus on the cultural, economic, and geographical problems encountered in managing the marketing function from a Canadian manager's perspective. (Prerequisite: MKTG-2320.)

MKTG-4360. Advertising Management

A study of how to approach the management of advertising in business enterprises. The focus will be on making advertising decisions (e.g., setting advertising objectives, creating advertising campaigns, developing media strategies, and measuring advertising results) in relation to the overall marketing strategy of the business or non-business enterprise. (Prerequisite: MKTG-2320.)

MKTG-4370. Sales Management

The study of the personal selling area, including an examination of the role and responsibilities of the salesperson, the sales management, and sales management functions. (Prerequisite: MKTG-2320.)

MKTG-4380. International Logistics

This is an applied course discussing the physical movement of products across international borders. The course examines the decisions that a logistics manager must make when shipping products internationally and the background knowledge that a logistics manager should possess to make these decisions. Topics include international ocean and international air transportation; customs duties; government influences on international logistics; international terms of carriage; and international cargo insurance and documentation. (Prerequisite: MKTG-1310 or permission of the instructor.)

MKTG-4390. Marketing Strategy and Planning

An advanced course in the management of the marketing function. The course will include an appraisal of the key issues in the management of the marketing function with major emphasis on the development, formulation, implementation, and control of the firm's marketing plan. Emphasis will also be placed on current key issues in the marketing area and global marketing considerations. (Prerequisites: MKTG-2320 and any 4 of MKTG-3340, MKTG-3320, MKTG-3350, MKTG-3370, MKTG-3380, MKTG-3390, MKTG-4330, MKTG-4350, MKTG-4360, MKTG-4370, MKTG-4910 and MKTG-4950)

MKTG-4410. Sustainability in Marketing

This course delves into the dynamic intersection of marketing, sustainability, and corporate social responsibility (CSR). In an era where consumers increasingly value ethical business practices and environmentally conscious choices, organizations must adapt their marketing strategies to align with these evolving expectations. This course equips students with the knowledge and skills needed to navigate the complex landscape of sustainable marketing and CSR in the contemporary business environment. (Prerequisite: MTKG 1310 and MKTG 2320)

MKTG-4450. Services Marketing

This course will be of particular interest to students who wish to explore marketing and management issues related to service industries (such as travel, hospitality, financial, sports, and other service related businesses). The course recognizes that service organizations require a distinctive approach to marketing and operations strategy, both in their development and execution. This course explores ways that goods-producing and -selling firms might use and market “service” as a source of competitive advantage. Topics include the service dominant logic; the systems perspective; research; branding; e-service principles; overlap of marketing/operations/human resource systems in service organizations (i.e., internal marketing); service blueprinting; service recovery; and service customer relationship management (CRM). Throughout, heavy emphasis will be placed on understanding the service consumer experience. (Prerequisites: MKTG-2320, MKTG-3340)

MKTG-4910. Special Topics in Marketing

This course examines major concepts, industries, ideas, issues or current problems in Marketing. Topics, and the method of delivery, may vary from semester to semester. Please contact the instructor for further information. (May be repeated for credit towards the Bachelor of Commerce program if content is different, but credit will be granted at most twice towards the Marketing specialization) (Prerequisite: Consent of instructor.)

MKTG-4950. Independent Study in Marketing

This course is of varying content dealing with topical issues in marketing. The course might focus on a specific functional area or a particular environment for the application of marketing concepts. Administration of the course will vary as appropriate with its content and might involve a literary survey, research project, experiential exercise, or other format. (Prerequisites: MKTG-2320 and consent of the instructor and Area Chair.) (May be taken for credit twice if content is different.)

STRATEGY AND ENTREPRENEURSHIP COURSES

STEN-1000. Introduction to Business

This course takes a holistic approach in helping students develop an understanding of their future places, as entry-level managers, in business and other forms of organizations. Functional business learning is undertaken using the lecture method. In parallel, the basic elements of strategic management are introduced in order to develop students’ strategic thinking capabilities. Project work focuses on adapting students’ career strategies to the employment environment, and on adapting companies’ strategies to their competitive environments. Finally, the case method is used to emphasize ethical self-management, group dynamics and organizational governance, and entrepreneurial processes involved in starting and managing a small business. The course demands that students: use their initiative; develop their analytical, decision-making and interpersonal management skills; and take responsibility for achieving success.

STEN-2050. Co-op Work Term I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students

with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course can not continue in the Co-op program.) (This is an experiential learning course.)

STEN-2900. Fundamentals of Entrepreneurship

This is a survey course designed to introduce students from all faculties to entrepreneurship as a career option. The entrepreneurial process will be explored through a mix of lectures and case studies. Topics include the identification of profitable business ideas, assessment of business opportunities, entry strategies, marshalling resources, and the start-up process. (Prerequisite: STEN-1000. Business students must also have completed MGMT-1000.)

STEN-3050. Co-op Work Term II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course can not continue in the Co-op program.) (This is an experiential learning course.)

STEN-3900. Entrepreneurial Resource Management

This course covers the strategic issues involved in attracting and managing resources - financial, human, and intellectual capital - in the entrepreneurial firm. The course is taught from two distinct perspectives - from the point of view of the resource provider (angel investor, venture capitalist, bank, corporation, talent) and from the point of view of the resource seeker (the entrepreneur). The course focuses on the strategic implications, rather than financial techniques, associated with both attracting resources and valuing new and growing ventures. The course is suitable for any student wishing to pursue an entrepreneurial career path, including a career in venture capital. Pre-requisites: FINA-2710 (Business Finance II) and MKTG-1310 (Principles of Marketing).

STEN-3910. New Venture Formation

Designed for students who choose entrepreneurship as a career option, this course is an in-depth study of the process of drawing the blueprints for a new enterprise including: developing business ideas, developing business concepts, conducting feasibility studies, choosing a legal form or business, writing business plans, identifying and approaching sources of money, raising funds, and putting together a package of resources to start an enterprise. (Prerequisites: STEN-2900.)

STEN-3930. International Business

This course is designed to provide students with the tools to think globally and manage internationally. This survey course covers a wide range of topics including, the global trade and investment environment, the international firm's cultural, political, and competitive environment, and the management and operations of international firms. The focus throughout the course is on the changes that occur when a firm moves from a domestic focus to a global one. (Prerequisites: FINA-2710 and MKTG-1310.)

STEN-3970. The Law and Business Administration

A survey of the law pertaining to business administration. Topics include: the legal approach to business problems, contracts, sale of goods, bills of exchange, agency, bailment, real property, partnerships, corporations, and bankruptcy. (Prerequisite: MGMT-2430.)

STEN-4050. Co-op Work Term III

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

STEN-4900. Strategy in the Global Business Environment

This course builds on the basic knowledge provided in STEN-3930 to provide students with an in-depth appreciation of global management issues. The course focuses on developing and implementing global strategies. This includes a detailed analysis of the international environment and the forces that determine global effectiveness, as well as consideration of different forms of entry available to firms and the specific factors that must be addressed to implement global strategies successfully. (Prerequisite: STEN-3930.)

STEN-4910. Special Topics in Strategic Management and Entrepreneurship

This is an advanced course designed to examine, in-depth, the strategic issues facing business decision makers. Coverage will vary to reflect the contemporary issues and concerns of today's executives. (May be taken for credit twice if content is different.) (Prerequisite: STEN-3910, fourth year standing or consent of the instructor.)

STEN-4930. Field Study in Strategic Management and Entrepreneurship

In this course, teams of students study an actual firm focusing on identifying the strategic issues facing the firm, the needed strategic plans for addressing them, and the implementation of such plans. Students pursuing the entrepreneurial option can also take this course to finalize the prototype for the business they intend to start. (Prerequisite: STEN-3910, fourth year standing or consent of the instructor.)

STEN-4950. Independent Study in Strategic Management and Entrepreneurship

Under faculty supervision, students undertake an individualized program of independent study to pursue, in great depth, a topic in strategic management or entrepreneurship where they can apply the knowledge gained in prior courses. (Prerequisite: consent of instructor and Area Chair.) (May be taken for credit twice if content is different.)

STEN-4960. Enterprise Development Consulting

Students will perform business consulting and market research for local organizations, giving them opportunities to network while applying skills and knowledge learned in the classroom to real life business situations. Semester-long projects covering different business areas are performed in small supervised teams. Weekly class time is a round-table discussion format used for collaboration of ideas and strategy with the rest of the class. Students will be evaluated on participation along with formal reports and presentations regarding the projects. Highly motivated students from a variety of business-related disciplines will make-up the consulting team. (Prerequisites: Approval of instructor.) (Open to Semester 7 and above students only).

STEN-4980. Strategic Management

Taught from the perspective of the CEO, this is the capstone course of the B.Comm. Program. It is designed to integrate the knowledge gained in all business courses and focus such knowledge on the central task of managing the firm in its entirety. (Prerequisites: All other required Business courses and

Semester 7 or 8 standing for B. Comm. students, or Semester 5 or 6 standing for B. Comm. for University Graduates students.) (Not open to non-Business students.)

FACULTY OF EDUCATION

GENERAL INFORMATION

History

The Faculty of Education, University of Windsor, was established on July 1, 1970, thus becoming the seventh Faculty in the University. Its predecessor, Windsor Teachers' College, founded in 1962, trained its students to teach in the elementary schools of Ontario. Integration with the University opened the way to the development of new programs of study designed to prepare candidates for teaching in both elementary and secondary schools.

The Role and Mission of the Faculty of Education

The Faculty of Education, University of Windsor, promotes the professional and scholarly growth of teachers at all levels as reflective, caring, competent and innovative educators. We advance knowledge and contribute to the improvement of pedagogical practice through our teaching, our research and scholarly activities, and our community service and development. Our undertakings are informed and shaped by a commitment to equity and social justice.

We approach teaching and learning primarily from a constructivist perspective, which builds upon the philosophical principles of progressive education. Some key elements include student-centred active learning, authentic activity, and integration of prior experiences. We are focused on providing prospective teachers with what they need to know in order to teach diverse student bodies. We value teaching in ways that emphasize the understanding of differences that may arise from diverse cultures, family experiences, multiple intelligences, and learning styles. Informing the design of our pre-service program are the following beliefs:

- effective teachers are able to work with students with a wide range of learning needs, including those with exceptionalities;
- teacher candidates learn best by doing and reflecting, collaborating with skilled professionals, and by sharing their experiences; and
- teacher candidates should be provided opportunities to develop a professional sense of accountability, which includes an understanding of the social and moral responsibilities that underlie the practice of the teaching profession.

The ultimate purpose of the Faculty of Education is to enable teacher candidates to prepare their students to be responsible and productive citizens. We stress to our teacher candidates the importance of recognizing the enormous influence they will have on students. They must continuously evaluate what students are thinking and modify their plans to take into account what they discover. In this regard, we promote the notion that teachers are powerful classroom ethnographers with the ability to analyse and explain to themselves and to others why they do the things they do. We believe teacher candidates should internalize the dispositions and skills needed to study their teaching and take responsibility for their own professional development and lifelong learning.

GENERAL REGULATIONS AND ENROLMENT LIMITATIONS

Students who have completed a degree in Education through the consecutive pre-service program, or who have completed Education courses in a Concurrent program, may not count any of the Education courses toward another degree.

The Faculty of Education reserves the right to limit enrollments in any program or individual course of instruction described in this Calendar in cases where the Faculty's teaching and other resources cannot accommodate all of the qualified applicants. In addition, not all courses listed may be offered.

PROGRAMS

Consecutive Bachelor of Education (2 year program)

APPLICATION

Candidates wishing to enter the two-year, pre-service program of study must apply through the Ontario Universities' Application Centre using the on-line application form (www.ouac.on.ca/teas/).

Applications must be received by the Centre by the announced date.

Applicants select one of three possible levels of teaching specialization: Primary-Junior (Junior Kindergarten to Grade 6), Junior-Intermediate (Grades 4 to 10), and Intermediate-Senior (Grades 7 to 12). Pertinent theory and exemplary teaching practices are supplemented by directed observation and field experience.

SELECTION OF CANDIDATES

Candidates will be selected for admission to the Pre-Service program on the basis of superior academic qualifications and experience profiles.

The Faculty of Education also offers an Equity Admissions Program.

ADMISSION REQUIREMENTS

- 1) A candidate for admission to the two-year, pre-service program of study leading to the Bachelor of Education (General) Degree and the Ontario College of Teacher's Certificate of Qualification and Registration must submit proof of graduation with an approved degree from an accredited postsecondary institution. The candidate's degree program must include at least three years of full-time study or ninety academic credits or equivalent beyond the Ontario School Secondary Diploma (OSSD) or its equivalent.
- 2) A candidate who wishes to qualify for the Ontario Certificate of Qualification, Intermediate-Senior concentration, will be required to select two teachable subjects from the following: Business Studies - General, Biology, Chemistry, Dramatic Arts, English, French as a Second Language, Geography, History, Mathematics, Media Arts, Music-Instrumental, Music-Vocal, Physical and Health Education, Physics, Science (General), Social Sciences General, and Visual Arts.

Junior-Intermediate candidates will be required to select one teachable subject from the same list, excluding Biology, Chemistry, Media Arts, Physics and Social Sciences-General, Business Studies-General.

A candidate for the Intermediate-Senior level must have as prerequisites for the major teachable subject at least ten semester courses or equivalent (thirty credits) and for the second teachable subject at least six semester courses or equivalent (eighteen credits). Prerequisites for the Social Sciences General include courses in Anthropology, Political Science, Psychology, Women's Studies and/or Sociology. Candidates for the Junior-Intermediate area should have as prerequisites for their teachable subject at least six semester courses or equivalent (eighteen credits). Additional requirements apply for Music and French as a Second Language teachable subjects. Please see the Faculty of Education website.

3) The following are required of all accepted applicants:

- (a) completed application form with the documents noted on form;
- (b) birth certificate and Social Insurance Number (S.I.N.);
- (c) proof of Canadian Citizenship or permanent residency as defined by the Immigration Act (Canada), or of eligibility for employment in Canada (if the Ontario Certificate of Qualification or a Temporary Letter of Standing is to be awarded);
- (d) legal proof of change of name must be submitted where the name being used differs from that shown on the birth certificate.

4) Additional requirements:

- (a) Prior to September 9th, the candidate must present proof of a tuberculin test as required by the Ontario Ministry of Health. The test must have been administered during the previous twelve months. Failure to do so may result in removal from the program.
- (b) An official Police Vulnerable Sector Check. The check must have been obtained within the previous six months.
- (c) After acceptance, students are required to submit to the Faculty a recent photograph (passport-size) for identification purposes within the Faculty of Education.
- (d) Proof of various vaccination(s) may be required at times by school boards, the university and /or health unit mandates

STANDING REQUIRED FOR CONTINUATION

Faculty Courses:

Teacher Candidates, who obtain three or more final grades below a 60-62.9% in any course in the program, or one or more final grades of 0-49.9% in any course in the program, over the duration of the program, will have failed the Bachelor of Education (BEd) Degree and will not be eligible for recommendation to the Ontario College of Teachers for certification. In all such cases, upon a cumulative academic record as defined above, Teacher Candidates will be required to meet with the Associate Dean, Teacher Education immediately to review their academic standing, which may lead to the requirement to withdraw from the program. Teacher Candidates may be provided with an opportunity to return to the Faculty of Education to fulfill outstanding requirements for the completion of the BEd Degree. Conditions of reinstatement are the sole prerogative of the Dean or her/his designate.

Practicum:

Each teacher candidate receives a final Pass/Fail grade for Practice Teaching (EDUC-5499). A pass is an essential prerequisite for both the BEd degree and recommendation for certification to the Ontario College of Teachers. The Pass/Fail determination is based on the Faculty Advisor's Final Summative

Practicum Report/Portfolio Assessment, which documents the overall field experience using a range of criteria. Satisfactory performance in practice teaching is essential for success.

Generally, in order to pass, a teacher candidate will have received “Satisfactory” Summative assessments from the Associate/Mentor Teacher at the end of each placement. However, in cases where a teacher candidate receives a “Borderline” Summative assessment in the first placement, but receives “Satisfactory” Summative evaluations in all subsequent placements, the teacher candidate’s status will be reviewed by the Associate Dean, Pre-Service. A teacher candidate who receives a “Borderline” assessment in either of the final two placements will be required to complete an additional placement and obtain a “Satisfactory” Summative assessment.

A teacher candidate who receives a Summative “Borderline” assessment will be notified in writing that he/she is in danger of not meeting the standard required in order to obtain a Pass. Teacher candidates who receive either two Summative “Borderline” assessments or one Summative “Unsatisfactory” assessment have not met the standard required to obtain a Pass in EDUC-5499. All such cases will be reviewed by the Associate Dean, Pre-Service, who will determine the next steps in the process. Placements which are terminated by the school will be considered “Unsatisfactory.”

Practicum Failure

It should be noted that failure may result from any serious contravention of the Ontario College of Teachers Standards of Practice and Ethical Standards for the Teaching Profession, including, but not limited to:

- Professional misconduct during the practicum component of the Faculty of Education program;
- Academic misconduct during the practicum component of the Faculty of Education program; and/or
- Neglect of teaching responsibilities and/or poor teaching performance during the practicum.

Failure due to issues related to performance in teaching practice, include, but are not limited to:

- Unsatisfactory performance in teaching practice (2 borderline or 1 unsatisfactory summative assessment); and/or
- An unsatisfactory portfolio assessment by the Faculty Advisor.

Failure for Cause

In certain circumstances a candidate may be deemed to have failed the Practice Teaching course, EDUC-5499, for cause. Failure for cause may result from professional misconduct during the practicum and/or gross neglect of teaching duties. All cases of this kind are referred for investigation and decision to the Associate Dean, Pre-Service Education, who may refer the matter to the Professional Standards Committee.

Sessional records

Sessional records include term assignments, oral and written tests, and practical work. The general attitude of the candidate to his or her work, adaptability to teaching, and the probability of future success as a teacher may be taken into consideration in determining sessional standing.

Final grades

Final grades awarded are based upon the accumulated evaluation of the candidate. Formal final examinations may be held; however, no formal supplemental examinations will be allowed.

STANDING REQUIRED FOR GRADUATION

To complete the Bachelor of Education (BEd) Degree and be recommended to the Ontario College of Teachers for certification, teacher candidates must meet the expectations in all areas of the pre-service education program. This means that candidates must successfully complete their course work, field experience (Each teacher candidate must receive a pass in EDUC-5499 as a prerequisite for both the BEd degree and recommendation for certification to the Ontario College of Teachers), professional learning series activities and the Professional Growth Portfolio.

TEACHER CERTIFICATION

The Faculty of Education provides programs and courses in teacher education but does not issue a teaching certificate. The responsibility for teacher certification lies with the Ontario College of Teachers. Upon successful completion of the requirements for teacher certification in Ontario, a recommendation will be made by the Dean of the Faculty to the Ontario College of Teachers indicating eligibility for the Ontario Certificate of Qualification. Candidates who successfully complete either the Consecutive or the Concurrent Programs of Study including Practice Teaching will be awarded the BEd degree of the University of Windsor, and will be recommended to the Ontario College of Teachers indicating eligibility for an Ontario Certificate of Qualification.

Degree Requirements

Total courses: 60 credits (20 course equivalencies)

(a) For all Divisions (P/J, J/I, I/S):

EDUC-5201. Foundations of Practice Pt. I (1.5)

EDUC-5202. Foundations of Practice Pt. II (1.5)

EDUC-5203. Educational Psychology (3)

EDUC-5204. Differentiated Instruction (3)

EDUC-5206. Aboriginal Ways of Knowing: Cultural, Political & Linguistic Contexts (1.5)

EDUC-5207. Service Learning Specialization (3)

EDUC-5208. Assessment and Evaluation (1.5)

EDUC-5209. Critical Analysis of Social, Global & Cultural Issues in Education (1.5)

EDUC-5210. Foundations of Practice (III) Law and Ethics - School Governance (1.5)

EDUC-5499. Practicum

Professional Development: Professional Learning Series (approximately 10 days during the Fall/Winter) (non-credit)

(i) Primary/Junior Stream

General Methodology Courses:

EDUC-5215. Mathematics Foundations (1.5)

EDUC-5311. Visual Arts Methodology (3)

EDUC-5312. Digital Technology and Social Media Applications (3)

EDUC-5313. Health and Physical Education (3)

EDUC-5314. Language Arts (3)

EDUC-5315. Mathematics Methodology (3)

EDUC-5316. Music Methodology (3)

EDUC-5317. Science (3)

EDUC-5318. Social Studies (3)

EDUC-5411. Drama Methodology (1.5)

EDUC-5412. Dance Methodology (1.5)

EDUC-5414. Language and Media Literacy (1.5)

For students who wish to teach in the Catholic school system in Ontario: EDUC-5200. Religious Education in Roman Catholic Schools (1.5)

(ii) Junior/Intermediate Stream

General Methodology Courses:

- EDUC-5221. Pedagogy of the Arts (1.5)
- EDUC-5225. Mathematics Foundations (1.5)
- EDUC-5321. Visual Arts Methodology (3.0)
- EDUC-5322. Digital Technology and Social Media Applications (3)
- EDUC-5323. Health and Physical Education (1.5)
- EDUC-5324. Language Arts (1.5)
- EDUC-5325. Mathematics Methodology (1.5)
- EDUC-5326. Music Methodology (1.5)
- EDUC-5327. Science (3)
- EDUC-5328. Social Studies (1.5)
- EDUC-5421. Drama Methodology (1.5)
- EDUC-5422. Dance Methodology (1.5)
- EDUC-5424. Language and Media Literacy (1.5)

Specialised Methodology Courses:

One Teachable (6) to be selected from the following:

- EDUC-5352. Art (6)
- EDUC-5356. English (6)
- EDUC-5358. French (6)
- EDUC-5359. Geography (6)
- EDUC-5362. History (6)
- EDUC-5366. Mathematics (6)
- EDUC-5367. Music (Vocals) (6)
- EDUC-5368. Music (Instruments) (6)
- EDUC-5369. Health and Physical Education (6)
- EDUC-5379. Drama (6)
- EDUC-5380. General Science (6)

For students who wish to teach in the Catholic school system in Ontario: EDUC-5200. Religious Education in Roman Catholic Schools (1.5)

(ii) Intermediate/Senior Stream

General Methodology Courses:

- EDUC-5231. Pedagogy of the Arts (1.5)
- EDUC-5331. Visual Arts Methodology (1.5)
- EDUC-5332. Digital Technology and Social Media Applications (3)
- EDUC-5333. Health and Physical Education (1.5)
- EDUC-5334. Language across the Curriculum (1.5)
- EDUC-5335. Mathematics (1.5)
- EDUC-5336. Music Methodology (1.5)
- EDUC-5337. Science (1.5)

EDUC-5338. Social Studies (1.5)
EDUC-5339. Career and Guidance Education (1.5)
EDUC-5431 Drama Methodology (1.5)

Specialised Methodology Courses:

Two Teachables (6 each) to be selected from the following:

EDUC-5352. Art (6)
EDUC-5356. English (6)
EDUC-5358. French (6)
EDUC-5359. Geography (6)
EDUC-5360. Media Arts (6)
EDUC-5362. History (6)
EDUC-5366. Mathematics (6)
EDUC-5367. Music (Vocals) (6)
EDUC-5368. Music (Instruments) (6)
EDUC-5369. Health and Physical Education (6)
EDUC-5370. Business Studies (6)
EDUC-5373. Biology (6)
EDUC-5374. Chemistry (6)
EDUC-5376. Physics (6)
EDUC-5377. Social Sciences (6)
EDUC-5379. Drama (6)
EDUC-5380. General Science (6)

For students who wish to teach in the Catholic school system in Ontario: EDUC-5200. Religious Education in Roman Catholic Schools (1.5)

Professional Development: Professional Learning Series (approximately 10 days during the Fall/Winter) (non-credit)

Bachelor of Education in Technological Studies/Diploma in Education - Technological Studies

- This program provides the preparation required for certification by the Ontario College of Teachers for teaching Technological Education in Ontario High Schools. The program is offered over the course of fourteen months with course work being held during two semesters in Summer I and Summer II of the program, and over the two semesters (fall and winter) between each summer. A practicum (minimum 80 days) at an Ontario High School and a service learning internship incorporating broad based technology skills are offered between September and June. Candidates may enter the program via one of four different pathways.
- Trade (3 years wage-earning) + 2 year College degree/diploma
- Trade (2 years wage-earning) + 3 year College degree/diploma
- Trade (X years wage-earning) + University degree (for a total of 5 years)
- Trade (at least 5 years wage-earning experience) + Ontario School Secondary Diploma (OSSD) or its equivalent

Those candidates who enter the program with an acceptable university degree or college diploma will receive, upon successful completion of the program, a Bachelor of Education in Technological Studies.

Those candidates who enter the program on the basis of 5 years wage-earning experience will receive, upon successful completion of the program, a Diploma in Education - Technological Studies. Graduates of the Diploma in Education – Technological Studies who later obtain an acceptable degree can apply to Registrar’s to have the Diploma converted to a B.Ed. Successful completion of Summer I and a practicum of a minimum of ten days will qualify candidates to apply to the Ontario College of Teachers (OCT) for a Transitional Certificate of Qualification and Registration. Upon successful completion of the entire program, candidates are qualified to apply to the OCT for a Certificate of Qualification and Registration.

Candidates are required to make their application to one of the following broad-based technological education subjects.

BROAD-BASED TECHNOLOGICAL EDUCATION SUBJECTS – Intermediate (Grades 9-10) and Senior (Grades 11-12)

Communications Technology
Computer Technology
Construction Technology
Green Industries
Hairstyling and Aesthetics
Health Care
Hospitality and Tourism
Manufacturing Technology
Technological Design
Transportation Technology

Application and Admission:

Applications are made through the Teacher Education Application Services (www.ouac.on.ca/teas/)

Technological Competency Requirements (as per *OCT Registration Guide for Technological Education*)

Documents required:

1. A resume providing an overview of your academic background and work experience. The resume should provide a clear and concise overview of your work experience, including employer, start and end dates, and a brief description of the position. A record of secondary and postsecondary education should be provided, including start and end dates, degrees, diplomas, certificates and/or trade licences. It is important that the resume reflect experience in the Broad-Based Technological Education subject area to which application is being made.

2. Copies of your Ministry of Training, Colleges and Universities Certificate of Qualification (C of Q) and/or certificate(s) of apprenticeship (if applying to teach to a regulated trade). To be a teacher in automotive (Transportation), electrical (Construction) or hairstyling, the applicant must hold a valid trade license. As applicable, candidates must submit a Ministry of Training, Colleges and Universities Certificate of Qualification (C of Q) accompanied by a Certificate of Apprenticeship (C of A) and the details of the examination showing at least 70% (B-) standing.

3. Letters of wage-earning experience.

You will need to show that you have accumulated the required number of years of work experience, outside of teaching, in your trade (1,700 hours equals one year). The number of years must correspond the appropriate pathway for admission:

- Trade (3 years wage-earning) + 2 year College degree/diploma

- Trade (2 years wage-earning) + 3 year College degree/diploma
- Trade (X years wage-earning) + University degree (for a total of 5 years)
- Trade (at least 5 years wage-earning experience) + Ontario School Secondary Diploma (OSSD) or its equivalent.
 - a) If you worked for an employer or through a union hall, submit a copy of a signed letter on official company or union letterhead. It must be written by a supervisor familiar with your work and must include the supervisor's name, title, address and contact information provided. The letter(s) must include your name, your position(s) in the company, the length of work experience(s), with start and end dates, typical hours of work per week, indication as to full or part-time employment, a brief description of the work, a detailed description of duties and skills used in the position. If you acquired experience as a manager or supervisor, specific statements of the knowledge and skills used in the position must be in the letter. We cannot return letters to you, so it is recommended that you ask for additional original copies for your future use.
 - b) Self-employed applicants or applicants employed in a family business are required to submit an original sworn statement, signed by a commissioner of oaths, that indicates the applicant was self-employed or employed in a family business. The statement should include the duration of employment, the actual start and end dates and the nature of duties (providing specific statements of the skills used in the position). In addition, to validate the applicant's sworn statement, the following supporting documentation must be submitted: ii) a copy of business license or registration supporting the duration of employment noted in the sworn statement; iii) copies of income tax assessments (which indicate self-employment/family business employment) supporting the duration of employment noted in the sworn statement, or a statement from an accountant, confirming income, or an annual report; iv) At least one letter from a major supplier attesting to materials purchased and/or a client attesting to the work completed. It is important that these documents reflect work experience in the Broad-Based Technological Education subject area to which application has been made.

We recognize that it is sometimes impossible to provide original and appropriate documentation for wage-earning experience, for instance in cases of bankruptcy or the death or retirement of an owner, or where you have worked in a family business or when you do not want to reveal that you may be leaving your place of employment. In these exceptional circumstances you must provide: i) a sworn statement or solemn affirmation made before a commissioner of oaths indicating the reason(s) why this information is not available; ii) copies of T-4 tax forms or a statement from an accountant to confirm the income and dates of employment.

Please visit the [Ontario College of Teachers website regarding wage-earning work experience requirements](#) .

4. Official secondary and postsecondary academic transcripts.

Official postsecondary academic transcripts/diploma, bearing the original seal and/or signature of the institution, must be sent directly by the issuing institution. Photocopies and student copies are not acceptable. Applicants applying for the Diploma in Education - Technological Studies are required to submit evidence of the Ontario School Secondary Diploma (OSSD) or its equivalent.

Required Documentation prior to receiving a practicum:

The following are required of all accepted applicants:

(a) birth certificate and Social Insurance Number (S.I.N.);(b) proof of Canadian Citizenship or permanent residency as defined by the Immigration Act (Canada), or of eligibility for employment in Canada (if the

Ontario Certificate of Qualification or a Temporary Letter of Standing is to be awarded);(c) legal proof of change of name must be submitted where the name being used differs from that shown on the birth certificate.

Additional requirements:

(a) Prior to September, the candidate must present proof of a tuberculin test as required by the Ontario Ministry of Health. The test must have been administered during the previous twelve months.(b) An official police criminal record check. The check must have been obtained within the previous six months.(c) A recent photograph (passport-size) for identification purposes within the Faculty of Education.(d) Candidates are advised that they are responsible for their own transportation to and from field placements.

Degree Requirements

Credits Required for the program: 60

Required courses:

EDUC-5203 Educational Psychology (3.0); EDUC-5204 Differentiated Instruction (3.0); EDUC-5205 Educational Foundations, Law and Ethics (3.0); EDUC-5206 Aboriginal Ways of Knowing (1.5); EDUC-5208 Assessment and Evaluation (1.5); EDUC-5332 Digital Technology (3.0); EDUC-5334 Language Across the Curriculum (1.5); EDUC-5339 Career and Guidance (1.5); EDUC-5386 Curriculum Development for Technological Studies Pt. 1 (4.5); EDUC-5387 Principles & Methods of Teaching Technological Studies Pt. 1 (4.5); EDUC-5388 Curriculum Development for Technological Studies Pt. II (4.5); EDUC-5389 Principles and Methods of Teaching Technological Studies Pt. II (4.5); EDUC-5497 Internship (7.5); EDUC-5498 Practicum (12.0) plus three additional courses: EDUC-5201 Foundations of Practice Part I (philosophical orientation) (1.5), EDUC-5202 Foundations of Practice Part II (classroom practice) (1.5) and, EDUC-5209 Critical Analysis of Social, Global and Cultural Issues in Education (1.5).

Course used to calculate the major average are: all required courses.

Standing Required for Continuation in Program

70% major average. Candidates who obtain a grade below 50% in any course will be required to withdraw from the program.

Standing Required for Graduation

70% major average.

The Faculty of Education does not issue a teaching certificate. The Ontario Certificate of Qualification and Registration is issued by the Ontario College of Teachers upon recommendation of the Dean of the Faculty of Education. To teach technological education you need to satisfy the Ontario College of Teachers' academic, professional, technological, language proficiency, Ontario Mathematics Proficiency Test and professional suitability requirements. The OCT's requirements may change without notice and it is your responsibility to be informed of such changes: <https://www.oct.ca/becoming-a-teacher/requirements>.

Candidates who obtain three or more final course grades below 65% will not be recommended for certification. Candidates who are unsuccessful in the internship or the practicum will not be recommended for either a diploma/degree or certification

Minor in Organizational Learning and Teaching

NOTE: Courses that lead to the Minor in Organizational Learning and Teaching cannot be counted towards a Bachelor of Education.

Total Courses: 6 courses

EDUC-4200 Theories of Individual and Collective Learning

EDUC-4100 Learning-Centred Teaching: Planning, Delivery, Assessment and Evaluation

EDUC-4150 Learning Organizations: Management and Leadership

EDUC-4050 Instructional Technology

EDUC-4000 Diversity and Inclusion in the Learning Organization

EDUC-4800 Experiential Learning Field Placement

Concurrent Bachelor of Music Education/ Bachelor of Education

Degree Requirements

Total course equivalents: Thirty (plus 20 units in the Faculty of Education)

Bachelor of Music Requirements

All students are required to complete the requirements of the Bachelor of Education degree program, in addition to the following Bachelor of Music course requirements:

(a) History and Literature (Musicology/Ethnomusicology): three courses, consisting of MUSC-1260, MUSC-1270 and one of MUSC-3460, MUSC-2270, MUSC-3200, MUSC-3260, MUSC-3270, MUSC-3170, MUSC-3460, MUSC-4260, MUSC-4270, MUSC-4360, MUSC-4370, MUSC-4470, MUSC 2900, MUSC-2490.

(b) Theory and Composition: four courses, consisting of MUSC-1120, MUSC-1130, MUSC-2120, MUSC-2130.

(c) Performance Studies: four courses, consisting of one course from the series MUSP-3470 to MUSP-3690, or MUSP-3710 (taken four times).

(d) Ensembles: four courses from MUSP-2100, MUSP-2200, or MUSP-3100. Up to 6 Units of this requirement may be completed with the MUSP-2400 course.

(e) Methods and Pedagogy: four courses, consisting of MUSC-2480 and three from MUSC-2390, MUSC-2550, MUSC-2690, and MUSC-2790.

(f) three additional Music courses. Additional Methods and Pedagogy and/or Music Education courses are recommended (MUSC-2850, MUSC-4840, MUSC-4850, MUSC-4940, MUSC-2490, MUSC-2390, MUSC-2550, MUSC-2690, MUSC-2790). If the student's second teachable requires more than six courses, this category may be used to fulfill those requirements (requires an ADV exemption from the SoCA Undergraduate Coordinator).

(g) GART-1500, GART-1510;

(h) six courses from any area of study, excluding Music, that are required for the student's second teachable.

Courses used to calculate the major average are:

Courses used to calculate the major average are: courses listed under requirements (a) to (f), and any courses taken in the major area(s) of study.

Bachelor of Education Requirements

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Music Education (Honours) degree program, in addition to the following Education courses: EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0) EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5367 or EDUC-5368, (6.0) plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Optional: Students completing the Concurrent Bachelor of Music Education/Bachelor of Education may return to the School of Creative Arts for an additional year to complete an Honours Bachelor of Music, which will benefit students interested in pursuing graduate programs or increase qualifications within school board teaching positions.

Concurrent Bachelor of Music Education/Bachelor of Education – Recommended Course Sequence

Year 1

<u>Fall Term</u>	<u>Winter Term</u>
GART 1500	GART 1510

Courses as required by the Faculty of Education	Courses as required by the Faculty of Education

Year 5

<u>Fall Term and Winter Term</u>
Courses as required by the Faculty of Education

Standing required for continuation and graduation from the concurrent program:

70% major average and 60% cumulative in the Bachelor of Music-Music Education (Honours).

70% major average in the Bachelor of Education.

Teacher candidates, who obtain three or more final grades below 70%, or one or more final grade of 49% in any course, will have failed the Bachelor of Education Degree and will not be eligible for recommendation to the Ontario College of Teachers for certification. In all such cases, teacher candidates may immediately be withdrawn from the B.Ed. Program. All cases will be reviewed by the Dean of Education or her/his designate. Teacher candidates may be provided an opportunity to return to the Faculty of Education to fulfill outstanding requirements for the completion of the B.Ed. Degree. Under certain circumstances, conditions of reinstatement are the sole prerogative of the Dean or her/his designate.

Unprofessional conduct by teacher candidates is investigated by the Professional Standards Committee (PSC). The Mandate of the PSC is to review the performance of all teacher candidates who have been deemed to have failed for cause or failed Practice Teaching for issues related to inadequate teaching performance. The PSC makes recommendations of a teacher candidate's status in the program and communicates this in writing to the Dean and the teacher candidate. Candidates have the right to appeal the decision, first, to the Dean of Education and then, through the Office of the Registrar, University of Windsor, if necessary. In all cases, teacher candidates are provided due process with opportunity to hear and respond to the case against them. It should be noted that failure may be the result of any serious contravention of the Ontario College of Teachers Standards of Practice and Ethical Standards of Practice for the teaching profession, including, but not limited to:

- Professional misconduct during any component of the Faculty of Education program;
- Academic misconduct during any component of the Faculty of Education program; and/or
- Neglect of teaching responsibilities and/or poor teaching performance during the practicum.

Concurrent General Bachelor of Arts (Modern Languages with Second Language Education)/Bachelor of Education

Application and Admission

Normally, admission will be to first year only, with a minimum high school (or equivalent) average of 75%. Alternatively, students will be able to apply to transfer into the program with a minimum high school (or equivalent) average of 75%, at the sole discretion of the Associate Dean, Pre-Service. In order to be considered, applicants will need to present six Grade 12 "U" or "M" courses, including Grade 12 "U" English, or equivalent. Admission to this program will be limited.

Degree Requirements

Students enrolled in this program must work with a Departmental Adviser to ensure they are following the correct course sequencing towards completion in 5 years.

General Bachelor of Arts in Modern Languages with Second Language Education Requirements

Total courses: thirty

(a) five Linguistics and Second-Language Education courses: INCS-1200, INCS-2200, INCS-3200, INCS-3210 and INCS-4200;

- (b) four Language Training courses in a chosen language: ARAB-1100, ARAB-1110, ARAB-2100, ARAB 2110 or ARAB-2150; or FREN-1210, FREN-1220, FREN-2210 and FREN-2220; or SPAN-1020 (6.0 credits) and SPAN-2020 (6.0 credits); or GRMN-1020 (6.0 credits) and GRMN-2020 (6.0 credits); or ITLN-1020 (6.0 credits) and ITLN-2020 (6.0 credits);
- (c) six courses in Intercultural Studies: ARAB-2610, ARAB-2620, ARAB-3610, ASIA-1100, ASIA-2620, ASIA-2640, FREN-2600, FREN-2700, FREN-2810, FREN-2830, SPAN-2600, SPAN-2610, SPAN-2480, GRMN-2600, GRMN-2610, GRMN-2480, ITLN-2600, ITLN-2610, ITLN-2480, GRST-3012, or GRST-3011.
- (d) two courses in Indigenous Studies: GART/SOSC-1210, PHIL-1350, PHIL-2300, ENGL-2320, HIST-2460, or HIST-2470;
- (e) two courses from Arts or Social Sciences;
- (f) two courses Sciences;
- (g) GART-1500; GART-1510
- (h) three courses from any area of study, including Modern Languages and French Studies
- (i) four courses from any area of study, excluding Modern Languages and French Studies

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Bachelor of Education Requirements

Total course equivalents: Equivalence of twenty in the Primary/Junior Division ONLY

All students are required to complete the requirements of the Bachelor of Arts: Modern Languages with Second Language Education degree program (General), in addition to the following Education courses: EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5311 (3.0), EDUC-5312 (3.0), EDUC-5313 (3.0), EDUC-5314 (3.0), EDUC-5315 (3.0), EDUC-5316 (3.0), EDUC-5317 (3.0), EDUC-5318 (3.0), EDUC-5215 (1.5), EDUC-5411 (1.5), EDUC-5412 (1.5), EDUC-5414 (1.5), EDUC-5499.

Courses used to calculate the Education major average are: All required Education courses.

Standing Required for Continuation and Graduation

70% major average and 60% cumulative average in the General BA in Modern Languages with Second Language Education. 70% major average in the Bachelor of Education.

Students who do not meet these standards during the three undergraduate years of the Concurrent program will be required to withdraw from the Concurrent program or put on academic probation following the collaborative review decision between the Faculty of Arts, Humanities and Social Sciences and the Faculty of Education. A student who has not met these standards or completed all required BA courses will not be permitted to continue into the Education years of the Concurrent program.

Teacher Candidates, who obtain three or more final grades below a 60 in any Education course in the program, or one or more final grades of 50% in any course in the Education program, over the duration of the program, will have failed the Bachelor of Education (BEd) Degree and will not be eligible for recommendation to the Ontario College of Teachers for certification. In all such cases, upon a cumulative academic record as defined above, Teacher Candidates will be required to meet with the Associate Dean, Teacher Education immediately to review their academic standing, which may lead to the requirement to withdraw from the program. Teacher Candidates may be provided with an opportunity to return to the Faculty of Education to fulfill outstanding requirements for the completion of the BEd Degree. Conditions

of reinstatement are the sole prerogative of the Dean or her/his designate. Teacher candidates must pass the practice teaching course.

Suggested Sequencing

First Year: Ten courses towards the General BA in Modern Languages with Second Language Education.

Second Year: Ten courses towards the General BA in Modern Languages with Second Language Education.

Third Year: Ten courses towards the General BA in Modern Languages with and Second Language Education.

Fourth Year: In the fourth year, students will take the entire Year 1 of the BEd program.

Fifth Year: In the fifth year, students will take the entire Year 2 of the BEd program.

Concurrent General Bachelor of Arts (Communication, Media and Film)/Bachelor of Education

The Concurrent Communication, Media and Film BA/Bachelor of Education Program is offered jointly over five years by the Communication, Media and Film Department and the Faculty of Education.

Application and Admission

Admission is to first-year only with a minimum high school average of 75% in six Grade 12 "U" or "M" courses including Grade 12 "U" English. Candidates not enrolling directly from secondary school may apply for the first year of the concurrent program and will be considered for admission on a case-by-case basis.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Degree Requirements

General Bachelor of Arts in Communication, Media and Film

Total course equivalents: Thirty

(a) ten courses, including CMAF-1010, FILM-1100, CMAF-2340, CMAF-2750, plus one of CMAF-2010, CMAF-2250, CMAF-3340 or CMAF-3750, plus five additional CMAF or FILM courses, at least two of which must be at the 3000 level or above (excluding CMAF-3990);

(b) GART-1500, GART-1510;

(c) two courses from Arts;

(d) two courses from Languages or Science;

(e) two courses from any area of study, excluding Social Sciences;

(f) six courses from any area of study, including CMAF and FILM;

(g) six courses from any area of study, excluding CMAF and FILM.

Courses used to calculate the major average are: All courses taken in CMAF and FILM.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: Communication, Media and Film degree program (General), in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0) EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5360 (6.0), plus one additional teachable subject selected from the Education Calendar. Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.*A student may complete the requirements for an honours degree in Communication, Media and Film by completing additional courses during the summer term and/or completing a Sixth Year.

Standing Required for Continuation and Graduation

70% major average and 60% cumulative average in the General BA in Communication, Media and Film.
70% major average in the Bachelor of Education.

In Addition: Teacher Candidates, who obtain three or more final grades below a 60-62.9% in any Education course in the program, or one or more final grades of 0-49.9% in any course in the Education program, over the duration of the program, will have failed the Bachelor of Education (BEd) Degree and will not be eligible for recommendation to the Ontario College of Teachers for certification. In all such cases, upon a cumulative academic record as defined above, Teacher Candidates will be required to meet with the Associate Dean, Teacher Education immediately to review their academic standing, which may lead to the requirement to withdraw from the program. Teacher Candidates may be provided with an opportunity to return to the Faculty of Education to fulfill outstanding requirements for the completion of the BEd Degree. Conditions of reinstatement are the sole prerogative of the Dean or her/his designate

Concurrent General Bachelor of Arts (Drama)/Bachelor of Education

The Concurrent General Bachelor of Arts (Drama)/Bachelor of Education Program is offered jointly over five years by the School of Dramatic Art and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching Drama and a second teachable Intermediate Senior candidates choose two teaching subjects. Applicants must complete at least ten semester undergraduate courses (30 semester hours) in the first teachable subject and at least six semester undergraduate courses (18 semester hours) in the second teachable subject.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching Drama in the English language school system (Public or Roman Catholic school system) and fulfill the requirements for recommendation for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the General Bachelor of Arts (Drama) degree while concurrently studying education and doing practice teaching in schools. . All students should see an advisor in the School of Dramatic Art and in the Faculty of Education, on a regular basis, to discuss course selection and academic progress.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses including Grade 12 "U" English. Enrolment in this program is limited.

Degree Requirements

General Bachelor of Arts in Drama

Total course equivalents: Thirty

All Students are required to complete the requirements of the Education program, in addition to the following requirements of the Bachelor of Drama (General) degree program:

- (a) DRAM-1000, DRAM-2000, DRAM-1600, DRAM-1610, DRAM-2600, DRAM-2610, DRAM-2770, DRAM-2840, DRAM-3600, DRAM-2250, DRAM-2350, plus two from the following: DRAM-3710, DRAM-3780, DRAM-4700, DRAM-4710; two from the following: DRAM-1300, DRAM-2300, DRAM-3350, DRAM-3330; two from the following: DRAM-2110, DRAM-2130, DRAM-2150, DRAM-2170, DRAM-2500, DRAM-3150, DRAM-3170, DRAM-3190,;
- (b) GART-1500, and GART-1510
- (c) 8 courses from any area of study excluding Drama
- (d) 3 courses from anywhere including Drama.

Courses used to calculate the Drama major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: Drama degree program (General), in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0), EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5379, (6.0) plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Suggested Course Sequence

First Year: 10 courses from the General BA in Drama, plus Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: Ten courses from the General BA in Drama, plus Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: In the third year, students will take the entire Year 1 of the BEd program.

Fourth Year: 10 Courses from the General BA in Drama – completing the requirements of a 3-year general degree in Drama, plus Education EDUC-3399 'Teaching and Learning Part II (50 hours over two semesters)

Fifth Year: In the fifth year, students will take the entire Year 2 of the BEd program.

*A student may complete the requirements for an honours degree in Drama and Education by completing additional courses during the summer term and/or completing a Sixth Year. See calendar for course requirements for the Honours BA in Drama and Education.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BA in Drama.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BA in Drama.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Arts (English)/Bachelor of Education

The Concurrent General Bachelor of Arts (English)/Bachelor of Education Program is offered jointly over five years by the Department of English and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching English and a second teachable Intermediate Senior candidates choose two teaching subjects. Applicants must complete at least ten semester undergraduate courses (30 semester hours) in the first teachable subject and at least six semester undergraduate courses (18 semester hours) in the second teachable subject.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching English in the English language school system (Public or Roman Catholic school system) and fulfill the requirements for recommendation for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the General Bachelor of Arts (English) degree while concurrently studying education and doing practice teaching in schools. . All students should see an Advisor in the Department of English and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses including Grade 12 "U" English. Enrolment in this program is limited.

Degree Requirements

General Bachelor of Arts in English

Total courses: thirty.

- a) ENGL 1002, ENGL 1003, and ENGL 1004;
- b) one of ENGL 2010, ENGL 2020, ENGL 2030, or ENGL 2040;
- c) one of ENGL 2110, ENGL 2120, or ENGL 2130;

- d) one of ENGL 2210, ENGL 2220, or ENGL 2230;
- e) one of ENGL 2310, ENGL 2320, or ENGL 2330;
- f) one of ENGL 2410, ENGL 2420, or ENGL 2430;
- g) any four ENGL courses at 3000-level or 4000-level;
- h) two courses from Social Sciences;
- i) two courses from Languages or Science;
- j) two courses from any area of study, excluding Arts;
- k) GART-1500;
- l) four courses from any area of study, including English;
- m) seven courses from any area of study, excluding English

Note: Five (5) 1000-level English courses may count toward the major.

Courses used to calculate the major average are: courses listed under requirements (a) to (g), and any courses taken in the major area of study.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: English General degree program, in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0), EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5356, (6.0) plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Suggested Course Sequence

First Year: 10 courses from the General BA in English, plus Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: Ten courses from the General GA in English, plus Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: In the third year, students will take the entire Year 1 of the BEd program.

Fourth Year: 10 Courses from the General BA in English – completing the requirements of a 3-year general degree in English, plus Education EDUC-3399 (50 hours over two semesters).

Fifth Year: In the fifth year, students will take the entire Year 2 of the BEd program.

*A student may complete the requirements for an honours degree in English by completing additional courses during the summer term and/or completing a Sixth Year. See calendar for course requirements for the Honours BA in English.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BA in English.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BA in English.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Arts (History)/Bachelor of Education

The Concurrent General Bachelor of Arts (History)/Bachelor of Education Program is offered jointly over five years by the Department of History and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching History and a second teachable.

Teachables: Intermediate Senior candidates choose two teaching subjects. Applicants must complete at least ten semester undergraduate courses (30 semester hours) in the first teachable subject and normally six semester undergraduate courses (18 semester hours) in the second teachable subject. Students should consult the Faculty of Education website for a list of teachables. Students should also seek Academic Advising from the department of the second teachable to ensure that there are sufficient courses available to non-majors.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching History in the English language school system (Public or Roman Catholic) and fulfill the requirements for recommendation for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the General Bachelor of Arts (History) degree while concurrently studying education and practice teaching in schools. All students should see an advisor in the Department of History and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses, including Grade 12 "U" English. Enrolment in this program is limited.

Degree Requirements**General Bachelor of Arts in History**

Total course equivalents: Thirty

- (a) HIST-1030, HIST-2030;
- (b) 7 more History courses at the 1000 or 2000 Level, up to 2 of which may be 1000 Level;
- (c) 3 more History courses at the 3000 Level or higher.
- (d) two courses from Arts;
- (e) two courses from Languages, Science, or one of each;
- (f) two courses from any area of study, excluding Social Sciences.
- (g) GART-1500, GART-1510;
- (h) four courses from any area of study, including History, but of which only one may be an additional 1000-level History course;

(i) six courses from any area of study, excluding History. Up to four of the following courses may be used to satisfy the requirements under (b) and (c): GRHS-2100, GRHS-2101, GRHS-2200, GRHS-2201, DRAM-1300, DRAM-2300, CMAF-2400, CMAF-2410, KINE-2400. (Please note, instructor's permission may be required.)

Courses used to calculate the History major average are: courses listed under requirements (a) to (c), and any courses taken in the major area(s) of study.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: History degree program (General), in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0), EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5362, (6.0) plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Recommended Course Sequence

First Year: 10 courses as per requirements for History (General) (see calendar requirements above), Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: Ten courses as per History (General) calendar, Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: In the third year, students will take the entire Year 1 of the B.Ed. program.

Fourth Year: 10 courses from the General BA in – completing the requirements of a 3-year general degree in History, Education EDUC-3399 'Teaching and Learning Part II' (50 hours over two semesters).

Fifth Year: In the fifth year, students will take the entire Year 2 of the B.Ed. program.

*A student may complete the requirements for an honours degree in History by completing additional courses during the summer term and/or completing a Sixth Year. See calendar for course requirements for the Honours BA in History.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BA in History.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BA in History.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Arts (Political Science)/Bachelor of Education

Application and Admission

Admission is to first-year only with a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses including Grade 12 "U" English. Admission to this program is limited.

Degree Requirements

General Bachelor of Arts in Political Science

Total course equivalents: Thirty

- (a) POLS-1000, POLS-1300 and POLS-1600
- (b) nine additional courses Political Science including at least three at the 3000-level or above. (Note: students interested in switching to Honours Political Science should take SOSC-2500, POLS-2750, and one of POLS-2510 or POLS-2520)
- (c) two courses from Arts
- (d) two courses from Languages or Science
- (e) two courses from any area of study, excluding Social Sciences
- (f) GART-1500, GART-1510
- (g) five courses from any area of study, including Political Science
- (h) five courses from any area of study, excluding Political Science

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

As indicated on the Political Science and Faculty of Education websites, Law and the Global Studies teachable subjects include the following courses:

Law:

two of: POLS-2140, POLS-3140, POLS-3630

Global Studies: two of: POLS-2320, POLS-2330, POLS-2350, POLS-2410, POLS-2440, POLS-2450, POLS-2490, POLS-2600, POLS-2610, POLS-2640, POLS-2680; two of: POLS-3460, POLS-3540, POLS-3550, POLS-3560, POLS-3600, POLS-3610, POLS-3650, POLS-3670, POLS-3720, POLS-4310, POLS-4340, POLS-4640, POLS-4650, POLS-4960.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: Political Science degree program (General), in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0) EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5377 (Social Sciences-General) (6.0), plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

*A student may complete the requirements for an honours degree in Political Science by completing additional courses during the summer term and/or completing a Sixth Year. See Undergraduate Calendar for course requirements for the Honours BA in Political Science.

Standing Required for Continuation in the General BA in Political Science

70% major average and 60% cumulative average in the General BA in Political Science.

Standing Required for Graduation

70% major average and 60% cumulative average in the General BA in Political Science.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Arts (Psychology)/Bachelor of Education/Diploma in Early Childhood Education

The Concurrent General Bachelor of Arts (Psychology)/Bachelor of Education/Diploma in Early Childhood Education Program is offered jointly over five years by the Department of Psychology and the Faculty of Education, in Co-operation with St. Clair College. The program prepares individuals to teach at the preschool and Primary-Junior levels.

Graduates of this program will receive two degrees and a diploma and will acquire the necessary skills and knowledge to fulfill the requirements to be recommended for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the General Bachelor of Arts (Psychology) degree while concurrently studying education and doing practice teaching in schools. All students should see an Advisor in the Department of Psychology and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

Application and Admission

Admission is to first-year only with a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses including Grade 12 "U" English. Enrolment in this program is limited.

Degree Requirements

All students are required to complete the thirty-course requirement of the University of Windsor General BA in Psychology, in addition to the Education courses: EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5311 (3.0), EDUC-5312 (3.0), EDUC-5313 (3.0), EDUC-5314 (3.0), EDUC-5315 (3.0), 316 (3.0), EDUC-5317 (3.0), 318 (3.0), EDUC-5215 (1.5), EDUC-5411 (1.5), EDUC-5412 (1.5), EDUC-5414 (1.5), EDUC-5491 (3.0), EDUC-5492 (3.0), EDUC-5493 (6.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5). The St. Clair College Early Childhood Education component will consist of ECE courses, including field placements.

Students who successfully complete the ECE program in Year 2 of the Concurrent program will receive 10 transfer credits towards their BA in Psychology. [Please contact the Registrar's Office for the specific course equivalencies.]

Courses used to calculate the Education major average are: All required Education courses.

Courses used to calculate the Psychology major average are: courses listed under requirement (a) of the General Psychology Program, and any courses taken in the major area(s) of study.

Recommended Course Sequence

FIRST YEAR

Fall Term: five Psychology General BA courses: GART-1500 (3.0), PSYC-1150 (3.0), one Arts/Language (3.0), one Language/Science (3.0), one Social Science (3.0)

Winter Term: five Psychology General BA courses: GART-1510 (3.0), PSYC-1160 (3.0), one Art/Language (3.0), one Language/Science (3.0), one Social Science (3.0)

SECOND YEAR

ECE Program at St. Clair College

THIRD YEAR

In the third year, students will take the entire Year 3 of the Psychology General BA program.

FOURTH YEAR

In the fourth year, students will take the entire Year 1 of the BEd program.

FIFTH YEAR

In the fifth year, students will take the entire Year 2 of the BEd program.

*A student may complete the requirements for an honours degree in Psychology by completing additional courses during the summer term and/or completing a Sixth Year.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BA in Psychology.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BA in Psychology.

70% major average in the Bachelor of Education.

Graduation

Graduates of the program receive both the Bachelor of Arts Psychology degree (General) and the Bachelor of Education degree from the University of Windsor, and the Diploma in Early Childhood Education from St. Clair College.

The Faculty of Education does not issue a teaching certificate. The Ontario Certificate of Qualification is issued by the Ontario College of Teachers upon recommendation of the Dean of the Faculty of Education. Only Canadian citizens or Permanent Residents of Canada qualify for this certificate. Under certain conditions, the Ontario College of Teachers may grant a non-Canadian citizen an Interim Certificate of Qualification.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Concurrent General Bachelor of Arts (Visual Arts)/Bachelor of Education

The Concurrent General Bachelor of Arts (Visual Art)/Bachelor of Education Program is offered jointly over five years by the Department of Visual Arts and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching Visual Arts and a second teachable Intermediate Senior candidates choose two teaching subjects. Applicants must complete at least ten semester undergraduate courses (30 semester hours) in the first teachable subject and at least six semester undergraduate courses (18 semester hours) in the second teachable subject.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching Visual Arts in the English language school system (Public or Roman Catholic school system) and fulfill the requirements for recommendation for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the Bachelor of Arts (Visual Arts) degree while concurrently studying education and doing practice teaching in schools. Practice Teaching courses begin in Year One of the program. All students should see an advisor in the School of Creative Arts and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

Students must successfully complete the Bachelor of Arts degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with an average of a minimum of 75%. Applicants from high school must present six Grade 12 "U" or "M" courses including Grade 12 "U" English. Enrolment in this program is limited.

Degree Requirements

General Bachelor of Arts in Visual Arts

Total course equivalents: Thirty

- (a) VSAR-1050, VSAR-1060, VSAR-1070 and VSAR-1080, and eight other studio courses numbered VSAR-2030 through VSAR-3900 plus MACS-1500, MACS-2050, MACS-2150 and either MACS-2450 or MACS-3450
- (b) two courses from Social Sciences
- (c) two courses from Languages or Science
- (d) two courses from any area of study, excluding Arts
- (e) GART-1500, GART-1510
- (f) INCS-2020, INCS-2030
- (g) four more courses from any area of study, excluding Visual Arts

Courses used to calculate the Visual Arts major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Arts: Visual Arts degree program (General), in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399,

EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0) EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5352, (6.0) plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0) Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Recommended Course Sequence

First Year: 10 courses from the General BA in Visual Arts, plus Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: 10 courses from the General BA in Visual Arts, plus Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: In the third year, students will take the entire Year 1 of the BEd program.

Fourth Year: 10 courses from the General BA in Visual Arts – completing the requirements of a 3-year general degree in Visual Arts, plus Education EDUC-3399 'Teaching and Learning Part II' (50 hours over two semesters).

Fifth Year: In the fifth year, students will take the entire Year 2 of the BEd program.

*A student may, with the appropriate selection of courses, complete the requirements for a combined honours degree in Visual Arts or an honours BA in Media Art Histories and Visual Culture, by completing additional courses during the summer term and/or completing a Sixth Year. See calendar for course requirements for the honours programs.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BA Visual Arts.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BA in Visual Arts.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Science (General Science)/ Bachelor of Education

The Concurrent Bachelor of Science (General Science) and Bachelor of Education Program is offered jointly over five years by the Faculty of Science and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching one of Physics, Biology or Chemistry and a second teachable.

It is essential that students receive academic advising from the Faculty of Science before registering for each semester of studies in the Science component of the program. With appropriate course selection during the degree it may be possible to plan to obtain a four year Honours degree in the First Teachable area with one additional year of study.

Selection of First and Second Teachable: Normally, the teachables are selected from the two areas of concentration in the Faculty of Science General Science degree program. Students should consult the Faculty of Education website for a list of teachables. All students should see an advisor in the Faculty of

Science and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

It may be possible to satisfy the requirements for Second Teachable in Health and Physical Education or Faculty of Arts, Humanities, and Social Sciences through careful course selection when fulfilling the requirements for courses from “any area of study”.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching one of Physics, Biology or Chemistry and one other subject in the English language school system (Public or Roman Catholic) and fulfill the requirements to be recommended for certification to the Ontario College of Teachers. It offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the Bachelor of Science degree while concurrently studying education and doing practice teaching in schools. Practice Teaching courses begin in Year One of the program.

Students must successfully complete the Bachelor of Science (General Science) degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with a minimum of 80%. ENG4U, MHF4U, and two of SCH4U, SBI4U or SPH4U is required for applicants from high school. MCV4U is strongly recommended. A second science and math average of 70% is required.

Degree Requirements

Bachelor of Science (General Science)

Total courses: thirty

(a) two sets of six courses from two different Departments or School as listed:

First Science Subject satisfies six of ten requirements for the First Teachable (choose one of):

- Biological Sciences: BIOL-1111 and BIOL-1101; and *four BIOL-XXXX or BIOM-XXX courses at the 2000 level or above
- Chemistry and Biochemistry: CHEM-1100 and CHEM-1110; and *four CHEM-XXXX or BIOC-XXXX courses at the 2000 level or above
- Physics: PHYS-1400 and PHYS-1410; and *four PHYS-XXXX courses at the 2000 level or above

Second Science Subject is normally used to satisfy the Second Teachable (choose one of):

- Biological Sciences: BIOL-1111 and BIOL-1101; and *four BIOL-XXXX courses at the 2000 level or above
- Chemistry and Biochemistry: CHEM-1100 and CHEM-1110; and *four CHEM-XXXX or BIOC-XXXX courses at the 2000 level or above
- Mathematics and Statistics: MATH-1720 (or MATH-1760) and MATH-1730; and *four MATH-XXXX or STAT-XXXX courses at the 2000 level or above
- Physics: PHYS-1400 and PHYS-1410; and *four PHYS-XXXX courses at the 2000 level or above

*NOTE: These courses must be selected from the courses used to calculate the major average for a degree program in the Department or School.

(b) one set of two courses from a third Department or School chosen from the following pairs:

- Biological Sciences: BIOL-1111 and BIOL-1101
- Chemistry and Biochemistry: CHEM-1100 and CHEM-1110
- Computer Science: COMP-1400 and COMP-1410, or COMP-1047 and COMP-2057, or COMP-2067 and COMP-2057
- Environmental Science: ESCI-1111 and ESCI-1100
- Economics: ECON-1100 and ECON-1110
- Mathematics and Statistics: MATH-1720 (or MATH-1760) and MATH-1730 or STAT-2910
- Physics: PHYS-1400 and PHYS-1410 or PHYS-1300 and PHYS-1310

(c) four Science courses from the first teachable subject at the 3000-level or above selected from the courses used to calculate the major average for a degree program of the Department or School in the Faculty of Science that offers the courses. These courses complete the first teachable requirement.

(d) four courses from Arts/Languages and Social Sciences, with at least one from each.

(e) eight courses from any area of study excluding BIOM-1003, BIOL-1013, CHEM-2003, MATH-1780, MATH-1280, and MATH-1980. Students may choose to augment the second teachable with four more courses from the second teachable in this category.

Calculation of Major Average

The major average is calculated from the grades of all Science courses, excluding the grades obtained in the following courses: ECON-2000, ECON-2010, BIOM-1003, BIOL-1013, BIOM-2093, CHEM-2003, CHEM-2305, BIOC-2015, COMP-2077, COMP-2097, COMP-2707, COMP-3057, COMP-3077, ESCI-1000, ESCI-1010, ESCI-2300, ESCI-2010, ESCI-2630, MATH-1780, MATH-1280, MATH-1980, PHYS-1000, PHYS-1010, PHYS-2060 and ESCI-2000.

Note: COMP-1047 or COMP-2067 and COMP-2057 count as a 'science pair' (see requirement (b) above) and will be included in the calculation of the major average.

Bachelor of Education

Total course equivalents: Twenty

All students are required to complete the requirements of the Bachelor of Science [G] General Science degree program, in addition to the following Education courses: EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0), EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), one of EDUC-5376 (6.0) or EDUC-5373 (6.0) or EDUC-5374 (6.0), plus one additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0). Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Recommended Course Sequence

First Year: 10 courses from the BSc General Science, plus Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: 10 courses in the BSc General Science, plus Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: In the third year, students will take the entire Year 1 of the BEd program.

Fourth Year: 10 courses from the BSc General Science -- completing the requirements for the General Science degree, plus Education EDUC-3399 'Teaching and Learning Part II (50 hours over two semesters).

Fifth Year: In the fifth year, students will take the entire Year 2 of the BEd program.

Please note: With advising and appropriate course choices it may be possible to complete the requirements for an Honours degree in a Science discipline by completing the equivalent of Sixth Year.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the BSc General Science.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the BSc General Science.

70% major average in the Bachelor of Education.

Concurrent General Bachelor of Mathematics/Bachelor of Education

The Concurrent General Bachelor of Mathematics and Bachelor of Education Program is offered jointly over five years by the Department of Mathematics and Statistics and the Faculty of Education. The program prepares individuals to teach at the intermediate and senior levels (grades 7 – 12), with a particular emphasis on teaching Mathematics and a second teachable.

It is essential that students receive academic advising from the Department of Mathematics and Statistics before registering for each semester of study in the Mathematics component of the program. With appropriate course selection during the degree it may be possible to plan to obtain a four-year Honours degree in Mathematics with one additional year of study.

Selection of Second Teachable: Students should consult the Faculty of Education website for a list of teachables. All students should see an advisor in the Department of Mathematics and Statistics and in the Faculty of Education on a regular basis to discuss course selection and academic progress.

Graduates of this program will receive two degrees and will acquire the necessary skills and knowledge for teaching Mathematics and one other subject in the English language school system (Public or Roman Catholic) and fulfill the requirements to be recommended for certification to the Ontario College of Teachers. This program offers students the opportunity to begin working towards teaching certification early in their academic careers. Students can qualify for the Bachelor of Mathematics degree while concurrently studying education and doing practice teaching in schools. .

Students must successfully complete the Bachelor of Mathematics degree program to be eligible to graduate with a Bachelor of Education degree.

Application and Admission

Admission is to first-year only with a minimum of 80%. ENG4U, MHF4U and MCV4U is required for applicants from high school. SPH4U is recommended. A minimum 70% average of math courses is also required.

All students are required to complete the requirements of the General Bachelor of Mathematics and the Bachelor of Education degree program as given below.

Degree Requirements

General Bachelor of Mathematics

Total courses: thirty

- (a) MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-1020, MATH-2780, MATH-2790, MATH-3590, STAT-2920 and STAT-2950
- (b) Four MATH, STAT or ACSC courses at the 2000 level or above.
- (c) COMP-1400 and COMP-1410
- (d) four courses from the Faculty of Arts, Humanities and Social Sciences
- (e) three courses from any area of study, including Mathematics and Statistics
- (f) eight courses from any area of study, excluding Mathematics and Statistics

Courses used to calculate the Mathematics major average are: All MATH and STAT courses taken.

Bachelor of Education

Total course equivalents: Twenty

- (a) EDUC-1199, EDUC-2299, EDUC-3399, EDUC-5201 (1.5), EDUC-5202 (1.5), EDUC-5203 (3.0), EDUC-5204 (3.0), EDUC-5206 (1.5), EDUC-5207 (3.0), EDUC-5208 (1.5), EDUC-5209 (1.5), EDUC-5210 (1.5), EDUC-5231 (1.5), EDUC-5331 (1.5), EDUC-5332 (3.0), EDUC-5333 (1.5), EDUC-5334 (1.5), EDUC-5335 (1.5), EDUC-5336 (1.5), EDUC-5337 (1.5), EDUC-5338 (1.5), EDUC-5339 (1.5), EDUC-5431 (1.5), EDUC-5366 (6.0)
- (b) One additional teachable subject selected from the Education Calendar and, EDUC-5499 (12.0). Students planning on teaching in the Roman Catholic School Board must also take EDUC-5200 (1.5).

Courses used to calculate the Education major average are: All required Education courses.

Recommended Course Sequence

First Year: 10 courses from Bachelor of Mathematics degree requirements, plus Education EDUC-1199 'Community Service Education' (50 hours over two semesters).

Second Year: 10 courses from Bachelor of Mathematics degree requirements, plus Education EDUC-2299 'Teaching and Learning Part I' (50 hours over two semesters).

Third Year: Year 1 of the BEd program.

Fourth Year: 10 courses from the General Bachelor of Mathematics – completing the requirements for a 3-year general degree in Mathematics, plus Education EDUC-3399 'Teaching and Learning Part II' (50 hours over two semesters).

Fifth Year: Year 2 of the BEd program.

With advising and appropriate course choices it may be possible to complete the requirements for an Honours degree in Mathematics by completing the equivalent of a Sixth Year.

Standing Required for Continuation in the Concurrent Program

70% major average and 60% cumulative average in the General BMath.

70% major average in the Bachelor of Education.

Standing Required for Graduation from the Concurrent Program

70% major average and 60% cumulative average in the General BMath.

70% major average in the Bachelor of Education.

Concurrent Bachelor of Arts/Bachelor of Education/Diploma in Early Childhood Education - Pre-Service Program

As of Fall 2014, there are no new admissions to this program.

The Concurrent Bachelor of Arts Bachelor of Education/Diploma in Early Childhood Education Program is offered jointly over five years by the Faculty of Arts and Social Sciences, and the Faculty of Education, in Co-operation with St. Clair College. The aim is to provide the opportunity and preparation to individuals who wish to teach at the preschool and Primary-Junior levels.

Graduates of this program will receive two degrees and a diploma and will acquire the necessary skills and knowledge to fulfill the requirements for certification by the Ontario College of Teachers.

Degree Requirements

All students are required to complete the thirty-course requirement of the University of Windsor General B.A. degree program, in addition to the Education courses EDUC-5203, EDUC-5204, EDUC-5205, EDUC-5209, EDUC-5311, EDUC-5312, EDUC-5313, EDUC-5314, EDUC-5315, EDUC-5316, EDUC-5317, EDUC-5318, and Practice Teaching (EDUC-5491, EDUC-5492, EDUC-5493, and EDUC-5494. The St. Clair College Early Childhood Education component will consist of the following courses, ECE 100C, ECE 106C, ECE 117C, ECE 120C, ECE 130C, ECE 209C, ECE 210C, ECE 216C, ECE 230C, ECE 310C, ECE 408C, ECE 409C, ECE 411C, and field placements. Requirements can also be met for teaching in the Roman Catholic school system by taking EDUC-5200.

Suggested Course Sequence

Course sequencing is subject to change. Contact the Faculty of Education each semester for details.

FIRST YEAR

Fall Term: five B.A. courses

Winter Term: five B.A. courses

SECOND YEAR

Fall Term: four BA courses; the BEd course EDUC-5203 (Educational Psychology), EDUC-5491 (full-year course)

Winter Term: ECE 100C, ECE 117C, ECE 120C, ECE 130C, ECE 210C, ECE 409C, and ECE 106; EDUC-5491 (full-year course)

Spring Term: two weeks of E.C.E. preschool field placement and two weeks of B.Ed. JK/SK practice teaching (EDUC-5491 (full-year course))

THIRD YEAR

Fall Term: three B.A. courses; the BEd courses EDUC-5314, and EDUC-5315; EDUC-5492 (full-year course)

Winter Term: three B.A. courses; the BEd courses EDUC-5311, EDUC-5313, EDUC-5316 and EDUC-5317; EDUC-5492 (full-year course)

Spring Term: four weeks of B.Ed. Junior grades practice teaching (EDUC-5492 (full-year course))

FOURTH YEAR

Fall Term: ECE 209C, ECE 230C, ECE 310C, ECE 408C, ECE 411C, ECE 216C and 4-week field placement; EDUC-5493 (full-year course)

Winter: four B.A. courses; the B.Ed. course EDUC-5204, EDUC-5493 (full-year course)

Spring: four weeks of E.C.E. Infant/Toddler field placement

FIFTH YEAR

Fall Term: three B.A. courses; the B.Ed. courses EDUC-5209; EDUC-5312; EDUC-5318; EDUC-5494 (full-year course)

Winter Term: three B.A. courses; the B.Ed. course EDUC-5205; EDUC-5494 (full-year course)

Spring Term: 4 weeks of B.Ed. Primary grades practice teaching (EDUC-5494 (full-year course))

Courses used to calculate the BA major average are: as listed for the General BA program.

Courses used to calculate the Education major average are: All required Education courses.

Standing Required for Continuation

Students must comply with the general university regulations, and with the academic regulations of their particular BA program. In addition, candidates who obtain three or more final Education course grades below 65% will not be recommended for certification. Candidates who are unsuccessful in practice teaching or obtain a grade of F in any course will not be recommended for either a degree or certification. Students may repeat only one B.Ed. course, excluding EDUC-5491, EDUC-5492, EDUC-5493, EDUC-5494, for upgrading throughout the program. Any deviation from the prescribed sequence of courses must be approved by the Dean of the Faculty of Education.

Graduation

Graduates of the program receive both the Bachelor of Arts and the Bachelor of Education (General) degrees from the University of Windsor, and the Diploma in Early Childhood Education from St. Clair College.

The Faculty of Education does not issue a teaching certificate. The Ontario Certificate of Qualification is issued by the Ontario College of Teachers upon recommendation of the Dean of the Faculty of Education. Only Canadian citizens or Permanent Residents of Canada qualify for this certificate. Under certain conditions, the Ontario College of Teachers may grant a non-Canadian citizen an Interim Certificate of Qualification.

EDUCATION COURSES

TEACHING EDUCATION COURSES

Pre-Service courses may extend over one, two or four terms.

EDUC-1199. Community Service Education

The course provides students with directed experience in a community service organization such as a service club, a youth club or group, a national park or conservation area, or a science museum. The Faculty of Education Field Experience Office will arrange the Community Service Field Placements, where applicable. Workshops and seminars will prepare students for the Community Service Field Placements and introduce students to the Professional Year Applicant Portfolio as a means of documenting and reflecting on professional learning and practice in the teaching profession. (Open only to students in the

Modern Languages, French, English Language and Literature, History, Drama, Visual Art, General Science and Mathematics I/S Concurrent Education programs). (This is an experiential learning course.)

EDUC-2299. Teaching and Learning Part I

This course provides students with directed field experiences in a grade 9 or 10 classroom (mathematics or science) during each of the Fall and Winter semesters. The Faculty of Education Field Experience Office will arrange the Field Placements. Workshops and seminars will provide an orientation to schools, with a focus on school culture and school community, and assist students in developing their Professional Year Applicant Portfolio as a means of documenting and reflecting on professional learning and practice in the teaching profession. (Open only to third-year students in the Modern Languages, French, English Language and Literature, History, Drama, Visual Art, General Science and Mathematics I/S Concurrent Education programs) (Prerequisite: EDUC-1199). (This is an experiential learning course.)

EDUC-3399. Teaching and Learning Part II

This course provides students with directed field experiences in a grade 11 or 12 classroom (mathematics or science) during the Fall semester. The Faculty of Education Field Experience Office will arrange the Field Placements. Workshops and seminars will provide an orientation to the senior division, with a focus on school culture and school community, and assist students in completing their Professional Year Applicant Portfolio. (Open only to fourth-year students in the Modern Languages, French, English Language and Literature, History, Drama, Visual Art, General Science and Mathematics I/S Concurrent Education programs.) (Pre-requisites: EDUC-1199 and EDUC-2299). (This is an experiential learning course).

EDUC-5200. Religious Education in Roman Catholic Schools

This course is provided for those preparing themselves for the ministry of teaching in the Roman Catholic Schools of Ontario. This course is open to all Education students. This course offers prospective teachers the opportunity: 1) to reflect, in an adult context, upon the significance of their faith and faith growth for themselves and their students; 2) to gain a theological background for an introduction to Religious Education. (1.5 Credit Weight).

EDUC-5201. Foundations of Practice (Part I): Philosophical Orientation to Education

Theories of learning and the nature of learning will be explored so that teacher candidates begin an inquiry process toward their teaching philosophy. (1.5 Credit Weight)

EDUC-5202. Foundations of Practice (Part II): Classroom Practice

Theories from Part 1 will be linked to instructional aspects of teaching, discovering strategies that are related to teacher candidates' perspective/philosophy of teaching. (1.5 Credit Weight)

EDUC-5203. Educational Psychology

Psychology applied to teaching: child growth and development, the learning process, mental health, learning and adjustment problems in the environment. (3.0 Credit Weight)

EDUC-5204. Differentiated Instruction for Students with Special Needs

This course provides an introduction to the field of special education in the Canadian context, focusing on background knowledge needed by teachers to address diverse learning needs in inclusive classrooms. This course provides an introduction to the field of special education in the Canadian context, focusing on background knowledge needed by teachers to address diverse learning needs in inclusive classrooms. It will examine the various methodologies used for differentiating instruction, accommodating and modifying instruction for IEP's, tiered instruction, and using technology to assist learning. (3.0 Credit Weight)

EDUC-5205. Educational Foundations, Law and Ethics

This course focuses on provincial legislation and policies and explores the significance of professional learning and ethical conduct that involves understanding a range of educational philosophies and pedagogical approaches. (Open only to Concurrent Education students.) (3.0 Credit Weight)

EDUC-5206. Aboriginal Ways of Knowing: Cultural, Political and Linguistic Contexts

Emphasis will be on critical thinking around the politics of education, explore resources so educators can better support Aboriginal learners and increase awareness about First Nations, Métis and Inuit culture as well as the multicultural and inclusive classrooms. (1.5 Credit Weight)

EDUC-5207. Service Learning Specialization

Students select one of the following options according to their division PJ/JI/IS (3.0 Credit Weight) (This is an experiential learning course.):

1. Leadership Experience for Academic Direction (LEAD) (JI/IS)

In this course students will gain an understanding of youth in the 21st century who are identified as being in-risk. Social learning theories, theories of resilience and personal and social responsibility are integrated. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the school community.

2. Urban Education (PJ)

In this course, teacher candidates will gain an understanding of expressions of power in society and SES factors that affect the teaching/learning process in our urban city schools in relation to issues of racism, ethnocentrism and poverty. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the school community or community at-large.

3. English Language Learners (PJ/JI/IS)

An understanding of the English Language Learner and how to engage the learner in learning is critical in the success of the Ontario urban classroom. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the school community or community at-large.

4. Global Learning: Cultural Engagement (PJ/JI/IS)

Global and Cultural Education International Experience allows for intercultural dialogue and engagement and provides a challenge to advocate for a global cross-cultural future in harmony and peace. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the global community.

5. Beginning Time Aboriginal Teaching (PJ/JI)

In this course, teacher candidates participate in a series of learning experiences that will allow them to think through and learn from traditional teachings and learning modalities. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the aboriginal community.

6. Early Childhood Education (PJ)

An introduction to Early Childhood Education provides the candidate with the opportunity for discovery of the nature of child development and learning through a specific early childhood education program preparing the candidate for full day kindergarten. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the Early Childhood Education community within schools or Early Childcare Centres.

7. Ecology and Wellness (PJ/JI/IS)

A course designed to study environment issues, concepts and pedagogy to advocate for sustainability, environmental justice and stewardship as well as becoming environmentally literate. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within school communities.

8. 'Going the Extra Mile' (MILE) Project (PJ)

Teacher candidates will go the extra "MILE" to combine academic study with service learning. In this course teacher candidates service students and communities in low SES neighbourhoods in the area. In addition to the benefits of engagement and service for both teacher candidates and the local community that they serve, teacher candidates gain valuable skills and experiences while establishing rapport, gaining insights to understand the lived reality of children beyond the classroom, and to make connections between inquiry and practice. Teacher candidates will be responsible for a minimum of a 20-hour experiential service-learning project within the school community or the low SES community at-large.

EDUC-5208. Assessment and Evaluation

This course will examine ways to incorporate "assessment as", "assessment for" and "assessment of" learning in all classes. Emphasis will be placed on incorporating frequent, continuous assessment techniques to foster an environment of intrinsic motivation for success. Strategies for tying feedback directly to curriculum expectations will also be explored. (1.5 Credit Weight)

EDUC-5209. Critical Analysis of Social, Global & Cultural Issues in Education

An introduction to critical reflection and analysis of educational issues. This course addresses the varieties of students who enter the classroom in terms of their diverse social origins, cultures, identities, and social status (lived and perceived). It engages participants in an examination of the purposes of education, education policy, and teachers' responsibility to work productively with school colleagues and other adults to achieve equitable access, experiences, and outcomes for all students. (1.5 Credit Weight)

EDUC-5210. Foundations of Practice (III) Law and Ethics – School Governance

This course focuses on provincial legislation and policies and explores the significance of professional learning and ethical conduct that involves understanding a range of educational philosophies and pedagogical approaches. (Open only to Consecutive Education students.) (1.5 Credit Weight)

EDUC-5211. Mental Health in the Classroom

This course is designed to assist teacher candidates in developing their mental health literacy. It will explore the concepts of mental health, mental illness and the stigma that surrounds it, looking specifically at various mood and anxiety disorders that can affect children and adolescents. It will include discussion of interventions teachers can implement and how to develop student resilience.

EDUC-5215. Mathematics Foundations (P/J)

This course is intended to give prospective teachers an in-depth preparation in the content, concepts, and principles of elementary mathematics education for students in Junior Kindergarten - Grade 6. Real-life problem-solving approaches, usefulness, and power of mathematics in everyday life will be emphasized in the course. The use of manipulatives, investigations, discussions, and the application of modern technological tools in appropriate situations. (1.5 Credit Weight)

EDUC-5221. Pedagogy of the Arts (J/I)

This course situates the arts in Grades 4 to 8 classes and communities and examines how they contribute to the growth of knowledge, creativity, and critical thinking in our students and in society. This will

include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasizes differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5225. Mathematics Foundations (J/I)

An introduction to the growth, development, and learning of children from Grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching mathematics. (1.5 Credit Weight)

EDUC-5231. Pedagogy of the Arts (I/S)

This course situates the arts in Grades 7 to 8 classes and communities and examines how they contribute to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasizes differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5311. Visual Arts Methodology

An introduction to the growth, development, and learning of children from Junior Kindergarten to grade 6 with an emphasis on instructional practices and curriculum planning for teaching visual arts. (3.0 Credit Weight)

EDUC-5312. Digital Technology and Social Media Applications (P/J)

This course explores a range of digital technologies in educational settings. Focusing on teaching, learning and inquiry, students will evaluate digital educational resources, critically discuss and assess uses of new media in school-based contexts, gain hands-on experiences with various digital tools, and develop various multimedia instructional tools with the aim of building an intelligent and thoughtful disposition towards the use of learning technologies within their own classroom and school contexts. (3.0 Credit Weight)

EDUC-5313. Health and Physical Education (P/J)

This course explores a constructivist approach to teaching health and physical education to children from Junior Kindergarten to Grade 6 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (3.0 Credit Weight)

EDUC-5314. Language Arts (P/J)

An introduction to the theories of learning and linguistics of children from Junior Kindergarten to grade 6 with an emphasis on curriculum content, expectations, ways of learning and implications of EQAO standardized testing. (3.0 Credit Weight)

EDUC-5315. Mathematics Methodology (P/J)

This course is designed to introduce methods for teaching mathematics to elementary students from Junior Kindergarten - Grade 6. This course focuses on children's thinking in mathematics and classroom practices that support and develop children's thinking. Teacher candidates will develop frameworks for assessing children's strategies for solving problems. They will explore the connection between arithmetical and algebraic thinking in the elementary grades. (3.0 Credit Weight)

EDUC-5316. Music Methodology

An introduction to the growth, development, and learning of children from Junior Kindergarten to grade 6 with an emphasis on instructional practices and curriculum planning for teaching music. (3.0 Credit Weight)

EDUC-5317. Science (P/J)

This course explores an inquiry-based approach to teaching science to children from Junior Kindergarten to Grade 6 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (3.0 Credit Weight)

EDUC-5318. Social Studies (P/J)

This course explores a constructivist approach to teaching social studies to children from Junior Kindergarten to Grade 6 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (3.0 Credit Weight)

EDUC-5319. Issues in Education

An introduction to critical reflection and analysis of social, cultural and political issues in education.

EDUC-5321. Visual Arts Methodology

An introduction to the growth, development, and learning of children from grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching visual art. (3.0 Credit Weight)

EDUC-5322. Digital Technology and Social Media Applications (J/I)

This course explores a range of digital technologies in educational settings. Focusing on teaching, learning and inquiry, students will evaluate digital educational resources, critically discuss and assess uses of new media in school-based contexts, gain hands-on experiences with various digital tools, and develop various multimedia instructional tools with the aim of building an intelligent and thoughtful disposition towards the use of learning technologies within their own classroom and school contexts. (3.0 Credit Weight)

EDUC-5323. Health and Physical Education (J/I)

This course explores a constructivist approach to teaching health and physical education to children from Grades 4 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5324. Language Arts (J/I)

An introduction to the growth, development, and learning of children from grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching language arts. (1.5 Credit Weight)

EDUC-5325. Mathematics Methodology (J/I)

An introduction to the growth, development, and learning of children from Grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching mathematics. (1.5 Credit Weight)

EDUC-5326. Music Methodology

An introduction to the growth, development, and learning of children from grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching music. (1.5 Credit Weight)

EDUC-5327. Science (J/I)

This course explores an inquiry-based approach to teaching science to children from Grades 4 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (3.0 Credit Weight)

EDUC-5328. Social Studies (J/I)

This course explores a constructivist approach to teaching social studies to children from Grades 4 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5331. Visual Arts Methodology (I/S)

An introduction to the development and learning of students in grades 7 to 8 with an emphasis on instructional practices and curriculum planning for teaching visual art. (1.5 Credit Weight)

EDUC-5332. Digital Technology and Social Media Applications (I/S)

This course explores a range of digital technologies in educational settings. Focusing on teaching, learning and inquiry, students will evaluate digital educational resources, critically discuss and assess uses of new media in school-based contexts, gain hands-on experiences with various digital tools, and develop various multimedia instructional tools with the aim of building an intelligent and thoughtful disposition towards the use of learning technologies within their own classroom and school contexts. (3.0 Credit Weight)

EDUC-5333. Health and Physical Education (I/S)

This course explores a constructivist approach to teaching health and physical education to children Grades 7 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5334. Language Across the Curriculum (I/S)

An exploration of the development and learning of students in Grades 7 to 8 with an emphasis on instructional practices and curriculum planning for teaching language arts across the curriculum. (1.5 Credit Weight)

EDUC-5335. Mathematics (I/S)

An introduction to the growth, development, and learning of children Grades 7 to 8, with an emphasis on instructional practices and curriculum planning for teaching mathematics. (1.5 Credit Weight)

EDUC-5336. Music Methodology

An introduction to the development and learning of students in grades 7 to 8 with an emphasis on instructional practices and curriculum planning for teaching music. (1.5 Credit Weight)

EDUC-5337. Science (I/S)

This course explores an inquiry-based approach to teaching science to children Grades 7 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5338. Social Science (I/S)

This course explores a constructivist approach to teaching social studies to children Grades 7 to 8 with an emphasis on differentiated instructional practices, diversity, curriculum planning and assessment. (1.5 Credit Weight)

EDUC-5339. Career and Guidance Education (I/S)

An exploration of the development and learning of students in grades 7 to 8 with an emphasis on career and guidance education. (1.5 Credit Weight)

EDUC-5352 to EDUC-5380. Junior - Intermediate, Intermediate - Senior Methods

These courses provide a more detailed study and application of the aims and teaching procedures of specific subjects in the Junior-Intermediate and Intermediate-Senior concentrations. Intermediate-Senior candidates must select two courses from the Table of Options. Junior-Intermediate candidates must select one.

EDUC-5360. Media Arts Teachable

Media Arts teachable focuses on strategies to refine high school students' use of multiple media and their skills in the use of emerging technologies and tools. The technologies and processes used include photography, film, classical animation, and video/television. On the digital side technologies include digital imaging, sound recording and sonic sculpture, two and three-dimensional animation, multimedia production, holography and web-page design.

EDUC-5386. Curriculum Development for Technological Studies Part I

An introduction to the theory and practice of curriculum development for Broad-Based Technology programs in secondary schools. The course uses a constructivist approach to promote integrated learning and broad-based technology approaches through activities that lead to the development of unit plans, a course of study, a project outline, a student learning module and a course portfolio. Thematic and project-based strategies are used to address the learning expectations outlined in curriculum guidelines and policy documents and provide a variety of student learning styles, teaching approaches, and assessment and evaluation strategies. Shop safety and workplace safety are themes infused throughout the course.

EDUC-5387. Curriculum Development for Technological Studies Part II

An introduction to the theory and practice of curriculum development for Broad-Based Technology programs in secondary schools. The course uses a constructivist approach to promote integrated learning and broad-based technology approaches through activities that lead to the development of unit plans, a course of study, a project outline, a student learning module and a course portfolio. Thematic and project-based strategies are used to address the learning expectations outlined in curriculum guidelines and policy documents and provide a variety of student learning styles, teaching approaches, and assessment and evaluation strategies. Shop safety and workplace safety are themes infused throughout the course. (Prerequisite: EDUC-5386.)

EDUC-5388. Principles and Methods of Teaching Technological Studies Part I

This course is an introduction to the methodology and processes of facilitating learning in the Broad-Based Technological Education classroom. The course will provide opportunities to apply pre-instructional planning, instruction and classroom management skills, ongoing and post-instructional assessment and evaluation strategies. Emphasis is on course activities that will focus on teaching and learning theories, the dynamics of team and group learning, and the development of written and oral communication skills. Course activities include lesson planning, team practice teaching, report writing, seminar presentations, and the development of video and print student learning modules.

EDUC-5389. Principles and Methods of Teaching Technological Studies Part II

This course is an introduction to the methodology and processes of facilitating learning in the Broad-Based Technological Education classroom. The course will provide opportunities to apply pre-instructional planning, instruction and classroom management skills, ongoing and post-instructional assessment and evaluation strategies. Emphasis is on course activities that will focus on teaching and learning theories, the dynamics of team and group learning, and the development of written and oral communication skills. Course activities include lesson planning, team practice teaching, report writing, seminar presentations, and the development of video and print student learning modules. (Prerequisite: EDUC-5388.)

EDUC-5411. Drama Methodology (P/J)

This course situates Drama as one of the arts in Junior Kindergarten to Grade 6 classes and communities and examines how it contributes to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasizes differentiated instructional practices, diversity, curriculum planning and assessment.

EDUC-5412. Dance Methodology (P/J)

This course situates Dance as one of the arts in Junior Kindergarten to Grade 6 classes and communities and examines how it contributes to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasizes differentiated instructional practices, diversity, curriculum planning and assessment.

EDUC-5414. Language and Media Literacy (P/J)

Emphasis will be placed on instructional practices and curriculum planning for teaching language arts through differentiated and tiered instruction. The use of media in language arts will be explored through a critical lens. (1.5 Credit Weight)

EDUC-5421. Drama Methodology (J/I)

This course situates Drama as one of the arts in Grades 4 to 8 classes and communities and examines how it contributes to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasises differentiated instructional practices, diversity, curriculum planning and assessment.

EDUC-5422. Dance Methodology (J/I)

his course situates Dance as one of the arts in Grades 4 to 8 classes and communities and examines how it contributes to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasises differentiated instructional practices, diversity, curriculum planning and assessment

EDUC-5424. Language and Media Literacy (J/I)

An introduction to the growth, development, and learning of children from Grades 4 to 8, with an emphasis on instructional practices and curriculum planning for teaching language arts. (1.5 Credit Weight)

EDUC-5431. Drama Methodology (I/S)

This course situates Drama as one of the arts in Grades 7 to 8 classes and communities and examines how it contributes to the growth of knowledge, creativity, and critical thinking in our students and in society. This will include strategies to encourage best practices in teaching and supporting learning and attainment of skills and knowledge in aesthetic and artistic practices. The course emphasises differentiated instructional practices, diversity, curriculum planning and assessment.

EDUC-5491, EDUC-5492, EDUC-5493, and EDUC-5494. Practice Teaching

Directed observation and practice teaching is provided through a series of field experiences. Primary-Junior candidates will normally be placed in Grades K to Six inclusive; Junior-Intermediate candidates will

normally be placed in Grades Four to Ten inclusive; Intermediate-Senior candidates will be placed in Grades Seven to Twelve inclusive.

EDUC-5497. Internship

The Internship consists of 90 hours of skills upgrading with 36 hours dedicated to an action research community service project. This community service project gives the students an opportunity to complete a needs assessment related to their trade in education, followed by an inquiry-based research project and evaluation. The remaining hours will be dedicated to the integration of technological skills, theory, and pedagogical practice and to deepening and broadening their skills and knowledge in their selected area of technological education. A technology skills profile will be used to track the range and level of skill development of each candidate. The Program Coordinator for the Technological Education program will work with Board-based Technological Program Consultants across the province to select teacher advisors who will support teacher candidates during their Internship period. The Technological Program Consultants will be responsible for evaluating teacher candidates during their Internship. (7.5 Credit Weight). (This is an experiential learning course.)

EDUC-5498. Practicum

The practicum consists of two main components: orientation to schools, with a focus on school culture and school community; and classroom practice related to the candidate's specific discipline. Teacher candidates are assigned, during Fall and Winter practicum sessions, to schools or other settings approved by the Ontario College of Teachers, for a minimum of sixty days of combined observation and practice related to these components. As well, candidates will do 100 hours of pedagogical workshops, courses or seminars, offered by the Board. The Technological Program Consultant will sign off on this training. Candidates would be required to visit schools that offer their discipline. The Technological Program Coordinator will set up the school visits and the Board will pay for teacher coverage during their absence from regular teaching. (Open only to student in the BEd/Diploma in Technological Education program.) (This is an experiential learning course.)

EDUC-5499. Practicum

The practicum consists of two main components: orientation to schools, with a focus on school culture and school community; and classroom practice related to the candidates' specific discipline. Teacher candidates are assigned, during Fall and Winter practicum sessions, to schools or other settings approved by the Ontario College of Teachers, for a minimum of 80 days of combined observation and practice related to these components. (12 Credit Weight) (This is an experiential learning course.)

ORGANIZATIONAL LEARNING AND TEACHING COURSES

NOTE: The Organizational Learning and Teaching courses that lead to the Minor in Organizational Learning and Teaching can not be counted towards a Bachelor of Education.

EDUC-4000. Diversity and Inclusion in the Learning Organization

This course will examine the evolution of the concepts of diversity and inclusion in social organizations, key management practices for improving performance, and current diversity and inclusion challenges in organizations. Diversity and inclusion are important aspects of learning organizations for the purpose of developing strategic options for improvement in many different ways. (Prerequisite: Semester 3 or above standing)

EDUC-4050. Instructional Technologies

This course has been designed to provide students with an introduction to theoretical and practical issues pertaining to the use of informational and instructional technologies in learning organizations.

Students will examine and critique the context of the field of instructional technologies and learn to apply current instructional technologies and media to instructional design and practice and the enhancement of learning opportunities. Basic concepts in educational technology, major developments, the present status of informational and instructional technologies, key principles of educational technology as an approach and tool for teaching and learning, and the development of appropriate educational technologies in terms of a learning organization's goals will also be examined. Technological literacy will be emphasized throughout while exploring computer applications, the utilization of converging digital technologies, and the use of the internet and web resources. (Prerequisite: Semester 3 or above standing)

EDUC-4100. Learning-Centred Teaching: Planning, Delivery, Assessment, and Evaluation

Students will learn about principles and theories of learning-centred practices. Specifically, students will critically examine and synthesize the findings of current research and scholarly texts on teaching and learning to develop a critical personal understanding of learning-centred practices that are applicable to a wide range of diverse workplace contexts. Through assigned readings and texts, students will acquire, integrate, and apply knowledge pertaining to planning, instructional delivery, and the assessment and evaluation of learning. Self-, peer-, and teacher-evaluated assignments will provide students with opportunities to integrate research and practice and to facilitate the development of particular skills, notably, interpersonal communication skills, planning, facilitation and organization of learning, critical thinking, inquiry learning, and reflection. (Prerequisite: Semester 3 or above standing)

EDUC-4150. Learning Organizations: Management and Leadership

Students will learn about current management theories and practices in contemporary learning organizations where learning is a primary or significant characteristic or quality of the organization. Specifically, from a leadership perspective, this course will examine the nature of leading and managing in learning organizations, the role of learning, and the complex legal, ethical, and social issues that give shape to the organization and its leaders. Through the use of a variety of resources and approaches, students will explore and question theories, models, tools, and best practices for managing and leading in learning organizations, prompting and providing critical perspectives and practical tools that may be applied in different contexts. (Prerequisite: Semester 3 or above standing)

EDUC-4200. Theories of Individual and Collective Learning

Students will examine current theories pertaining to learning and learners in diverse organizational contexts. Particular themes will be examined, including the nature of learning, patterns of growth and development, the dynamics and complexities of learning in diverse educational contexts, and current educational realities in society. Specifically, students will examine a number of important issues, such as: learning and cognitive processes; personal, social and moral development; individual and group differences; social-cognitive views (e.g., racial discrimination, bullying, harassment, abuse, gender bias, xenophobia, homophobia, stereotyping); motivation and cognition relevant to individual and collective learning; knowledge construction and higher-order thinking. In this course, students will develop a critical awareness of learning theories and related issues and will critique, analyze, and reflect on the underlying assumptions associated with matters and the implications for individual and collective learning in learning organizations. (Prerequisite: Semester 3 or above standing)

EDUC-4800. Experiential Learning Field Placement

This course has been designed to provide students with an experiential learning opportunity with which to connect theoretical and practical issues in a field-based learning environment. Under the guidance of the course instructor and the partners in the field, students will engage in a collaborative process leading to the production of a final paper on an issue or topic of inquiry of relevance to the partners in the field. This course will present students with authentic assessment tasks that situate their on-going inquiries in

a context that enables them to apply and further critique what has been previously learned. Students will engage in matters pertaining to learning and learners applicable to research, needs assessment, program review, and policy development, as appropriate. The final project will be grounded in the field experience, and will show evidence of knowledge, skills of inquiry, reflection and problem-solving acquired through the other courses. This course will be taken following completion of the other course-work in the minor option. (Prerequisites: EDUC-4000, EDUC-4050, EDUC-4100, EDUC-4150, EDUC-4200). (This is an experiential learning course.)

EDUCATION IN-SERVICE COURSES

In-Service Courses include:

Additional Basic Qualification Courses

Additional Qualification Courses

Honours Specialist Qualification Courses

Principal's Qualification Course

For a complete description of all In-Service courses and registration procedures, please visit the Faculty of Education website at www.uwindsor.ca/edfac.

FACULTY OF ENGINEERING

PROGRAM INFORMATION

The engineering curriculum leading to the BASc degree has been designed to offer students an education that is immediately valuable to them on graduation and which, at the same time, provides a foundation to accommodate their further education in industry or research.

Those interested in pursuing graduate studies should consult the graduate calendar information on the Integrated BASc/MASc program.

The first year is common in order to give the student an introduction to general engineering principles and to allow investigation of a special field of interest for subsequent years of study.

The Co-operative Education Program is available in Civil Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering (with or without a minor in Business Administration), and Mechanical Engineering (with or without an option in Aerospace, Automotive, Materials or Environmental).

While engineers must work within the technologies of the times, they are also responsible for the continual development of these technologies. The flexibility demanded of the engineer must be based upon proficiency in the physical sciences, and a confident ability to apply the sciences to the benefit of humankind. Therefore, our engineering programs are founded upon a substantial content of mathematics, physics, and chemistry; and our engineering subjects are taught with a view to familiarizing the students with contemporary practice, and teaching them those methods of analysis, design, and realization which they will be able to apply to a continually developing discipline.

The aim of the engineer is to apply the latest science and technology for the betterment of society; engineers must, therefore, realize their duties to society and, as a prerequisite, appreciate how civilizations have developed to their present states.

The independent responsibility that we wish to see in practicing engineers is impressed upon our students by emphasis on laboratory work, tutorials, projects, and assignments. Further, the student is assisted in individual studies by counselling and professional development seminars.

These activities encourage a close and profitable student professor relationship and facilitate the interchange of engineering information and experience to develop the professional maturity and integrity of the student.

ACADEMIC REGULATIONS

Students are directed to become familiar and to comply with the general regulations of the University which apply to all students. Additionally, programs within the Faculty of Engineering have particular regulations. Students enrolled in Engineering programs also must comply with these particular requirements.

Students also are directed to read the "Statement of Responsibility".

COURSE CHANGES

All course changes subsequent to registration require the written approval of the Associate Dean of the Faculty.

COURSES NOT PART OF THE ENGINEERING PROGRAM

A student may register for courses additional to those in the Engineering program only with the permission of the Head of the department in which the student is enrolled and the Associate Dean.

FACULTY OF ENGINEERING: COURSES THAT MAY BE TAKEN FROM OUTSIDE THE FACULTY OF ENGINEERING

For complete descriptions of the courses listed below, see the respective area/program sections of this Calendar.

Not all courses will be offered each year. All courses are three hours a week unless otherwise indicated.

Consult the Office of the Associate Dean (Academic) for the current list of approved complementary studies courses that may be taken from outside Engineering, and which have been chosen to satisfy the Complementary Studies requirements of the Canadian Engineering Accreditation Board. Students will be required to take one course from each of the two lists, A and B.

List A: Courses focusing on Equity, Diversity, Inclusion, and Decolonization

GART-1210. An Introduction into Indigenous Topics (also SOSC-1210)

ENGL-2320. Indigenous Literatures

ENGL-2330. Gender and Literature

HIST-2460. Aboriginal Peoples in Canadian History: Beginnings to Mid-Nineteenth Century

HIST-2470. Aboriginal Peoples in Canadian History: Mid-Nineteenth Century to the Present

PHIL-1350. Culture, Health, and Social Justice on Turtle Island

PHIL-2300. Indigenous Philosophy of the Americas

PHIL-2380. Social Identity, Diversity and Race

POLS-2000. Indigenous Policy and Constitutional Relationships

POLS-2110. Women and Politics (also WGST-2110)

POLS-3000. Indigenous Treaties and Land Claims

POLS-4000. Indigenous Nation-Building: Traditional Governance in a Modern Era

SACR-2050. Sociology of Sexualities

SACR-2100. Gender, Sexuality and Social Justice

SACR-2400. Introduction to Race and Ethnicity

SJST-2370. Queer Activism (also WGST-2370)

WGST-1000. Women in Canadian Society

WGST-2200. Women, Race and Social

WGST-2380. Good Relations: Indigenous Sovereignty, Feminism and Reconciliation

WGST-2800. Boys to Men: A critical exploration of masculinities

List B: Humanities and Social Science Courses

GART-2090. Ethics in the Professions
CMAF-1010. Introduction to Media and Society
DRAM-2100. Speech Communication to Inform
ENGL-1001. Composition
HIST-2510. History of Women's Movements in North America (also WGST 2510)
PHIL-1290. Contemporary Moral Issues
PHIL-2210. Introduction to Ethics
PHIL-2270. Environmental Ethics
PHIL-2280. Technology, Human Values and the Environment
POLS-2120. Environmental Policy and Politics
POLS-2300. Space, Place and Scale: Foundations of Human Geography
POLS-2490. Political Economy of Agriculture and Food
PSYC-2180. Everyday Conflicts and Their Resolution (also SJST-2180)
SACR-1100. Foundations of Social Life
SACR-2270. Globalization, Development and Social Change
SACR-2280. Class, Wealth and Power
SJST-2700. Speaking Truth to Power: Voice and Activism (also WORK-2700, CMAF-2700)
WORK-1500. Working for a Living
WORK-2000. Labor Law and Workers Rights

SUPPLEMENTAL PRIVILEGES

The Academic Standing Committee may grant a supplemental evaluation privilege for a failed course provided that the student:

- (a) has failed only one course in the evaluation period; and
- (b) has a grade below 50%; and
- (c) has a cumulative average of 60% or better.

If a supplemental evaluation privilege is granted and the student decides to exercise this privilege, the student must register for the supplemental and pay the appropriate fee. Once a student has registered for a supplemental evaluation and the required evaluation method has been prescribed, the evaluation will occur at the time and place prescribed by the Faculty of Engineering. Failure to write after registering for the supplemental evaluation will result in a failing grade being assigned. Both the resulting grade and the original grade will be shown on the student's transcript and will be included in the determination of the student's cumulative average.

GRADUATION REQUIREMENTS

In addition to complying with the general university regulations an Engineering student must complete the program within eight years of study from the date of first registration in an Engineering program.

CO-OPERATIVE EDUCATION PROGRAM

The Faculty of Engineering Co-operative Education Program integrates 3 four-month, paid, full-time, career-related work terms. By combining semesters of study with career-related positions, students acquire valuable professional experience in the workplace.

APPLICATION PROCEDURE

Admission to the Co-operative Education Program is competitive. Students can apply for the Bachelor of Applied Science Co-op Program either directly out of grade 12 (or equivalent) year, or in the fall term of their second year of study.

Students applying through OUAC directly out of their grade 12 (or equivalent) year will be admitted based on academic achievement. The Co-op portion of the degree will begin in the fall of 2nd year. Students who were not admitted and/or did not apply to Co-op directly out of grade 12 (or equivalent) can apply for the Bachelor of Applied Science Co-op program in September of their 2nd year of study. Second-year Co-op applications are available through the Co-operative Education and Workplace Partnerships office.

ACADEMIC STANDING

Students admitted to Bachelor of Applied Science Co-op directly out of high school must meet the following requirements for automatic continuation in Co-op in year 2:

- A minimum cumulative average of 70% at the end of year 1 of engineering studies
- Eligible for 2nd year standing, or at the discretion of the Faculty of Engineering
- Maintain a minimum 60% cumulative average in years 2, 3, and 4
- No more than one outstanding grade of 50% or lower on their transcript
- Maintain full-time status, with a minimum of 4 courses per study term

First year students with a cumulative average of 60-69.9%, can apply for re-admission to Co-op in the fall of their 2nd year.

Year 2, 3 and 4 students must maintain a minimum cumulative average of 60% and have no more than one outstanding grade below 50% in the evaluation period.

WITHDRAWING FROM THE CO-OP PROGRAM

Withdrawal from the Co-op program will be granted on an exception basis only as it must be determined that the student has no outstanding commitments to employers. Students who wish to withdraw must meet with a WIL Coordinator and complete a withdrawal form.

The deadline to withdraw from the co-op program and receive a fee refund for the current study term is the 1st Friday of classes. Students in the fall of their second year have an extended withdrawal deadline date provided by Co-operative Education & Workplace Partnerships.

Students who withdraw from Co-operative program cannot re-join the Co-op program at a future date.

Once students have accepted an offer of employment for a work term, they must remain in the co-op program until they have completed their work term requirements. Failure to complete the work term and/or work term requirements (as per the work term course outline) will result in a non-pass grade for that work term course, and they may be required to withdraw from the Co-op stream. The Co-op fee for the work term is non-refundable.

CO-OP JOB SEARCH PROCESS

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Co-operative Education and Workplace Partnerships using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process in partnership with their coordinator at Co-operative Education and Workplace Partnerships.

CO-OP REQUIREMENTS

Students must successfully complete 3 work terms to be eligible for the co-op designation. Although we strive to provide Co-op opportunities for all our students, placements are not guaranteed as students must be selected for employment by the employer.

Bachelor of Applied Science Co-op students must remain full-time students and typically follow a standardized work/study sequence schedule. Faculty advisors can assist with course scheduling. Work/study sequence changes are possible and must be approved by the Work Integrated Learning (WIL) Coordinator and faculty advisor.

Year of Study	Fall Term	Winter Term	Summer Term
Year 1	Study term 1	Study term 2	Off
Year 2	Study term 3	Study term 4	Work term 1
Year 3	Study term 5	Work term 2	Study term 6
Year 4	Work term 3	Study term 7	Study term 8

PROGRAMS ADMINISTERED BY THE OFFICE OF THE DEAN OF ENGINEERING

Bachelor of Engineering Technology

Admission Requirements for all Streams

Applicants are eligible if they:*

- possess an Advanced Diploma in Technology from Ontario CAATs (or an equivalent Canadian or International Institution)
- possess an Engineering degree from a Canadian university (or an equivalent recognized International Institution)
- possess a University degree in a scientific or technical subject from a Canadian university (or an equivalent international institution)
- have completed the equivalent of three years of an engineering degree from a recognized international institution.

*Admission to the Bachelor of Engineering Technology Program (General Stream) also may be extended to students with a two-year Engineering Technology Diploma or Certificate from a Canadian College (CAAT or equivalent) and relevant work experience based on space availability in the program. Additional coursework may be required to ensure equivalency to the three-year diploma program as evaluated by the Office of Admissions and Faculty of Engineering.

And meet the following minimum average requirement:

1. For Canadian Colleges (CAAT or equivalent), Graduating Cumulative Average of 70%.
2. For international colleges (equivalent to CAAT's advanced diploma), Graduating Cumulative Average of 80% and minimum English language requirement as per University policy
3. For Canadian University degree holders who are seeking technology designation, 70%.
4. For international university degree holders who are seeking technology designation, 80% and minimum English language requirement as per University policy.
5. For individuals who have completed the equivalent of three years of an engineering degree from a recognized international institution, cumulative average of 80%, or first class honours, or equivalent; and minimum English language requirements as per University policy.

Remark 1: Students applying to Bachelor of Engineering Technology (Mechanical) must have received an advanced diploma in Mechanical Engineering Technology (or equivalent as stated in 1 and 2 above). Students applying to Bachelor of Engineering Technology (Civil) must have received an advanced diploma in Civil Engineering Technology (or equivalent as stated in 1 and 2 above).

Remark 2: Students, who received a four-year degree in a technical subject in Science, if admitted into BEngTech program, may be asked to take additional courses beyond the minimum requirements, and up to four courses in their original degree can be counting towards the BEngTech program, if appropriate.

Bachelor of Engineering Technology (BEngTech) - General Stream

Degree Requirements

Total courses: A minimum 15 courses

(a) Two 1000 courses, six 2000 level courses, three 3000 level courses, and four 4000 level courses.

A higher-level course can replace a lower-level course but the reverse is only allowed under extenuating circumstances. The students are encouraged to take more 3000 and 4000 level courses.

NOTE: Due to the curriculum change in Engineering, some 2000 level courses are offered during the third year, and some 3000 level courses are offered during the fourth year of studies.

Suggested Courses

Fall Courses

MECH-3212. Thermodynamics

ELEC-2320. Software Fundamentals

ELEC-2141. Circuit Analysis I

GENG-2500. Engineering and the Environment

GENG-2220. Probability and Statistics for Engineering

MECH-3233. Fluid Mechanics I

GENG-3130. Engineering Economics

CIVL-3530. Structural Analysis I
CIVL-4820. Planning and Construction Management
MECH-4850. Welding Engineering

Winter Courses

GENG-2190. Engineering Materials
MECH-2230. Advanced Engineering and Design
GENG-2220. Probability and Statistics for Engineering
GENG-4210. Engineering and Society
CIVL-2200. Civil Engineering Information Systems
INDE-3020. Health, Safety and Human Factors
INDE-3110. Computer Aided Design and Computer Aided Manufacturing
MECH-4212. Mechatronics (Laboratory Based)

Summer Courses

GENG-4210. Engineering and Society
GENG-4830. Engineering Report
CIVL-3650. Transportation and Traffic Engineering
MECH-3220. Fundamentals of Automotive Engineering
ENVE-4810. Sustainability and Engineering

Bachelor of Engineering Technology (BEngTech) – Biomedical Stream

Degree requirements:

Total courses: 15 courses

Fall Courses

KINE-1800 .Fundamental Mechanics of Human Motion
KINE-2700. Research Design
GENG-3130. Engineering Economics
GENG-3500. Signals and Systems Analysis
GENG-3300. Applied Engineering Mathematics

Winter Courses

ELEC-2170. Digital Logic Design 1
GENG-4500. Artificial Intelligence and Machine Learning
INDE-3020. Health, Safety, and Human Factors
MECH-3221. Control Theory
MECH-3224. Engineering Measurements

Summer Courses

ELEC-4490. Sensor and Vision Systems
MECH-4240. Special Topics in Mechanical Engineering: Biomedical Signal Processing
MECH-4240. Special Topics in Mechanical Engineering: Biomedical Instrumentation and Certification
GENG-4800. Capstone Mechatronics
GENG-4600. Robotics

Courses used to calculate the major average are: All courses taken by the student during this program are included in the student's GPA.

Bachelor of Engineering Technology (BEngTech) - Mechanical Stream

Degree Requirements

Total courses: A minimum 20 courses

Fall Courses

MECH-3212. Thermodynamics
GENG-2220. Probability and Statistics for Engineering
ELEC-2320. Software Fundamentals
MECH-3233. Fluid Mechanics 1 (or CIVL-3510 Fluid Mechanics)
GENG-2500. Engineering and the Environment

Winter Courses

GENG-2180. Mechanics of Deformable Bodies
GENG-2200. Numerical Analysis for Engineering
MECH-2230. Advanced Engineering and Design
GENG-2190. Engineering Materials

1 course from the following list:

INDE-3020 Health, Safety and Human Factors
INDE-3270 Product Quality and Reliability
INDE-3110 CAD/CAM
CIVL-4720 Hydraulics

Summer Courses

MECH-3217. Applied Thermodynamics
MECH-4228. Sustainability in Engineering
MECH-4255. Environmental Effects & Control of Noise
GENG-4210. Engineering and Society

1 course from the following list:

MECH-3224 Engineering Measurements
MECH-4259 Computer Aided Engineering
MECH-4258 Computational Fluid Dynamics
MECH-3670 Aerospace Engineering Fundamentals
MECH-3430 Automotive Engineering Fundamentals
MECH-3830 Materials and their Properties

Fall Courses

GENG-3130. Engineering Economics
INDE-3210. Manufacturing Process Design
MECH-3211. Stress Analysis (or CIVL-3520 Stress Analysis)

2 courses from the following list:

INDE-3150 Product and Process Design
INDE-4280 Facilities Design and Logistics
MECH-2210 Dynamics
MECH-4850 Welding Engineering

Bachelor of Engineering Technology (BEngTech) - Civil Stream

Degree Requirements

Total courses: A minimum 20 courses as follows:

Fall Courses

GENG-2220. Probability and Statistics for Engineering
ELEC-2320. Software Fundamentals
GENG-2500. Engineering and the Environment
CIVL-3510. Fluid Mechanics (or MECH-3233 Fluid Mechanics I)
1 course from the following list:
MECH-2210 Dynamics
NDE-2010 Management and Globalization,
GENG-1110 Engineering Mechanics I

Winter Courses

GENG-2180. Mechanics of Deformable Bodies
CIVL-2200. Civil Engineering Information Systems
CIVL-2190. Materials in Civil and Environmental Eng.
GENG-4210. Engineering and Society
1 course from the following list:
ENVE-3630 Water and Wastewater treatment
NVE-4710. Water Distribution and Wastewater Collection Systems
CIVL-4720 Hydraulics
NDE-3020 Health, Safety, and Human Factors

Summer Courses

GENG-1190. Technical Communication
ENVE-4810. Sustainability in Engineering
MECH-4255. Environmental Effects and Control of Noise
2 courses from the following list:
CIVL-3650 Transportation and Traffic Engineering
CIVL-4820 Planning and Construction Management
CIVL-4810 Highway Design and Construction
ENVE-3620 Air Pollution Control

Fall Courses

GENG-3130. Engineering Economics
CIVL-3520. Stress Analysis
CIVL-3540. Concrete Design
CIVL-3530. Structural Analysis
1 course from the following list:
CIVL-3550 Geotechnical Engineering I
MECH-3220 Fluid Mechanics II

Bachelor of Engineering Technology (BEngTech) – Mechatronics Stream

Degree Requirements

Total courses: 15 courses as follows:

GENG-3130. Engineering Economics
GENG-3300. Applied Engineering Mathematics
GENG-3400. Mechatronic System Design and Project
GENG-3500. Signals and Systems Analysis
GENG-4300. Intelligent and Digital Manufacturing
GENG-4400. Energy Conversion Systems
GENG-4500. Artificial Intelligence and Machine Learning
GENG-4600. Introduction to Robotics
GENG-4800. Capstone Mechatronics
ELEC-4100. Directed studies I (Engineering Project Management)
ELEC-4100. Directed Studies I (Industrial Control Systems)
ELEC-4490. Sensor and Vision Systems
MECH-3221. Control Theory
MECH-3224. Engineering Measurements
MECH-4212. Mechatronics

FACULTY OF ENGINEERING GENERAL COURSES

GENG-1101. Engineering I

Overview of the engineering profession: fields, career development, sustainability, health and safety, relation to society, business and entrepreneurship, ethics, equity, and Canada's Truth and Reconciliation process. Academic integrity, strategies for university success, academic regulations, engineering-related extracurricular activities. Effective oral and written technical communication: informative and persuasive presentations; resumes and job search communications; technical writing and formatting; information gathering and analysis; research documentation and referencing; the use of visual tools such as graphs, figures, and tables; e-portfolios; and technical reports. (Open only to Engineering students.) (3 lecture hours and 1.5 tutorial hours weekly)

GENG-1102. Engineering Graphics

Visualization techniques, graphical communication using sketching, descriptive geometry, and computer-aided design (CAD) for orthographic projection, pictorial drawings, dimensioning, section views, and auxiliary views. Reading engineering drawings. Engineering graphics e-portfolio and CAD project to develop visualization skills and task completion skills. (Open only to Engineering students.) (4.5 hours weekly.)

GENG-1201. Cornerstone Design

The engineering design process: problem formulation, functional requirements and constraints, competitive evaluation and areas of improvement, conceptual design through ideation sketches, selection of design, communication of the design solution, prototype construction, testing, iteration, reporting. Includes group work to develop personal, teamwork, leadership, and task completion skills as

part of the design process. (Prerequisite: GENG- 1102. Open only to Engineering students.) (4.5 hours weekly.)

GENG-1202. Introductory Electrical and Computer Engineering

This course introduces the fundamentals of electrical and computer engineering, including introductory selected topics on circuit elements and analysis, semiconductor devices, optical devices, sensors, electric motors, operational amplifiers, and logic gates. (Open only to students in Engineering)

GENG-1110. Engineering Mechanics I

Statics of particles and rigid bodies; trusses, frames, machines; centroids and centres of gravity; friction. (3 lecture, 2 tutorial hours a week.)

GENG-1180. Engineering and the Profession

The Engineering and the Profession course is an introductory professional course for all Engineering students. The students will be introduced to and learn about various professional and academic topics, and may include but are not limited to: differences and similarities between the various engineering disciplines; academic performance, expectations, and procedures; strategies for academic success; extracurricular student opportunities; important career development issues; academic integrity and ethical considerations; sustainability considerations; and public health and safety responsibilities; and how engineering is broadly related to our society. The fundamentals of technical communications will be introduced, focusing on common technical writing needs, such as grammar, formatting, and style, as well as basic writing forms, such as memos and short documents. Additional topics may include the basics of common engineering measurements, technical principles and approaches, business and legal practices. (3 lectures hours a week.)

GENG-1190. Technical Communications

The Technical Communications course focuses on teaching Engineering students effective oral and written communication techniques and approaches to improve their clarity and comprehensiveness when communicating to a variety of audiences. The topics covered may include but are not limited to: graphical communications, informative presentations; persuasive presentations; the use of visual aids for conveying technical/engineering information when speaking; resumes and job search communications; technical writing styles and formatting; information gathering and analysis; literature research techniques; topic development; summaries and abstracts; the use of visual tools such as graphs, figures, and tables; research documentation and referencing; developing and documenting instructions and procedures; proposals and technical reports. Ethical and legal issues in communications, such as plagiarism, will also be covered. Topics for discussion, assignments, and skills development activities may include issues and aspects taught in GENG-1180 or other relevant subjects. In addition, students will continue to receive periodic communications relevant to their academic and professional development.

GENG-1200. Engineering Thermofluids

Introductory thermodynamics, fluid mechanics, and heat transfer. Terminology and units; sources of and types of energy and their interchange; types of fluid flow and heat transfer; physical and thermal properties of fluids. Solution of basic problems using laws of thermofluids; exploration of common thermofluid systems. Includes demonstrations and laboratory-based experiments. (Prior knowledge from GENG-1110 or PHYS-1400 is recommended.) (3 lecture, 2 tutorial/laboratory hours per week)

GENG-1330. Engineering and Design

Introductory engineering design course. Visualization techniques, graphical communication using sketching, isometric drawings, orthographic projection, section views, auxiliary views and descriptive geometry. Drafting portfolio. Design portfolio consisting of open-ended problems: problem

identification and formulation; analysis of the problem; problem solving techniques; graphical communication of the solution. Includes group work to develop personal, teamwork, leadership, and task completion skills. (3 lecture, 3 laboratory hours a week.)

GENG-1980. Work Term

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course may not be allowed to remain in the Co-op program.)

GENG-2101. Engineering II

This course primarily covers topics in environmental engineering and engineering management, such as: (Introduction to) sustainability, dimensions of contamination, air quality, climate change, water quality, risk, mass balances, energy balances, life cycle assessment (environmental and non-environmental considerations), engineering project management, organizational structure and culture, leadership, management of employees of diverse backgrounds, (introduction to) global supply chain and supply chain management, new product development processes, sustainable development, environmentally conscious design and production, and material selection and process selection with environmental impact considerations. (Prerequisites: CHEM-1103 and GENG-1201.) (3 lecture, 2 laboratory or tutorial hours a week.)

GENG-2102. Programming and Algorithms

Introduction to programming languages and digital computing concepts with emphasis on analyzing fundamental engineering problems using MATLAB. (3 lecture, 2 laboratory or tutorial hours a week.)

GENG-2180. Mechanics of Deformable Bodies

An introduction to stress, strain, and stress-strain relations. Internal stresses and bending moment, and deformation of members subjected to different types of external load including axial load, torsion, transverse load and eccentric load including axial load, torsion, transverse load and eccentric load. An introduction to statically indeterminate problems. (Prerequisites: GENG-1110 and MATH-1720.) (3 lecture hours, 3 laboratory/tutorial hours a week.)

GENG-2190. Engineering Materials Fundamentals

This course explains how the properties of solid materials are derived and are related to their basic crystallographic and electronic structures: Metals, ceramics, polymers, and electronic materials are covered. (3 lecture, 2 laboratory or tutorial hours a week.)

GENG-2200. Numerical Analysis for Engineering

Application of numerical methods to real-world engineering problems. Development of mathematical background for numerical techniques. Root finding; numerical linear algebra; curve fitting; numerical quadrature; numerical solution to ordinary differential equations. (Prerequisite: GENG-2320.) (3 lecture, 2 laboratory or tutorial hours a week.)

GENG 2201 Engineering Design II

This course covers: problem formulation, functional requirements and constraints, competitive evaluation and areas of improvement, conceptual design through ideation sketches, selection of design, communication of the design solution, prototype construction, testing, iteration, reporting. Includes team work to develop personal, partnership, leadership, and task completion skills. (Prerequisite: GENG-1201. Open only to Engineering students.) (6 hours weekly.)

GENG-2220. Probability and Statistics for Engineering

Treatment of engineering data using the concepts of frequency distribution; measures of central tendency and dispersion. Probability; introduction to random processes; random variables; discrete and continuous distributions. Tests of hypotheses; estimation; goodness-of-fit test; linear regression and correlation. Applications using computers in engineering design problems, quality control, and manufacturing processes. (Prerequisite: MATH-1720.) (3 lecture hours, 1 tutorial hour a week.)

GENG-2500. Engineering and the Environment

Introduction to: pollutants, natural cycles, natural energy use, human population and consumption, common environmental problems, effects on human health. Dimensions of environmental contamination and flow. Pollution Prevention: waste audits, mass balances (open and closed systems, with and without chemical change), waste reduction, industrial ecology, and design for the environment. Conversion of energy and efficiency. Energy: world consumption, sources and their potential, environmental effects. Occupational health and safety. Environmental legislation. Sustainability. (Prerequisite: CHEM-1103.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

GENG-2980. Work Term I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course may not be allowed to remain in the Co-op program.) (This is an experiential learning course.)

GENG-3130. Engineering Economics

Cost estimation, cost accounting, and cost control. Comparison of engineering alternatives by annual cost, present worth, and rate of return methods. Depreciation and taxes. Equipment replacement. (3 lecture, 1.5 tutorial hours a week.)

GENG-3201. Engineering Design III

A project-based learning experience where students are exposed to a series of open-ended design projects that will develop both technical and professional skills. The emphasis will be on the engineering design process, which consists of: problem formulation, functional requirements and constraints, conceptual design through CAD, selection of design, communication of the design solution, prototype construction, testing, iteration, and reporting. Includes group work to develop personal, teamwork, leadership, and task completion skills as part of the design process. (Prerequisite: Engineering students only, GENG 2201) (6 hours weekly)

GENG-3300. Applied Engineering Mathematics

This course will cover first-order ordinary differential equations (ODEs), higher-order ODEs with constant coefficients, Cauchy-Euler equations, systems of linear ODEs, Laplace transforms, and applications to science and engineering. Application of ODE for analyzing the first, second, and higher order RLC electrical circuits will be studied. Mechanical system analysis using ODE will be considered as another application. The rest of the course will cover complex numbers and applications in engineering. Specifically, phasor concept and analyzing of the steady state solution of electrical systems is considered as the main application. Then the frequency response will be introduced as the most important application.

GENG-3400. Mechatronic System Design and Project

This course will introduce concepts to integrate mechatronic components such as mechanical, electronic, optical and computer programming. Basic concepts and fundamental principles in mechatronic system-based design for automation, packaging and other applications will be reviewed. Students will develop the knowledge and skills necessary to adopt an interdisciplinary approach to mechatronic system design. The hands-on laboratory activities will assist in developing the skills in designing and troubleshooting integrated mechatronic systems. Students will be organized into teams of three or four students, and each team will be proposing, conceptualizing, designing, building and demonstrating a significant hands-on mechatronic project. Through this course and team project the students will be prepared for the final Capstone Mechatronics.

GENG-3500. Signals and Systems Analysis

Discrete and Continuous-Time Signals and Systems, Discrete and Continuous-Time Linear Time-Invariant Systems, System Analysis in Time Domain, System Analysis in Frequency Domain, Convolution, Differential Equation Models, Fourier series, the Fourier Transform, the Laplace Transform and its Applications, Sampling of Systems.

GENG-3980. Work Term II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course may not be allowed to remain in the Co-op program.) (This is an experiential learning course.)

GENG-4210. Engineering and Society

The technology-society relationship in a historical context; the nature of technological change and its consequences; the engineer's role in the control of technology and sustainable development; the responsibility of engineers for health and safety in the workplace, including OHSA, WHMIS. The development of the engineering profession; professional registration and the code of ethics; the duties and responsibilities of engineers; the engineer and the law. (Restricted to fourth-year students.) (3 lecture hours a week.)

GENG-4300. Intelligent and Digital Manufacturing

Manufacturing methods are shifting towards smart tools that are adaptive and self-aware. This course will introduce concepts and components for intelligent machining tools and interfacing them with digital manufacturing that will create the knowledge of Industry 4.0. Integration of smart sensors and controls, data processing, interconnected machines, digital link between design and production, analysis of manufacturing processes and supply chains will be discussed.

GENG-4400. Energy Conversion Systems

This course covers the fundamental principles of energy conservation processes. Design analysis, and construction of modern electromechanical systems, mechanical transmission systems, measurement of mechanical motion, and implementation of electromechanical coupling. DC and AC machinery fundamentals, electromechanical energy conversion, synchronous and induction motors, motion and controls of electromechanical systems will be discussed. Hands-on lab with modelling and simulation of multi-domain electromechanical systems. The course also introduces the use of modern energy conversion systems which may include conventional combustion based and Rankine power systems,

energy systems for space applications, Autonomous vehicle applications, solar, wind, wave, thermoelectric, and geothermal energy systems.

GENG-4500. Artificial Intelligence and Machine Learning

This course is an introduction to the area of Artificial Intelligence and designing intelligent machines. Artificial intelligence aims to understand thinking and intelligence in ways that enable the construction of computer systems that are able to reason in uncertain environments. Work in AI has supported the development of driverless cars and house-cleaning robots as well as systems that have defeated world chess champions and planned space explorations. The course has three core sections: search, representation, and uncertainty. Each section will provide a thorough understanding of major approaches, representational techniques and core algorithms. Students completing this course will have an in-depth understanding of three core areas of AI and the connections among them, and with such other key AI areas as machine learning, robotics, natural language processing and multi-agent systems.

GENG-4600. Introduction to Robotics

This course is an introduction to robotics modeling, dynamics, and control of robotic manipulators and industrial motion control. Students study Kinematics and Dynamics of Machines and will be exposed to principles of the geometry of motion, Uniform and non-uniform motion, linkage, gears, cams. Students will be exposed to the operation, programming and applications of a typical industrial robot using the actual and simulation tools. Hands-on activities will include manual teach programming, testing with simulation software and programming of advance movements.

GENG-4800. Capstone Mechatronics

A team-based Mechatronics Capstone Project will integrate and realize all the technical skills and hands-on experience the students have acquired throughout their program. Students will be organized into teams of three or four students, each team will be proposing, conceptualizing, designing, building and demonstrating a significant hands-on mechatronic project. Skills deployed during this project include: creative thinking, engineering design, documentation and implementation, team work, presentation, engineering standards and entrepreneurship. (This is an experiential learning course.)

GENG-4830. Engineering Report

The course prepares the students to present a problem, an observation, or idea, and to analyze it logically and draw conclusions or make recommendations. The course content includes acceptable technical content involving engineering analysis, design, development, or research. The course outcome includes generating a report to demonstrate a satisfactory level of writing and graphical skills, thus the quality of the presentation will be a factor in determining the acceptability of the report. The final report should be about 5,000 words long, or 25 double-spaced typewritten pages not including tables and graphs, and includes a signed statement that it was written by the candidate. (Open to BEngTech Majors)

GENG-4980. Work Term III

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course may not be allowed to remain in the Co-op program.) (This is an experiential learning course.)

CIVIL AND ENVIRONMENTAL ENGINEERING

PROGRAMS

Bachelor of Applied Science in Civil Engineering

Civil engineering comprises the conception, design, operation, and maintenance of buildings, railroads, waterways, bridges, harbours, tunnels, water supply and purification systems, sewage collection and treatment facilities, hydraulic structures, and waterpower developments. The Civil Engineering curriculum provides a diversity of applied course work and aids the student in selecting a major field of endeavour as well as a thorough background in the basic sciences and a broad understanding of the social sciences and humanities.

The Civil Engineering program provides modern and comprehensive laboratory facilities in the following fields: Strength of Materials, Soil Mechanics, Hydraulics, Structures, Concrete, Sanitary Engineering, and Surveying. The Canadian Society for Civil Engineering has an active student section on campus.

Note: The baccalaureate degree program in Civil Engineering is accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers.

Degree Requirements

Total Courses: 42 courses (plus 3 work terms for Co-op students)

Year 1 - Fall (Semester 1)

GENG-1101. Engineering 1
GENG-1102. Engineering Graphics
MATH-1720. Differential Calculus
MATH-1270. Linear Algebra (Engineering)
PHYS-1400. Introductory Physics I

Year 1 - Winter (Semester 2)

GENG-1110. Engineering Mechanics I
GENG-1201. Cornerstone Design
GENG 1202. Introductory Electrical and Computer Engineering
MATH-1730. Integral Calculus
CHEM-1103. Topics in General Chemistry

SECOND YEAR

Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses.

Year 2 - Fall Term (Semester 3)

GENG-2101. Engineering II

GENG-2102. Programming and Algorithms
GENG-2180. Mechanics of Deformable Bodies
CIVL-2200. Civil Engineering Information Systems
MATH-2780. Vector Calculus
PHYS-2100. Topics in Physics

Year 2 - Winter Term (Semester 4)

GENG-2220. Probability and Statistics for Engineering
CIVL-2190. Materials in Civil and Environmental Engineering
CIVL-3520. Stress Analysis
ENVE-2200. Environmental Concepts and Applications in Engineering
MATH-2790. Differential Equations
1 course from the approved Faculty of Engineering Complementary Studies List A or B*.

Year 2 - Summer Term (Co-op students only)

GENG-2980. (Work Term I)

THIRD YEAR

Students must have completed all the 1st year courses and at least nine (9) of their 2nd year courses before being allowed to register into the 3rd year courses.

Year 3 - Fall (Semester 5)

GENG-3130. Engineering Economics
CIVL-3510. Fluid Mechanics
CIVL-3530. Structural Analysis
CIVL-3540. Concrete Design
CIVL-3650 Transportation and Traffic Engineering

Year 3 - Winter Term (Co-op students Only)

GENG-3980. Work Term II

Year 3 - Summer (Semester 6)

CIVL-3610. Masonry and Concrete Design
CIVL-3550. Geotechnical Engineering I
CIVL-3640. Structural Steel Design
CIVL-4710. Hydrology

1 course from the following list:

CIVL-3620 Finite Element For Analysis and Design,
CIVL-4940 Transportation Systems Analysis,
CIVL-4950 Building Information Technology,
CIVL-4960 Wood Design,
CIVL-4970 Life Cycle Thinking
ENVE-3630 Water and Wastewater Treatment,
ENVE-4810 Sustainability in Engineering,
ENVE-4820 Hydrogeological Engineering,
ENVE-4811. Climate Change and Infrastructure.

FOURTH YEAR

Students cannot register into any of the 4th year courses until they have completed nine (9) 3rd year Civil Engineering courses and all courses from 1st and 2nd year.

Year 4 – Fall Term (Co-op students only)
GENG-4980. Work Term III

Year 4 - Winter (Semester 7)
CIVL-4000. Capstone Design
ENVE-4710. Water Distribution and Wastewater Collection Systems
CIVL-3630. Geotechnical Engineering II
CIVL-4720. Hydraulics
1 course from the approved Faculty of Engineering Complementary Studies List A or B*.

*Students must take one course from List A and one course from List B.

Year 4 - Summer (Semester 8)
CIVL-4000. Capstone Design
CIVL-4810. Highway Design and Construction
CIVL-4820. Plan and Construction Management

2 courses from the following list:
CIVL-3620 Finite Element For Analysis and Design,
CIVL-4920 Advanced Topics in Structural Design,
CIVL-4940 Transportation Systems Analysis,
CIVL-4950 Building Information Technology,
CIVL-4960 Wood Design,
CIVL-4970 Life Cycle Thinking
ENVE-3630 Water and Wastewater Treatment
ENVE-4810 Sustainability in Engineering
ENVE-4820 Hydrogeological Engineering,
ENVE-4811 Climate Change and Infrastructure

Technical Elective courses offered every year:
CIVL-4920 Advanced Topics in Structural Design
CIVL-4970 Life Cycle Thinking
ENVE-3630 Water and Wastewater Treatment
ENVE-4810 Sustainability in Engineering
ENVE-4820 Hydrogeological Engineering
ENVE-4811 Climate Change and Infrastructure

Technical Elective courses offered every other year:
CIVL-3620 Finite Element For Analysis and Design
CIVL-4940 Transportation Systems Analysis
CIVL-4950 Building Information Technology
CIVL-4960 Wood Design

Bachelor of Applied Science in Environmental Engineering

The program in Environmental Engineering is built upon a broad base of science and mathematics combined with an emphasis on engineering principles and design.

The rapid growth of industrial activities has produced many new problems related to environmental protection, resource conservation, and safety. The public has been aware of the risks involved in handling a wide range of hazardous and toxic materials by major incidents which have occurred in spite of improved design methods and operating techniques to overcome potential problems. Consequently, legislation is being formulated and enacted to control the release of toxic chemicals and pollutants into our environment. Environmental engineers are trained not only to solve problems of immediate concern, but also to develop practices and processes to systematically avoid their occurrence.

Environmental engineers have qualifications which will permit them to focus upon the transport, transformation and removal of contaminants in air, water, and soil, as well as the broader aspects of environmental planning and impact assessment.

Note: The baccalaureate degree program in Environmental Engineering is accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers. With appropriate selection of electives, students would be qualified to apply to medical schools.

Degree Requirements

Total Courses: 42 courses (plus 3 work terms for Co-op students)

Year 1 - Fall (Semester 1)

GENG-1101. Engineering 1
GENG-1102. Engineering Graphics
MATH-1720. Differential Calculus
MATH-1270. Linear Algebra (Engineering)
PHYS-1400. Introductory Physics I

Year 1 - Winter (Semester 2)

GENG-1110. Engineering Mechanics I
GENG-1201. Cornerstone Design
GENG 1202. Introductory Electrical and Computer Engineering
MATH-1730. Integral Calculus
CHEM-1103. Topics in General Chemistry

SECOND YEAR

Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses.

Year 2 - Fall Term (Semester 3)

MATH-2780. Vector Calculus
PHYS-2100. Topics in Physics
GENG-2101. Engineering II
GENG-2102. Programming and Algorithms
GENG-2180. Mechanics of Deformable Bodies
CIVL-2200. Civil Engineering Information Systems

Year 2 - Winter Term (Semester 4)

GENG-2201. Engineering Design 2
GENG-2220. Probability and Statistics for Engineering
ENVE-2200. Environmental Concepts and Applications in Engineering
CIVL-2190. Materials in Civil and Environmental Engineering
MATH-2790. Differential Equations
1 course from the approved Faculty of Engineering Complementary Studies List A or B*.

*Students must take one course from List A and one course from List B.

Year 2 - Summer Term (Co-op students only)
GENG-2980. (Work Term I)

THIRD YEAR

Students must have completed all the 1st year courses and at least nine (9) of their 2nd year courses before being allowed to register into the 3rd year courses.

Year 3 - Fall (Semester 5)
GENG-3130. Engineering Economics
CIVL-3510. Fluid Mechanics
ENVE-3510. Thermodynamics
ENVE-3521. Environmental Chemistry and Microbiology
1 course from the approved Faculty of Engineering Complementary Studies List A or B*.

*Students must take one course from List A and one course from List B.

Year 3 – Winter (Co-op students only.)
GENG-3980. Work Term II

Year 3 - Summer Term (Semester 6)
ENVE-3630. Water/Wastewater Treatment
ENVE-4810. Sustainability in Engineering
CIVL-3550. Geotechnical Engineering I
CIVL-4710. Hydrology
CIVL-4970. Life Cycle Thinking

FOURTH YEAR

Students cannot register into any of the 4th year courses until they have completed nine (9) 3rd year Civil Engineering courses and all courses from 1st and 2nd year.

Year 4 – Fall Term (Co-op students only)
GENG-4980. Work Term III

Year 4 - Winter (Semester 7)
ENVE-4000. Capstone Design
ENVE-4740. Site Assessment and Remediation
ENVE-3620. Air Pollution Control
ENVE-4710. Water Distribution and Wastewater Collection Systems
CIVL-4720. Hydraulics

Year 4 - Summer (Semester 8)

ENVE-4000. Capstone Design
ENVE-4811. Climate Change and Infrastructure
ENVE-4820. Hydrogeological Engineering
CIVL-4820. Planning and Construction Management
1 course from the following list:
MECH-3217. Applied Thermodynamics,
MECH-3228. Heat Transfer,
MECH-4255. Environmental Effects and Control of Noise

Honours Certificate in Environmental Engineering

Admission Requirements

A candidate for the Honours Certificate in Environmental Engineering shall hold the degree of (i) Bachelor of Applied Science (B.A.Sc.); (ii) a four-year B.Sc. (or BCS) degree in Chemistry, Biochemistry, Biotechnology, Earth Sciences or related Science fields. The program can be also taken concurrently by 3rd year and 4th year students at the University of Windsor in Engineering and Science Fields.

Certificate Requirements

Total courses: Eight (8) courses [minimum of 6 upper year courses (Years 3 and 4), and up to 8 if the student has all the pre-requisite, or their equivalent, courses.

(a) eight (8) undergraduate courses, at the 3000 or 4000-level, as listed in the program requirements for the B.A.Sc. in Environmental Engineering. Students with an undergraduate Bachelor of Science degree may take a minimum of two courses at the 2000-level.

NOTES:

The present pre-requisite requirements for 3rd and 4th year courses must be respected. All selected courses should not be from courses, subjects or topics that were part of the applicant's undergraduate studies.

If students from another program are missing pre-requisites courses critical for successful completion of the certificate, they are to choose from appropriate 2nd year courses. A maximum of 2 courses from the pre-requisite courses will count towards the certificate, although more may be necessary depending on the student's background.

To qualify for the certificate, students will be required to successfully complete all 8 courses at the University of Windsor. No transfer credit will be considered for this certificate.

Honours Certificate in Civil Engineering

Admission Requirements

A candidate for the Honours Certificate in Civil Engineering shall hold the degree of (i) Bachelor of Applied Science (B.A.Sc.); (ii) a four-year B.Sc. (or BCS) Science fields degree. The program can also be taken concurrently by the 3rd and 4th years University of Windsor students in Engineering and Science fields.

Certificate Requirements

Total courses: Eight (8) courses [minimum of 6 upper year courses (Years 3 and 4), and up to 8 if the student has all the pre-requisite, or their equivalent, courses].

(a) eight (8) undergraduate courses, at the 3000 or 4000-level, as listed in the program requirements for the BSc in Civil Engineering. Students with an undergraduate Bachelor of Science degree may take a minimum of two courses at the 2000-level.

NOTES:

The present pre-requisite requirements for 3rd and 4th year courses must be respected. All selected courses should not be from courses, subjects or topics that were part of the applicant's undergraduate studies.

If students from another program are missing pre-requisites courses critical for successful completion of the certificate, they are to choose from appropriate 2nd year courses. A maximum of 2 courses from the pre-requisite courses will count towards the certificate, although more may be necessary depending on the student's background.

To qualify for the certificate, students will be required to successfully complete all 8 courses at the University of Windsor. No transfer credit will be considered for this certificate.

Bachelor of Applied Science in Civil Engineering for Graduates of St. Mary's University Diploma of Engineering

Admission Requirements

Graduates of St. Mary's University Diploma of Engineering minimum cumulative average of 60% may be admitted to this degree completion pathway.

Degree Requirements

The total course requirements and course sequence listed are for students who have met the minimum requirement of 60% for each course for which transfer credit has been assessed. Additional courses will need to be taken for students who have not qualified for the maximum allowable transfer credit.

Total courses: 25

YEAR 1

Fall Term

CIVL-3520. Stress Analysis

CIVL-3530. Structural Analysis

CIVL-3540. Concrete Design

CIVL-3550. Geotechnical Engineering I

Winter Term

GART-1510. Effective Writing II

CIVL-2190. Materials in Civil and Environmental Engineering

CIVL-2200. Civil Engineering Information Systems

GENG-2200. Analysis of Engineering Systems

Summer Term

CIVL-3610. Masonry and Concrete Design
CIVL-3620. Finite Element for Analysis and Design
CIVL-3630. Geotechnical Engineering II
CIVL-3640. Structural Steel Design
CIVL-3650. Transportation and Traffic Engineering

Students cannot register into any of the 4th year courses until they have completed nine (9) 3rd year Civil Engineering courses and all courses from 1st and 2nd year.

YEAR 2

Winter Term

CIVL-4000. Capstone Design Project
ENVE-4710. Water Distribution and Wastewater Collection Systems
CIVL-4710. Hydrology
CIVL-4720. Hydraulics
ENVE-3630. Water and Wastewater Treatment
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Summer Term

CIVL-4000. Capstone Design Project
CIVL-4810. Highway Design and Construction
GENG-4210. Engineering and Society
CIVL-4820. Planning and Construction Management
2 courses from CIVL-4920 Advanced Topics in Structural Design, CIVL-4940 Transportation Systems Analysis, ENVE-4810 Sustainability in Engineering, ENVE-4820 Hydrogeological Engineering

Articulation Agreement with St. Clair College, Civil Engineering Technology Program

1. The articulation only applies to the Advanced Diploma in Civil Engineering Technology at St. Clair College.
2. When applicable, the university Challenge Exams must be completed with a 70% or better grade to secure a passing grade.
3. It is the responsibility of the student to arrange a Challenge Exam through the Department of Civil and Environmental Engineering.

Students who have completed the three-year Diploma Program at St. Clair College in Civil Engineering Technology with a cumulative average grade of B (70%) or better may receive credit for up to thirteen specified semester courses provided they have passed the respective college courses with a grade of B (70%) or better.

University challenge exams must be completed with a 70% or better grade to secure a passing grade. It is the responsibility of the student to contact the Department to arrange for the Challenge examination. See department for list of courses.

CIVIL AND ENVIRONMENTAL ENGINEERING COURSES

CIVIL ENGINEERING

- Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses.
- Students must have completed all the 1st year courses and at least nine (9) of their 2nd year courses before being allowed to register into the 3rd year courses.
- Students cannot register into any of the 4th year courses until they have completed nine (9) 3rd year Civil Engineering courses and all courses from 1st and 2nd year.

CIVL-2190. Materials in Civil and Environmental Engineering

Fundamental materials in civil and environmental engineering. Concrete: Portland cement, hydration, mixture design, admixtures, mixing, placing and curing. Masonry: masonry units, mortar, grout, and plaster, types of bond and joints. Timber: Structure and types of wood. Iron and steel: cast iron, wrought iron, steel products, structural steel, reinforcing steel, welded wire fabrics. Wastewater and biosolids, Coagulant and adsorbents. Particulate air pollutants. Solid waste and hazardous waste.

CIVL-2200. Civil Engineering Information Systems

A course in information systems in civil engineering including Surveying, GPS, GIS and Graphic communication. Surveying: Distance measurements; Leveling theory of differential leveling, curvature and refraction, types of surveying levels, leveling rods, benchmark leveling, profile and cross-section leveling; Angles and Theodolites: reference directions for vertical angles, meridians, horizontal angles, Total Station: reference directions for vertical angles, meridians, horizontal angles; Transverses Survey and Computations: balancing field angles, meridians, bearings, azimuths, latitude departures; Curves: circular curves, vertical curves, spiral curves. Introduction to GPS and GIS; applications of GIS and GPS in surveying. Graphic communication using AutoCAD. (3 lecture, 3 laboratory hours a week.)

CIVL-3510. Fluid Mechanics

Continuity, energy, momentum concepts. Boundary layers. Pipe flow including network installations. Rotodynamic pumps, system curves. Irrotational flow, flownets. Introduction to open channel flow: specific energy, flow regimes; uniform, (Prerequisite: PHYS-2100 and MATH-2790.) (3 lecture, 2 laboratory hours a week.)

CIVL-3520. Stress Analysis

Distribution of internal loading in structural members; Deflection of beams; Moment areas theorems; Virtual work; Castigliano's theorems; Maxwell-Betti reciprocal theorem; Buckling of columns; and Application of Energy methods in simple determinate structures. (Prerequisite: GENG-2180) (3 lecture and 2 laboratory/tutorial hours a week.)

CIVL-3530. Structural Analysis

Stability and determinacy of trusses and frames; analysis of statically determinate trusses and frames; influence lines and moving loads. Statically indeterminate structures; force method; displacement method. (Prerequisite: CIVL-3520.) (3 lecture, 2 laboratory hours a week.)

CIVL-3540. Concrete Design

Mechanics and behaviour of reinforced concrete components. Analysis and ultimate strength design of reinforced concrete beams and one-way slabs. Design for serviceability. Design for columns. Laboratory work includes design and testing of a concrete beam. (Prerequisite: GENG-2180) (3 lecture, 2 laboratory hours a week.)

CIVL-3550. Geotechnical Engineering I

Index properties of soils. Soil structure and classification of soils. Soil compaction and stabilization. Hydraulic principles of flow through soils, flow nets. Frost action in soils. Effective stresses. Compressibility, consolidation, and settlement analysis. Shear strength of soil. Kinematics and Stress distribution in soil. Stress analysis and stability of slopes (Prerequisite: GENG-2180.) (3 lecture, 3 laboratory hours a week.)

CIVL-3610. Masonry and Concrete Design

Analysis and design of columns, two-way slabs, and footings. Design of reinforced concrete bearing walls and retaining walls. Design of masonry units for axial, flexure, and combined loads; Design of masonry beams, flexural and load bearing walls; columns, and pilasters; (Prerequisite: CIVL-3520 and CIVL-3540) (3 lecture, 2 laboratory hours a week.)

CIVL-3620. Finite Element for Analysis and Design

Limit state design concepts; load factors and combinations; load specifications for structural design calculations. Introduction to the finite element method; computer-aided analysis of structures. (Prerequisite: CIVL-3530) (3 lecture, 2 tutorial hours a week.)

CIVL-3630. Geotechnical Engineering II

Earth pressure and design of retaining walls. Sheet-pile walls, braced and tie back excavations. Combined pressures. Soil bearing capacity. Soil exploration. Load induced pressures and settlements. Footings and eccentrically loaded foundations. Raft and pile foundations. Piles and pile driving, cofferdams and caissons. (Prerequisites: CIVL-3550) (3 lecture, 3 laboratory hours a week.)

CIVL-3640. Structural Steel Design

Design of structural steel components subjected to axial tension and compression forces, shear force, bending moment, and combined bending and compression; Design of simple bolted and welded connections; Computer-aided design of steel structures. (Prerequisite: CIVL-3520.) (3 lecture, 2 tutorial hours a week.)

CIVL-3650. Transportation and Traffic Engineering

Characteristics of transportation systems; rail, highway, airway, waterway, and pipeline, urban transportation planning, analysis and prediction, traffic impacts studies, highway and intersection capacity, characteristics of traffic flow, traffic control principles, queuing theory. (3 lecture, 2 laboratory hours a week.)

CIVL-4000. Capstone Design Project

A significant design experience which is based on knowledge and skills acquired in earlier course work. Engineering design integrates mathematics, basic science, engineering sciences and complementary studies in developing elements, systems and processes to meet specific needs while considering economic, health, safety, environmental, social or other pertinent factors. It involves a creative, iterative, and open-ended process. Written and oral reports are required. Topics include: professional registration and the code of ethics; the duties and responsibilities of engineers; the engineer and the law. (Prerequisite: consent of the supervisor and Department Head.) (2 hours lecture and 4 hours lab/week) (2 semester course) (This is an experiential learning course.)

CIVL-4710. Hydrology

Hydrologic Cycle, Weather. Precipitation: intensity, frequency, duration; Point and area estimates of precipitation; rational methods. Hydrologic abstractions. Runoff: storms, conceptual models, unit hydrograph principles, inflow design hydrograph. Streamflow: gauging, stage-discharge. Channel and Reservoir flood routing. Snowmelt. basics of hydrologic modeling; Probability applications and frequency analysis of precipitation and floods. Groundwater flow and water wells. Hydrologic design of urban and highway structures (Prerequisites: GENG-2220 and CIVL-3510 or consent of the instructor/ Department Head.) (3 lecture, 2 laboratory hours a week.)

CIVL-4720. Hydraulics

Review of basic concepts. Gradually and rapidly varied flows; surface profiles. Design of open channels with non-erodible and erodible beds; steady gradually varied flow computations in prismatic and non-prismatic channels; computer methods including HEC2. Design of hydraulic structures including gravity and arch dams, spillways, and outlet structures. (Prerequisite: CIVL-3510.) (3 lecture, 2 laboratory hours a week.)

CIVL-4810. Highway Design and Construction

Geometric design of highways and at-grade intersections; horizontal and vertical alignments, Cross-section elements, drainage; highway soil engineering including soil stabilization; bituminous materials; rigid and flexible pavement design; construction of pavements. (Prerequisite: GENG-2180 or CIVL-3520.) (3 lecture, 2 laboratory hours a week.)

CIVL-4820. Planning and Construction Management

The planning portion of this course will cover the elements of proper urban planning, the Planning Act, official plans, zoning by-laws, and subdivision design guidelines. The construction management portion will cover construction industry characteristics; types of business ownerships; organizational structures; drawings and specifications; estimating and bidding; types of construction contracts; insurance, bonding and claims; financial considerations; project cost controls and scheduling; project planning and administration; computer applications in construction industry, quality assurance, and construction safety. (3 lecture, 2 tutorial hours a week.)

CIVL-4950. Building Information Modelling

Practical and theoretical applications of building information modeling (BIM) in civil engineering projects. BIM standards (ISO 19650), BIM software for buildings (e.g., Revit), and BIM-based analysis (e.g., solar analysis, structural analysis, and energy analysis). Project management with the aid of BIM. (Prerequisites: CIVL-2200.) (3 lecture hours, 1.5 tutorial/laboratory hours weekly.)

CIVL-4960. Wood Design

Introduction to structural wood design based on CSA O86. Wood as an engineering material; sawn lumber; structural panels; connections; lateral-load resisting systems; glulam; and cross laminated timber. (Prerequisites: CIVL-3520.) (3 lecture hours, 1.5 tutorial/laboratory hours weekly.)

CIVL-4970. Life Cycle Thinking

Life-cycle assessment, life-cycle cost (LCC) analysis, systems thinking and system dynamic modelling. Greenhouse gas emission estimation. Social life-cycle analysis (S-LCA), stakeholder communication. Decision making. (Prerequisites: ENVE-2200.) (3 lecture hours, 1.5 tutorial/laboratory hours weekly.)

APPROVED CIVIL ENGINEERING COURSES TO FULFILL NON-SPECIFIED ENGINEERING COURSE REQUIREMENTS

CIVL-4920. Advanced Topics in Structural Design

Design of plate girders and composite structures. Introduction to prestressed concrete and wood design. (Prerequisite: CIVL-3610 and CIVL-3640.) (3 lecture, 2 tutorial hours a week.)

CIVL-4940. Transportation Systems Analysis

Socio-economic impacts on transportation, four-stage demand modeling system, use of models in transportation planning and forecasting, data and space issues, regression and discrete choice models; choice of modes, destinations and routes, passenger and freight travel, introduction to land use modeling. (Prerequisite: CIVL-3650) (3 lecture, 2 laboratory hours a week.)

ENVIRONMENTAL ENGINEERING

- Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses.
- Students must have completed all the 1st year courses and at least nine (9) of their 2nd year courses before being allowed to register into the 3rd year courses.
- Students cannot register into any of the 4th year courses until they have completed nine (9) 3rd year Environmental Engineering courses and all courses from 1st and 2nd year.

ENVE-2200. Environmental Concepts and Applications in Engineering

Environmental quality objectives, standards and guidelines. Material balance techniques as applied to environmental processes. Introduction to environmental pollution control methods. (Prerequisites: GENG-2101.) (3 lecture hours, 3 tutorial/laboratory hours weekly.)

ENVE-3510. Thermodynamics

Real gas behaviour and equations of state. The First and Second Laws of Thermodynamics and their applications. (3 lecture hours, 2 tutorial hours a week.)

ENVE-3521. Environmental Chemistry and Microbiology

Principles of water, soil and air sampling. Instrumental methods of analysis for organic and inorganic contaminants. Resolution, accuracy, precision, statistical treatment of data, sensitivity, calibration and control of error. Microbial occurrence, detection, growth, and survival in the environment. (Prerequisites: ENVE-2200.) (3 lecture hours, 3 tutorial/ laboratory hours weekly.)

ENVE-3620. Air Pollution Control

Regulations and methods of source testing and monitoring. Nomenclature of organic compounds. Dispersion modelling. Air pollution control methods, designs, and their relative effectiveness. (Prerequisite: GENG-2101) (3 lecture, 2 lab/tutorial hours per week.)

ENVE-3630. Water and Wastewater Treatment

Water and wastewater quality, guidelines and standards, flow fluctuation and design capacity. Design of different unit operations and processes in water and wastewater treatment. (Prerequisites: ENVE-2200 and a course in fluid mechanics or hydraulics.) (3 lecture, 3 laboratory hours a week.)

ENVE-4000. Capstone Design Project

A significant design experience which is based on knowledge and skills acquired in earlier course work. Engineering design integrates mathematics, basic science, engineering sciences and complementary studies in developing elements, systems and processes to meet specific needs while considering economic, health, safety, environmental, social or other pertinent factors. Written and oral reports are required. Topics include: professional registration and the code of ethics; the duties and responsibilities of engineers; the engineer and the law. (Prerequisite: consent of the supervisor and Department Head.) (2 lecture, 4 lab/tutorial hours per week (2 terms). (This is an experiential learning course.)

ENVE-4710. Water Distribution and Wastewater Collection Systems

Quantities of water and wastewater; development of surface and groundwater sources; design, construction, and maintenance of water distribution systems; design, construction, and maintenance of wastewater collection systems. (Prerequisite: CIVL-3510 Fluid Mechanics or equivalent.) (3 lecture, 2 tutorial/laboratory hours a week).

ENVE-4740. Site Assessment and Remediation

Transport and fate of contaminants. Introduction to regulatory, engineering and management aspects of site assessments and restoration. Monitoring and sampling strategies and techniques. Engineered solutions for site remediation. (Prerequisites: ENVE-3521.) (3 lecture hours, 1.5 tutorial/ laboratory hours weekly.)

ENVE-4810. Sustainability in Engineering

Environmental impact assessment. Biophysical and socioeconomic impacts from engineering activities, processes, and projects. Human health and environmental risk concepts. Introduction to corporate/industrial environmental management, and environmental management systems. Waste reduction, reuse, and recycling, and reclamation. (3 lecture, 2 tutorial hours a week.) (Credit may only be obtained for one of MECH-4228, or ENVE-4810).

ENVE-4811. Climate Change and Infrastructure

Climate change adaptation and mitigation measures. Engineering risk management. Resilience, systems thinking applied to engineered systems. (Prerequisites: ENVE-2200) (3 lecture hours, 1.5 tutorial/laboratory hours weekly)

ENVE-4820. Hydrogeological Engineering

Fundamental physics and properties of groundwater flow in porous geologic material; anisotropy, heterogeneity. Introduction to the theory of groundwater flow; groundwater flow equations and patterns, recharge and discharge, flow nets, aquifer pumping, two-phase flow and well hydraulics. Aquifer development and management. Introduction to chemical hydrogeology and non-aqueous phase liquids, Wellhead protection. Numerical modeling concepts. (Prerequisites: MATH-1720, MATH-1730, CIVL-3510 and CIVL-4710, or consent of instructor.) (3 lecture, 2 laboratory hours a week.)

ELECTRICAL AND COMPUTER ENGINEERING

Program Regulations and Information

Electrical Engineering encompasses a large number of exciting and diverse areas of study. Areas such as: electronics, computer systems and networks; communications; energy systems; computer-aided design; control systems, robotics and multimedia are only a few of the directions that Electrical Engineering students can choose after graduation. The program of study includes Co-operative work terms for qualified students that are designed to enhance the knowledge and professionalism of the student.

The program of study encompasses courses outside Electrical Engineering and provides a professional education sufficiently fundamental in nature so as to allow the student to choose his or her specific area of professional specialization after graduation. This philosophy of education recognizes that the professional responsibilities of graduate engineers evolve throughout their careers. Student may select from the list of approved courses from within Engineering during the fourth year so as to meet their needs more effectively.

Graduates of this program are able to engage, from the outset of their career, in decision making with a much broader perspective than is possible when excessive specialization at the undergraduate level is permitted. The program of study also provides excellent preparation for those students who may wish to continue their formal education with graduate study and research.

Students must participate in a fourth-year team-based capstone design project that develops leadership skills and professional maturity. Students are encouraged to participate in seminars and in other professional development activities as organized by the Department, as well as off-campus professional activities. The Institute of Electrical and Electronics Engineers (IEEE) has an active student chapter on campus which includes a Women in Engineering Affinity Group (WIE).

Note: The baccalaureate degree program in Electrical Engineering is accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers.

PROGRAMS

Bachelor of Applied Science in Electrical Engineering

Bachelor of Applied Science - Electrical Engineering

Year 1 - Fall Term (Semester 1)

GENG-1101. Engineering 1
GENG-1102. Engineering Graphics
MATH-1720. Differential Calculus
MATH-1270. Linear Algebra (Engineering)
PHYS-1400. Introductory Physics I

Year 1 - Winter Term (Semester 2)

GENG-1201. Cornerstone Design
GENG-1110. Engineering Mechanics I
GENG-1202. Introductory Electrical and Computer Engineering
MATH-1730. Integral Calculus
CHEM-1103. Topics in General Chemistry

Year 2 - Fall Term (Semester 3)

GENG-2101. Engineering 2
MATH-2780. Vector Calculus
PHYS-2100. Topics in Physics
ELEC-2141 Circuit Analysis I
ELEC-2240. Signals and Systems
MATH-2790. Differential Equations

Year 2 - Winter Term (Semester 4)

ELEC-2320. Software Fundamentals
GENG-2220. Probability and Statistics for Engineering
ELEC-2170. Digital Logic Design
ELEC-2260. Electronics I
ELEC-2200. Circuit Analysis II
ELEC-2280. Electromagnetic Fields

Summer Term - Co-op students only

GENG-2980. Work Term I

Year 3 - Fall Term (Semester 5)

GENG-3130. Engineering Economics
ELEC-3000. Engineering Design
ELEC-3130. Electromech. Systems
ELEC-3160. Electronics II
ELEC-3270. Microprocessors
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Year 3-Winter Term - Co-op students only

GENG-3980. Work Term II

Year 3 - Summer Term (Semester 6)

ELEC-3030. Physical Electronics

ELEC-3040. Embedded System Design

ELEC-3240. Control Systems I

ELEC-3290. Analog Comm.

ELEC-3010. Computer Aided Analysis

Year 4 – Fall Term - Co-op students only

GENG-4980. Work Term III

Year 4 - Winter Term (Semester 7)

Core Subjects - All Students

ELEC-4000. Capstone Design A (+ ethics lectures)

ELEC-4310. Control Systems II

ELEC-4570. Fundamentals of Digital Signal Processing

1 course from the approved Faculty of Engineering Complementary Studies List A or B*.

*Students must take one course from List A and one course from List B.

1 or 2 courses from

ELEC-4190. Digital Communications,

ELEC-4350. Microelectromech. Systems,

ELEC4360. Computer Communications,

ELEC-4370. Intelligent Computing,

ELEC-4440. Analog Int. Circuit Design,

ELEC-4450. Power Electronics,

ELEC-4490. Sensor and Vision Systems,

ELEC-4500. Power Systems I

[Students opting for the Integrated BAsC/MASc program will need to register in two graduate courses spread over the Winter-Summer terms (one graduate course per term). Admission requirements for the Integrated BAsC/MASc are shown in the third year course sequence.]

Year 4 - Summer Term (Semester 8)

Core Subjects - All Students

ELEC-4000. Capstone Design B (+ law lectures)

ELEC-4320. EM waves and Rad. Sys. II

2 or 3 courses from

ELEC-4330. Digital Integrated Circuits,

ELEC-4340. Automotive Electronics

ELEC-4380. Coding and Info. Theory

ELEC-4390. Multimedia Systems

ELEC-4400. Wireless Communications

ELEC-4470. Comp. Networks and Security

ELEC-4480. Digital Comp. Arch

ELEC-4600. Power Systems II

[For the students who are registered in the Integrated BAsc/MAsc program see the conditions outlined in the 4th year Winter semester.

Taking courses out of sequence can be allowed for special cases transfers, advanced credit, etc. at the discretion of the Department Head.

The above changes are being made to the BAsc Electrical Engineering program and should be reflected in the Engineering section of the calendar.

Honours Certificate in Electrical Engineering

Admission Requirements

A candidate for the Honours Certificate in Electrical Engineering shall hold the degree of Bachelor of Applied Science (B.A.Sc.) or a four-year B.Sc. (or BCS) degree in Computer Science or in Physics.

Certificate Requirements

Total courses: eight

- a) a minimum of 6 courses from:
- ELEC-4190. Digital Communications
 - ELEC-4330. Digital Integrated Circuits
 - ELEC-4340. Automotive Electronics
 - ELEC-4350. Microelectromechanical Systems
 - ELEC-4360. Computer Communications
 - ELEC-4370. Intelligent Computing
 - ELEC-4380. Coding and Info. Theory
 - ELEC-4390. Multimedia Systems
 - ELEC-4400. Wireless Communications
 - ELEC-3040. Embedded Sys. Design
 - ELEC-4440. Analog Int. Circuit Design
 - ELEC-4450. Power Electronics
 - ELEC-4470. Computer Networks and Security
 - ELEC-4480. Digital Comp. Arch.,
 - ELEC-4490. Automotive Sensors
 - ELEC-4500. Power Systems I
 - ELEC-4600. Power Systems II.

b) a maximum of 2 courses from our 3rd year and

(c) a maximum of 1 course from 2nd year

All selected courses should not be from courses, subjects or topics that were part of the applicant's undergraduate studies.

To qualify for the certificate, students will be required to successfully complete all 8 courses at the University of Windsor. No transfer credit will be considered for this certificate.

ELECTRICAL AND COMPUTER ENGINEERING COURSES

Students must have completed at least nine (9) of their 1st year courses before being allowed to register into the 2nd year courses including all pre-requisite courses required for registration into the 2nd year courses.

Note: Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses including all pre-requisite courses required for registration into the 2nd year courses.

ELEC-2141. Electrical and Computing Fundamentals

Basic components of electric circuits; circuit laws and theorems; circuit analysis techniques; energy-storage elements; transient response of first and second-order circuits. (3 lecture, 3.0 laboratory/tutorial hours a week.) (Credit cannot be obtained for both GENG-2340 and ELEC-2141).

ELEC-2170. Digital Logic Design

Boolean algebra and logic gates; simplification of Boolean functions; arithmetic operations; analysis and design of combinatorial logic circuits with SSI, MSI, and LSI; sequential logic components; registers; counters and memory units; analysis and synthesis of sequential synchronous and asynchronous networks. (Co-requisites: MATH-2780 and MATH-2790) (3 lecture, 2 Laboratory/tutorial hours or equivalent a week.)

ELEC-2200. Circuit Analysis II

Sinusoidal steady-state analysis; complex power in single and three-phase systems; magnetically coupled circuits; circuit analysis in the s-domain; frequency response; two-port networks; and computer-aided analysis and design. (3 lecture, 3.0 laboratory/tutorial hours a week.) (Prerequisite: ELEC-2141.)

ELEC-2240. Signals and Systems

Discrete and Continuous-Time Signals and Systems, Discrete and Continuous-Time Linear Time-Invariant Systems, System Analysis in Time Domain, System Analysis in Frequency Domain, Convolution, Differential Equation Models, Fourier series, the Fourier Transform, the Laplace Transform and its Applications, Sampling of Systems. (Prerequisites: MATH-2780 and MATH-2790) (3 lecture, 1.5 laboratory hours and 1.5 tutorial hours a week.)

ELEC-2260. Electronics I

Classification of signals; introduction to diodes; rectifier circuits, Zener diode, limiting and clamping circuits; Op amp amplifier configurations, Op amp distortion, non ideal op amp performance; active filters, Tow-Thomas Biquad; Introduction to data converters; oscillators; super-diodes; pulse generation. (Prerequisites: MATH-2780 and MATH-2790) (3 lecture, 1.5 laboratory hours and 1.5 tutorial hours a week.)

ELEC-2280. Electromagnetic Fields

Static electric fields; Coulomb's law, Gauss's law and its applications; electric potential; dielectrics; boundary conditions; capacitance; resistance; steady electric currents, current density, boundary condition for current density, equation of continuity and Kirchhoff's law; power dissipation; static magnetic fields; Biot-Savart's law, Ampere's law; vector magnetic potential; magnetic dipole; magnetic circuits; boundary conditions for magnetic fields; magnetic forces and torque; induction current.

(Prerequisites: MATH-2780 and MATH-2790) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-2320. Software Fundamentals

This course covers basics of programming with C++ and topics include: Introduction to C++ Programming, Control Statements, Functions, Recursion, Arrays and Vectors, Pointers, Object-Oriented Programming, Classes, Operator Overloading, Templates, Inheritance, Polymorphism and File Processing (3 lecture, 2 lab/tutorial hours a week).

Note: Students must have completed all the 1st year courses and at least ten (10) of their 2nd year courses before being allowed to register in the 3rd year courses, including all pre-requisite courses required for registration in the 3rd year courses.

ELEC-3000. Engineering Design

This course is based on one or more electrical engineering design projects. It involves designing electrical engineering sub-systems used in real world applications. All the knowledge and skills acquired in the second-year electrical engineering courses will be required to complete the design projects. The students will work in teams of 2 or 3 members to complete the projects. (Prerequisites: completion of all 2nd year electrical engineering courses) (1.5 lecture, 3 laboratory/tutorial hours or equivalent a week.)

ELEC-3010. Computer-Aided Analysis

Introduction to numerical algorithms; fundamental to scientific computation; equation solving; function approximation; integration; difference and differential equations; special computer techniques; Emphasis is placed on efficient use of computers to optimize speed and accuracy in numerical computations; extensive digital computer usage for algorithm verification. Labs will introduce MATLAB to solve numerical problems. (Prerequisites: MATH-2780 and MATH-2790) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-3030. Physical Electronics

This course covers crystal structures, properties of semiconductor materials, Schrodinger wave equation, energy band theory, intrinsic and extrinsic semiconductors, charge carriers in semiconductors, thermal equilibrium carrier concentrations, carrier transport mechanisms, non-equilibrium excess carriers in semiconductors, Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFET), and Bipolar Junction Transistors (BJT). (Prerequisites: MATH-2780 and MATH-2790) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-3040. Embedded System Design

Embedded hardware and software systems; introduction to embedded systems; custom single-purpose processors, hardware design; general-purpose processors, software, design flow environment and tools, testing and debugging; standard single-purpose processors, peripherals, memory system design; interfacing issues, serial and parallel communication, bus standards, protocols and arbitration; exercises on real world applications; Laboratory implementation on modern Field Programmable Gate Arrays (FPGAs) and microcontrollers using associated Electronic Design Automation (EDA) tools. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 3 laboratory hours a week.)

ELEC-3130. Electromechanical Systems

Machinery principles; transformers; AC machinery fundamentals; synchronous generators; synchronous and induction motors; DC machinery fundamentals; DC motors; electromechanical energy conversion;

three-phase concepts; special-purpose motors. (Prerequisites: MATH-2780, MATH-2790, ELEC-3030.) (3 lecture, 2 laboratory hours or equivalent a week.)

ELEC-3160. Electronics II

Analog amplification; small-signal modeling of analog circuits; differential-amplifier topology; BJT, MOSFET and JFET differential amplifiers; frequency response and time-dependent circuit behavior; feedback and stability; multistage and power amplifiers; active filters and oscillators; use of CAD in modern transistor circuit design. (Prerequisites: MATH-2780, MATH-2790 and ELEC-2260.) (3 lecture, 1.5 laboratory hours and 1 hour tutorial.)

ELEC-3240. Control Systems I

Transfer function and state-space model for linear time-invariant systems; linearization of nonlinear systems; controllability and observability; transient performance; stability; tracking performance; Proportional-Integral-Derivative (PID) control design; frequency response and root locus (Prerequisites: MATH-2780, MATH-2790, ELEC-3130.) (3 lecture, 1.5 laboratory hours and 1.5 tutorial hours a week.)

ELEC-3270. Microprocessors

Microprocessor systems (8 and 16 bit) and architecture; data representations, arithmetic units; memory structures; complex instruction set; accumulator, index, and memory reference instructions; addressing modes; stacks, subroutines, and other instructions; interrupts and timing; interfacing I/O devices and data converters; software development systems and assemblers; code implementation on microcontrollers. (Prerequisites: MATH-2780, MATH-2790, ELEC-2170, ELEC-3160 and ELEC-3300.) (3 lecture, 3 laboratory/tutorial hours or equivalent a week.)

ELEC-3290. Analog Communications

Analog communication systems; information measure; signals and noise; Fourier transform and spectra; bandwidth of signals; analog modulation and demodulation systems; AM, FM, TV transmitters and receivers, detector circuits. (Prerequisites: MATH-2780, MATH-2790 and ELEC-3160.) (3 lecture, 1.5 laboratory hours and 1.5 tutorial hours a week.)

ELEC-3300. Digital Logic Design II

Contemporary digital system design; programmable logic; device architectures; reconfigurable computing; design entry methods; VHDL (Hardware Description Language); Electronic Design Automation (EDA) tools; combinational and sequential logic design, implementation using programmable logic devices. (Prerequisites: MATH-2780, MATH-2790 and ELEC-2170.) (3 lecture, 3 laboratory/tutorial hours or equivalent a week.)

Note: Students cannot register in any of the 4th year courses until all Electrical Engineering courses from 1st, 2nd and 3rd year have been completed.

ELEC-4000. Capstone Design Project

Team based design project satisfying the "CAPSTONE DESIGN PROJECT REQUIREMENTS", available from the Department of Electrical and Computer Engineering. Gives the student significant design experience and builds on the knowledge and skills acquired in earlier course work. Provides an exposure to teamwork so as to emulate a typical professional design environment. Computers are to be used both in the execution of the design methodology and the management of the design project. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (2 lecture/4 laboratory hours per week; that must be completed over two consecutive winter and summer terms.) 2 semester course. Topics on ethics for engineers will be covered in the winter term, and topics on laws for engineers will be covered in the summer term during lectures. (This is an experiential learning course.)

ELEC-4100. Directed Study I

The objective of this course is to provide an opportunity for the exceptional fourth-year student with a demonstrated record of scholarship to work in close accord with a faculty member on a project of mutual interest. A written report and oral presentation are required for evaluation by the Department. A Directed Study course may be taken by an eligible student in place of a fourth-year unspecified course. (Prerequisite: an 11.0 GPA or better in the third year and permission of the Department Head.) (For the purposes of assigning grades and determining averages, 3 lecture hours per week have been allocated to the course.)

ELEC-4190. Digital Communications

Digital communication systems; discrete Fourier transform; sampling theory; A/D converters; digital modulation; time-division multiplexing; packet transmission; random processes and spectral analysis for digital systems; error probabilities; noise; introduction to information theory. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4200. Directed Study II

The objective of this course is to provide an opportunity for the exceptional fourth-year student with a demonstrated record of scholarship to work in close accord with a faculty member on a project of mutual interest. A written report and oral presentation are required for evaluation. A Directed Study course may be taken by an eligible student in place of a fourth-year general option course. (Prerequisite: an 11.0 GPA or better in the third year and permission of the Department Head.) (For the purposes of assigning grades and determining averages, 3 lecture hours per week have been allocated to the course.)

ELEC-4310. Control Systems II

Stability and performance analysis in frequency domain; lead-lag control design in frequency domain; elementary observer and control design in state space; z- transformation and z-plane analysis; direct and indirect discrete-time control design; implementation of digital control. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 1.5 laboratory hours and 1.5 tutorial hours a week.)

ELEC-4320. EM Waves and Radiating Systems

Maxwell equations; time varying potentials; time harmonic fields; electromagnetic wave propagation; wave polarization; power and Poynting vector; transmission lines; Smith chart; rectangular waveguides; waveguide current and mode excitation; dipole antenna; small loop antennas; antenna characteristics; antenna arrays. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 tutorial hours a week.)

ELEC-4330. Digital Integrated Circuit Design

Physics and modelling of MOSFETs; fabrication and layout of CMOS integrated circuits; the CMOS inverter: analysis and design; switching properties of MOSFETs; static logic gates; transmission gate logic circuits; dynamic logic circuit concepts; CMOS dynamic logic families; CMOS differential logic families; design methodologies and CAD tools; deep-submicron implementations. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4340. Automotive Electronics

Proportional-Integral-Derivative (PID) controllers and limit cycle controllers; fundamentals of digital control of Spark-Ignition (SI) engine; MPC555 Motorola Power PC/dSPACE based SI engine control

system; Motronic engine management system; automotive sensors and actuators; vehicle motion control including Antilock Braking System (ABS); Controller Area Network (CAN); Time-Triggered CAN (TTCAN); FlexRay. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4350. Microelectromechanical Systems

MicroElectroMechanical System (MEMS) technology overview and design process; microfabrication and process integration; lumped element modeling; 3-D finite element modeling; energy conserving transducers (electrostatics); linear and nonlinear system dynamics; elasticity, stress, strain, material properties; structure analysis, beams, plates; MEMS sensing and actuation; material case studies; MEMS design methodology; device modeling. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4360. Computer Communications

Protocols and architecture; data transmission; data encoding; interfacing; data link control; multiplexing, ISO reference model; wide-area networks; circuit switching; packet switching; ATM and frame relay; LAN technology and systems; internet protocols; inter-network operation; transport protocols; network security. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4370. Intelligent Computing

Computing models of the human mind. Neural computing models and learning algorithms. Fuzzy set theory and fuzzy systems. Evolutionary computing. Applications of intelligent computing. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year in an Engineering program or fourth year standing in a Computer Science program.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4380. Coding and Information Theory

Abstract algebra, number theory and complexity theory; simple cryptosystems; Shannon's theory; entropy and information theory; data encryption standard, RSA system and factoring; public-key cryptosystems; signature schemes; hash functions; key distribution and key agreement; identification schemes; authentication codes; access structures and general secret sharing; pseudo-random number generation; zero-knowledge proofs (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4390. Multimedia Systems

Multimedia signals: Audio fundamentals; the Human visual system and perception; multimedia data acquisition. Multimedia signal compression: Transforms and subband decomposition; text representation; digital text, audio, image, and video compression. Multimedia signal processing: Digital audio, image, and video processing. Multimedia systems. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4400. Wireless Communications

Introduction to wireless communications; cellular system design fundamentals; propagation path loss; fading and multi-path propagation; modulation techniques; diversity; coding and equalization; speech coding for wireless communications; multiple access networking, wireless communications protocols; satellite communication systems. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4440. Analog Integrated Circuit Design

Bipolar and Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFET) technology; device characterization; analog circuit modelling; current sinks, sources, and mirrors; differential pairs; current and voltage amplifiers; differential amplifiers; comparators; operational amplifiers; A/D and D/A converters; Integrated Circuit (IC) implementation with Electronic Design Automation (EDA) tools.

(Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 3 laboratory/tutorial hours or equivalent a week.)

ELEC-4450. Power Electronics

Power diodes; thyristors; power Metal-Oxide-Semiconductor Field-Effect Transistors (MOSFET); Insulated-Gate Bipolar Transistors (IGBT); controlled rectifiers; DC-DC converters; inverters; AC-AC converters; gate drive circuits; motor drives; r computer simulation of power electronics and motor drives. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4470. Computer Networks Security

Introduction to computer networks security; cryptography; public-key and secret key encryption; encryption algorithms; network security mechanisms and techniques; security protocols; authentication and network security services; traditional and emerging Information Technology (IT) security; cyber-security. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4480. Digital Computer Architecture

Computer Organization and architecture (32 bit); computer abstraction; reduced instruction set; high level to assembler level language translation; pipelined instruction set architectures; speculation and branch prediction; instruction level parallelism; memory hierarchies, and virtual memory; secondary storage and I/O; multithreading, multicore, multiple CPU, and clustering; Graphics Processing Unit (GPU). (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 3 laboratory/tutorial hours a week.)

ELEC-4490. Sensor and Vision Systems

Basics of sensors and transducers; sensor characteristics and applications; fundamentals of pressure, temperature, displacement and position sensors; accelerometer physics, strain gauges, and torque sensors; machine vision; image processing, image enhancement, edge and corner detectors; image segmentation techniques; image feature extraction and matching; colour models and processing; object recognition and classification; discussion on camera parameters and calibration; stereo vision, 3D range imaging techniques. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours a week.)

ELEC-4500. Power Systems I

Principles of operation, modeling and analysis of electric power systems; complex power, phasors and per-unit system; three-phase circuits; power transformer and generator modeling; transmission line parameters; steady-state operation of transmission lines; network matrices and power flow analysis; introduction to alternative energy sources. (Prerequisites: completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4570. Fundamentals of Digital Signal Processing

Discrete time signals and systems models and analysis; Z-transform; discrete Fourier transform (DFT); FFT algorithms; FIR filter design; IIR filter design; stability; realization; hardware and software implementations; digital signal processing applications. (Prerequisites: completion of all Electrical

Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

ELEC-4600. Power Systems II

Advanced analytical tools; analysis of abnormal operation, numerical methods, stability and control; transient stability and voltage stability; control and monitoring of power systems; dynamics and control of multi-machine systems; symmetrical faults; symmetrical components; unsymmetrical faults; power system protection and relaying; economic dispatch; optimal power flow; numerical simulation tools in power systems. (Prerequisites: ELEC-4500 and completion of all Electrical Engineering courses from 1st year, 2nd year and 3rd year.) (3 lecture, 2 laboratory/tutorial hours or equivalent a week.)

MECHANICAL, AUTOMOTIVE, AND MATERIALS ENGINEERING

PROGRAM INFORMATION

Students may take a regular program in Mechanical Engineering or in Industrial Engineering. They may also specialize in Engineering Materials, Aerospace Engineering, Environmental Engineering, Automotive Engineering, or Industrial Engineering with Minor in Business Administration as described below.

The baccalaureate degree program in Mechanical Engineering is accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers. Mechanical engineers are responsible for the design, construction, maintenance, and operation of machines and systems of machines. They create, plan, research, supervise, analyze, and generally act as the professionals of mechanical technology.

The mechanical engineer's knowledge and skills are needed in many industries, such as: heating, ventilating, and air conditioning; transportation; power generation and distribution; metal production and processing; manufacturing; and chemical and electrical equipment. Mechanical engineers commonly go beyond the limits of purely mechanical work. They are found at all levels of management in private industry and the public sector.

Students in the regular program specialize by selecting six courses from those offered in the areas of: air conditioning; dynamics and stress analysis; vibrations and noise; and gas dynamics and turbomachinery.

AUTOMOTIVE ENGINEERING

Students interested in the Automotive Option begin their specialization in the Summer term of their third year. The Option includes four required courses and two courses from within Engineering, selected from the approved list.

ENVIRONMENTAL ENGINEERING

(As of Fall 2025, there are no new admissions to the BAsC in Mechanical Engineering with Environmental Option.)

Students interested in the Environmental Option begin their specialization in the Summer term of their third year. The Option includes five required courses and one course from within Engineering, selected from the approved list.

ENGINEERING MATERIALS

Students interested in the Engineering Materials Option begin their specialized studies in the Summer term of their third year. The Option includes a series of four required and two courses from within Engineering, selected from the approved list. Engineering Materials courses include modern developments in such areas as steels, casting, polymers, environmental degradation and novel processing techniques.

INDUSTRIAL AND MANUFACTURING SYSTEMS ENGINEERING

The Industrial and Manufacturing Systems Engineering program is unique and innovative. It provides students with a broad based curriculum of practical real world material that develops engineering skill for which demand exceeds supply in industry, manufacturing and business organizations worldwide. Examples of manufacturing assignments held by our alumni include the areas of Product Engineering, Process Engineering, Plant/Facility Engineering, Tool Engineering, Industrial Engineering and Human Factors. Business organizations such as banks, railroads, petroleum, airlines, insurance companies, and hospitals are also employing our graduates to manage and improve performance of their operations. Our graduates are employed all over the world, in all levels of management and responsibilities.

The department has a tradition of highly successful Co-op internship education programs with local business and industry in Canada, the United States and the European Union. These activities expose students to applied aspects of their research programs and help them establish strong contacts with potential employers in relevant fields that include design and manufacturing at several local corporate headquarters such as Ford, General Motors, DaimlerChrysler, Toyota, Honda, VW Audi. The combination of real industry experience, cutting edge research and a curriculum that delivers the skill needed by employers provides exceptional value and our degree is valued by others. Enrolment in the programs is competitive and the department welcomes new student applicants who have a drive to succeed and are prepared to be challenged to top performance.

Students may enroll in a general Industrial Engineering program or a Minor in Business Administration. The first and second years are common for all students registered in the Industrial Engineering program. The baccalaureate degree program in Industrial Engineering is accredited by the Canadian Engineering Accreditation Board of the Canadian Council of Professional Engineers.

PROGRAMS

Bachelor of Applied Science in Industrial Engineering

Bachelor of Applied Science in Industrial Engineering

Bachelor of Applied Science in Industrial Engineering with Cooperative Education

Bachelor of Applied Science in Industrial Engineering with Business Minor

Bachelor of Applied Science in Industrial Engineering with Business Minor and Cooperative Education

OUTLINE OF STUDIES

Note: All students will follow the sequence of study terms shown in their program of study.

Degree Requirements

FIRST YEAR - Common to all Industrial Engineering Programs

Fall Term (Semester 1)

GENG-1101. Engineering 1
GENG-1102. Engineering Graphics
MATH-1720. Differential Calculus
MATH-1270. Linear Algebra (Engineering)
PHYS-1400. Introductory Physics I

Winter Term (Semester 2)

GENG-1110. Engineering Mechanics I
GENG-1201. Cornerstone Design
GENG 1202. Introductory Electrical and Computer Engineering
MATH-1730. Integral Calculus
CHEM-1103. Topics in General Chemistry

SECOND YEAR

Fall Term (Semester 3)

GENG-2101. Engineering II
MATH-2780. Vector Calculus
GENG-2102. Programming and Algorithms
PHYS-2100. Topics in Physics
GENG-2190. Introduction to Engineering Materials
STEN-1000. Introduction to Business

Winter Term (Semester 4)

GENG-2201. Engineering Design II
MATH-2790. Differential Equations
GENG-2220. Probability and Statistics for Engineering
GENG-2230. Advanced Engineering and Design
ACCT-1510. Principals of Financial Accounting I
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Summer Term - Co-op students only

GENG-2980. Work Term I

THIRD YEAR

Fall Term (Semester 5)

INDE-3170. Systems Analysis and Design
INDE-3120. Operations Research I

GENG-3130. Engineering Economics
INDE-3150. Product and Process Design
INDE-3210. Manufacturing Process Design
In addition, Industrial Engineering with Business Minor students must take:
ACCT-2550. Managerial Accounting

Winter Term – Co-op students only
GENG-3980. Work Term II

Summer (Semester 6)
INDE-3110. Computer Aided Design and Computer Aided Manufacturing
INDE-3020. Health, Safety and Human Factors
INDE-3270. Product Quality and Reliability
INDE-3910 Supply Chain Engineering
MGMT-2430 Human Resource Management

FOURTH YEAR

Fall Term – Co-op students only
GENG-4980. Work Term III

Winter Term (Semester 7)
INDE-4000. Capstone Industrial Design A
INDE-4130. Production Analysis and Logistics
INDE-4220. Simulation of Industrial Systems
INDE-4280. Facilities Design and Logistics
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

In addition, Industrial Engineering with Business Minor students must take:
MKTG-1310. Principles of Marketing

Summer Term (Semester 8)
MECH-3221. Control Theory
INDE-4000. Capstone Design B
INDE-4120. Operations Research II
INDE-4350. DOE Techniques for Manufacturing
INDE-4310 Flexible Manufacturing Systems
In addition, Industrial Engineering with Business Minor students must take:
MSCI-2130. Management Information Systems

PROGRAMS

Bachelor of Applied Science in Mechanical Engineering

Bachelor of Applied Science in Mechanical Engineering - General
Bachelor of Applied Science in Mechanical Engineering - Aerospace Option
Bachelor of Applied Science in Mechanical Engineering - Automotive Option

Bachelor of Applied Science in Mechanical Engineering - Materials Option**Bachelor of Applied Science in Mechanical Engineering - Environmental Option** (As of Fall 2025, there are no new admissions to the Environmental option.)

All programs are offered with and without Co-op.

Total courses: **44** (Automotive Option, Aerospace Option, Materials Option, Environmental Option) + Co-op Work Terms for students in the Co-op option; **42** (General Option) + Co-op Work Terms for students in the Co-op option

Degree Requirements

Fall Term (Semester 1)

GENG-1101. Engineering I
GENG-1102. Engineering Graphics
MATH-1720. Differential Calculus

GENG-2101. Engineering II
MATH-2780. Vector Calculus
GENG-2102. Programming and Algorithms
PHYS-2100. Topics in Physics
GENG-2180. Mechanics of Deformable Bodies
GENG-2190. Introduction to Engineering Materials

Winter Term (Semester 4)

GENG-2201. Engineering Design II
MATH-2790. Differential Equations
GENG-2220. Probability and Statistics for Engineering
MECH-2210. Dynamics
MECH-2230. Advanced Engineering and Design
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Summer Term - Co-op students only

GENG-2980. Work Term I

THIRD YEAR

Fall Term (Semester 5)

GENG-3130. Engineering Economics

MECH-3211. Stress Analysis

MECH-3212. Thermodynamics

MECH-3223. Machine Dynamics

MECH-3233. Fluid Mechanics I

1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Winter Term - Co-op students only

GENG-3980. Work Term II

Summer Term (Semester 6)

GENG-3201. Engineering Design III

MECH-3217. Applied Thermodynamics

MECH-3220. Fluid Mechanics II

MECH-3228. Heat Transfer

MECH-4259. Computer Aided Engineering or MECH-4258 Computational Fluid Dynamics

One of the following courses based on the students option:

General Mechanical Engineering:

No course required (spare)

Automotive Option:

MECH-3430. Automotive Engineering Fundamentals

MECH-4463. Vehicle Dynamics

MECH-4467. Vehicle Thermal Management

Aerospace Option:

MECH-3670. Aerospace Engineering Fundamentals

MECH-4670. Aerospace Propulsion

MECH-4671. Aerodynamics and Performance

Materials Option:

MECH-3830. Materials and Their Properties

MECH-3671. Aerospace Materials and Manufacturing

MECH-4471. Auto Materials and Manufacturing Processes

Environmental Option:

MECH-4228. Sustainability in Engineering

MECH-4255. Environmental Effects and Control of Noise

ENVE 3640 Materials Recovery and Waste Management

FOURTH YEAR

Fall Term - Co-op students only

GENG-4980. Work Term III

Winter Term (Semester 7)

MECH-4200. Capstone Design A

MECH-3224. Engineering Measurements

MECH-4221. Machine Design

Plus the following courses based on the students option:

General Mechanical Engineering (no option cohort):

One course from the following:

MECH-3215. Mechanical Vibrations

MECH-4253. Heating, Ventilation, and Air Conditioning

And one course from the following in either Semester 7 or Semester 8:

MECH-4251. Turbomachines

MECH-4250. Gas Dynamics

MECH-4212. Mechatronics

MECH-4255. Environmental Effects and Control of Noise

MECH-4218. Thermofluid Systems Design

MECH-4228. Sustainability in Engineering

MECH-4259. Computer Aided Engineering or MECH-4258. Computational Fluid Dynamics

MECH-4240. Special Topics in Mechanical Engineering

MECH-4241. Directed Studies in Mechanical Engineering

INDE-4350. DOE Techniques for Manufacturing

Automotive Option: two courses from:

MECH-3430. Automotive Engineering Fundamentals

MECH-4463. Vehicle Dynamics

MECH-4467. Vehicle Thermal Management

Aerospace Option: two courses from

MECH-3670. Aerospace Engineering Fundamentals

MECH-4670. Aerospace Propulsion

MECH-4671. Aerodynamics and Performance

Materials Option: two courses from

MECH-3830. Materials and Their Properties

MECH-3671. Aerospace Materials and Manufacturing

MECH-4471. Auto Materials and Manufacturing Processes

Environmental Option: two courses from

MECH-4228. Sustainability in Engineering

MECH-4255. Environmental Effects and Control of Noise

ENVE-3640 Materials Recovery and Waste Management

Summer Term (Semester 8)

MECH-3221. Control Theory

MECH-4211. Design for Failure Prevention (to be renamed as of Spring 2027 to: Deformation, Fracture and Failure Prevention)

MECH-4200. Capstone Design B

Plus the following courses based on the students option:

General Mechanical Engineering: one course from

MECH-3215. Mechanical Vibrations

MECH-4253. Heating, Ventilation, and Air Conditioning

And one course from the following in either Semester 7 or Semester 8:

MECH-4251. Turbomachines

MECH-4250. Gas Dynamics

MECH-4212. Mechatronics

MECH-4255. Environmental Effects and Control of Noise

MECH-4218. Thermofluid Systems Design

MECH-4228. Sustainability in Engineering

MECH-4259. Computer Aided Engineering or MECH-4258. Computational Fluid Dynamics MECH-4240.

Special Topics in Mechanical Engineering

MECH-4241. Directed Studies in Mechanical Engineering

INDE-4350. DOE Techniques for Manufacturing

Automotive Option: two courses from:

MECH-4465. Internal Combustion Engines

MECH-4469. Sustainable Propulsion

MECH-4440-10. Special Topics: Electric Motors

MECH-4471. Auto Materials and Manufacturing Processes

MECH-4440. Special Topics in Automotive Engineering

MECH-4441. Directed Studies in Automotive Engineering

Aerospace Option: two courses from

MECH-3671. Aerospace Materials and Manufacturing

MECH-4673. Aerospace Structures

MECH-4672. Flight Dynamics and Control of Unmanned Aerial Vehicles

MECH-4640. Special Topics in Aerospace Engineering

MECH-4641. Directed Studies in Aerospace Engineering

Materials Option: two courses from

MECH-3831. Thermodynamics and Kinetics of Materials

MECH-4820. Ceramic Materials

MECH-4832. Modern Steels

MECH-4850. Welding Engineering

MECH-4840. Special Topics in Materials Engineering

MECH 4841 Directed Studies in Materials Engineering

Environmental Option: two courses from:

ENVE-3620. Air Pollution Control

ENVE-3630. Waste Water Treatment

MECH-4242 Special Topics in Environmental Engineering

MECH-4243 Directed Studies in Environmental Engineering

Bachelor of Applied Science in Mechanical Engineering Articulation Agreement with St. Mary's University Diploma of Engineering

Admission Requirements

Graduates of St. Mary's University Diploma of Engineering minimum cumulative average of 60% may be admitted to this degree completion pathway.

Degree Requirements

The total course requirements and course sequence listed are for students who have met the minimum requirement of 60% for each course for which transfer credit has been assessed. Additional courses will need to be taken for students who have not qualified for the maximum allowable transfer credit.

OUTLINE OF STUDIES

Note: All students will follow the sequence of study terms shown in their program of study.

Total courses: 25

YEAR 1

Fall Term

MECH-3212. Thermodynamics
MECH-3211. Stress Analysis
MECH-3223. Machine Dynamics
1 additional course*

Winter Term

GART-1510. Effective Writing II
GENG-2190. Engineering Materials Fundamentals
MECH-2230. Advanced Engineering and Design
GENG-2200. Analysis of Engineering Systems
1 additional course*

Summer Term

MECH-3217. Applied Thermodynamics
MECH-3220. Fluid Mechanics II
MECH-3228. Heat Transfer
MECH-3224. Engineering Measurements
MECH-4221. Machine Design
MECH-4259. Computer Aided Engineering or MECH-4258 Computational Fluid Dynamics

Students must have completed all of the 1st year and 2nd year courses and at least ten of the twelve 3rd year courses before being allowed to register into the 4th year courses, including all prerequisite courses required for registration into the 4th year courses.

YEAR 2

Winter Term

MECH-4200. Capstone Design Project
MECH-4218. Thermofluid Systems Design

MECH-4211. Design for Failure Prevention (to be renamed as of Spring 2027 to: Deformation, Fracture and Failure Prevention)

1 additional course*

Summer Term

MECH-4200. Capstone Design Project

MECH-3221. Control Theory

GENG-4210. Engineering and Society

2 additional courses

*A minimum of four out of the six additional courses must be numbered MECH-3XXX, MATL-3XXX, MECH-4XXX or MATL-4XXX. A maximum of two out of the six additional courses may be replaced with unrestricted electives. These unrestricted electives may be taken from any department or Faculty, but must have a minimum course weight of 3.0.

Bachelor of Applied Science in Mechanical Engineering with Automotive Option Articulation Agreement with St. Mary's University Diploma of Engineering

Admission Requirements

Graduates of St. Mary's University Diploma of Engineering minimum cumulative average of 60% may be admitted to this degree completion pathway.

Degree Requirements

The total course requirements and course sequence listed are for students who have met the minimum requirement of 60% for each course for which transfer credit has been assessed. Additional courses will need to be taken for students who have not qualified for the maximum allowable transfer credit.

Note: All students will follow the sequence of study terms shown in their program of study.

Total courses: 26

YEAR 1

Fall Term

MECH-3212. Thermodynamics

MECH-3211. Stress Analysis

MECH-3223. Machine Dynamics

Winter Term

GENG-1190. Technical Communications

GENG-2190. Engineering Materials Fundamentals

MECH-2230. Advanced Engineering and Design

GENG-2200. Analysis of Engineering Systems

Summer Term

MECH-3217. Applied Thermodynamics

MECH-3220. Fluid Mechanics II

MECH-3228. Heat Transfer

MECH-4221. Machine Design

MECH-4259. Computer Aided Engineering or MECH-4258 Computational Fluid Dynamics
MECH-3430. Automotive Engineering Fundamentals

Students must have completed all of the 1st year and 2nd year courses and at least ten of the twelve 3rd year courses before being allowed to register into the 4th year courses, including all prerequisite courses required for registration into the 4th year courses.

YEAR 2

Winter Term

MECH-4200. Capstone Design Project
MECH-4218. Thermofluid Systems Design
MECH-4211. Design for Failure Prevention (to be renamed as of Spring 2027 to: Deformation, Fracture and Failure Prevention)
MECH-4463. Vehicle Dynamics
MECH-4467. Vehicle Thermal Management
1 course with an automotive focus numbered MECH-XXXX, MATL-XXXX, MECH-3XXX or MECH-4XXX (see Undergraduate Handbook)

Summer Term

MECH-4200. Capstone Design Project
MECH-3221. Control Theory
MECH-3224. Engineering Measurements
GENG-4210. Engineering and Society
MECH-4465. Internal Combustion Engines
1 course with an automotive focus numbered MECH-XXXX, MATL-XXXX, MECH-3XXX, or MECH-4XXX (see Undergraduate Handbook)

Bachelor of Applied Science in Mechanical Engineering with Environmental Option Articulation Agreement with St. Mary's University Diploma of Engineering

(As of Fall 2025, there are no new admissions to the Environmental option.)

Admission Requirements

Graduates of St. Mary's University Diploma of Engineering minimum cumulative average of 60% may be admitted to this degree completion pathway.

Degree Requirements

The total course requirements and course sequence listed are for students who have met the minimum requirement of 60% for each course for which transfer credit has been assessed. Additional courses will need to be taken for students who have not qualified for the maximum allowable transfer credit.

OUTLINE OF STUDIES

Note: All students will follow the sequence of study terms shown in their program of study.

Total courses: 26

YEAR 1

Fall Term

MECH-3212. Thermodynamics
MECH-3211. Stress Analysis
MECH-3223. Machine Dynamics

Winter Term

GENG-1190. Technical Communications
GENG-2190. Engineering Materials Fundamentals
MECH-2230. Advanced Engineering and Design
GENG-2200. Analysis of Engineering Systems

Summer Term

MECH-3217. Applied Thermodynamics
MECH-3220. Fluid Mechanics II
MECH-3228. Heat Transfer
MECH-4228. Sustainability in Engineering
MECH-4221. Machine Design
MECH-4259. Computer Aided Engineering or MECH-4258 Computational Fluid Dynamics

Students must have completed all of the 1st year and 2nd year courses and at least ten of the twelve 3rd year courses before being allowed to register into the 4th year courses, including all prerequisite courses required for registration into the 4th year courses.

YEAR 2

Winter Term

MECH-4200. Capstone Design Project
MECH-4218. Thermofluid Systems Design
MECH-4211. Design for Failure Prevention (to be renamed as of Spring 2027 to: Deformation, Fracture and Failure Prevention)
ENVE-3620. Air Pollution Control
ENVE-3630. Water and Wastewater Treatment
ENVE-3640. Materials Recovery and Waste Management

Summer Term

MECH-4200. Capstone Design Project
MECH-3221. Control Theory
GENG-4210. Engineering and Society
MECH-3224. Engineering Measurements
MECH-4255. Environmental Effects and Control of Noise
1 course with an environmental focus numbered CIVL-4XXX, MECH-4XXX or ENVE-4XXX (see Undergraduate Handbook)

Bachelor of Applied Science in Mechanical Engineering with Materials Option Articulation Agreement with St. Mary's University Diploma of Engineering

Admission Requirements

Graduates of St. Mary's University Diploma of Engineering minimum cumulative average of 60% may be admitted to this degree completion pathway.

Degree Requirements

The total course requirements and course sequence listed are for students who have met the minimum requirement of 60% for each course for which transfer credit has been assessed. Additional courses will need to be taken for students who have not qualified for the maximum allowable transfer credit.

MECH-3224. Engineering Measurements

1 course numbered MECH-XXXX or MATL-XXXX

Honours Certificate in Industrial and Management Engineering

Admission Requirements

A candidate for the Honours Certificate in Industrial and Management Engineering in Industrial Engineering shall hold the degree of (i) Bachelor of Applied Science (B.A.Sc.); (ii) a four-year B.Sc. (or BCS) degree in Computer Science or in Physics, or related Science fields, (iii) Bachelor of Commerce (B.Comm.), or (iv) BHK Honours.

Certificate Requirements

Total courses: Eight (8) courses

- (a) a maximum of 5 courses from our 4th year (INDE-4XXX) courses and
- (b) a maximum of 4 courses from our 3rd year (INDE-3XXX) and
- (c) a maximum of 3 pre-requisite 2000-level courses, with the approval of the AAU Head and depending on the discipline of your undergraduate degree.

NOTES: No 1000-level courses will be permitted. The present pre-requisite requirements for 4th year courses must be respected. All selected courses should not be from courses, subjects or topics that were part of the applicant's undergraduate studies. Students from programs that do not have prerequisite general engineering courses will need to obtain them as described earlier in this application. If the student has taken the equivalent to required pre-requisite courses, this requirement may/will be waived.

If students from another program (students with degree from the Department of Electrical and Computer Engineering, degree in Computer Science and so forth) are missing pre-requisites courses critical for successful completion of the certificate, they are to choose from appropriate 2nd courses. A maximum of 3 courses from the pre-requisite courses will count towards the certificate, although more may be necessary depending on the student's background.

To qualify for the certificate, students will be required to successfully complete all 8 courses at the University of Windsor. No transfer credit will be considered for this certificate.

MECHANICAL, AUTOMOTIVE, AND MATERIALS ENGINEERING COURSES

MECHANICAL ENGINEERING COURSES

1. Students must have completed at least eight (8) of the ten 1st year courses before being allowed to register into 2nd year courses, including all prerequisite courses required for registration into 2nd year courses.

2. Students must have completed all 1st year courses and at least ten (10) of the twelve 2nd year courses before being allowed to register into 3rd year courses, including all prerequisite courses required for registration into 3rd year courses.
3. Students must have completed all 1st and 2nd year courses and at least ten of the twelve 3rd year courses before being allowed to register into 4th year courses, including all prerequisite courses required for registration into 4th year courses.
4. Taking courses out of sequence can be allowed at the discretion of the Department Head.

MECH-2210. Dynamics

Review of kinetics and kinematics of particles; work-energy and impulse-momentum methods; moments of inertia of areas and masses; kinematics of rigid bodies; plane motion; forces and accelerations for rigid bodies, energy and momentum methods for rigid bodies in plane motion. (Prerequisite: GENG-1110 or PHYS-1400) (3 lecture, 2 tutorial hours a week.)

MECH-2230. Advanced Engineering and Design

Computer aided design applications for engineering graphic communication. Solid modeling; orthographic projection and isometric drawing; sections and conventions; dimensioning and tolerancing. Design portfolio and project. (Prerequisite: GENG-1102) (4 lecture/laboratory hours a week.)

MECH-3211. Stress Analysis

Analysis of stresses and strains in simple mechanical structures subjected to combinations of axial, torsion and flexural loads; two-dimensional transformations of stress and strain components; yield and fracture criteria; deflection of statically determinate and indeterminate beams; buckling of columns with various end conditions; introduction to energy methods. (Prerequisite: GENG-2180.) (3 lecture, 2 laboratory/tutorial hours a week.)

MECH-3212. Thermodynamics

An introductory thermodynamics course in which fundamental principles are developed. Included are ideal gas relations, properties of pure substances, First Law for closed and steady flow systems, the Second Law with entropy relations, and an introduction to cycles. (3 lecture, 1.5 tutorial hours a week.) (Prerequisite: PHYS-2100)

MECH-3217. Applied Thermodynamics

Ideal gas mixtures and psychrometrics. Reacting mixtures and combustion. Power cycles, refrigeration and heat pump cycles. (Prerequisite: MECH-3212.) (3 lecture, 2 laboratory/tutorial hours a week.)

MECH-3220. Fluid Mechanics II

Navier-Stokes equations and some exact solutions, external flows boundary layer over a flat plate, drag forces; turbulent flows in pipes and mixing length theory, flow measurement, compressible flows and introduction to potential flows. (Prerequisite: MECH-3233.) (3 lecture, 2 laboratory/tutorial hours a week.)

MECH-3221. Control Theory

Control system concepts, linear modelling and analysis of response and stability of physical systems, complex variables and Laplace transforms, frequency, and transient response analysis and performance specifications. (Prerequisites: MATH-2780 and MATH-2790.) (3 lecture hours, 1 tutorial hour a week.)

MECH-3223. Machine Dynamics

Linkages of flexible connectors, cams, toothed gearing, intermittent motion mechanisms, trains of mechanisms, static and dynamic analysis of mechanical flywheels, balancing of rotating and reciprocating masses. (Prerequisite: MECH-2210.) (3 lecture, 2 tutorial hours a week.)

MECH-3224. Engineering Measurements

Basic concepts in instrumentation; error analysis; instrumentation and measurement systems including sensors, transducers, signal conditioning and display; computer-based data acquisition and analysis. (Prerequisite: GENG-2102 or STAT-2910.) (3 lecture, 3 laboratory/tutorial hours a week.)

MECH-3228. Heat Transfer

Introduction to the three heat transfer modes: conduction, convection, and radiation. Application of heat exchange equipment. (Prerequisite: MATH-2790 and semester 6 or higher standing.) (3 lecture, 2 laboratory hours a week.)

MECH-3233. Fluid Mechanics I

Fluid properties and basic concepts, fluid statics, equations of motion, one dimensional flows, flows in pipes in series, parallel and networks, dimensional analysis and similitude. (3 lecture hours, 1 tutorial hour a week.) (Prerequisite: PHYS-2100)

MECH-4200. Capstone Design

Student design teams, operating within a "company" environment, utilize the broad range of their undergraduate experience in interdisciplinary projects selected to promote interaction between the mechanical, automotive, and materials programs. Design methodologies and team interaction simulate future professional practice. Project milestones include: a design proposal with cost analysis and scheduling, construction and commissioning of the designed apparatus, and a final report and presentation having both global and detail completeness. (Prerequisite: Semester 7 or higher standing.) (2 semester course.) (This is an experiential learning course.)

MECH-4211. Design for Failure Prevention

(to be renamed as of Spring 2027 to: Deformation, Fracture and Failure Prevention)

Mechanics of deformation, fracture, and failure in engineering materials, structures, and components. Principles of stress and strain analysis, including stress concentrations and strain energy. Mechanisms of material failure, including brittle and ductile fracture, fatigue, and creep. Practical aspects of failure prevention, including design principles, failure analysis, and material characterization and selection. (Prerequisites: MECH-3211, MECH-3223, and Semester 7 or higher standing) (3 lecture hours, 1.5 tutorial hours, 1.5 laboratory hours weekly)

MECH-4218. Thermofluid Systems Design

Evaluation of major thermofluid systems: HVAC and R, power generation. Factors affecting design and selection of thermofluid devices: boilers, pumps and compressors, valves, piping systems, heat exchangers, evaporators, and turbines. Effect of device characteristics on process efficiency. Application of optimization techniques to thermofluid systems. (Prerequisites: MECH-3212, MECH-3233, MECH-3228; and either MECH-3217 or MECH-3220.)

MECH-4221. Machine Design

Gearing and gear trains: spur, helical, worm, and bevel gears. Clutches, brakes, couplings, flywheels. Chain and belt drives. Design of shafting. Student-developed software to support mechanical design. (Prerequisite: MECH-3223 and MECH-3211.) (3 lecture, 3 laboratory hours a week.)

MECH-4258. Computational Fluid Dynamics - CFD

Fundamentals of finite volume methods for problem solving in fluid flow and heat transfer, using CFD computer programs. (Pre-requisites: MECH 3233) (Co-requisites: MECH-3220) (This is an experiential learning course.)

MECH-4259. Computer Aided Engineering - CAE

Three-dimensional graphics; fundamentals of finite element methods for problem solving in heat transfer, solids, and trusses using finite element computer programs. (Prerequisite: MECH-3211.) (2 lecture, 3 laboratory/tutorial hours a week.)

MECHANICAL ENGINEERING APPROVED COURSES TO FULFILL NON-SPECIFIED ENGINEERING COURSE REQUIREMENTS

Some of these courses may not be offered in any given year.

MECH-3215. Mechanical Vibrations

Free, damped, and forced vibration of single and multi-degree of freedom systems with discrete masses. Exact and approximate methods of solution. Vibration isolation, vibration transducers, use of computers in vibration analysis. (Prerequisite: MECH-2210 and Semester 6 or higher standing.) (3 lecture, 2 tutorial hours a week.)

MECH-4212. Mechatronics

Review of electromechanical components. Practical application of microcontrollers in electromechanical systems. Use of infrared sensors, photoresistors, operational amplifiers, timers, servomotors, and analog/digital converters in mechatronics systems. A hands-on, laboratory-based course. (Prerequisite: Semester 7 or 8 standing for Mechanical Engineering students; other students require instructor approval.) (2 lecture, 3 laboratory/tutorial hours a week.)

MECH-4228. Sustainability in Engineering

Environmental impact assessment. Biophysical and socioeconomic impacts from engineering activities, processes, and projects. Human health and environmental risk concepts. Introduction to analysis, corporate/industrial environmental management, and environmental management systems. Waste reduction, reuse, and recycling, and reclamation. (Cross-listed with ENVE-4810.) (Prerequisite: GENG-2101 and Semester 6 or higher standing.) (3 lecture, 2 tutorial hours a week.)

MECH-4240. Topics in Mechanical Engineering

Selected topics of current interest in Mechanical Engineering. (Prerequisite: 4th-year Semester 7 or higher standing or permission of instructor.) (3 lecture, 1 laboratory hour a week.)

MECH-4241. Directed Studies in Mechanical Engineering

A special course of studies in Mechanical Engineering with content and direction approved by the Department Head. (Prerequisite: Semester 7 or higher standing with a 70% average or better.)

MECH-4250. Gas Dynamics

Basic concepts and one-dimensional flow equations of gas dynamics. Emphasis on isentropic flows in variable area ducts as well as Fanno, Rayleigh and Isothermal flows in constant area ducts. Normal shock waves, their appearance in various flow types, their application in nozzles and diffusers. Oblique shock and Prandtl Meyer expansion waves. Considerations in compressible flow measurements. (Prerequisite: MECH-3220.) (3 lecture, 1 laboratory/tutorial hours a week.)

MECH-4251. Turbomachines

Dimensional analysis and similitude; definitions of efficiency, two-dimensional analysis of axial flow turbines and compressors, three dimensional flow, centrifugal pumps and compressors. (Prerequisite: MECH-3220.) (3 lecture, 1 laboratory/tutorial hours a week.)

MECH-4253. Heating, Ventilation, and Air Conditioning

Principles of environmental air quality and occupant comfort control. Psychrometric analysis of buildings as applied to common air distribution system designs. Current solar radiation estimation techniques and other energy transfer mechanisms; their application to cooling and heating load calculations. Analytical and numerical calculations. Computational tools. (Prerequisite: MECH-3217.) (3 lecture, 1 laboratory/tutorial hours a week.)

MECH-4255. Environmental Effects and Control of Noise

Physical properties of sound and noise, measurement of noise, noise control, hearing characteristics and environmental effects of noise. (Prerequisite: Semester 7 or higher standing.) (3 lecture, 1 tutorial/laboratory hours a week.)

AEROSPACE ENGINEERING COURSES

MECH-3670. Aerospace Engineering Fundamentals

History of flight and aircraft evolution. Aircraft operating principles. Airfoil and wing aerodynamics. Aerospace propulsion systems (turbojets, turbofans, turboprops, and rockets). Lab on performance estimation and measurement for a turbojet engine. Aircraft design. Weight estimation. Aircraft systems. Aircraft materials and structures. Governance of aviation in North America. Design studies of aircraft or spacecraft and/or components thereof. (Prerequisites: MATH-2780, MATH-2790, semester 6 or higher standing; and Aerospace option students or permission of instructor.) (Co-requisites: MECH-3217, MECH-3220.)

MECH-3671. Aerospace Materials and Manufacturing

Properties and selection of metals, ceramics, polymers, and composite materials for aerospace applications. Structural and gas-turbine alloys. Machining, casting, forming, heat treating, and joining processes for original manufacture and repair. Manufacture and application of composites. In-service materials degradation. (Pre-requisites: MECH-3670.)

MECH-4640. Topics in Aerospace Engineering

Selected topics of current interest in Aerospace Engineering. (Prerequisite: Semester 7 or higher standing or permission of instructor.) (3 lecture, 1 lab hours per week.)

MECH-4641. Directed Studies in Aerospace Engineering

A special course of studies in Aerospace Engineering with content and direction approved by the Department Head. (Prerequisite: Semester 7 or higher standing with a 70% average or better.)

MECH-4670. Aerospace Propulsion

Application of gas dynamics and thermodynamics to aerospace engines. Analysis of engine cycles. Theory and design of propellers; turboprop engine analysis, Internal combustion and gas turbine engines. Component design for compressors, combustors, afterburners, exhaust nozzles. (Pre-requisites: MECH-3217, MECH-3220, MECH-3670, and semester 7 or higher standing.)

MECH-4671. Aerodynamics and Performance

Analysis of aircraft configurations. Viscous and compressibility effects. Manoeuvring loads and load factors; implications of manoeuvrability on thrust requirements. Aircraft stability and control. (Prerequisites: MECH-3220, MECH-3670, and Semester 7 or higher standing.)

MECH-4672. Flight Dynamics and Control of Unmanned Aerial Vehicles

Flight dynamics modelling for fixed-wing aircraft and rotorcraft. Low-Reynolds number considerations applicable to unmanned aerial vehicles (UAVs). Control theory and state-space control schemes. State-space controller design for UAVs. Lab(s) involving control of virtual and/or physical UAV models. (Prerequisites: MECH-3670 and MECH-4671)

MECH-4673. Aerospace Structures

In this course, students will become familiar with the loads acting on aircraft and its individual parts, learn how to choose appropriate structural idealizations, and perform stress analysis of airframe parts. The following topics will be considered: parts of an airframe, their function and loads transfer between major structural elements; airframe loads; airframe as a thin-walled stiffened beam: bending of thin-walled beams, shear of thin-walled beams, torsion of thin-walled beams; structural idealization of the airframe; stress analysis of wing spars and box beams; stress analysis of fuselages; stress analysis of wings. (Prerequisite: MECH-3211.) (3 lecture, 1 tutorial hours a week.)

AUTOMOTIVE ENGINEERING COURSES

MECH-3430. Automotive Engineering Fundamentals

Overview of primary automotive systems. Engine types and configurations, combustion, emission control, vehicle performance. Powertrain, suspension, frame and chassis. Materials and fabrication issues. Engine and vehicle dissection laboratory. Identification of industry issues and trends. (Prerequisite: Automotive Option students only and Semester 6 or higher standing.) (2 lecture, 3 laboratory hours a week.)

MECH-4440. Topics in Automotive Engineering

Selected topics of current interest in Automotive Engineering. (Prerequisite: Semester 7 or higher standing or permission of instructor.) (3 lecture, 1 laboratory hours a week.)

MECH-4441. Directed Studies in Automotive Engineering

A special course of studies in Automotive Engineering with content and direction approved by the Department Head. (Prerequisite: Semester 7 or higher standing with a 70% average or better.)

MECH-4463. Vehicle Dynamics

Classification and analysis of suspension types and geometry, powertrain layout, and ride quality. Tire modeling, stability, and numerical simulation of vehicle dynamics, including longitudinal and lateral vehicle response to driver inputs. Selected topics from industry experts. (Prerequisite: Semester 7 or higher standing.) (Co-requisite: MECH-3215 or MECH-3221.) (3 lecture, 1 tutorial hours a week.)

MECH-4465. Internal Combustion Engines

Mechanical design of vehicular internal combustion engines for different applications. Covers basic engine types and their operation from an energy conversion systems viewpoint, where the system needs to satisfy a number of requirements. These performance and operational requirements are derived from basic thermodynamics, operation of heat engine cycles, ignition and combustion processes, fuel system design, heat transfer, emissions formulation, available instrumentation and testing procedures. Environmental impact of vehicular designs on global pollution and government standards. Recent

developments in energy-efficient and alternate fuel engines. (Prerequisites: MECH-3217, MECH-3220.) (3 lecture, 1 tutorial hours a week.)

MECH-4467. Vehicle Thermal Management

A study of controlled passenger compartment environment, and automotive thermal management hardware: radiator, heater core, air-conditioning components. Topics include the thermal comfort model of occupants in a vehicle, determination of heating and cooling loads, the practical application of refrigeration in automotive air-conditioning followed by design of equipment and HVAC system, description and design of engine cooling system. (Prerequisites: MECH-3217, MECH-3228, MECH-3233.) (3 lecture, 1 laboratory hours a week.)

MECH-4469. Sustainable Propulsion

This course develops a fundamental understanding of the theory and practice of sustainable propulsion systems for automotive applications. A concise review of energy sources suitable for automotive applications will be introduced, focusing on the impact of energy density on real-world applications. Critical concepts and issues of advanced clean combustion strategies will be studied along with their applications in modern internal combustion engines, including fuel properties, lean-burn stoichiometry, fuel injection systems, combustion systems, turbocharging, and other aspects of engine design and performance evaluation. The development trend of future propulsion systems, including engine electrification, smart hybridization, and carbon-neutral renewable fuels, will be discussed. (Prerequisites: MECH-3217 and Semester 6 or higher standing.)

MECH-4471. Automotive Materials and Manufacturing Methods

The objective of this course is to introduce both the metallic and non-metallic materials employed in automobiles. The content to be covered ranges from the production of introduced automotive materials to their recent development. To understand the rationale for using various automotive materials, the advantages of their manufacturability and properties are discussed. Different manufacturing processes corresponding to specific automotive materials are highlighted. The mechanical properties and microstructure of automotive materials are reviewed. The implementation of automotive materials in automobiles is presented. Upon completing this course, students are expected to understand the basic principles of manufacturing and the advantages and disadvantages of introduced automotive materials over other materials in terms of performance and weight saving. The course also trains students to obtain knowledge of advanced manufacturing processes, structural characterization and property evaluation, and component design of various automotive materials. (Prerequisite: Semester 7 or higher standing.) (3 lecture, 2 tutorial hours a week.) (Also offered as MECH-4871. Credit cannot be obtained for both MECH-4471 and MECH-4871.)

MECH-4871. Automotive Materials and Manufacturing Methods

The objective of this course is to introduce both the metallic and non-metallic materials employed in automobiles. The content to be covered ranges from the production of introduced automotive materials to their recent development. To understand the rationale for using various automotive materials, the advantages of their manufacturability and properties are discussed. Different manufacturing processes corresponding to specific automotive materials are highlighted. The mechanical properties and microstructure of automotive materials are reviewed. The implementation of automotive materials in automobiles is presented. Upon completing this course, students are expected to understand the basic principles of manufacturing and the advantages and disadvantages of introduced automotive materials over other materials in terms of performance and weight saving. The course also trains students to obtain knowledge of advanced manufacturing processes, structural characterization and property evaluation, and component design of various automotive materials. (Prerequisite: Semester 7 or higher

standing.) (3 lecture, 2 tutorial hours a week.)(Also offered as MECH-4471. Credit cannot be obtained for both MECH-4471 and MECH-4871.)

ENGINEERING MATERIALS COURSES

MECH-3830. Materials and Their Properties

The relationship of the engineering properties of materials to their atomic structure, bonding, crystal structure, imperfections and microstructure. The processing of materials to produce required structure and properties. Includes consideration of crystal structure determination, phase diagrams, diffusion, phase transformations, solidification, heat treatment and deformation. The laboratory is a term-long project designed to familiarize students with the use of materials-related equipment commonly found in industrial and research laboratories. (Prerequisite: GENG-2190 and Semester 6 or higher standing.) (3 lecture, 2 laboratory hours a week.)

MECH-3831. Thermodynamics and Kinetics of Materials

Thermodynamics: review of First and Second Laws, gas laws, humidity, thermochemistry, entropy, reversible and irreversible processes, equilibrium criteria, Gibbs free energy, activity and activity coefficient, solution thermodynamics, Raoult's and Henry's Laws, Gibbs-Duhem equation, alloy phase equilibria, free energy-composition diagrams, Ellingham diagrams. Kinetics: empirical treatment for homogeneous reaction rates, reaction order and specific rate constant, activation energy, Arrhenius' Law, energy distribution in reacting systems, heterogeneous reactions. Selected problems in materials processing to illustrate theory. (Prerequisites: MECH-3212 and Semester 7 or higher standing.) (3 lecture, 2 laboratory hours a week.)

MECH-4820. Ceramic Materials

Uses of traditional and advanced ceramics. Monolithic and composite ceramics. Comparison of ceramics with metals and alloys. Processing: raw material preparation, forming techniques, theory and practice of sintering, quality control. Properties: modulus of rupture, creep, corrosion, erosion, and electrical, magnetic and optical properties. (Prerequisite: Semester 7 or higher standing.) (3 lecture hours, 1 laboratory hours a week.)

MECH-4832. Modern Steels

Traditional and advanced high strength steels. Automotive sheet steels. Stainless and tool steels. Cast irons. Steel industry in Canada. Mechanical and microstructural characterization laboratories. (Prerequisite: Semester 7 or higher standing.) (3 lecture hours, 1 laboratory hour a week.)

MECH-4840. Topics in Materials Engineering

Selected topics of current interest in Materials Engineering. (Prerequisites: Semester 7 or higher standing or permission of instructor.) (3 lecture, 1 laboratory hours a week.)

MECH-4841. Directed Studies in Materials Engineering

A special course of studies in Materials Engineering with content and direction approved by the Department Head. (Prerequisites: Semester 7 or higher standing with a 70% average or better.) (3 lecture hours, 1 laboratory hour a week.)

MECH-4850. Welding Engineering

Design and qualification of arc welding procedures to meet the requirements of the ASME Boiler and Pressure Vessel Code. Arc welding processes, weld discontinuities, mechanical and non-destructive testing. Welding metallurgy, base and filler metal classification. Control of hydrogen-assisted cracking,

preheat and postweld heat treatment. Fabrication issues. Canadian and international welding codes. (Prerequisite: Semester 7 or higher standing.) (3 lecture, 1 laboratory hours a week.)

INDUSTRIAL AND MANUFACTURING SYSTEMS ENGINEERING COURSES

1. Students must have completed at least eight (8) of their 1st year courses before being allowed to register into the 2nd year courses including all pre-requisite courses required for registration into the 2nd year courses.
2. Students must have completed all their 1st year courses and at least ten (10) of their 2nd year courses before being allowed to register into the 3rd year Industrial Engineering courses including all pre-requisite courses required for registration into the 3rd year courses.
3. Students cannot register into any of the 4th year courses until all their courses from 1st, and 2nd year have been completed.
4. Students cannot register into 4th year courses if they have more than two (2) outstanding 3rd year mandatory courses.

INDE-3020. Health, Safety and Human Factors

Fundamentals of manufacturing safety and health are studied to provide manufacturing engineers with the knowledge to effectively incorporate design solutions for health and safety considerations in the workplace. Human capabilities and limitations in the industrial workplace are also assessed and taken into account when implementing design solutions. Topics will include: machine guards, confined space protocol, accident losses, prevention, liabilities and the Workplace Safety and Insurance Board by-laws, the Ontario Occupational Safety and Health Act, and related standards and codes. Also addressed are ergonomic issues such as the design of the workplace and environment, design of display and control systems and human factors in expanding technology. (Pre-requisite: GENG-2190) (3 lecture, 2 laboratory hours a week.)

INDE-3110. Computer-Aided Design and Computer Aided Manufacturing

This courses focuses on CAD/CAM from theory to practice. Basic and generic design principles and tools are introduced and the course material is complemented with significant hands on practice and engineering applications. Students will learn modelling strategies, and advanced computer aided engineering design, analysis, manufacturing and measurement tools. Topics include: Solid modelling, GD & T, tolerance stack ups, assembly modelling and mechanism analysis, process planning, CNC code generation, tool path optimization and principles of measurement.(3 lecture, 2 laboratory hours a week.)

INDE-3120. Operations Research I

Deterministic O. R. models. Linear programming-graphical and simplex methods, duality theory. Transportation, assignment and network models. Sensitivity analysis. Integer programming, branch-and-bound and cutting plane methods, mixed IP algorithms, 0/1 programming. Use of LP and IP computer software programs. Dynamic programming-principle of optimality, stagecoach problems, recursive relationship. (Prerequisite: MATH-1270.) (3 lecture, 2 laboratory hours a week.)

INDE-3150. Product and Process Design

Engineering design and work measurement principals are studied and applied to quantify and reduce the base engineered assembly content of automotive product designs. Non traditional methods for designing and building products for profit are studied with a goal of minimizing total assembly costs, manual labour and associated ergonomic injuries. Recent advances in manufacturing driven product designs in the automotive industry are presented to educate students on the contributions of product

designs to the minimization of assembly costs, assembly labour content and the risk of injuries. (3 lecture and 2 lab hrs per week.)

INDE-3170. Systems Analysis and Design

Fundamental concepts, philosophies, and trends that provide the context of systems analysis and design methods. Information systems in terms of common building blocks: Data, Processes, and Interfaces. Basic concept of systems and systems engineering; system representation; system life cycle; system design process; and system design methods. Formulation of decision problems in engineering and management. Decision criteria. Strategies. Utility theory and decision functions. Information requirements of decision-making systems. Methods in systems analysis and design are applied to a wide variety of problem domains. (3 lecture hours and 2 laboratory/tutorial hours a week.)

INDE-3210. Manufacturing Process Design

This curriculum provides students with the basic science and engineering science background required to lead the design and manufacturing of products for profit in a globally competitive marketplace. Successful students will understand manufacturing in the broadest sense and emphasis is placed on the basic science of converting select raw materials into quality products anywhere on earth. Successful graduates will know and be able to compare the difference between the mechanical behaviors of materials, select materials for manufacturing based on desirable physical properties and lead the design of the most important manufacturing processes used in industry. The manufacturing processes studied include the engineering science of: metal casting, rolling of metals, forging, extrusions and drawing of metals, sheet metal forming, and the forming and shaping of plastics parts. This course includes the laboratory analysis of the materials and the study of manufacturing processes used to produce automotive components. (3 lecture hours and 2 laboratory/tutorial hours a week.) (Prerequisite: GENG-2190, in addition to the program prerequisites.)

INDE-3270. Product Quality and Reliability

Impact of quality on manufacturing processes and product design. Methods and theories of statistical process control. Control charts for attributes and for variables. Process capability analysis and six-sigma method. Acceptance sampling and sampling standards. Reliability engineering and various failure models. Failure modes and effects analysis (FMEA). Taguchi method. Product design and quality function deployment (QFD). ISO 9000/ QS 9000 standards. Total Quality Management (TQM) method. (Prerequisite: GENG-2220.) (3 lecture, 2 tutorial hours a week.)

INDE-3910. Supply Chain Engineering

This course explores the basic concepts of managing the flow of materials in a typical enterprise supply chain. This includes the design and operation of manufacturing and warehousing facilities. Students will examine a complete overview of material and information flow, from internal and external suppliers, to and from the enterprise. Topics covered include: basic elements of the supply chain; planning and managing inventories in supply chains; just-in-time; enterprise resource planning; demand and aggregate planning; the analysis of logistics capabilities and transportation issues; and interrelationships among customer service. The impact of e-commerce on supply chain management is also included. The students have the opportunity to explore and use SAP and other software packages. (Pre-requisite: INDE-3120) (3 lecture, 2 laboratory hours a week.)

INDE-4000. Capstone Industrial Design Projects

Student teams, supervised by faculty, undertake a significant design project, which integrates mathematics, basic sciences, engineering sciences and complementary studies in making informed, thoughtful and creative decisions in devising a product, system, component, or process to meet specified needs. It is a creative open-ended and generative activity often iterative and multidisciplinary, subject to

constraints which may be governed by corporate standards or applicable legislation to varying degrees depending upon the project. These constraints may relate to economic, health, safety, environmental, social or other pertinent factors. Course requirements include seminars, group meetings, oral presentations, and written reports. Faculty advisors and industrial preceptors will advise project groups and evaluate the progress and results of the design projects. (2 lecture hours and 4 laboratory hours a week.) (2 semester course.) (This is an experiential learning course.)

INDE-4120. Operations Research II

Probabilistic O.R. models. Markov chains and their properties; continuous-time Markov chains. Queuing theory; the role of Exponential and Poisson distributions. Applications of queuing theory in production systems. Markovian decision processes. Reliability. Renewal Theory. Use of computer software programs to solve optimization problems in queues and Markov Processes. (Prerequisite: GENG-2220.) (3 lecture, 2 laboratory hours a week.)

INDE-4130. Production Analysis

Analysis and control of production systems. Demand forecasting. Deterministic and stochastic inventory systems. Aggregate planning and master scheduling. Material requirement planning. Operations sequencing and balancing. Job shop scheduling and control systems. Introduction to group technology and flexible manufacturing systems. (Prerequisite: INDE-3120.) (3 lecture and 2 laboratory hours per week.)

INDE-4220. Simulation of Industrial Systems

Introduction to Simulation-Random number and variate generation. Applications to queues, inventories and related models. Special purpose simulation languages-SIMAN/ARENA. Input data analysis and model validation. Simulation output analysis, design of experiments. Use of computer software. (Prerequisite: INDE-3270.) (3 lecture, 2 laboratory hours a week.)

INDE-4280. Facilities Design and Logistics

Approaches to establishing location and layout of space, equipment and services for industrial facilities. Criteria and data for generating & comparing alternatives. Computerized layout planning models, storage systems, AS/RS, Material handling, scope, definitions, and principles, unit load design, types of equipment, flow of material and line balancing. Environmental, human and cost considerations. Electrical and lighting systems and atmospheric systems. (Prerequisite: INDE-3150.) (3 lecture and 2 laboratory hours per week.)

INDE-4300. Directed Study

The student will undertake a literature survey and/or a laboratory project in consultation with the Department Head. A written report is mandatory and participation in the Industrial Engineering Program seminars may be part of the requirement. (Prerequisite: fourth-year standing with at least an 8.0 average.)

INDE-4310. Flexible Manufacturing Systems

Production Systems, Flexible Automation, Computer-Integrated Manufacturing, Group Technology And Cellular Manufacturing, Flexible Manufacturing Systems, Assembly Systems, Materials and tools handling, Robotics In Manufacturing, Principles Of Design For Manufacture, Process Planning And Concurrent Engineering, New Trends-Lean, Agile And Re-Configurable Manufacturing Systems. (Corequisite or prerequisite: INDE-4130 or equivalent.) (3 lecture, 2 tutorial/laboratory hours a week.)

INDE-4350. DOE Techniques for Manufacturing

Use of designed experiments (DOE) in engineering product and process design processes. Experiments involving one factor; ANOVA; fixed, random, and mixed models; randomized blocks, Latin squares, and incomplete block designs. Factorial designs. Fractional designs. The Taguchi method and robust product/process design. Emphasis is put on industrial applications of various designs. (Prerequisite: INDE-3270.) (3 lecture, 2 laboratory hours a week.)

Bachelor of Applied Science in Mechatronics Systems Engineering

The program is for Fall 2025 intake.

This is a joint offering between the Departments of Mechanical and Materials Engineering (MAME) and Electrical and Computer Engineering (ECE)

Total courses: 44 (132 credits). The co-option requires 47 courses (141 credits).

Semester 1 (Fall)

GENG-1101. Engineering 1
GENG-1102. Engineering Graphics
MATH-1270. Linear Algebra with MATLAB
MATH-1720. Differential Calculus
PHYS-1400. Introductory Physics 1

Semester 2 (Winter)

CHEM-1103. Topics in Chemistry
GENG-1201. Cornerstone Design
GENG-1202. Electric and Computing Fundamental
GENG-1110. Engineering Mechanics
MATH-1730. Integral Calculus

Second Year: Students must have declared their major as Mechatronic Systems Engineering and completed at least eight (8) of their first-year courses before being allowed to register for the second-year courses (including all specifically required pre-requisite courses)

Semester 3 (Fall)

MATH-2780. Vector Calculus
GENG-2101. Engineering 2
GENG-2320. Software Fundamentals
PHYS-2100. Topics in Physics
ELEC-2140. Circuit Analysis I
ELEC-2240. Signals and Systems

Semester 4 (Winter)

MATH-2790. Differential Equations
GENG-2220. Treatment of Experiential Data
GENG-2201. Engineering Design Projects II
ELEC-2170. Digital Logic Design I
TRON-2201. Kinematics and Dynamics of Machines
1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

Summer

GENG-2980. Work Term I (Co-op students only)

Third Year: Students must have completed all the first-year courses and at least ten (10) of their second-year courses before being allowed to register for the third-year courses (including all specifically required pre-requisite courses).

Semester 5 (Fall)

GENG-3130. Engineering Economics

ELEC-3130. Electromechanical Systems I

MECH-4212. Mechatronics

ELEC-3240. Control Systems I

1 course from the approved Faculty of Engineering Complementary Studies List A or B*

*Students must take one course from List A and one course from List B.

(Winter)

GENG-3980. Work Term II (Co-op students only)

Semester 6 (Summer)

GENG-3201. Engineering Design Projects III

ELEC-2260. Electronics I

TRON-3201. Solid Mechanics

TRON-3202. Fluid Power Systems

TRON-3203. Thermodynamics and Heat Transfer

Fourth Year: Students must have completed all first and second-year courses, and at least eight (8) third-year courses before being allowed to register for the fourth-year courses (including all specifically required pre-requisite courses).

Fall

GENG-4980. Work Term III

Semester 7 (Winter)

Capstone Design A (+ethics lectures)

GENG-4500. Artificial Intelligence and Machine Learning

ELEC-4430. Embedded System Design

ELEC-4350. Microelectromech. Systems

Specialization Course 1

Specialization Course 2

Semester 8 (Summer)

Capstone Design B (+law lectures)

TRON-4201. Sensors and Electronic Actuators

MECH-4221. Machine Design

ELEC-4570. Fundamentals of Digital Signal Processing

Specialization Course 3

Specialization Course 4

Area of Specialization 1: Autonomous Vehicle

Specialization Course 1: ELEC-4340. Automotive Electronics

Specialization Course 2: TRON-4045. Autonomous Systems-Localization, Navigation and Mapping Systems

Specialization Course 3: TRON-4015. Intelligent Machines, Connected Vehicles, Cyber Security and Human Safety

Specialization Course 4: MECH-4463. Vehicle Dynamics

Area of Specialization 2: Intelligent Manufacturing

Specialization Course 1: GENG-4300. Intelligent and Digital Manufacturing

Specialization Course 2: ENG-4600. Robotics

Specialization Course 3: TRON-4025. Distributed Control Systems- Connectivity and Cyber Security

Specialization Course 4: TRON-4035. Computer Integrated Manufacturing

MECHATRONIC COURSES

TRON-2201. Kinematics and Dynamics of Machines

This course covers the principles of motion and force analysis applied to machines, including moments of inertia, kinematics of rigid bodies; plane motion, forces and accelerations for rigid bodies, work-energy and impulse-momentum methods; the fundamentals of mechanisms and machines, the kinetics and kinematics of particles; kinematic and dynamic analysis of linkages, cam-based, gear-based, and intermittent motion mechanisms, static and dynamic analysis of mechanical flywheels, balancing of reciprocating and rotating masses. (Prerequisites: GENG-1101 and PHYS-2100) (Corequisite: MATH-2780.) (This is an experiential learning course.)

TRON-3201. Solid Mechanics

This course introduces fundamental principles of Solid Mechanics and their application in the design and analysis of mechanical components within mechatronic systems. The course covers the concepts of stresses and strains in simple and complex structures under different loading conditions, stress transformation and failure criterion, material properties (such as elasticity, strength), and behavior of solid materials under the influence of external forces. (Prerequisites: GENG-1101 and TRON-2201) (Corequisite:GENG-3210.) (This is an experiential learning course.)

TRON-3202. Fluid Power Systems

This course covers fundamental principles of fluid power. This course provides an in-depth study of hydraulic and pneumatic systems, exploring the principles, components, and applications of fluid power in mechanical settings. The laws and equations that govern hydraulic and pneumatic systems to find pressure, force and area of the components and the selection criteria for specific applications will be covered. Through analyzing the fluid power control circuits, students will also learn to inspect, diagnose, and recommend repairs in hydraulic and pneumatic systems. (Prerequisite: PHYS-2100) (Co-requisite: TRON-3203)

TRON-3203. Thermodynamics and Heat Transfer

This course covers the laws of thermodynamics that govern the behavior of energy in systems, providing fundamental principles used to analyze and design a wide range of processes, including those found in mechatronics. Key concepts include energy conservation, heat transfer, work done, and the efficiency of energy conversion processes. Students will learn about the analysis of steady and transient thermal systems involving heat transfer by conduction, convection, and radiation and of mass transfer by molecular diffusion and convection as well as the thermal analysis of heat exchangers and heat transfer

systems involving a change of state. (Prerequisite: PHYS-2100) (Co-requisite: TRON-3202) (This is an experiential learning course.)

TRON-4201. Sensors and Electronic Actuators

This course explores the principles, types, and applications of sensors and electronic actuators, equipping students with the knowledge and skills to design and implement mechatronic systems. Topics include operating principles, design considerations, and applications of analog sensors, digital transducers, stepper motors, continuous-drive actuators, and drive system electronics. Component integration and design considerations are studied through examples selected from various mechatronic applications. (Prerequisites: ELEC-3130, TRON -3203, MECH -4212) (This is an experiential learning course.)

TRON-4015. Intelligent Machines and Connected Vehicles

This course focuses on the intelligent vehicles where both AI algorithms and their system aspects are studied. The topics covered include key concepts of the perception-planning-control pipeline for autonomous driving; key concepts of machine learning (ML), especially reinforcement learning (RL), and deep reinforcement learning (DRL); hands-on exercises with one of the popular open-source ML frameworks such as Tensorflow or PyTorch. Training, deployment, and validation of ML-based autonomous driving algorithms in a simulation environment. This course is one of the four specialization courses introduced in the fourth year and is specific to the area of specialization of Autonomous Vehicles. (Prerequisite: ELEC-4430 and GENG 4500) (This is an experiential learning course.)

TRON-4025. Distributed Control Systems- Connectivity and Cyber Security

This course focuses on the critical aspects of connectivity and cybersecurity within Distributed Control Systems (DCS) used in industrial settings. Unlike PLCs (programmable logic controllers), which are typically used to control just one machine, DCSs can control several machines or processes at the same time. The systems are often used in critical infrastructure industries such as electric power generators, transportation systems, telecommunication systems, and others, highlighting the importance of DCS systems in the increasingly networked world we live in. This course describes the fundamental blocks in the DCS systems and explains the different vulnerabilities and threats to these systems. Plus, it provides a comprehensive technical guide on up-to-date secure defending theories and technologies, novel design, and systematic understanding of secure architecture and some practical applications. This course is one of the four specialization courses introduced in the fourth year specific to the area of specialization of Intelligent Manufacturing. (Prerequisites: ELEC 3240, MECH-4212) (This is an experiential learning course.)

TRON-4035. Computer Integrated Manufacturing

This course provides an in-depth exploration of the integration of computer technologies in manufacturing processes, emphasizing flexibility and adaptability in modern industrial settings. The course introduces all the major elements in an enterprise including product design, manufacturing production, operational control systems, and their integration using information technology. Students will be equipped to contribute to the design, implementation, and optimization of manufacturing systems, fostering adaptability and efficiency in a rapidly evolving industrial landscape. This course is one of the four specialization courses introduced in the fourth year for students in the area of specialization of Intelligent Manufacturing. (This is an experiential learning course.)

TRON-4045. Autonomous Systems-Localization, Navigation and Mapping Systems

This course offers a comprehensive exploration of the fundamental concepts, technologies, algorithms, and methodologies essential for enabling autonomous systems to autonomously navigate, localize themselves, and create accurate maps of their environment. The course will show the theoretical foundations and will also have a considerable experimental component based on Matlab/ROS. The basic

concepts in probability followed by probabilistic approaches for data fusion such as Bayes Filters, Kalman Filter, Extended Kalman Filter, Unscented Kalman Filters, and Particle Filters will be provided. The course will also introduce the SLAM problem, showing how this has recently been solved using batch optimization and graph methods. Finally, mapping algorithms will be briefly discussed. This course is one of the four specialization courses introduced in the fourth year and is specific to the area of specialization of Autonomous Vehicles. (This is an experiential learning course.)

FACULTY OF HUMAN KINETICS

PROGRAMS

Honours Bachelor of Science (Kinesiology and Health Studies)

The Honours Bachelor of Science (Kinesiology and Health Studies) is for students interested in entering the general field of science as it relates to human activity as teachers, physicians, chiropractors, physiotherapists, exercise consultants, sport and exercise psychology consultants, sport therapists, athletic trainers, ergonomic specialists in the biomechanics of movement, and human performance specialists in motor development and memory. This program is recognized by The College of Kinesiologists of Ontario and Ontario Kinesiology Association. Graduates are also qualified to enter graduate school or a Faculty of Education.

Degree Requirements

Total courses: forty.

(a) Human Kinetics Core Courses (TAKE ALL):

- o KINE-1000. Health and Wellness
- o KINE-2250. Ethics in Sport and Physical Activity
- o KINE-2690. Measurement and Evaluation
- o KINE-2700. Research Design

(b) Required Kinesiology and Health Studies Courses (TAKE ALL):

- o KINE-1110. Principles of Mental Skills Training
- o KINE-1650. Functional Anatomy
- o KINE-1660. Functional Anatomy II
- o KINE-1800. Fundamental Mechanics of Human Motion
- o KINE-2040. Sport Nutrition
- o KINE-2100. Human Performance
- o KINE-2240. Physical Ergonomics and Injury Prevention
- o KINE-2600. Physiology of Human Performance
- o KINE-2850. Human Growth and Development

Kinesiology and Health Studies Course (SELECT 10 COURSES):

- o KINE-3010. The Use and Abuse of Drugs
- o KINE-3020. Exercise Psychology
- o KINE-3030. Imagery Effects on Performance
- o KINE-3060. Obesity and Eating Disorders
- o KINE-3100. Motor Learning and Control
- o KINE-3330. Applied Sport Psychology
- o KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- o KINE-3600. Respiratory Physiology
- o KINE-3610. Musculoskeletal Physiology
- o KINE-3630. Cognitive Ergonomics

- o KINE-3150. Scientific Principles of Strength and Conditioning
- o KINE-3770. Sport Tactics and Strategies
- o KINE-3800. Global Perspectives in Human Kinetics
- o KINE-4000. Human Movement and Aging
- o KINE-4040. Population Health
- o KINE-4080. Dynamics of Skill Acquisition
- o KINE-4100. Physical Activity for Special Populations
- o KINE-4150. Fundamentals and Application of Sport Science
- o KINE-4330. Selected Topics in Sport Leadership
- o KINE-4530. Perceptual Motor Development
- o KINE-4580. The Endocrine System in Sport, Exercise and Health
- o KINE-4600. Cardiovascular Physiology
- o KINE-4610. Clinical Exercise Rehabilitation
- o KINE-4620. Exercise in Extreme Environments
- o KINE-4630. Applied Neurophysiology
- o KINE-4640. The Pathophysiology of Pain
- o KINE-4650. Advanced Physical Ergonomics and Injury Prevention
- o KINE-4660. Cardiac Rehabilitation
- o KINE-4670. User Experience
- o KINE-4710. Sports Therapy
- o KINE-4750. Individual Studies
- o KINE-4760. Principles of Coaching
- o KINE-4770. Outdoor Recreation
- o KINE-4780. Undergraduate Thesis* (6 credits)
- o KINE-4800. Advanced Biomechanics
- o KINE-4850. Group Dynamics in Sport
- o KINE-4900. Special Topics in Kinesiology and Health Studies
- o KINE-4980. Internship (4 months)

Kinesiology and Health Studies Labs (SELECT 2 COURSES):

- o KINE-4920. Laboratory Experiences in Kinesiology I
- o KINE-4930. Laboratory Experiences in Kinesiology II

(c) six courses from the Faculty of Engineering, the Faculty of Nursing, Department of Psychology, the Faculty of Science and/or the Faculty of Education (Minor in Organizational Learning and Teaching only).

(d) five courses from any area of study, excluding KINE courses.

(e) two courses from any area of study, including 1000 or 2000 level KINE courses.

(f) two courses from any area of study, including Practice Theory and Analysis (PTA) or 3000 level KINE courses.

Of the eight courses in requirements (c) and (f), at least seven must be at the 2000 level or above.

*KINE-4780 is a 6-credit course, and as such, students successfully completing KINE-4780 will be required to take only 9 of the Kinesiology and Health Studies elective courses listed in section (b).

Honours Bachelor of Sport Management and Leadership

The Honours Bachelor of Sport Management and Leadership prepares students to be managers and leaders in the contemporary sport industry, with an understanding of the social, historical, and cultural influences of and in sport. Graduates typically assume positions with government agencies, municipal recreation units, public and private sport organizations, public and private sport and recreation facilities, and amateur or professional sports organizations. Graduates also are prepared to enter graduate school or a Faculty of Education.

Degree Requirements

Total courses: forty.

(a) Human Kinetics Core Courses (TAKE ALL):

- o KINE-1000. Health and Wellness
- o KINE-2690. Measurement and Evaluation
- o KINE-2700. Research Design

(b) Required Sport Management and Leadership Courses (TAKE ALL):

- o KINE-1200. Introduction to the Sport Industry
- o KINE-1330. Introduction to Sport Leadership
- o KINE-1400. Historical Perspectives on Physical Activity and Sport in Western Civilization
- o KINE-1500. Principles of Sport Management
- o KINE-1560. Communication for the Sport Industry
- o KINE-2300. Sociology of Sport
- o KINE-2450. Sport Marketing
- o KINE-2500. Organizational Behaviour
- o KINE-2520. Sport Finance
- o KINE-3400. History of the Modern Olympic Movement
- o KINE-4050. Gender Issues in Sport
- o KINE-4330. Selected Topics in Sport Leadership
- o KINE-4500. Human Resources in Sport Management
- o KINE-4510. Sport and the Law
- o KINE-4590. Sport Media

Sport Management and Leadership Courses (SELECT 7 COURSES):

- o KINE-3330. Applied Sport Psychology
- o KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- o KINE-3510. Sport Event Management
- o KINE-3550. Socio-Economic Aspects of Sport and Leisure
- o KINE-3770. Sport Tactics and Strategies
- o KINE-3800. Global Perspectives in Human Kinetics
- o KINE-4040. Population Health
- o KINE-4400. History of Sport in Canada
- o KINE-4410. Sport in America
- o KINE-4520. Sport Policy and Governance
- o KINE-4550. Global Issues in Sport Management
- o KINE-4560. Sport Communication
- o KINE-4570. Hockey in Canada
- o KINE-4730. The Social Construction of Leisure

- o KINE-4750. Individual Studies
- o KINE-4760. Principles of Coaching
- o KINE-4770. Outdoor Recreation
- o KINE-4780. Undergraduate Thesis* (6 credits)
- o KINE-4850. Group Dynamics in Sport
- o KINE-4890. Special Topics in Sport Management and Leadership
- o KINE-4980. Internship (4 months)

(c) six courses from the Faculty of Arts, Humanities and Social Sciences, the Odette School of Business, and/or the Faculty of Education (Minor in Organizational Learning and Teaching only) and/or Economics.

(d) five courses from any area of study, excluding KINE courses.

(e) two courses from any area of study, including 1000 or 2000 level KINE courses.

(f) two courses from any area of study, including Practice Theory and Analysis (PTA) courses or 3000 level and above KINE courses.

Of the eight courses in requirements (c) and (f), at least seven must be at the 2000 level or above.

*KINE-4780 is a 6-credit course, and as such, students successfully completing KINE-4780 will be required to take only 7 of the other Sport Management and Leadership elective courses listed in section (b).

Honours Bachelor of Sport Management and Leadership for Graduates of Lambton College's Three-Year Sport and Recreation Management Diploma

Admission Requirements

A student may enter the Honours Bachelor of Sport Management and Leadership program after completing the three-year Diploma in Sports and Recreation Management with a cumulative average equivalent to a 70% (B- or 3.0/4) or better.

Degree Requirements

Total Courses: 20

- a) Required Sport Management and Leadership Courses (TAKE ALL)
- o KINE-1330. Introduction to Sport Leadership
 - o KINE-1400. Historical Perspectives on Physical Activity and Sport in Western Civilization
 - o KINE-1560. Communication for the Sport Industry
 - o KINE-2300. Sociology of Sport
 - o KINE-2520. Sport Finance
 - o KINE-2690. Measurement and Evaluation
 - o KINE-2700. Research Design
 - o KINE-2500. Organizational Behaviour
 - o KINE-3400. History of the Modern Olympic Movement
 - o KINE-4050. Gender Issues in Sport

- KINE-4330. Special Topics in Sport Leadership
- KINE-4500. Human Resources in Sport Management
- KINE-4510. Sport and the Law
- KINE-4590. Sport Media

b) Sport Management and Leadership Courses (SELECT 6 COURSES)

- KINE-3330. Applied Sport Psychology
- KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- KINE-3510. Sport Event Management
- KINE-3550. Socio-Economic Aspects of Sport and Leisure
- KINE-3770. Sport Tactics and Strategies
- KINE-3800. Global Perspectives in Human Kinetics
- KINE-4040. Population Health
- KINE-4400. History of Sport in Canada
- KINE-4410. Sport in America
- KINE-4520. Sport Policy and Governance
- KINE-4550. Global Issues in Sport Management
- KINE-4560. Sport Communication
- KINE-4570. Hockey in Canada
- KINE-4730. The Social Construction of Leisure
- KINE-4750. Individual Studies
- KINE-4760. Principles of Coaching
- KINE-4770. Outdoor Recreation
- KINE-4780. Undergraduate Thesis (6 credits)
- KINE-4850. Group Dynamics in Sport
- KINE-4890. Special Topics in Sport Management and Leadership
- KINE-4980. Internship (4 months)

Honours Bachelor of Sport Management and Leadership for Graduates of Durham College's Three-Year Advanced Diploma in Sport Management Diploma

Admission Requirements

A student may enter the Honours Bachelor of Sport Management and Leadership program after completing the three-year Advanced Diploma in Sport Management with a cumulative average equivalent to a 70% (B- or 3.0/4) or better.

Degree Requirements

Total Courses: 20

a) Required Sport Management and Leadership Courses (TAKE ALL)

- KINE-1000. Health and Wellness

 - KINE-4780. Undergraduate Thesis (6 credits)
 - KINE-4850. Group Dynamics in Sport
 - KINE-4890. Special Topics in Sport Management and Leadership
 - KINE-4980. Internship (4 months)
- (c) Take 2 non-KINE courses from the Faculty of Arts, Humanities and Social Sciences, the Odette School of Business, and/or the Faculty of Education (Minor in Organizational Learning and Teaching only) and/or Economics.

Honours Bachelor of Sport Management and Leadership for Graduates of St. Clair College's Three-Year Sport and Recreation Management Diploma

Admission Requirements

Students may enter the Honours Bachelor of Sport Management and Leadership program after completing the three-year Diploma in Sport and Recreation Management with a cumulative average equivalent to a 70% (B- or 3.0/4) or better.

Degree Requirements

Total courses: 20

- a) Required Sport Management and Leadership Courses (TAKE ALL):
- KINE-1000. Health and Wellness
 - KINE-1400. Historical Perspectives on Physical Activity and Sport in Western Civilization
 - KINE-1560. Communication for the Sport Industry
 - KINE-2300. Sociology of Sport
 - KINE-2500. Organizational Behaviour
 - KINE-2690. Measurement and Evaluation
 - KINE-2700. Research Design
 - KINE-3400. History of the Modern Olympic Movement
 - KINE-4050. Gender Issues in Sport
 - KINE-4330. Special Topics in Sport Leadership
 - KINE-4510. Sport and the Law
 - KINE-4590. Sport Media
- (b) Sport Management and Leadership (SELECT 6 COURSES)
- KINE-3330. Applied Sport Psychology
 - KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
 - KINE-3510. Sport Event Management
 - KINE-3550. Socio-Economic Aspects of Sport and Leisure
 - KINE-3770. Sport Tactics and Strategies
 - KINE-3800. Global Perspectives in Human Kinetics
 - KINE-4040. Population Health
 - KINE-4400. History of Sport in Canada
 - KINE-4410. Sport in America
 - KINE-4520. Sport Policy and Governance
 - KINE-4550. Global Issues in Sport Management
 - KINE-4560. Sport Communication
 - KINE-4570. Hockey in Canada
 - KINE-4730. The Social Construction of Leisure
 - KINE-4750. Individual Studies
 - KINE-4760. Principles of Coaching
 - KINE-4770. Outdoor Recreation
 - KINE-4780. Undergraduate Thesis (6 credits)
 - KINE-4850. Group Dynamics in Sport
 - KINE-4890. Special Topics in Sport Management and Leadership
 - KINE-4980. Internship (4 months)
- (c) Take 2 Non-KINE courses from the Faculty of Arts, Humanities and Social Sciences, the Odette School of Business, and/or the Faculty of Education (Minor in Organizational Learning and Teaching only) and/or Economics.

Honours Bachelor of Sport Management and Leadership (Degree Completion) for Graduates of Saskatchewan Polytechnic Business Sport Management

Admission Requirements

A student may enter the Honours BMSL degree after completing the two-year Diploma in Business - Sport Management with a cumulative average equivalent to a 70% (3.0) or better.

Degree requirements

Total courses: 20

(a) Required courses

Year 1 and 2 courses

- KINE-1000. Health and Wellness
- KINE 1330. Introduction to Sport Leadership
- KINE-1400. Historical Perspectives on Physical Activity and Sport in Western Civilization
- KINE-1560. Communication for the Sport Industry
- KINE-2520. Sport Finance
- KINE-2690. Measurement and Evaluation
- KINE-2700. Research Design

Year 3 and 4 courses

- KINE-3400. History of the Modern Olympic Movement
- KINE-4050. Gender Issues in Sport
- KINE-4330. Special Topics in Sport Leadership
- KINE-4500. Human Resources in Sport Management
- KINE-4510. Sport and the Law
- KINE-4590. Sport Media

(b) Sport Management and Leadership Courses

Take 4 courses from:

- KINE-3330. Applied Sport Psychology
- KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- KINE-3550. Socio-Economic Aspects of Sport and Leisure
- KINE-3770. Sport Tactics and Strategies
- KINE-3800. Global Perspectives in Human Kinetics
- KINE-4020. Sport Tourism
- KINE-4040. Population Health
- KINE-4400. History of Sport in Canada
- KINE-4410. Sport in America
- KINE-4520. Sport Policy and Governance
- KINE-4550. Global Issues in Sport Management
- KINE-4560. Sport Communication
- KINE-4570. Hockey in Canada
- KINE-4730. The Social Construction of Leisure
- KINE-4750. Individual Studies (01, 02)
- KINE-4760. Principles of Coaching
- KINE-4770. Outdoor Recreation
- KINE-4780. Undergraduate Thesis (6 units)
- KINE-4850. Group Dynamics in Sport
- KINE-4890. Special Topics in Sport Management and Leadership
- KINE-4980. Internship (4 months)

(c) two courses from any area of study, excluding Kinesiology.

- (d) One courses from any area of study, including Practice Theory and Analysis (PTA) courses or 3000 level and above courses from Kinesiology

Courses used to calculate the major average are: all of the above, excluding the 2 elective courses listed in (c).

Honours Bachelor of Science (Kinesiology and Health Studies) for Graduates of St. Clair College's Two-Year Fitness and Health Promotion Diploma

Admission Requirements

A student may enter the Honours Bachelor of Science (Kinesiology and Health Studies) after completing the two-year Diploma in Fitness and Health Promotion with a cumulative average equivalent to a 70% (B- or 3.0/4) or better.

Degree Requirements

Total Courses: 25

(a) Required Kinesiology and Health Studies Courses (TAKE ALL)

- KINE-1110. Principles of Mental Skills Training
- KINE-1660. Functional Anatomy II
- KINE-2040. Sport Nutrition
- KINE-2240. Physical Ergonomics and Injury Prevention
- KINE-2250. Ethics in Sport and Physical Activity
- KINE-2600. Physiology of Human Performance
- KINE-2690. Measurement and Evaluation
- KINE-2700. Research Design
- KINE-2850. Human Growth and Development

(b) Kinesiology and Health Studies courses (SELECT 6 COURSES):

- KINE-3010. Use and Abuse of Drugs
- KINE-3020. Exercise Psychology
- KINE-3030. Imagery Effects on Performance
- KINE-3060. Obesity and Eating Disorders
- KINE-3100. Motor Learning and Control
- KINE-3330. Applied Sport Psychology
- KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- KINE-3600. Respiratory Physiology
- KINE-3610. Musculoskeletal Physiology
- KINE-3630. Cognitive Ergonomics
- KINE-3770. Sport Tactics and Strategies
- KINE-3800. Global Perspectives in Human Kinetics
- KINE-4000. Human Movement and Aging
- KINE-4040. Population Health
- KINE-4080. Dynamics of Skill Acquisition
- KINE-4530. Perceptual Motor Development
- KINE-4580. The Endocrine System in Sport, Exercise and Health
- KINE-4600. Cardiovascular Physiology

- KINE-4610. Clinical Exercise Rehabilitation
- KINE-4620. Exercise in Extreme Environments
- KINE-4630. Applied Neurophysiology
- KINE-4640. The Pathophysiology of Pain
- KINE-4650. Advanced Physical Ergonomics and Injury Prevention
- KINE-4660. Cardiac Rehabilitation
- KINE-4670. User Experience
- KINE-4710. Sports Therapy
- KINE-4750. Individual Studies
- KINE-4760. Principles of Coaching
- KINE-4770. Outdoor Recreation
- KINE-4780. Undergraduate Thesis (6 credits)
- KINE-4800. Advanced Biomechanics
- KINE-4850. Group Dynamics in Sport
- KINE-4900. Special Topics in Kinesiology and Health Studies

Kinesiology and Health Studies Laboratory (SELECT 1 COURSE):

- KINE-4930 Laboratory Experiences in Kinesiology II

- (c) six courses from the Faculty of Engineering, the Faculty of Nursing, Department of Psychology, the Faculty of Science and/or the Faculty of Education (Minor in Organizational Learning and Teaching only).

NOTE: Of the six courses in requirements (c) all must be at the 2000 level or above.

- (d) two courses from any area of study, excluding KINE courses.

Transfer credit obtained through this articulation agreement is subject to re-evaluation in cases where the student decides to transfer into another program at the University.

Honours Bachelor of Science (Kinesiology and Health Studies) for Graduates of Fanshawe College's Two-Year Fitness and Health Promotion Diploma

Admission Requirements

A student may enter the Honours Bachelor of Science (Kinesiology and Health Sciences) program after completing the two-year Diploma in Fitness and Health Promotion from Fanshawe College with a cumulative average equivalent to a 70% (B- or 3.0/4) or better.

Degree Requirements:

Total courses: 25

- (a) Required Kinesiology and Health Studies Courses (TAKE ALL):
- KINE-1110. Principles of Mental Skills Training
 - KINE-1660. Functional Anatomy II
 - KINE-1800. Fundamental Mechanics of Human Motion
 - KINE-2040. Sport Nutrition
 - KINE-2100. Human Performance

- KINE-2240. Physical Ergonomics and Injury Prevention
- KINE-2250. Ethics in Sport and Physical Activity
- KINE-2690. Measurement and Evaluation
- KINE-2700. Research Design
- KINE-2850. Human Growth and Development

(b) Kinesiology and Health Studies courses (SELECT 6 COURSES):

- KINE-3010. Use and Abuse of Drugs
- KINE-3020. Exercise Psychology
- KINE-3030. Imagery Effects on Performance
- KINE-3060. Obesity and Eating Disorders
- KINE-3100. Motor Learning and Control
- KINE-3330. Applied Sport Psychology
- KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence
- KINE-3600. Respiratory Physiology
- KINE-3610. Musculoskeletal Physiology
- KINE-3630. Cognitive Ergonomics
- KINE-3770. Sport Tactics and Strategies
- KINE-3800. Global Perspectives in Human Kinetics
- KINE-4000. Human Movement and Aging
- KINE-4040. Population Health
- KINE-4080. Dynamics of Skill Acquisition
- KINE-4100. Physical Activity for Special Populations
- KINE-4530. Perceptual Motor Development
- KINE-4580. The Endocrine System in Sport, Exercise and Health
- KINE-4600. Cardiovascular Physiology
- KINE-4610. Clinical Exercise Rehabilitation
- KINE-4620. Exercise in Extreme Environments
- KINE-4630. Applied Neurophysiology
- KINE-4640. The Pathophysiology of Pain
- KINE-4650. Advanced Physical Ergonomics and Injury Prevention
- KINE-4660. Cardiac Rehabilitation
- KINE-4670. User Experience
- KINE-4710. Sports Therapy
- KINE-4750. Individual Studies
- KINE-4760. Principles of Coaching
- KINE-4770. Outdoor Recreation
- KINE-4780. Undergraduate Thesis (6 credits)
- KINE-4800. Advanced Biomechanics
- KINE-4850. Group Dynamics in Sport
- KINE-4900. Special Topics in Kinesiology and Health Studies

(c) Kinesiology and Health Studies Laboratory (SELECT 2 COURSES):

- KINE-4920. Laboratory Experiences in Kinesiology I
- KINE-4930. Laboratory Experiences in Kinesiology II

(c) (six) courses from the Faculty of Engineering, the Faculty of Nursing, Department of Psychology, the Faculty of Science and/or the Faculty of Education (Minor in Organizational Learning and Teaching only).

(d) (one) course from any area of study, excluding KINE courses.

NOTE: Of the six courses in requirements (c) all must be at the 2000 level or above.

Transfer credit obtained through this articulation agreement is subject to re-evaluation in cases where the student decides to transfer into another program at the University.

Honours Bachelor of Science (Kinesiology and Health Studies) for Graduates of Lambton College of Applied Arts and Technology's Massage Therapy Diploma

Articulation Agreement: A student may enter the Honours Bachelor of Science (Kinesiology and Health Studies) after completing the three-year Diploma in Massage Therapy with a minimum cumulative average equivalent to a B or better and a minimum cumulative grade of B or better for each college course or group of college courses for which transfer credit may be granted. Up to ten transfer credits may be given.

For information on Course Equivalencies contact the Registrar's Office or the Head of the Department of Kinesiology.

Bachelor of Science (Kinesiology and Health Studies) for Graduates of Fanshawe College's Recreation and Leisure Services Diploma

Articulation Agreement: Students who have completed the two-year Recreation and Leisure Services Diploma at Fanshawe College with a cumulative average grade of B may receive up to ten Kinesiology credits to be determined by the Faculty of Human Kinetics, provided they passed the respective college courses with a grade of B- or better. For information on Course Equivalencies contact the Registrar's office or the Head of the Department of Kinesiology.

Certificate in Coaching

Admission Requirements

All students who have met the entrance requirements for the Honours Bachelor of Science (Kinesiology and Health Studies) or the Honours Bachelor of Sport Management and Leadership, who are in good standing and completed the required courses of the first two years, or who have successfully been awarded a Honours Bachelor of Science (Kinesiology and Health Studies) or the Honours Bachelor of Sport Management and Leadership or equivalent degrees are eligible to register for the certificate program.

Degree requirements

Total courses: 10

(a) Required Kinesiology Courses (TAKE ALL):

- KIN-1110. Principles of Mental Skills Training
- KINE-1500. Principles of Sport Management
- KINE-3770. Sports Tactics and Strategies
- KINE-4760. Principles of Coaching
- KINE-4980. Internship*

(b) Kinesiology Courses (SELECT 1 COURSE):

- KINE-2100. Human Performance
- KINE-2850. Human Growth and Development

Elective Kinesiology Courses (SELECT 4 COURSES)

- KINE-2300. Sociology of Sport
- KINE-3150. Scientific Principles of Strength and Conditioning
- KINE-3330. Applied Sport Psychology
- KINE-4050. Gender Issues in Sport
- KINE-4330. Special Topics in Sport Leadership
- KINE-4850. Group Dynamics in Sport
- KINE-4750. Individual Studies*

*Note. For KINE-4980 (Internship), and for students electing to take KINE-4750 (Individual Studies), students must pursue research or job placements related to coaching to be eligible towards this certificate.

Certificate in Human Factors and Ergonomics

Admission Requirements

All students who have met the entrance requirements for the Honours Bachelor of Science (Kinesiology and Health Studies), who are in good standing and completed the required courses of the first two years, or who have successfully been awarded a Honours Bachelor of Science (Kinesiology and Health Studies) or equivalent Kinesiology degree are eligible to register for the certificate program.

Degree requirements

Total courses: 10

(c) Required Kinesiology and Health Studies Courses (TAKE ALL):

- KINE-2620. Human Factors and Performance
- KINE-4650. Advanced Physical Ergonomics and Injury-Prevention
- KINE-3630. Fundamentals of Cognition for Ergonomics
- KINE-4670. User Experience
- KINE-4980. Internship (4 months)¹

(d) Kinesiology and Health Studies courses (SELECT 1 COURSE):

- KINE-4750. Individual Study¹
- KINE-4930. Laboratory Experiences in Kinesiology II

(e) Kinesiology and Health Studies courses (SELECT 3 COURSES)

- KINE-3100. Motor Learning and Control
- KINE-3610. Musculoskeletal Physiology
- KINE-4000. Human Movement and Aging
- KINE-4080. Dynamics of Skill Acquisition
- KINE-4530. Perceptual-Motor Development
- KINE-4800. Advanced Biomechanics
- KINE-4640. Pathophysiology of Pain

- (f) Outside Kinesiology (SELECT 1 COURSE)
- WORK-2000. Labour Law and Workers' Rights
 - WORK-2500. Worker Health and Safety

NOTES:

¹For KINE-4980 (Internship), and for students electing to take KINE-4750 (Individual Study), students MUST pursue research or job placements related to the human factors and ergonomics field to be eligible towards this certificate.

²Students are also encouraged to pursue other research, volunteer, or shadowing opportunities under the mentorship or supervision of a Canadian College Certified Professional Ergonomist (CCPE), an individual certified through an International Ergonomics Association (IEA) accredited certification body, an Association of Canadian Ergonomists (ACE) Fellow, or Faculty member in the Faculty of Human Kinetics.

Co-operative Education Program Regulations

The Co-operative Education Program is designed for highly motivated students who wish to develop their skills, increase their knowledge, and gain career-related experience. Students may apply into the Honours Bachelor of Science (Kinesiology and Health Studies) Co-op Program or the Honours Bachelor of Sport Management and Leadership Co-op Program following the completion of their first term of study. There are 25 available Co-op openings for each application cycle.

The following criteria have been established to evaluate such applications:

- 1) academic achievement based on first term of study;
- 2) previous volunteer and paid work experience;
- 3) an application form and resume;
- 4) an interview with the student.

Withdrawal from the Co-op program will be granted on an exception basis only as it must be determined that the student has no outstanding commitments to employers. Students who wish to withdraw must meet with a Co-op Coordinator and complete a withdrawal form. However, the only time a student may withdraw from an undergraduate Co-op program without further Co-op fee payment implications is by the 1st Friday of classes after their first Co-op work term. Students who withdraw from the Co-op program at any other time will be liable for paying the Co-op fee for the term in which they are dropping and one additional term. This will help offset the costs of developing another student for placement.

In the interest of building solid partnerships with employers, students who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on the student's transcript for that work term.

Students must register during their work terms in KINE-2990, KINE-3990, and KINE-4990 successively. Each work term will be graded on a Pass/Fail basis as a result of the successful completion of each of the following:

- Submission of learning objectives approved by the employer
- Work term assessment evaluation by the employer
- Final employer work term evaluation
- Work term report evaluation by faculty and by the employer
- Work term presentation evaluation by faculty

All Co-op positions must be full-time, paid, related to the degree program, and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

A Co-op fee is charged in each term beginning with the Winter term of Year 1. The fee is not a job-placement fee, but is levied to help defer the administrative costs associated with the program.

WORK/STUDY SEQUENCE

Option One

FIRST YEAR

Fall Term: Study term.

Winter Term: Study term.

Summer Term: Off.

SECOND YEAR

Fall Term: Study term.

Winter Term: Work term.

Summer Term: Study term.

THIRD YEAR

Fall Term: Work term.

Winter Term: Study term.

Summer Term: Work term or optional term.*

FOURTH YEAR

Fall Term: Study term.

Winter Term: Study term.

Summer Term: Work term or optional term.*

FIFTH YEAR

Fall Term: Study term.

*The requirement of a third work term may be fulfilled in the Summer of either the third or fourth year.

Option Two: Fast-Track

Students wishing to complete the Co-op program in Kinesiology may do so in four years. This requires careful planning and scheduling. Students wishing to "fast-track" through the Co-op Program are advised to meet with the faculty contact for Co-op in the Department of Kinesiology to discuss a strategy.

KINESIOLOGY COURSES

Not all courses listed will necessarily be offered each year.

Unless otherwise indicated, all courses are open to non-Kinesiology-Kinesiology and Health Studies (KMS) and non-Sport Management and Leadership (SML) students if enrolment capacity allows. To enrol in 3000- and 4000-level KINE courses, non-KMS and non-SML students require instructor approval.

All courses are three lecture hours per week (3.00 credit hours) unless otherwise indicated.

KINE-1000. Health and Wellness

This introductory course examines health and wellness from both a local and global perspective. An emphasis is placed on physical activity, nutrition, psychosocial wellness and stress, and disease prevention behaviours.

KINE-1030. Kinesiology and Health Studies Perspectives

This course will present an overview of the biophysical sub-disciplines that comprise Kinesiology. Treatment of each sub-discipline will highlight the history of the area, the current state of research and the practical application of principles in Kinesiology to sport, the workplace and activities of daily living. (Open only to non-Kinesiology majors.)

KINE-1040. Introduction to Kinesiology: Sport Management and Sociocultural Perspectives

An introduction and overview of key areas within the sport management and sociocultural sub-disciplines of Kinesiology. The course will explore the historical, social, cultural, and political significance of sport, and relate that significance to understanding the ways in which sport is organized, managed, and promoted in contemporary society. (Open only to non-Kinesiology and Health Studies and non-Sport Management and Leadership students.)

KINE-1110. Principles of Mental Skills Training

This course surveys the psychological principles underlying cognitive techniques that can be used to improve performance and enjoyment in physical activity environments such as sport and exercise. Among the topics to be explored will be goal setting, anxiety control, and attentional focus.

KINE-1200. Introduction to the Sport Industry

This course introduces students to macro aspects of the sport industry, including the key decision-making bodies, governance structures, funding pathways, and legal considerations in the public, non-profit, and commercial sectors of sport and recreation. This course provides an overview of current industry trends and issues, while exposing students to the wide variety of career opportunities that exist in sport and recreation. Students will gain a foundational understanding of the various sport systems that work to organize and administer sport and recreation at the community, national, and international levels.

KINE-1330. Introduction to Sport Leadership

This course introduces students to leadership in the context of sport organizations. Specifically, it provides an introduction to leadership theories, the implications of leadership style on individual, group, and organizational factors, and the role that a leader can play in defining organizational culture, values, and volunteer and/or staff engagement. This course will discuss various sociological issues that often dictate who and why certain individuals occupy leadership positions over others. Students will have an opportunity to engage in professional development by developing a personal leadership philosophy that reflects their individual values and leadership goals. Overall, this course provides students with a

foundation to discuss the many factors that frame the ever-present debate of whether leaders are born or made.

KINE-1400. Historical Perspectives on Physical Activity and Sport in Western Civilization

This introductory course presents an overview of the significance of physical activity and sport in Western Civilization from ancient Greece to the present by specific reference to selected topics in different eras through which the particular society may be examined. Within this framework, the relationship of physical activity and sport to such factors as economics, politics, and religion will be emphasized, as will its contribution to the culture.

KINE-1500. Principles of Sport Management

An introduction to sport management as a profession and academic discipline. Special emphasis will be given to the principles associated with the management of various types of sport organizations, along with the knowledge, skills, and abilities to successfully navigate employment in the sport industry.

KINE-1560. Communication for the Sport Industry

The sport industry requires that people communicate effectively, persuasively, and ethically in written, verbal, and interpersonal communications. This course introduces students to academic writing, critical reasoning, and professional discourse across a variety of sport environments. Students will learn and gain confidence in their ability to communicate by practicing and receiving feedback on a number of communication skills relevant to the sport industry, while also having opportunities to improve academic and workplace language proficiency.

KINE-1650. Functional Anatomy

An in-depth study of the human musculoskeletal system. Emphasis will be placed on the components of skeletal, muscular, and nervous systems. Joint articulations will be covered in detail. (3 lecture hours per week; 1 lab hour per week; weekly test.)

KINE-1660. Functional Anatomy II

An in-depth study of the structure and function of the human cardiovascular, lymphatic, endocrine, respiratory, digestive, urinary, and reproductive systems, as well as the somatic and special senses. (3 lecture hours per week; 1 lab hour per week; weekly test.)

KINE-1800. Fundamental Mechanics of Human Motion

Presents the quantitative fundamentals of mechanics as they apply to movements of the human body and the sport implements it handles.

KINE-2040. Sport Nutrition

This course will (1) examine the fundamental concepts of nutritional science applied to health, exercise, and sport, (2) develop an understanding of the relationship between diet and sports performance, and (3) apply sports nutrition principles to exercise science.

KINE-2100. Human Performance

An examination of the role perception and cognition play in our ability to sense, attend to, process, and transmit information during the performance of any motor skill. The course will focus on an information processing approach to examine the processes that underlie our ability to perform motor skills.

KINE-2150. Fitness and Lifestyle Assessment

This is an applied course that involves a lecture and laboratory component where students develop laboratory skills in assessing fitness and health and use their knowledge to interpret testing data to

prescribe exercise. Students will utilize material from the CSEP-PATH which is a fundamental component for the CSEP-CPT examination. (1.5 lecture, 1.5 lab) (This is an experiential learning course.)

KINE-2240. Introduction to Physical Ergonomics and Injury Prevention

This introductory course will examine topics in the field of physical ergonomics. The goal of the course will be to provide the tools, skills, and knowledge to perform basic ergonomic assessments. The course will focus on human productivity and risk of injury of specific tissues in the workplace. This course also provides in-class laboratories, where students will use the knowledge gained in lectures to measure and analyze simulated workstations.

KINE-2250. Ethics in Sport and Physical Activity

A philosophical analysis of sport and physical activity with emphasis on ethical aspects. Ethical theories will be studied as a basis for assessing and understanding decisions and actions of coaches, athletes, officials, and executive members. Case studies covering problem areas will be utilized to enable the student to analyze these decisions and actions.

KINE-2300. Sociology of Sport

This course introduces key sociological concepts and theories to examine the social, political, cultural, and mediated role of sport in society. Using a sociological lens, the topics in this course evaluate how sport reflects specific social structures, frames and reproduces dominant images and stereotypes, and is a key site for identity formation and performance. From this perspective, the course critiques the social realities of how dominant understandings of the meaning and purpose of sport as well as how it is organized influence who is allowed to play sport and under what conditions. The goal is that students will begin to form their own critical insights on how sport can be more equitable, diverse, and inclusive.

KINE-2450. Sport Marketing

An application of marketing concepts and activities to the sports domain. Topics include product development, promotions, advertising, publicity, pricing, licensing, market segmentation, and research, as well as the development of a marketing plan for a sport/recreation organization. (3 lecture hours/week.)

KINE-2500. Organizational Behaviour

This course provides an introduction to human behaviour in the workplace and its influence on organizational effectiveness. This course focuses on the micro (study of individuals in organizations), meso (study of work groups), and macro-levels (study of how organizations behave) of organizational studies. The emphasis is on identifying issues, challenges, and potential solutions, typically encountered by sport organizations at the individual, group, and organizational levels. Through assigned readings, case studies, and lectures, students will gain a balanced perspective of theory and practice relating to how and why people interact within a variety of organizational contexts.

KINE-2520. Sport Finance

Introduction to basic theory in finance, budgeting, and accounting applied to the management of sport organizations. Topics may broadly include: financial issues in sport, financial systems and how they operate, types of business structures, basic accounting principles, capital structuring and other sources of revenue, principles of budgeting, taxation, financial ratio analysis, break-even analysis, time value of money, and various other financial concepts as applicable.

KINE-2600. Physiology of Human Performance

Discussion of the physiological systems of the human body and the adjustments seen as a result of exercise. General topic areas include examination of how aerobic and anaerobic metabolism operate and respond to energy demands, how the cardiovascular and respiratory systems maintain blood gases and

total body perfusion for work, skeletal and smooth muscle function and physiology, neuromuscular function, and how the renal (kidney) and hepatic (liver) systems support work demands, among others.

KINE-2620. Human Factors and Performance

This course provides a foundational experience regarding the effects of human factors on performance in work and non-work environments. Human performance will be explored as a function of a variety of factors which may include: how we process, store, and attend to information; the design of products, spaces and processes; how we communicate information and interface with displays and controls; environmental factors such as lighting, sound, and temperature; and how our work and daily lives are scheduled. (Credit cannot be obtained for both KINE-3620 and KINE-2620).

KINE-2690. Measurement and Evaluation

An introduction to descriptive and basic inferential statistical techniques with special emphasis on evaluation of data in the various Kinesiology sub-disciplines. (Course equivalencies and antirequisites as stated in the University of Windsor Senate Policy on Introductory Statistics Courses.

KINE-2700. Research Design

This course will introduce students to quantitative and qualitative research designs and how they can be utilized when conducting experiments. Students will also be introduced to basic statistical concepts and their application towards data analyzation and data interpretation.

KINE-2850. Human Growth and Development

This course introduces human growth and maturation and examines this process across the lifespan, from prenatal development to old age. A main objective of the course is to explore the physical, psychological, and social aspects of human development as they relate to sport and physical activity. Special emphasis will be placed on factors that impact physical activity participation (e.g., gender, age, environmental influences).

KINE-2990. Co-op Work Experience I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

KINE-3010. The Use and Abuse of Drugs

A concentrated study of the actions and effects of drugs, with special emphasis on the use, abuse, and/or involvement of drugs in today's sporting world.

KINE-3020. Exercise Psychology

An examination of the psychological processes by which healthy and unhealthy behaviours related to physical activity develop and the methods by which behavioural change can be encouraged. Emphasis will be placed physical activity interventions and psychosocial influences of exercise.

KINE-3030. Imagery Effects on Performance

This course will be an examination of imagery use in various performance domains (e.g., sport, exercise, rehabilitation, work). Emphasis will be placed on both the theory and research used in the examination of the effects of imagery.

KINE-3060. Obesity and Eating Disorders

This course will provide a multidisciplinary approach to understanding of the current epidemic of obesity and eating disorders in Canada and its impact on disease development throughout the lifespan. Particular emphasis will be on translating basic science findings related to body weight to intervention and prevention strategies.

KINE-3100. Motor Learning and Control

An examination of the processes which underlie the acquisition and control of goal directed human movement. Emphasis will be placed on: 1) the factors that affect learning (feedback, attention, memory), 2) the simultaneous integration and coordination of body parts involved in movement execution and control, and 3) review of motor learning and control research.

KINE-3150. Scientific Principles of Strength Conditioning

Students will learn theoretical concepts of strength and conditioning and will apply these concepts in a laboratory setting to develop their ability to teach clients exercises as well as to conduct fitness assessments that are a fundamental component of a CSEP-CEP and an NSCA-CSCS. (1.5 lecture, 1.5 laboratory hours per week). (Credit cannot be obtained for both KINE-3700 and KINE-3150.) (This is an experiential learning course.)

KINE-3330. Applied Sport Psychology

This course explores fundamental concepts and theories in sport psychology. Designed to offer a comprehensive understanding, it delves into major topics while emphasizing their practical application in sport environments. Gain insights into the core principles and applied practices essential for navigating the applied practice of sport psychology.

KINE-3400. History of the Modern Olympic Movement

An examination of the historical development of the Modern Olympic Movement. Areas covered include politics, nationalism, gender, commercialism, marketing, and amateurism. The contributions of various athletes and administrators who have helped to shape Olympic history will also be assessed.

KINE-3501. Practical Strategies for Social Change: Intervening to Prevent Sexual Violence

This course introduces students to sexual violence as a social problem; why it matters, the forms it takes, and how it can be changed. The importance of personal and community responsibility for social change is emphasized. This course also provides students with the background knowledge that is needed to successfully teach sexual violence prevention workshops for their peers. Restricted to students who have attained a cumulative GPA of 66% or higher at the time of application. (Prerequisite: Semester 4 standing or above and permission of the instructor by online application at bystanderinitiative.ca) (Also offered as PSYC-3500, SACR-3500, SJST-3500, SOSC-3500, SWRK-3500, WGST-3500.)

KINE-3510. Sport Event Management

A study of the theories and techniques involved in the management of various types of sport events. Special emphasis will be given to strategic, operational, contingency, and financial planning, facility design and setup, marketing, volunteer management, and legal liability. Working in groups, students will conceive of, plan, and execute their own small-scale sport event.

KINE-3530. Sport Facility Management

This course introduces students to the planning, design, and management of sport and recreation facilities and to the principles and techniques of facility development and operation. The course will cover topics related to the organization and management of sport and recreation facilities, legal and

financial considerations in facility management, and risk management. The course will also explore the social, political, and psychological factors that make facility management such an important part of the sport delivery equation.

KINE-3540. Sales Management

This course focuses on the process and management of selling sport properties, including ticket sales, media rights, sponsorship agreements, and memberships. Adopting a multi-sectoral understanding of the sport system, this course provides students with an understanding of the role of sales in commercial, public, and private sport entities. An emphasis will be placed on the development, activation, and management of sales in these contexts.

KINE-3550. Socio-Economic Aspects of Sport and Leisure

An introduction to the interaction of sport and economics. A socio-economic approach is taken to examine such topics as the demand for sport and leisure activities, and sport consumer behaviour.

KINE-3600. Respiratory Physiology

This course explores the physiology of breathing at rest, during exercise, and in disease. This course also examines the interaction of metabolism, ventilation, and kidney function during rest/exercise. Physiologic challenges, in particular acid-base balance at sea level and altitude, are explored.(3 lecture hours/week.)

KINE-3610. Musculoskeletal Physiology

Adaptability and function of components of the musculoskeletal (MSK) system (skeletal muscle and motor neurons, connective tissue, bone) will be examined in detail. Properties of tissues will be illustrated by examining: 1) cell types found in MSK tissues including stem cell populations, 2) cell signaling and gene expression responses to various exercise stimuli (resistance and endurance training), and 3) selected aspects of fatigue and responses to injury and disease.

KINE-3630. Cognitive Ergonomics

Human cognition and perception shape our interaction with the surrounding world and influence the way we use objects and tools in the workplace. While ergonomics focuses on the physical element involved in human-machine interaction, this course will concentrate on discovering how cognition and perception affect the way we perceive objects, process relevant information, and produce adequate responses. This course will also address how cognition and perception can be measured when assessing and developing effective human-machine interactions.

KINE-3770. Sports Tactics and Strategies

Sport tactics and strategies are examined from the coach's point of view in helping athletes make better in-game decisions. The course will examine the notions of controlling force, time, space, uncertainty, the opposition, and the athletes themselves. An effort is made to explain the bases for various tactics and to show connections in tactical decision-making utilized among different sports.

KINE-3800. Global Perspectives in Human Kinetics

This study abroad class provides students with global perspectives in Sport Management and Leadership and Kinesiology and Health Studies that are inherent to the destination. There will typically be a significant field component to the course in which students will be exposed to various aspects of their field of study. Ancillary fees will apply. (This course is an experiential learning course.)

KINESIOLOGY PRACTICE THEORY AND ANALYSIS COURSES (KINE-3810 - KINE-3970)

KINE-3810. Practice, Theory, and Analysis of Urban Outdoor Recreation

Utilizing sociological, historical, and philosophical viewpoints this course examines the concept of wilderness, specifically within an urban setting. Using Essex County as the "urban setting," students will explore the breadth of possible recreation activities available and consider their relevance to a broader understanding of recreation, wilderness, and ourselves.

KINE-3820. Practice, Theory, and Analysis of Golf

Combining physical and analytical techniques this course will assist students to understand and execute golf skills, enhance their abilities in error detection and correction, understand strategy and course management, and be aware and appreciative of golf rules and etiquette. (Additional fee applies.) (2 lecture, 2 laboratory hours a week.)

KINE-3830. Practice, Theory, and Analysis of Hockey

Combining physical and analytical techniques this course will assist students to understand and execute hockey skills, enhance their abilities in error detection and correction, and understand and apply the strategies to the offensive, neutral, and defensive zones. (Additional fee applies.) (2 lecture, 2 laboratory hours a week.)

KINE-3920. Practice, Theory, and Analysis of Basketball

This course combines improvement of individual offensive and defensive skills, application of mental and physical training principles by which basketball performance can be enhanced, rules of the game, and awareness of strategic concepts by which individuals and teams compete. (2 lecture, 2 laboratory hours a week.)

KINE-3970. Practice, Theory, and Analysis of Track and Field

This course introduces students to the science of track and field. They will be introduced to all track and field events and the progressions associated with each event. Students will be expected to illustrate basic movements for each event and analyze skill movements for all track and field events. (2 lecture, 2 laboratory hours a week.)

KINE-3990. Co-op Work Experience II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a cooperative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

KINE-4000. Human Movement and Aging

An examination of the physiological, sensory, muscular, and cardiorespiratory mechanisms underlying age-related changes in human movement and motor control. These issues will be explored from cellular to whole-body perspectives incorporating current theoretical approaches to aging. Emphasis will be placed on integrating the role of physical activity into explaining age-related changes in cognition and activities of daily living.

KINE-4040. Population Health

This course will examine the factors that aim to (1) improve health of the entire population and (2) reduce health inequalities among population groups. Particular emphasis will be on the Canadian health care system and the determinants of health, in addition to personal health practices and health knowledge, health policy, and behaviour change theory as it applies to the health of our society.

KINE-4050. Gender Issues in Sport

A comprehensive overview of the status of women, men, and LGBTIQs in sport with a view towards understanding the influence of gender and sexuality on participants and consumers of sport.

KINE-4080. Dynamics of Skill Acquisition

This course will introduce students to the theoretical and empirical data underlying dynamic systems “theory”. Specifically, it will examine the notion of “self-organization”; individual and environmental constraints on action and the evolution of skilled motor behaviour; and discuss practical applications of this theory to normal and pathological motor activity.

KINE-4100. Adapted Physical Activity

An examination of varying vulnerable or underrepresented populations in the area of physical activity (sensory, cognitive, musculo-skeletal impairment). Emphasis will be placed on defining the characteristics of the population, the needs and strengths of each population, and matching the strengths with the appropriate physical activities. Issues of integration, programming, and environmental adaptation will also be considered.

KINE-4150. Fundamentals and Application of Sport Science

Students will be exposed to modern and comprehensive overview of sport science and the role of a sport scientist with athletes in applied settings. This course will expose students to fundamental components of a CSEPCEP and an NSCA-CSCS. (1.5 lecture, 1.5 laboratory hours per week) (Prerequisite: KINE-3150) (This is an experiential learning course.)

KINE-4330. Selected Topics in Sport Leadership

The course examines sport leadership from a variety of theoretical perspectives that include both interpersonal and intrapersonal perspectives. The course will expose you to current research and literature relating to leadership in sport. The course will examine the role of the sport leader and how to become an effective sport leader. Students will develop specific leadership skills that are of interest to them and practice these skills in exercises and class projects. The emphasis will be on applying psychological concepts to your sport leadership experiences. (Prerequisites: Open to 3rd and 4th year Kinesiology majors and students in the Certificate in Sport Media, Communication and Social Issues.) (Open to non-majors if there is enrolment space.)

KINE-4400. History of Sport in Canada

An examination of the issues and topics related to the historical evolution of sport in Canada. Areas of study include methodology, social class, geography, immigration, native sport, urbanization, industrialization, religion, gender, economics, and government involvement.

KINE-4410. Sport in America

Legendary Ohio State football coach Woody Hayes once said, “Anyone who will tear down sports will tear down America. Sports and religion have made America what it is today.” While perhaps an oversimplification, Hayes’ statement reflects the fundamental role of sport in American society. This course provides students with a chronological and thematic approach to understanding sport in the

United States, paying attention to the development of race, class, and gender structures, as well as the country's obsession with professional sport and its unique approach to college athletics.

KINE-4420. Sport Sponsorship

This course is focused on the process of developing sponsorship programs for sport organizations and brands, including market research, sponsorship valuation and analysis, and creating leveraging strategies. The course provides students the opportunity to analyze existing sponsorship agreements, as well as apply their knowledge by engaging in the process of creating sponsorships. The course also integrates theoretical and critical examinations of sponsorship, with emphasis on applying consumer and sociological theories to the sponsorship context.

KINE-4430. Social Responsibility in Sport

Sport has the potential to realize positive impacts within society. There is a need for socially responsible sport managers and organizations with regard to their communities, formalized partnerships, and overall role in society. This course will give a broad overview of social responsibility practices and pillars. A major part of this course is an experiential learning activity called the "Make A Difference" project.

KINE-4440. Consumer Behavior

This course will examine consumer behaviour in the context of sport by integrating theories from various disciplines, including psychology and marketing. Areas of study will include fan socialization, fan identification, organizational constraints, demographics, and theories of consumer behaviour. A particular emphasis will be placed on the internal and external influences of consumer behaviour on sport organizations.

KINE-4500. Human Resources in Sport Management

An overview of the theoretical and applied aspects of human resource management in various types of sport organizations. Special emphasis will be given to the planning, recruitment, selection, orientation, training and development, motivation, performance appraisal, rewarding, and termination of our most important organizational resource: people.

KINE-4510. Sport and the Law

Introduces students to the principles of law as they relate to Human Kinetics. The principles of law will be related to sport or athletic administration, and to instruction and supervision as it relates to physical and health education and field activities, interscholastic and intercollegiate programs, as well as, other recreational and leisure pursuits.

KINE-4520. Sport Policy and Governance

This course provides an overview of the connection between government and sport in Canada. Various policies, programs, and governance systems are explored to identify the dominant ideologies that guide sport policy, and to critique the impact of government involvement upon the direction, management, and delivery of sport in Canada. Students will critique policy and governance trends, and analyze the past, present, and future role and impact of government involvement in Canadian sport.

KINE-4530. Perceptual-Motor Development

This course examines motor skill development of children and adolescents, bringing together theoretical perspectives from psychology, biology, genetics, neuroscience, and sociology. An interdisciplinary perspective is used to study the interaction of developmental processes. The emergence, development, and assessment of selected perceptual-motor skills will be examined in detail.

KINE-4550. Global Issues in Sport Management

Adopting an issues-based approach, this course will examine a number of current issues that affect athletes, teams, leagues, and/or sport-related organizations, from grassroots to elite performance levels of sport, and non-profit to commercialized sport around the world. The course will emphasize broad knowledge, critical thinking, and personal and collective reflection, with a view to imagining better futures and preparing students for engaged citizenship.

KINE-4560. Sport Communication

This course explores the process of communication as it relates to the messages, symbols, and meanings embedded in how we communicate about sport, how sport is communicated to us, and what is communicated by sport. Taking a critical cultural perspective, this course analyzes ideologies and power as influences on communication practices and acknowledges that communication informs, persuades, and permeates how we play, consume, and incorporate notions of sport into our daily lives. This course also touches on the strategic nature of communication for sport and media entities, and its role in managing crises, scandals, and organizational changes.

KINE-4570. Hockey in Canada

Starting with the nineteenth century and the origins of the game, this course moves forward chronologically and thematically through the game's evolution, paying special attention to matters of national identity, business and labour, leisure, race and ethnicity, gender, rural-urban issues, international affairs, and religion. This course uses hockey to gain a new, perhaps more personal, understanding of Canada's past and present.

KINE-4580. The Endocrine System in Sport, Exercise and Health

The endocrine system, in close association with the nervous system, is an important regulator of physiological homeostasis. Various components of the "milieu interieur" or internal environment must be maintained for a "free and independent life". Exercise induces several metabolic and physiological challenges to which the endocrine system must respond in order to maintain this internal environment. Thus, this course will introduce students to the mammalian endocrine system and then examine how exercise and health affect and are affected by the endogenous hormones and chemical messengers of the human body.

KINE-4590. Sport Media

The focus of this course is to examine sport with more critical awareness by exploring the lens through which athletics is brought to and consumed by fans. We will look at conventional sport media coverage as well as sport representation in various other forms of media (e.g. novels, movies, music, documentaries, advertisements, social media, etc.) in order to challenge preconceived notions, uncover biases and comprehend the complicated social fabric of which sport is part. (This is an experiential learning course.)

KINE-4600. Cardiovascular Physiology

The study of the cardiovascular system, anatomy, electrophysiology, mechanics, and responses to stressors. This course provides an advanced foundation of cardiovascular physiology with an emphasis on circulatory control. The basic and novel concepts related to regulatory mechanisms of the cardiovascular and cerebrovascular systems are explored. Clinical aspects of cardiovascular physiology are also introduced.

KINE-4610. Clinical Exercise Rehabilitation

This course is designed to provide a broad understanding of: 1) the physiological processes involved in the development of selected chronic diseases (e.g., cardiovascular, respiratory, cancer, autoimmune) and

disorders (e.g., Huntington's disease), 2) the risk factors associated with their development and progression, where applicable, and 3) how exercise rehabilitation can be used as a tool for intervention, including past, current and emerging exercise recommendations.

KINE-4620. Exercise in Extreme Environments

Humans are a remarkably resilient species in the face of widely varying environmental conditions. In fact, humans inhabit nearly every corner of the earth (and beyond) and manage to survive and work in the extremes of cold, heat, pollution, atmospheric and water pressures, and even extreme g-forces and microgravity. The purpose of this course is to introduce students to the physiological responses to exercise (including work or play) under extreme environmental conditions and some of the counter measures we and our bodies employ to protect ourselves in these environments.

KINE-4630. Applied Neurophysiology

Mechanisms underlying human movement in healthy, diseased, aged and trained states will be examined by studying the integrated actions of the neural, somatosensory and motor systems. Emphasis will be placed upon sensory transduction, reflexes and the descending motor system.

KINE-4640. The Pathophysiology of Pain

Pain is a phenomenon encountered in many of the sub-disciplines of kinesiology. This course is designed to give students an awareness of the functional significance of pain. This course will focus on the physiology and anatomy of pain from nerve endings in peripheral tissue to synaptic transmission in the central nervous system. Factors that affect pain perception, including pharmacological and non-pharmacological treatment modalities and psychological aspects of pain, will also be discussed.

KINE-4650. Advanced Physical Ergonomics and Injury-Prevention

This course will build upon the foundations from KINE 2240 by examining more advanced topics within the study of physical ergonomics. Specifically, students will learn how to use commercially available digital human modeling software to evaluate and redesign jobs, examine muscle fatigue and recovery related to workplace tasks, and learn the economic benefit of a sound ergonomics program. In addition, students will continue to gain practical experience in applying quantitative and qualitative ergonomic assessment tools. Topics include: the mechanisms of upper limb and low back injuries, the principles of redesigning operations to reduce injury risk, and techniques for optimizing the feasibility of ergonomic implementation.

KINE-4660. Cardiac Rehabilitation

This course introduces the pathophysiological mechanisms associated with the development and progression of cardiovascular disease, namely atherosclerotic heart disease, and emphasizes its global burden. It also highlights the positive effects of Cardiac Rehabilitation on quality of life, morbidity and mortality outcomes, delivering insight into the paradigm shift toward personal responsibility for chronic disease management/secondary prevention to maximize cardiovascular health across the lifespan, and offers students an opportunity to hone leadership and communications skills via group discussions and presentations. Cardiac Rehabilitation-related career opportunities will be explored.

KINE-4670. User Experience

Understanding the user experience (UX) is necessary for the design of ergonomically sound products, and for ergonomics professionals to develop an all-encompassing approach to human-machine interface assessment. This lab-based course familiarizes students with how to conduct usability assessments of interfaces, and how user assessment fits into the broader ergonomic design process. This course will start by covering common UX practices, techniques and approaches (e.g., questionnaires and surveys,

talking aloud, etc.). In addition, students will also conduct user assessments on everyday objects including websites, tools, car interfaces, etc. These will serve as individual and group assignments. =

KINE-4710. Sports Therapy

An examination of athletic injuries and their therapy. Topics to include the prevention of and pathology of injuries, as well as the care of injuries and rehabilitation techniques. (Additional laboratory fees may apply.)

KINE-4730. The Social Construction of Leisure

An examination of leisure as a social activity which is shaped by various societal institutions and social relations.

KINE-4750. Individual Studies

The student will select an approved topic and under direction investigate and report on it. (Prerequisite: consent of the instructor is required at least three weeks prior to the end of the Fall or Winter term preceding the term in which enrollment is anticipated.) (Hours to be arranged.)

KINE-4760. Principles of Coaching

A critical study of various issues that confront the modern-day coach. Areas of study involve effective coaching techniques; person attributes; motivation and discipline approaches; dealing with problem athletes; and coach-player communication. Stress will be placed upon developing a sound beginning philosophy of coaching, along with looking at the coach as a professional person.

KINE-4770. Outdoor Recreation

Through guided discovery and experiential learning, this course provides knowledge about the outdoors as an alternative recreational medium that fosters deeper awareness of nature, wilderness, and ourselves. (Prerequisite: demonstrated swimming competence.) (Additional fee applies.) (This is an experiential learning course.)

KINE-4780. Undergraduate Thesis

The Undergraduate Thesis course provides undergraduate students with an opportunity to conduct a full year independent research project under the supervision of a faculty member, culminating in a written thesis. Students enrolled in the course will attend regular meetings throughout the fall and winter terms with their faculty supervisor. Components of the course will include: (a) establishing research questions and design; (b) research proposal document; (c) data collection and analysis; and (d) written and oral presentation of the outcomes of the research project. (Students will normally be in the final year of their degree and in Good Academic Standing. Approval of the supervising faculty member and Thesis Coordinator is required. Students who have already taken two (2) Individual Studies courses (KINE-4750), are not eligible for this course.) (This is an experiential learning course.)

KINE-4850. Group Dynamics in Sport

This course examines the intricate dynamics shaping team interactions within sport environments. Students will explore the psychological, social, and behavioural aspects influencing team performance, cohesion, leadership, and roles within sports teams. (This is an experiential learning course.)

KINE-4890. Special Topics in Sport Management and Leadership

This is a course in which current topics in the field Sport Management and Leadership are examined.

KINE-4900. Special Topics in Kinesiology and Health Studies

Courses in which current topics associated with Kinesiology and Health Studies are examined.

KINE-4920. Laboratory Experiences in Kinesiology I

This advanced laboratory course will provide students the opportunity to become familiar with operating common laboratory equipment used in the field of human and exercise physiology and the psychology of physical activity. Practical experiences will include performing health related fitness appraisals involving screening tools, flexibility assessments, body composition measurements, heart rate and blood pressure measurements, electrocardiogram analysis, aerobic and anaerobic fitness assessments, the use of evaluation/checklists used to assess sport psychology, applying both classical and recent methodological protocols, collecting common measurement variables, evaluating personal results,, and the use of Microsoft Excel. (Prerequisites: Completion of all required first- and second-year Kinesiology courses. Open only to Kinesiology and Health Studies Majors.) (This is an experiential learning course.)

KINE-4930. Laboratory Experiences in Kinesiology II

This advanced laboratory course will provide students the opportunity to become familiar with operating common laboratory equipment used in the field of biomechanics and ergonomics and motor learning. Practical experiences will include anthropometry measurements, force platform data acquisition, gait analysis, video analysis, linear and angular kinetics/kinematics analysis, biomechanical model analysis, and electromyography. Students will have the opportunity to develop the skills required to assess and modify common office and industrial environments, workstations and hand tools found in the workplace to minimize musculoskeletal demands and help prevent injuries in the workplace. Students will also use evaluation tools/checklists used to assess motor control, and motor learning, applying both classical and recent methodological protocols, collecting common measurement variables and evaluating personal results, examine reaction and movement time, Fitts' Law, practice, balance, and movement planning and the use of Microsoft Excel. (Prerequisites: Completion of all required first and second year Kinesiology courses. Open only to Kinesiology and Health Studies Majors.) (This is an experiential learning course.)

KINE-4980. Internship

A supervised, project-driven work experience in an approved setting. The experience will be expected to provide students with an enriched learning opportunity to integrate theory and practice. Internships are open to 4th year Kinesiology students from either major. (Offered on a Pass/Non-Pass basis.) (Prerequisite: consent of the instructor is required at least three weeks prior to the end of the Fall or Winter term preceding the term in which enrollment is anticipated.) (9 hours a week.) (This is an experiential learning course.)

KINE-4990. Co-op Work Experience III

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

FACULTY OF LAW

For information on the following programs that are offered at the University of Windsor, visit the Faculty of Law at <http://www.uwindsor.ca/law/>:

Juris Doctor (JD)

Canadian and American Dual JD

Master of Business Administration (MBA)/Juris Doctor (JD)

Master of Social Work (MSW)Juris Doctor (JD)

Master of Laws (LLM) (1 Year and 2 Year Teaching Stream)

Intellectual Property Law

LAW SERVICE COURSES

The Law Faculty offers a number of courses which are available for credit toward university degrees and diplomas other than the full-time JD degree. These courses cannot presently be counted as credit for the JD degree because of Law Society Regulations governing qualification for call to the Ontario Bar.

LAWS-2180. Environmental Law

This course is intended to provide non-law students with a background in environmental law with an emphasis on Ontario environmental legislation. Topics include: introduction to common law, public participation, jurisdictional issues, environmental assessment, Ontario regulations covering air, water and waste management, enforcement, compliance and alternatives to regulations.

LAWS-2190. Forensic Evidence and the Canadian Legal System

This course is designed as an introduction to the Common Law legal system in Canada and the place of forensic evidence in law. The following topics will be covered: the nature of law and the constitutional basis of legal authority in Canada; the court structure; the nature of the adversarial system and the criminal and civil process; burdens of proof and onus; a primer on the rules of evidence with special emphasis on the opinion of rule and the use of real and demonstrative evidence.

NURSING

MISSION STATEMENT

As partners, the Faculty of Nursing at the University of Windsor with St. Clair College (Windsor and Thames Campuses) and Lambton College undertake the shared commitment to excellence in the preparation of Bachelor of Science in Nursing (BScN) candidates who embody our core values and the best elements of the art and science of nursing, education, leadership, research, and practice in their professional journeys.

VISION

Excellence in Nursing education, practice, and research.

CORE VALUES

In the spirit of collaboration, and through values clarification and group decision-making, the following concepts have been selected to identify and signify the core values of the University of Windsor collaborative BScN Program. These concepts reflect the foundation upon which knowledge, skills, judgement, communications, relationships, behaviours, and intent of our mission and vision are built. Health and well-being; Safety; Caring; Collaboration; Professionalism; Leadership; Social Justice; Scholarship; Research; Innovation.

PHILOSOPHY

The philosophy of the Faculty of Nursing at the University of Windsor is outlined in the following statements about our beliefs relative to health, individuals, nursing, learning, teaching, and environments:

HEALTH

Health is a dynamic process whereby the individual, family, or group is able to realize aspirations, satisfy needs, and change or cope with the environment. Health is a resource for everyday life. It is a positive concept emphasizing social and personal resources as well as physical capacity. Health is the goal of all nursing behaviours.

INDIVIDUALS

Individuals are unique holistic persons with inherent dignity and are worthy of respect and care. Individuals have freedom of choice and are accountable for these choices. Individuals are capable of entering reciprocal caring relationships which foster health, growth, and self-actualization.

NURSING

Nursing is a humanistic, caring process, the goal of which is to help individuals, families, groups, and communities achieve and maintain an optimal level of health consistent with their abilities and desires. Nurses, in collaboration with members of the health team and other service providers build on strengths and address health variations to facilitate client maturation and adaptation.

LEARNING/TEACHING

Learning is an individualized activity and involves learners' personal goals, perceptions and unique learning style. Learning is goal oriented and an active life-long process of change and development. Teaching is a facilitative process through which learners are guided and supported. It involves communication, clearly defined goals, appropriate learning activities and a climate conducive to growth.

The curriculum is multi-disciplinary and aims to provide the learners with opportunities for intellectual and professional development.

ENVIRONMENTS

Environments are milieus within which individuals, families, groups, and communities strive to achieve optimal health. As human beings attempt to mature and adapt within their environments, there are dynamic interactions which can serve as a source of growth. Environments encompass psycho-social, cultural, religious, political, economic, and physical contexts which impact upon the efforts of all.

ADMISSION REQUIREMENTS

Degrees in Other Disciplines

Special consideration may be given to applicants holding degrees in other disciplines.

University of Windsor Senate Admission Requirements for the Bachelor of Science in Nursing (BScN): Successful completion of the Ontario Secondary School Diploma (OSSD) and a minimum 70% average of the top six Grade 12 U or M courses. ENG4U, SBI4U, SCH4U, and one Grade 12 mathematics required. A minimum grade of 65% in Grade 12U English (ENG4U) is required. A second minimum average of 70% is required in chemistry (SCH4U) and biology (SBI4U). These averages may be higher, depending on the number of applicants. For additional details, please see the Senate Policy on Admission Requirements (Undergraduate).

Program Transfers

Please refer to the University of Windsor Policy on Transferring to Another Program.

Admission by Transfer

Please refer to the University of Windsor Policy on Advanced Standing and Transfer Credit.

Applications for transfer to Nursing are subject to a March 1 deadline for Fall admission. Transfer is based on academic achievement and the availability of space. A minimum 75% cumulative average is required to be considered for a transfer to Nursing. Applicants must have taken ENG4U, SBI4U, SCH4U, and any grade 12 math or courses that have been deemed equivalent. In addition, all Nursing applicants are required to submit the Applicant Profile form no later than March 1. It must be submitted directly to the University of Windsor, Office of the Registrar, Windsor, Ontario, N9B 3P4. The Applicant Profile form can be found on the Nursing website.

Admission Requirements for Mature Students

Please refer to the University of Windsor Undergraduate Calendar Admission Requirements for Mature Students.

Applicant Profile

All Nursing applicants are required to submit the Applicant Profile Form no later than March 1. It must be submitted directly to the University of Windsor, Office of the Registrar, Windsor, Ontario, N9B 3P4.

Prior Nursing Courses

University courses taken within seven years prior to admission or readmission to any nursing program may be considered for credit.

Selection for Admission

Preference will be given to applicants with the best qualifications. Selection of candidates for admission to the various programs will be based on criteria determined by the Faculty of Nursing Admissions Committee.

Medical Requirements

Students in all nursing programs must be cleared for clinical via a pre-clearance process prior to the start of their clinical course(s). This is the financial responsibility of the student.

Other Requirements

- 1) Students are responsible for their own transportation and living expenses incurred in clinical nursing experiences, including the consolidation experiences. Additional costs may be incurred for participation in some clinical placements. Inability to comply with this requirement may necessitate voluntarily withdrawal from the course to avoid risk of failure due to missed clinical hours.
- 2) Students are responsible for supplying their own uniforms and equipment. Details pertaining to uniforms and accessories will be sent to those admitted to the program.
- 3) A vulnerable sector (or extended) Police Clearance is mandatory before beginning clinical courses, and entry, and must be updated annually, or more frequently as required by the program or, clinical placement agencies. This is the financial responsibility of the student.
- 4) Applicants who accept admission into the undergraduate nursing program are required to obtain certification in First Aid and Cardiopulmonary Resuscitation (CPR): Basic Life Support (BLS) for health care providers before starting the clinical courses. Annual CPR re-certification is necessary even if a student's card indicates that certification is valid for longer than one year. This is the financial responsibility of the student. Details pertaining to other non-medical program requirements are available on the Faculty of Nursing website.

HONOURS BScN PROGRAM ADMISSION REQUIREMENTS

The Honours BScN program is delivered collaboratively with St. Clair College and Lambton College. Students who apply and are accepted to the University of Windsor will take all degree requirements (4 years full time) at the University of Windsor. Students who apply and are accepted to St. Clair College or Lambton College will complete Years 1 and 2 of program at the college site and will transfer to the University of Windsor to complete Years 3 and 4 (students have the option to return to their college campus for the final semester of Year 4).

For admission requirements, go to the Policy on Admission Requirements (Undergraduate) at <http://www.uwindsor.ca/policies>.

An interview with the Faculty of Nursing Admissions Committee may be required.

ADMISSION REQUIREMENTS :

Graduates of the St. Clair College or Lambton College One-year Pre-Health Science Program

Students at Lambton College who successfully complete the one-year Pre-Health Science-Nursing Program with a minimum overall grade point average of 2.7 (B), and a minimum science subject average of a 2.7 (B) in BIO 120, BIO 220, CHM 125 and CHM 225, will be considered for admission to the BScN Program.

Students at St. Clair College who successfully complete the one-year Pre-Health Science Program with a minimum overall grade point average of 2.7 (B), and a minimum science subject average of (2.7) (B) in BIO 50, BIO51, CHM 50 and CHM 51, will be considered for admission to the BScN Program.

ADMISSION REQUIREMENTS for Graduates of St. Clair College's or Other Ontario College Practical Nursing Programs

The following are the admission requirements for Registered Practical Nurses to enter the BScN Program:

Registered Practical Nursing diploma from a College of Applied Arts and Technology with an overall B (73%) average and no grade less than a C (63%).

Minimum one year full-time equivalent work experience as a Registered Practical Nurse (RPN) (i.e. 2000 hours).

Current Registration with the College of Nurses of Ontario (CNO) as an RPN with no practice restrictions.

To demonstrate competency in health assessment and other clinical skills, students must complete and pass an objective structured clinical examination (OSCE). This examination will be scheduled at program entry and/or prior to beginning the first clinical course in the program. If a student performs below the expected level of clinical competence on the OSCE, the student may seek remediation, at the student's expense. Students must demonstrate clinical competence at the expected level prior to taking any clinical courses.

Prior to beginning clinical, students must provide documentation of current CPR certification: (BasicLife Support (BLS) for health care providers, and a Vulnerable Sector (or extended) police clearance. Clinical agencies will require a record of immunization. (see policies for the Faculty of Nursing, Collaborative Nursing Program)

PROGRAM REGULATIONS

Students must become familiar and comply with the general regulations of the University, which apply to all students. Additionally, students must comply with the regulations particular to Nursing programs within the Faculty of Nursing.

- 1) For promotion and graduation, nursing students are required to achieve a minimum grade of a 60% in each nursing course for which a numerical grade is provided and must achieve a "pass" in each clinical course. Students must maintain both cumulative and major averages of at least 60%.
- 2) Students who fail a clinical course may require remediation in a lab or clinical setting prior to re-taking the course to ensure competence for safe practice at the expected level. Clinical courses in the nursing program require the application of theory to practice. Therefore, a student who fails a required theory course may be advised to repeat its paired clinical course to ensure continuing safe clinical practice. Students who voluntarily withdraw from the same clinical course more than once will be required to withdraw from the Nursing Program. In exceptional circumstances, the Dean (or designate) may grant exemptions to this policy.
- 3) Students will be required to withdraw from the Nursing Program if they have failed three required nursing courses, or if they have failed the same required nursing course more than once. Students with a cumulative or major average of < 55% (or < 50% for first year students) will also be required to withdraw

from the nursing program (For further information, see Standing Required for Continuation in Programs at www.uwindsor.ca/policies)

4) Students who wish to repeat a previously passed nursing course for any purpose may be permitted to do so only if there is space in the course with approval. Students are not encouraged to repeat previously passed courses.

5) The program of studies for the four-year BScN degree must be completed within seven years from the first Nursing course (NURS-xxxx) taken.

6) Clinical placements will be arranged by the Faculty of Nursing to enable students to meet the Entry to Practice expectations of the College of Nurses of Ontario.

7) The Faculty of Nursing administration/staff reserve the right to change students' schedules, including clinical, theory and lab courses, according to operational needs and course availability, subject to Bylaw 54.

8) Students are required to meet all Faculty of Nursing clinical placement policy requirements and to conform to any additional agency-specific policies. Students will be denied access to a clinical placement site if they fail to be cleared for clinical placement. The Faculty of Nursing is not responsible for providing an alternative clinical experience for students who do not meet these requirements.

9) Any change in status related to a student's police clearance after clearance has been obtained must be immediately disclosed by the student to the Associate Dean.

10) If students are convicted of a criminal offense after admission to the program (or if a prior criminal conviction becomes known after admission to the program), they will be denied access to clinical placements as per clinical placement agencies' policies, and will be required to withdraw from the clinical course.

11) Attendance at all clinical nursing practica and experiential learning laboratories is mandatory. Non-attendance at a clinical placement by the University of Windsor's add/drop date for the semester will require that a student withdraw from the clinical course. A student may not miss more than 20% of the required hours in a clinical course. Time spent completing alternative learning activities will not be counted toward the student's clinical hours. A student who misses more than 20% of the required hours will be required to withdraw from the course without academic penalty if they are otherwise in good standing in the course.

12) To pass clinical courses, students must achieve all course learning outcomes.

13) Students are expected to attend clinical shifts as scheduled by the Faculty of Nursing. Shifts may be scheduled during the days, evenings, and/or weekends. Students should expect to have up to 8-hour shifts during the first two years of the program, except during Consolidated Practicum courses, when some 12-hour shifts may be required. In year four, students in precepted experiences may work 8 or 12 hour day, afternoon or night shifts. Students are not permitted to attend clinical more than 3 days in a row if they are scheduled for 12 hour shifts (i.e., three consecutive 12 hour shifts), and a minimum break of 48 hours must occur before starting the next set of shifts.

14) During consolidated practicum courses, students engage in full-time clinical learning that is scheduled daily. Students should not schedule conflicting commitments during consolidated practicum courses,

such as employment or registration in other courses. Requests to be excused from attending consolidation due to these types of conflicts will be denied. A letter to employers explaining the consolidation course requirements is available upon request to students in the Nursing Office.

15) Auditing of clinical courses is not permitted.

16) Students in good standing who are absent for more than one semester and wish to return to nursing must complete and submit the “Returning Nursing Student Form” available at the Nursing Main Office and/or on the Nursing website prior to registering for any courses, and may be required to demonstrate clinical competence before taking any clinical course. The deadlines for submitting the Returning Nursing Student Form are April 15 (for return in Fall), September 15 (for return in Winter), or January 15 (for return in consolidation/intersession/summer). Students who fail to meet these deadlines will not be guaranteed a clinical placement.

17) Students who wish to return to the Nursing Program after an absence of more than one year may be re-admitted with special permission from the Dean’s Office. Each case will be assessed on an individual basis. Students will be required to demonstrate continued competency in specific nursing courses, which may include any combination of OSCE and/or skill testing, challenge exams, and/or re-taking specified courses. Students will be charged a fee for this assessment. Students must follow the same process and deadlines as described in Regulation 17 (above).

18) Students with disabilities who require academic accommodations in any nursing course must contact an Advisor in Student Accessibility Services (SAS) to complete SAS registration and receive the necessary Letters of Accommodation. After registering with SAS, students must present their Letter of Accommodation and discuss their needs with their professor(s) as early in the term as possible. Deadlines for submission of documentation and completed forms to SAS are available on the website: <http://www.uwindsor.ca/studentaccessibility/>.

19) Students of the Faculty of Nursing are required to demonstrate behaviours consistent with the University of Windsor standards of acceptable behaviour (see Senate Bylaw 31) the Practice Standards and Practice Guidelines of the College of Nurses of Ontario (<http://www.cno.org/en/learn-about-standards-guidelines/standards-and-guidelines/>); and of the academic policies of the University of Windsor.

Failure of any Nursing student to conform to the principles of these documents may result in dismissal from any of the Faculty of Nursing programs.

The Faculty of Nursing reserves the right to remove a nursing student from the clinical placement in instances where the instructor has reason to believe that the student is rendering unsafe and/or unprofessional and/or unethical nursing care, or that the student's safety is at risk. A student who is removed from a clinical placement course due to rendering unsafe and/or unprofessional and/or unethical nursing care may attempt to retake the same course only once. Students will be required to withdraw from the nursing program if they are removed from the same or any other clinical placement course for a second time due to rendering unsafe and/or unprofessional and/or unethical nursing care.

Note: The College of Nurses of Ontario requires that in order to obtain permission to write Nurse Registration Examinations and/or apply for Nurse Registration in Ontario, a person must provide a declaration of one's status regarding:

(a) any conviction of a criminal offense under the Narcotic Control Act and the Food and Drugs Act;

- (b) being a subject of proceedings with respect to professional misconduct, incompetence, or incapacity in Ontario in another health profession or in another jurisdiction in nursing or in another health profession;
- (c) any mental or physical disorder which makes it desirable in the public interest that the person not practice;
- (d) a current police clearance within six months of examinations.

Further Information

Applicants wishing to discuss the program or visit the Faculty of Nursing should contact the campus (519-253-3000, Ext.2265). Information may also be obtained from the Internet: www.uwindsor.ca/nursing

Major Clinical Resources

Nursing is a profession of diverse opportunity. Students will engage in learning in diverse clinical settings. Clinical placements include, but are not limited to hospitals, public health agencies, home health care or visiting nurse agencies, family support services, primary care offices and clinics, day care centres and preschools, elementary and high schools, new Canadian multicultural programs, First Nations groups, long-term care homes, and seniors residences and services.

Awards and Scholarships

Nursing Awards and Scholarships are available to students enrolled at the University of Windsor, Faculty of Nursing.

PROGRAMS

Honours Bachelor of Science in Nursing

This program is four years in length and is designed for individuals who are seeking to prepare for a career in nursing at the baccalaureate level.

The curriculum is designed on the premise that professional nursing is multidisciplinary in nature, applying nursing, biological and social sciences, as well as the arts, to the care of individuals, families and communities. As inquiring, caring, competent practitioners, nurses serve the needs of society through health promotion, health maintenance, prevention of disease and care of the sick and dying.

The Faculty of Nursing programs are approved and accredited. National Accreditation was granted in 1998 by the Board of Accreditation, Canadian Association of Schools of Nursing (CASN). The collaborative program was granted candidacy status by the Board of Accreditation of CASN in 2004. In 2016, CASN Accreditation Bureau granted the University of Windsor, Lambton College and St. Clair College collaborative Nursing Program a 7-year term in response to the on-site review that took place in November 2015.

Upon successful completion of the program, students are eligible to write nurse registration examinations and pursue graduate studies.

Degree Requirements

Total courses: 46 (127 credits = 42.33 course equivalents)

(a) NURS-1110, NURS-1900, NURS-1210, NURS-1511, NURS-1120, NURS-1220, NURS-1521, NURS-1310, NURS-1410, NURS-1512, NURS-1612, NURS-2130, NURS-2531, NURS-2420, NURS-2522, NURS-2810, NURS-2320, NURS-2541, NURS-2532, NURS-2820, NURS-2920, NURS-2930, NURS-2622, NURS-3551, NURS-3542, NURS-3830, NURS-3940, NURS-3950, NURS-3960, NURS-3140, NURS-3561, NURS-3552, NURS-3840, NURS-3970, NURS-3632, NURS-4150, NURS-4571, NURS-4980, NURS-4990, NURS-4562*, NURS-4572*.

(b) One of NURS-4999 or NURS-4951;
(c) SOSC-2500 or STAT-2910,
(c) BIOM-1073; PSYC-3390; PHIL-1350

Note: NURS-4150, NURS-4571, NURS-4980, NURS-4990, NURS-4999 (or NURS-4951) must be taken in same semester; NURS-4562 and NURS-4572 must be in the same semester.

* NURS-4562, NURS-4572 are double-weighted courses that will be offered as half-semester (6 week) courses. If NURS-4562 is taken during the first 6 weeks of the semester, then NURS-4572 will be taken during the second 6 weeks. If NURS-4572 is taken during the first 6 weeks of the semester, then NURS-4562 will be taken during the second 6 weeks.

Courses used to calculate the major average are: All NURS courses

BScN Program for Graduates of St. Clair College or other Ontario College Practical Nursing Program – Degree Completion Pathway

Qualified students will be given one year of credit for their previously completed two-year diploma in Practical Nursing that includes all relevant clinical experiences. Each student who enters the program will complete accredited courses from years one and two of the collaborative nursing program at the site to which they were admitted (University of Windsor or St. Clair College) The courses that have been selected bridge the gap between what was previously studied and what needs to be completed to enter year three of the BScN program. Students will be required to demonstrate competency with their health assessment skills prior to entering their first clinical experience in the program.

Degree Requirements:

Total courses: The students entering into the program will receive credit for 12 courses towards the BScN. They will complete an additional 14 courses at St. Clair College or the University of Windsor that are a combination of year one and year two collaborative nursing course requirements. In addition, they will also complete all required year three and year four courses.

The Registered Practical Nurse Pathway will include:

(a) NURS-1900, NURS-2130, NURS-2531, NURS-2810, NURS-2320, NURS-2541, NURS-2532, NURS-2820, NURS-2920, NURS-2622, NURS-3551, NURS-3542, NURS-3830, NURS-2930, NURS-3940, NURS-3950, NURS-3960, NURS-3140, NURS-3561, NURS-3552, NURS-3840, NURS-3970, NURS-3632, NURS-4150, NURS-4571, NURS-4980, NURS-4990, NURS-4562*, NURS-4572*
(b) One of NURS-4999, NURS-4571;
(c) BIOM-1073, STAT-2910 or SOSC-2500; PSYC-3390; PHIL-1350

Note: NURS-4150, NURS-4571, NURS-4980, NURS-4990, NURS-4999 (or NURS-4951) must be taken in same semester; NURS-4562 and NURS-4572 must be taken in the same semester.

*Will be offered as half-semester (6 week) courses.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Students who come to the University of Windsor at the end of the year at Lambton College or St. Clair College will enter year three of the collaborative BScN.

Note: If NURS-4562 and NURS-4572 are taken in the Fall term, then NURS-4150, NURS-4571, NURS-4980, NURS-4990, and NURS 4000 are taken in the Winter term. If NURS-4150, NURS-4571, NURS-4980, NURS-4990, and NURS 4000 are taken in the Fall term, then NURS-4562 and NURS-4572 are taken in the Winter term.

NURSING COURSES

Note 1: Only NURS-4951, NURS-4951, and NURS-3910 are open to non-nursing students. These courses will not necessarily be offered each year.

Note 2: Theory courses are marked with a "(T)" next to the course title. Clinical courses are marked with a "(C)" next to the course title.

Note 3: For all nursing students, a minimum of 60% is required to complete/pass any nursing theory course. A minimum 60% grade is required to meet any nursing theory course prerequisites. (i.e. courses that are coded NURS-xxx).

NURS-1110. Professional Nursing I (T)

This is the first in a series of five courses that address professional nursing practice. The learner is introduced to the roles and responsibilities of registered nurses and fundamental concepts of professional nursing practice. Emphasis is on exploring the concept of health and professional nursing skills (i.e., critical thinking, therapeutic communication, evidence-informed decision-making, teaching and learning) that promote patient/client and family-centred care. (Prerequisite: Admission to the collaborative undergraduate nursing program. Corequisites: Registration in all courses required for first year fall semester) (3 lecture hours per week). 3 credits

NURS-1120. Professional Nursing II (T)

This is the second in a series of five courses addressing professional nursing practice. The learner will explore concepts that contribute to safer, high-quality patient/client-centered health care systems. Examples include: leadership, collaboration, quality, and nursing informatics. The learner is introduced to the history and structure of the Canadian health care system. They explore the legal and professional roles and responsibilities of registered nurses in various care settings, and how nurses promote community and population health. (Prerequisite: NURS 1110, NURS 1900.) (3 Lecture hours per week) 3 credits

NURS-1210. Human Anatomy and Physiology I (T)

This is the first of two courses that introduce the learner to the foundations of anatomy and physiology within the context of nursing and health. Content includes an overview of the structure, function, and organization of the human body (from the cellular level, to tissues, organs, and organ systems) and review of selected organ systems such as the integumentary, nervous, endocrine, hematologic, and musculoskeletal systems. Review of systems will incorporate the anatomy and physiology of the system and its relevance, and importance to patient/client care. (Prerequisite: Admission to the collaborative undergraduate nursing program. Co-requisite: Registration in all courses required for first year fall semester) (3 lecture hours per week; 2 lab hours every other week) 3 credits

NURS-1220. Human Anatomy and Physiology II (T)

This is the second of two courses that introduce the learner to the foundations of anatomy and physiology within the context of nursing and health. Emphasis is on interrelationships among the cardiovascular, immune, respiratory, digestive, urinary, and reproductive systems. The learner will also examine the regulation of physiological functions involved in maintaining homeostasis. (Prerequisite: NURS 1210.) (3 lecture hours per week; 2 lab hours every other week) 3 credits

NURS-1310. Pharmacology and Medication Management I (T)

This is the first in a sequence of two pharmacology courses. This course introduces the learner to the fundamentals of the science of pharmacology and safe medication management. Selected herbal, over-the-counter, and major drug classifications are introduced. (Prerequisite: Successful completion of all year one fall required courses) (Co-requisite: Registration in all courses required for first year Winter semester) (3 Lecture hours per week) (3 credits).

NURS-1410. Holistic Health Assessment I (T)

This is the first of two courses that introduce the learner to concepts and principles underlying the holistic health assessment of the well adult. In this introductory course, the focus is on the development of interviewing and history taking skills, and foundational health assessment skills (physical, psychosocial, cultural, and spiritual). The learner will recognize normal findings and deviations from normal, and communicate assessment findings to promote health. (Prerequisite: Successful completion of all year one fall required courses) (Co-requisite: Registration in all courses required for first year winter semester) (3 Lecture hours per week) (3 credits).

NURS-1511. Experiential Learning Lab I (C)

This is the first in a series of seven onsite experiential learning labs in which the learner will apply theory to clinical practice through a variety of interactive and simulated activities. In this course, the learner is introduced to clinical and communication skills for the professional nurse. (Prerequisite: Admission to the undergraduate collaborative nursing program) (Corequisite: Registration in all courses required for first year fall semester) (2 hours per week) (1 credit).

NURS-1512. Clinical Practicum I (C)

This is the first in a series of clinical practica that provide the learner with the opportunity to apply knowledge and skills in clinical practice settings. The learner will practice professionalism, components of holistic health assessment, and communication skills with the adult population, in the context of family and community. (Prerequisite: Successful completion of all year one fall required courses) (Co-requisite: Registration in all courses required for first year winter semester) (36 hours per semester) (1.5 credits). (This is an experiential learning course).

NURS-1521. Experiential Learning Lab II (C)

This is the second in a series of seven onsite experiential learning labs in which the learner will apply theory to clinical practice through a variety of interactive and simulated activities. In this course, the learner will apply introductory holistic health assessment skills, and selected clinical and communication skills for professional nursing. (Prerequisite: Successful completion of all year one fall required courses) (Co-requisite: Registration in all courses required for first year winter semester; this course must be taken concurrent with Holistic Health Assessment I) (36 hours per semester) (1 credit).

NURS-1612. Consolidated Practicum I (C)

This course provides the learner with the opportunity to consolidate knowledge and skills in a clinical practice setting. The learner will practice professionalism, selected clinical and health assessment skills, and communication skills with the adult population in the context of family and community.

(Prerequisite: Successful completion of all required year one required courses) (72 hrs over two weeks) 3 credits. (This is an experiential learning course).

NURS-1900. Writing for the Professional Nurse (T)

This course introduces the principles of effective written communication that are essential in the diverse roles of a nursing professional. The aim is to help the learner develop the skills to critique and communicate written information accurately and reliability in a variety of forms (e.g., personal reflections, scholarly paper, educational materials, abstracts, posters, and critique, journal articles).

(Prerequisite: Open only to Nursing students. Corequisites: Registration in all courses required for first year fall semester) (3 lecture hours per week). (3 credits).

NURS-2130. Professional Nursing III (T)

This course is the third in a sequence of five courses addressing professional nursing practice. The overarching focus is on competency development in intra-and inter-professional collaboration. Instructional content and learning activities will prepare the learner to collaborate with patients/clients/families/communities and other care providers to promote health. Examples of major topics include models of health promotion/prevention, communication and leadership in groups, cultural competency, teaching and learning, and evaluating practice guidelines for evidence-informed decision-making. (Prerequisite: Successful completion of all year one required courses.) (Co-requisite: Registration in all courses required for second year fall semester.) (3 Lecture hours per week) (3 credits).

NURS-2320. Pharmacology and Medication Management II (T)

This is the second in a sequence of two pharmacology courses. This course builds on the knowledge the learner gained in Pharmacology and Medication Management I (NURS 1310). Major drug classifications will be examined and discussed. Particular emphasis will be placed on the nurse's responsibilities in drug therapy and the development of critical thinking skills necessary for the safe administration of medications in a variety of settings and during transitions in care. (Prerequisite: Successful completion of all year one winter required courses.) (Co-requisites: Registration in all courses required for second year fall semester.) (3 Lecture hours per week.)

NURS 2420. Holistic Health Assessment II (T)

This is the second of two courses that introduces and expands upon holistic health assessment concepts and principles of the well adult. The focus is on continued development of interviewing and history taking skills, and foundational health assessment skills related to specific systems. The learner will recognize normal findings, deviations from normal, and communicate assessment findings to promote health. (Prerequisite: Successful completion of all year one fall required courses) (Co-requisite: Registration in all courses required for first year winter semester) (3 Lecture hours per week)

NURS-2522. Clinical Practicum II (C)

This is the second in a series of clinical practica that provide opportunities for learners to integrate knowledge and skills in a clinical practice setting. The focus of this course is on application of the nursing process to provide holistic person-family centred care for adults experiencing health alterations. The learner will apply sub-concepts of critical thinking (clinical reasoning and clinical judgment). They will develop skills in evidence-informed decision-making and intra- and interprofessional collaboration to support the delivery of safe, quality nursing care. (Prerequisites: Successful completion of all required year one courses.) (Co-requisite: Registration in all courses required for second year fall semester.) (96 hours per semester; 3 credits.) (This is an experiential learning course).

NURS-2531. Experiential Learning Lab III (C)

This is the third in a sequence of seven onsite experiential learning labs in which the learner will apply knowledge-based principles to practice by engaging in a variety of interactive and simulated activities that foster clinical reasoning and clinical judgment. Learners will build proficiency in therapeutic and professional communication techniques (intra and interprofessional), holistic health assessment skills, safe medication administration principles, and selected psychomotor skills to care for adults with health alterations, and those undergoing surgical interventions. (Prerequisite: Successful completion of all year one winter required courses) (Co-requisite: Registration in all courses required for second year fall semester: this course must be taken concurrent with Holistic Health Assessment II) (36 hours per semester) (1 credit)

NURS-2532. Clinical Practicum III

This is the third in a series of clinical practica that provide the learner with the opportunity to apply knowledge and skills in clinical practice settings. The learner will apply the nursing process in the holistic care of patients/clients/families within the context of their community in collaboration with health care providers and in a variety of care settings and populations across the lifespan (e.g., child-bearing families, individuals experiencing alterations in physical and/or mental health). (Prerequisites: successful completion of all required fall year 2 courses) (Co-requisites: NURS 2541; NURS 2820; NURS 2920; NURS 2520). (8 hr/week; 3 credits). (This is an experiential learning course.)

NURS-2541. Experiential Learning Lab IV (C)

This is the fourth in a sequence of seven onsite experiential learning labs in which the learner will apply knowledge-based principles to practice by engaging in a variety of interactive and simulated activities that foster clinical reasoning and clinical judgment. Learners will integrate therapeutic and professional communication techniques (intra and interprofessional), holistic health assessment skills, safe medication administration principles, and selected psychomotor skills to provide patient and family centered care for adults with health alterations, childbearing women and newborns, and individuals with psychiatric and mental health concerns. (Prerequisite: Successful completion of all year two fall required courses) (Co-requisite: Registration in all courses required for second year winter semester) (24 hours per semester) (1 credit) .

NURS-2622. Consolidated Practicum II

This is the second in a series of consolidated clinical practica that provide the learner with the opportunity to consolidate knowledge and skills in clinical practice settings. The learner will apply the nursing process in the holistic care of patients/clients/families within the context of their community, in collaboration with health care providers and in a variety of care settings and populations across the lifespan (e.g., child-bearing families, individuals experiencing alterations in physical and/or mental health). (Prerequisites: successful completion of all Year 2 Winter courses) (72 hrs over two weeks) (3 credits). (This is an experiential learning course.)

NURS-2810. Adult Health and Health Alterations I (T)

This is the first in a sequence of four courses that address the concepts and principles associated with the nursing care of adults experiencing alterations in health, across health care settings and throughout the care continuum. This course focuses on foundational knowledge-based concepts (e.g., stress, pain, oxygenation) that are common across a variety of health alterations, and on the care of adults undergoing surgery. The course also focuses on the care of adults experiencing selected common acute or chronic health alterations (e.g., respiratory disorders, vascular disorders, diabetes). Principles of pathophysiology, assessment, pharmacology, nutrition, collaborative management and quality and evidence-based care are emphasized. (Prerequisites: Successful completion of all year one required courses.) (Co-requisites: Registration in all courses required for second year fall semester.)

NURS-2820. Adult Health and Health Alterations II (T)

This is the second in a sequence of four courses that address the concepts and principles associated with the nursing care of adults experiencing alterations in health across health care settings and throughout the care continuum. Building upon the knowledge acquired in Adult Health and Health Alterations I, this course continues to focus on the care of adults experiencing selected common acute or chronic health alterations (e.g. infectious diseases, disorders of the gastrointestinal, urinary, and cardiovascular systems). Principles of pathophysiology, assessment, pharmacology, nutrition, collaborative management and quality and quality and evidence-based care are emphasized. (Prerequisites: Successful completion of all year two fall required courses.) (Co-requisites: Registration in all courses required for second year winter semester.)

NURS-2902. Individualized Clinical Nursing Experience (C)

This clinical practice course is intended for students who were unable to sequentially complete NURS-2722, NURS-2742, or NURS-2782 due to extenuating circumstances. The course emphasizes the practice of professional and technical skills in a clinical setting that will enable to students to obtain course competencies that are consistent with the course that student could not complete as a result of extenuating circumstances. This course may be taken only with special permission, and will be offered only if required resources are available. (Prerequisite: Completion of all year 2 non-clinical nursing courses; clinical course pre-requisites to be determined by the Faculty of Nursing on an individual basis). (Offered on a Pass/Non-Pass basis) (40 hours/week for 2 weeks if used to replace NURS-2722, NURS-2742 or 40 hours/week for 4 weeks if used to replace NURS-2782.) (Students who completed NURS-2722, NURS-2742, or NURS-2782 are not eligible to take this course.) (This is an experiential learning course).

NURS-2920. Maternal and Newborn Care (T)

This course introduces the learner to concepts related to the provision of nursing care for childbearing women, their newborns and families. The focus of this course is on the application of critical thinking and clinical judgement related to reproduction, pregnancy, labour and delivery and postpartum care. Culture, situational crises, ethical considerations, risk assessment and intervention strategies will be explored to promote the health of childbearing women, their newborns and families. (Prerequisites: Completion of all year 2 fall semester courses) (Corequisites: Registration in all required nursing and courses in winter semester) (3 lecture hours a week.)

NURS-2930. Mental Health Nursing

This course introduces the learner to specialized nursing knowledge required to understand, promote, and maintain mental health and wellness across the lifespan. This course focuses on the nursing care of individuals experiencing major mental health disorders. Comprehensive and focused mental health assessments; crisis intervention and prevention; therapeutic communication techniques/skills; and the promotion of positive mental health outcomes are addressed. Through a trauma-informed lens, principles of physiology; pharmacological and non-pharmacological interventions; and collaborative, quality, and evidence-based care are explored. (Prerequisite: Successful completion of all year two fall required courses.) (Co-requisite: Registration in all courses required for second year winter semester.) (3 Lecture hours per week.) (3 credits.)

NURS-3140. Professional Nursing IV

This is the fourth in a sequence of five courses addressing professional nursing practice. This course prepares learners to apply tools and frameworks for leading and managing change at the team, organizational and systems levels. Learners will analyze and apply theories of change, and quality improvement tools and processes to actual/hypothetical scenarios from various practice situations and settings. Emphasis is on continued development of leadership, critical thinking, oral and written communication skills, evidence-informed decision-making, cultural safety, patient safety, and nursing

informatics. (Prerequisite: Successful completion of all year 3 fall required courses.) (Co-requisites: Registration in all courses required for Year 3 winter semester.)

NURS-3542. Clinical Practicum IV

This is the fourth in a series of clinical practica that provide the learner with the opportunity to apply knowledge and skills in clinical practice settings. The learner will apply the nursing process in the holistic care of patients/clients/families/communities in collaboration with health care providers and in a variety of care settings and populations across the lifespan (e.g., child-bearing families, pediatrics, individuals experiencing complex alterations in physical and/or mental health). (Prerequisites: successful completion of all Year 2 courses.) (96 hours (8 hrs x 12 wks).) (3 credits.) (This is an experiential learning course.)

NURS-3551. Experiential Learning Lab V

This is the fifth in a sequence of seven onsite experiential learning labs in which the learner will combine knowledge-based principles to formulate, evaluate, and revise care to specialized populations across the lifespan, in various settings. Learners will demonstrate clinical reasoning and clinical judgment through a variety of interactive and simulated activities including safe medication administration, laboratory values interpretation, and selected psychomotor skills. Learners will demonstrate therapeutic and professional communication techniques to identify and implement change. (Prerequisite: Successful completion of all year two winter required courses.) (Co-requisite: Registration in all courses required for third year fall semester.) (2 hrs every other week; 0.5 credit.)

NURS-3552. Clinical Practicum V

This is the fifth in a series of clinical practica that provide the learner with the opportunity to apply knowledge and skills in clinical practice settings. The learner will apply the nursing process in the holistic care of patients/clients/families/communities in collaboration with health care providers and in a variety of care settings and populations across the lifespan (e.g., child-bearing families, pediatrics, older adults, individuals experiencing alterations in physical and/or mental health). (Prerequisites: successful completion of all Fall Year 3 courses.) (Co-requisite: Registration in all courses required for third year Fall semester.) 96 hours (8 hr x 12 weeks) (3 credits). (This is an experiential learning course).

NURS-3561. Experiential Learning Lab VI

This is the sixth in a sequence of seven onsite experiential learning labs in which the learner will combine knowledge-based principles to formulate, evaluate, and revise care to specialized populations across the lifespan, in various settings. Learners will demonstrate clinical reasoning and clinical judgment through a variety of interactive and simulated activities including safe medication administration for adult patients and specialized populations, laboratory values interpretation, and learning or mastering selected psychomotor skills and assessments. Learners will demonstrate therapeutic and professional communication techniques to identify and implement change. (Pre-requisites: Successful completion of all year 3 fall required courses.) (Co-requisite: Registration in all courses required for Year 3 winter semester.)

NURS-3632. Consolidated Practicum III

This is the third in a series of three consolidated clinical practica that provide the learner with the opportunity to consolidate knowledge and skills in clinical practice settings. The learner will apply the nursing process in the holistic care of patients/clients/families/communities in collaboration with health care providers and in a variety of care settings and populations across the lifespan (e.g., child-bearing families, pediatrics, older adults, individuals experiencing alterations in physical and/or mental health). (Prerequisites: successful completion of all fall and winter Year 3 courses.) (This is an experiential learning course).

NURS-3760. Advanced Health Assessment (T)

This course is intended to help senior level BScN students strengthen their assessment skills through presentation of cases, experiential learning, helping student to effectively and consistently differentiate their assessments and focus their plans of care. The student will be expected to integrate prior and current learning in deciding what data to collect and what data is important in developing differential nursing diagnoses. Provides an opportunity to focus on critical thinking, diagnostic-reasoning skills as students transition to the novice RN role. (Prerequisite: NURS-2782.) (1 lecture hr/week plus 2 laboratory hrs/week)

NURS-3830. Adult Health and Health Alterations III

This is the third in a sequence of four courses that address the concepts and principles associated with the nursing care of adults experiencing alterations in health across health care settings and throughout the care continuum. Building upon the knowledge acquired in Adult Health and Health Alterations I and II, this course focuses on the care of adults experiencing selected complex acute or chronic health alterations (e.g., cardiovascular, endocrine, renal, hematology, and oncology disorders, and end of life care). Principles of pathophysiology, assessment, pharmacology, nutrition, collaborative management, and quality and evidence-based care are emphasized. (Prerequisites: Successful completion of all year two winter required courses.) (Co-requisites: Registration in all courses required for third year fall semester.) (3 lecture hours per week.) (3 credits).

NURS-3840. Adult Health and Health Alterations IV

This is the fourth in a sequence of four courses that address the concepts and principles associated with the nursing care of adults experiencing alterations in health across health care settings and throughout the care continuum. Building upon the knowledge acquired in Adult Health and Health Alterations I, II and III, this course focuses on adults experiencing complex and multi-system health alterations (e.g. cardiac arrhythmia and disorders, hemodynamic monitoring, shock states, burns, acute respiratory and neurological disorders and emergency care), and includes concepts and interventions associated with care of the critically ill adult. Principles of pathophysiology, assessment, pharmacology, nutrition, collaborative management and quality and evidence-based care are emphasized. (Prerequisites: Successful completion of all year three fall required courses.) (Co-requisites: Registration in all courses required for third year winter semester.)

NURS-3902. Individualized Clinical Nursing Experience (C)

The course emphasizes the practice of professional and technical skills in the care of individuals across the life span who are experiencing complex or multi-system health disruption within the context of family and community. This course may be taken only with special permission, and will be offered only if required resources are available. (Prerequisite: Completion of all year 3 non-clinical nursing courses; clinical course pre-requisites to be determined by the Faculty of Nursing on an individual basis; all non-specified courses). (Offered on a Pass/Non Pass basis.) (40 hrs/week for 2 weeks). (This is an experiential learning course).

NURS-3940. Nursing Care of Infants, Children, and Youth

This course focuses on the health promotion and nursing care needs of infants, children and youth with alterations in health. Principles of growth and development; and the physiological, psychosocial, cultural and spiritual care needs of children with the context of family are emphasized. (Prerequisites: Successful completion of all year two winter required courses.) (Co-requisites: Registration in all courses required for third year fall semester.) (3 lecture hours per week.) (3 credits).

NURS-3950. Course Title: Nursing Research

Building on knowledge and skills developed in Professional Nursing I and III, this course will enhance the learners' ability to formulate questions for evidence-informed decision-making and apply critical appraisal skills to selected research methodologies and studies. Learners will critically use relevant information, knowledge and communication technologies to support evidence-informed nursing practice. (Prerequisite: Successful completion of all year two winter required courses.) (Co-requisite: Registration in all courses required for third year fall semester.) (3 lecture hours per week.) (3 credits).

NURS-3960. Community Health Nursing

This course will focus on the registered nurses' role in caring for, and working with, communities in Canada. Emphasis will be placed on applying relevant community health nursing practice standards, community health nursing theories, the social determinants of health, and social justice concepts. The learner will explore the use of evidence-informed information and therapeutic relationships in advocating for and promoting the health of communities. (Prerequisites: Successful completion of all year two winter required courses.) (Co-requisites: Registration in all courses required for third year semester.) (3 lecture hours per week.) (3 credits).

NURS-3970. Health Issues in Gerontology

This course is designed to focus on contemporary biopsychosocial changes inherent in human aging. It includes an exploration of the theories, the meaning, and the epidemiology of aging, and public policy relevant to the diverse aging population in Canada. The course examines debates on health care rationing, self-determined death, mistreatment of older adults, and the impact of age on creativity and sexuality. It provides an overview of the influence of chronic illnesses and the social determinants of health on age, aging, and later life. The course also considers normal aging patterns and abnormal circumstances such as cognitive and mental health decline; and discusses implications for nursing and other service providers across disciplines as well as the health care and long-term care sectors in Ontario, Canada, and beyond. (Prerequisites: Successful completion of all year 3 fall required courses.) (Co-requisites: Registration in all courses required for third year winter semester.)

NURS 4150. Professional Nursing V

This is the last in a sequence of five courses addressing professional nursing practice. This course is designed to facilitate mastery of the skills and competencies needed to transition from the role of nursing student to registered nurse. Emphasis is placed on the nurse's role and responsibilities in coordinating patient/client care across settings, sectors, and systems, including supporting continuity of care and safe care transitions. Selected curricular concepts (i.e., knowledge-based practice, clinical reasoning, clinical judgement, safety) are integrated to promote independent nurse decision-making and to help prepare learners for nursing registration examinations (NCLEX-RN, Jurisprudence Exam). (Prerequisite: Successful completion of all year 3 required courses.) (Co-requisites: NURS-4571, NURS-4980, NURS- 4990.) (Anti-requisite: NURS-4730.)

NURS-4562. Integrated Clinical Practicum: Community

This precepted clinical experience engages the learner in opportunities to synthesize cumulative knowledge and skills in a variety of community practice settings, and with populations across the lifespan. The emphasis is on demonstrating proficiency in select entry-to-practice competencies and enacting the role of nurse as care coordinator to support safe transitions in care and client/family navigation of the healthcare system. The learner will independently apply all core curricular concepts (i.e., critical thinking, knowledge-based practice, evidence-informed decision making, health, teaching/learning, professional practice, communication, leadership, collaboration, quality, safety, person-family centred care and health informatics) within the context of community as client. This course includes experiential integrated rounds. (Prerequisites: successful completion of all year 3 courses; corequisite: NURS-4572) (This is an experiential learning course.)

NURS 4571. Experiential Learning Lab VII

This is the seventh in a sequence of seven onsite experiential learning labs in which the learner will integrate knowledge-based principles with clinical reasoning and clinical judgment to formulate, evaluate, and revise nursing care for specialized populations across the lifespan, in various settings, and in changing contexts. Interactive simulated scenarios assess mastery of competencies required for entry-to-nursing practice. The case-based scenarios will emphasize the nurse coordination role and enable the learner to apply concepts of leadership, followership, collaboration, communication, and principles of delegation and prioritization. (Prerequisite: Successful completion of all year 3 fall required courses.) (Co-requisites: NURS- 4150, NURS- 4980, NURS- 4990.)

NURS-4572. Integrated Clinical Practicum: Hospital

This precepted clinical experience engages the learner in opportunities to synthesize cumulative knowledge and skills in a variety of acute care practice settings, and with populations across the lifespan. The emphasis is on demonstrating proficiency in select entry-to-practice competencies and enacting the role of nurse as care coordinator to support safe transitions in care and patient/family navigation of the healthcare system. The learner will independently apply all core curricular concepts (i.e., critical thinking, knowledge-based practice, evidence-informed decision making, health, teaching/learning, professional practice, communication, leadership, collaboration, quality, safety, person-family centred care and health informatics) to the care of patients and families with complex and changing health needs. This course includes experiential integrated rounds. (Prerequisite: Successful completion of all year 3 required courses.) (Co-requisite: NURS-4562.) (This is an experiential learning course.)

NURS-4902. Individualized Clinical Nursing Experience (T)

This clinical practice course is intended for students who were unable to complete a required Level 4 clinical course (NURS-4722 or NURS-4762) due to extenuating circumstances. This course emphasizes the practice of professional and technical skills in a clinical setting that will enable to students to obtain course competencies that are consistent with the course that student could not complete as a result of extenuating circumstances. This course may be taken only with special permission and will be offered only if required resources are available. (Prerequisite: Completion of all non-clinical nursing courses in the level in which the student is enrolled; clinical course pre-requisites to be determined by the Faculty of Nursing on an individual basis). (Offered on a Pass/Non-Pass basis) (192 hours over 6-12 weeks) (Students who have successfully completed all of the usual clinical courses for their current academic year are not eligible to take NURS-4902.) (This is an experiential learning course).

NURS-4951. The Human Meaning of Death (T)

Learners explore the complex and multidimensional ways in which death, dying, and grief are experienced, understood, and navigated by individuals and communities around the globe. Legal, ethical, and cultural considerations surrounding these issues, including Medical Assistance in Dying (MAiD) and advanced directives are addressed. By engaging in a variety of learning activities and modalities, learners will reflect on their own attitudes and beliefs about death, dying and grief to develop a deeper understanding of these phenomena. (Open to nonnursing students) (3 lecture hours a week.)

NURS-4980. Palliative and End-of-Life Care

This course prepares the learner to apply a palliative approach to care for patients/clients/families who are experiencing progressive life-limiting illnesses and/or nearing end of life. The focus of this course is on the application of critical thinking and decision-making in the assessment and planning of evidence-informed person and family-centred palliative care and with emphasis on symptom assessment and management, communication, collaboration, psychosocial, cultural, and spiritual support, loss and grief, and end of life care in the last days and hours. The learner will analyze ethical, legal, and systems-based

issues in palliative care and nursing roles and responsibilities in coordinating culturally safe care across sectors and settings. (Prerequisite: Successful completion of all year 3 required courses.) (Co-requisites: NURS-4571, NURS-4150, NURS-4990).

NURS-4990. Issues in Global and Planetary Health

The learner will explore the foundational concepts of global and planetary health, as well as current and emerging issues, trends, and research that impact human, global and planetary health. The learner will apply concepts of critical thinking, health, safety, professional practice, leadership, collaboration, and evidence informed practice when examining the roles, responsibilities and contributions of nurses, the nursing profession, and other stakeholders in addressing global and planetary health trends, issues, and concerns. (Pre-requisites: Successful completion of all year 3 required courses.) (Co-requisites: NURS-4571, NURS-4150, NURS-4980.)

NURS-4999. Nursing Specialty Option (T)

This Nursing Specialty Option course provides the learner an opportunity for in-depth study a topic of interest. Topics are relevant to learners preparing for a career in nursing or other health profession and will vary from term to term. Examples of special topics include Women's Health, Indigenous Health, Patient Safety, and Oncology. Please contact the Faculty of Nursing for a complete list of courses (Some courses will be open to non-Nursing students) (3 lecture hours a week, with possible lab or other experiential component depending on the topic). (May be repeated for credit if content changes).

FACULTY OF SCIENCE

Students are directed to become familiar and to comply with the general regulations of the University which apply to all students. Additionally, the Faculty, and individual programs within the Faculty of Science may have particular regulations. Students enrolled in programs in the Faculty of Science also must comply with these particular requirements which may be found in the program sections of the Faculty. We strongly encourage students to seek counselling in the Departments or in the Faculty of Science Office to clarify the requirements of their particular degree programs.

General Information About Science Programs

Bachelor of Science General Programs

The Bachelor of Science (General Science) requires the completion of thirty courses.

Bachelor of Science Honours Programs

Programs leading to an Honours B.Sc. require the completion of forty courses. Specific requirements differ depending upon the Honours Major(s). Course selection may provide for further specialization in a single subject or in a combination of related subjects. Students who achieve a major average of 70% or higher will receive the Honours degree.

BSc Honours with Thesis Programs

Programs leading to an Honours B.Sc. with Thesis require the completion of forty courses, of which two course credits would result in a thesis in the final year of study. Honours standing (major average of 70% or higher) is required for graduation in all B.Sc. with Thesis programs. In any program some degree of specialization is possible; course selection may provide for further specialization in a single subject or in a combination of related subjects.

Bachelor of Computer Science Programs

Computer Science - Both general and honours programs are offered, leading to the degree of Bachelor of Computer Science (B.C.S.). Each permits the student to augment a specialized study of computers with an extensive study of one of a number of related fields, or with a broad spectrum of other courses. A Co-operative Education program is offered in Honours Computer Science. Also offered are B.Sc. programs leading to degrees in Computer Information Systems Specialization, or with Software Engineering Specialization.

Bachelor of Arts in Economics

Economics - Both general and honours programs are offered leading to the Bachelor of Arts degree in Economics. Combined degrees are also available.

Bachelor of Science Honours in Economics

Economics - Honours program leading to the Bachelor of Science degree in Economics.

Bachelor of Mathematics

Mathematics and Statistics - Both general and honours programs lead to the Bachelor of Mathematics (B.Math.) degree. Mathematics also may be combined with Computer Science or another major leading to the Honours B.Math. degree.

Co-operative Education Programs

The Co-operative Education Program offers students the opportunity to combine their classroom experiences with related work experiences. Students seeking admission to the Co-operative Education Program must be admitted to the Faculty of Science and enrolled as a full-time student. The Faculty of Science offers the following Co-op programs:

Computer Science:

Bachelor of Computer Science (Honours)

Bachelor of Science (Honours Computer Information Systems)

Bachelor of Science (Honours Computer Science with Software Engineering Specialization)

Physics:

Bachelor of Science in Physics

Bachelor of Science in Physics (Medical Physics)

ADMISSION AND APPLICATION

Students can apply for admission to the Co-op program in high school and in September during the second year of study. Students applying for Co-op during their second year of study will be required to submit an application form and a resume. Second year admission will be based on academic achievement, previous volunteer and paid work experience, and in some cases, an interview.

NOTE: Each Co-op program within the Faculty of Science has particular regulations and guidelines. Students are directed to the program sections of the Faculty.

Pre-medical and Pre-professional Programs

In addition to the degree programs, the Faculty of Science offers combinations of course selections for students intending to apply to professional schools such as medicine, dentistry, optometry, pharmacy, physiotherapy, alternative medicine, chiropractic, radiation therapy, etc. All students intending to apply for admission to a professional school are advised to study carefully the requirements of the particular schools) to which admission is sought because there is some variation, both with respect to choice of subjects and number of years of study required for entrance. Institutions may also change their requirements from time to time.

PROGRAMS ADMINISTERED BY THE OFFICE OF THE DEAN OF SCIENCE

Bachelor of Science (General Science)

Degree Requirements

Total courses: thirty.

(a) two sets of six courses from two different Departments or School as listed:

Biological Sciences: BIOL-1101 and BIOL-1111; and *four BIOL-XXXX or BIOM-XXXX courses at the 2000 level or above

Chemistry and Biochemistry: CHEM-1100 and CHEM-1110; and *four CHEM-XXXX or BIOC-XXXX courses at the 2000 level or above

Computer Science: COMP-1400 and COMP-1410; and *four COMP-XXXX courses at the 2000 level or above

School of the Environment: ESCI-1100 and ESCI-1111; and *four ESCI-XXXX courses at the 2000 level or above

Economics: ECON-1100 and ECON-1110; and *four ECON-XXXX courses at the 2000 level or above

Mathematics and Statistics: MATH-1720 (or MATH-1760) and MATH-1730; and *four MATH-XXXX or STAT-XXXX courses at the 2000 level or above

Physics: PHYS-1400 and PHYS-1410; and *four PHYS-XXXX courses at the 2000 level or above

*NOTE: These courses must be from among the courses listed to calculate the major average for a degree program in the Department or School.

(b) one set of two courses from a third Department or School as listed:

Biological Sciences: BIOL-1101 and BIOL-1111

Chemistry and Biochemistry: CHEM-1100 and CHEM-1110

Computer Science: COMP-1400 and COMP-1410, or COMP-1047 and COMP-2057, or COMP-2067 and COMP-2057

School of the Environment: ESCI-1100 and ESCI-1111

Economics: ECON-1100 and ECON-1110

Mathematics and Statistics: MATH-1760 and STAT-2910, or MATH-1720 and STAT-2910, or MATH-1760 and MATH-1730, or MATH-1720 and MATH-1730.

Physics: PHYS-1400 and PHYS-1410 or PHYS-1300 and PHYS-1310

(c) four Science courses at the 3000 level or above which are from the courses listed to calculate the major average for a degree program of the Department or School in the Faculty of Science that offers the courses.

(d) four courses from Arts/Languages and Social Sciences, with at least one from each

(e) eight courses from any area of study excluding BIOM-1003, BIOL-1013, CHEM-2003, MATH-1280, MATH-1780, MATH-1980, ESCI-1000 and ESCI-1010

Calculation of Major Average

The major average is calculated from the grades of all Science courses, excluding the grades obtained in the following courses: ECON-2000, ECON-2010, BIOM-1003, BIOL-1013, BIOM-2093, CHEM-2003, CHEM-2305, BIOC-2015, COMP-2077, COMP-2097, COMP-2707, COMP-3057, COMP-3077, ESCI-1000, ESCI-1010, ESCI-2300, ESCI-2010, ESCI-2630, MATH-1280, MATH-1780, MATH-1980, PHYS-1000, PHYS-1010, PHYS-2060 and ESCI-2000.

Note: COMP-1047 or COMP-2067 and COMP-2057 count as a 'science pair' (see requirement (b) above) and will be included in the calculation of the major average.

Standing Required for Continuation in the BSc (General Science) Program

- 1) the minimum requirement for continuation "in good standing" in the General Science program is a minimum cumulative average of 60% and a minimum average of 60% in the required Science courses of this program.
- 2) If a student has not met the minimum cumulative and science course average requirements by the end of the Summer or Fall term, the student automatically will be placed on probation.
- 3) If, at the end of the Winter term, a student has not met the minimum cumulative and science course average requirements, the student's record will be referred to the Academic Standing Committee for a decision.
 - (a) If one average is at least 60%, but the other is between 55% and 59.9% (or if both averages are between 55% and 59.9%), the student normally will be allowed to continue on probation until the next evaluation period.

By the subsequent evaluation period, both averages must be raised to at least 60% or the student will be required to withdraw.
 - (b) If both averages are below 55%, the student normally will be required to withdraw.
 - (c) If only one average is below 55%, the student may be required to withdraw.
- 4) A student who has been required to withdraw may not register in the Faculty of Science for twelve months and may not apply for re-admission before the subsequent Summer term. The student must apply for re-admission to the Faculty through the Office of the Registrar by the appropriate deadline date for the term desired and must with the application include a statement of rationale and any documentation of academic success attained elsewhere.

Readmission to the Faculty is not automatic and will be dependent upon the Academic Standing Committee's assessment of the applicant's prospects for successful completion of the program. If readmitted, the student will be placed on probation and must raise the cumulative and science course averages to 60% by the next evaluation period and must satisfy any additional conditions of readmission which may have been imposed. If the student fails to meet such requirements, he or she normally will be required to withdraw. A student who has been required to withdraw a second time will not be eligible for readmission under any conditions. Students receiving the BSc. (General Science) degree will have the designation, "General Science" respectively indicated on their transcripts.

Concurrent General Bachelor of Science (General Science)/ Bachelor of Education

Direct admissions from high school only.

This is a joint offering between the Faculty of Science and the Faculty of Education. See Faculty of Education for program requirements.

Honours Bachelor of Forensic Science (BFS)

This program will enable students to develop as inquisitive researchers, gain an understanding of scientific processes and standardized laboratory protocols, recognize the significance of high ethical standards, and develop sophisticated interpersonal skills for communicating results to the criminal justice system. Students will have the opportunity to specialize in a particular area of forensic science, namely forensic human biology, forensic chemistry, or the ecology of death. Throughout the program, students will apply their knowledge and skills to address pressing issues in forensic science, blending a

strong scientific foundation with practical application of the field's principles. By engaging in a capstone project under the guidance of experienced professionals or scientists, students will gain hands-on experience in real-world forensic settings.

Degree Requirements

Total courses: forty

(a) FRSC-1000, FRSC-2101; FRSC-3010; FRSC-3101; FRSC-3105; FRSC-3111; FRSC-3900; FRSC-4900; BIOL-2063; LAWS-2190;

(b) any three of the following (if not required in chosen area of concentration): FRSC-3201; FRSC-3217; FRSC-3231; FRSC-4018; FRSC-4120; FRSC-4201; FRSC-4202; FRSC-4207; FRSC-4217.

(c) eleven additional courses from one of the four following areas of concentration: Forensic Human Biology, Forensic Chemistry, Ecology of Death. The area of concentration must be declared prior to entry of second year studies.

(d) BIOL-1101; BIOL-1111; CHEM-1100; CHEM-1110; CHEM-2300 ; MATH-1720 or MATH-1760; STAT-2910; one pair of PHYS-1300 and PHYS-1310 OR PHYS-1400 and PHYS-1410 (PHYS-1400 and PHYS-1410 are required in Forensic Chemistry concentration); COMP-1047; SCIE-1000; either PSYC-1150 Introduction to Psychology as a Behavioural Science or SACR-1100 Foundations of Social Life.

(e) four courses from any area of study, including at least one or more of the following: GART/SOSC-1210 Introduction into Indigenous Topics; PHIL-2300 Indigenous Philosophy of the Americas; and/or PHIL-4260 Philosophy of Law.

Courses that are used to calculate the major average: courses listed under requirements (a) and (b), and courses in the chosen area of concentration.

Area of Concentration: Forensic Human Biology

Required Courses:

BIOL-2040. Human Physiology

BIOM-2021. Human Anatomy

BIOL-2111. Genetics

BIOM-2131. Introductory Molecular Biology

BIOC-2010. Organic Chemistry of Biomolecules

FRSC-3217. Forensic Serology and DNA Applications

FRSC-3231. Forensic Anthropology

FRSC-4120. Human Skeletal Variation

Plus choose 3 courses from the Forensic Human Biology Options:

BIOC-3310 Pharmacology for Health Sciences

BIOC-4050 Drug Design

BIOL-3571 Animal Cells & Tissues

BIOM-3500 Molecular Cell Biology

BIOM-3530 Advanced Cell Biology

Or any 3000+ level course approved by the program director

Area of Concentration: Forensic Chemistry

Required Courses:

CHEM-2310. Introduction to Organic Chemistry II

CHEM-2500. Introduction to Inorganic Chemistry I

CHEM-2200. Analytical Chemistry

CHEM-3210. Principles of Instrument Analysis
CHEM-3305 Spectroscopic Structure Identification
BIOC-2010 Organic Chemistry of Biomolecules
BIOC-2010 Organic Chemistry of Biomolecules
BIOC-2010. Organic Chemistry of Biomolecules
BIOC-3310 Pharmacology for Health Sciences
FRSC-4201 Forensic Chemistry

Plus choose 3 courses from the Forensic Chemistry Options:

CHEM-3310/3315 Intermediate Organic Chemistry
BIOC-3100 Metabolism I
BIOC-3110 Metabolism II
BIOC-4050 Drug Design

Or any 3000+ level course approved by the program director

Area of Concentration: Ecology of Death

Required Courses:

BIOL-2101. Ecology
BIOL-2111. Genetics
BIOL-3250. Population and Community Ecology
BIOL-2142. Principles of Evolution
FRSC-3201 Applied Entomology
BIOC-2010. Organic Chemistry of Biomolecules
FRSC-3231. Forensic Anthropology
FRSC-4202. Death Investigation

Plus choose 3 courses from the Ecology of Death Options:

BIOL-3230 Animal Behaviour
BIOL-4270 Conservation Biology
ESCI-1130 Atmosphere and Climate
ESCI-1100 Intro to Environmental Science
ESCI-1141 Cartography and Digital Mapping

Or any 3000+ level course approved by the program director

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and courses in the chosen area of concentration

Combined Bachelor of Arts in Forensics

This multifaceted program provides training in the collection, identification and presentation of evidence in criminal investigations and offers students the unique opportunity to integrate a second field of study, such as criminology, psychology, or sociology into their degree. With a strong emphasis on effective communication relating to evidence analysis and the standards of criminal investigations, students gain a comprehensive understanding of the intersection between science and law. In this dynamic program, students can tailor their degree to their specific interests and career goals, preparing them for further studies at the graduate level.

Degree Requirements

Total courses: forty.

(a) Forensics: PHIL-2260 or HIST-2870 or GART-2090; BIOL-2063; BIOL-1101; BIOL-1111; one of COMP-1047 or ESCI-1100; one of SOSC-2500 or STAT-2910; FRSC-1000; FRSC-2101; FRSC-3010; FRSC-3105; FRSC-3111; FRSC-3231; FRSC-3900; LAWS-2190; any four of the following: FRSC-4018; FRSC-4900 ;FRSC-4120; FRSC 4202; FRSC 4207; FRSC-4217.

(b) Course Requirements-Other Subject in Arts, Humanities and Social Sciences: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) additional courses (if required) to a total of forty courses. MATH-1760/MATH-1720 is strongly recommended. At least one of the following is strongly recommended: GART/SOSC-1210 Introduction into Indigenous Topics; PHIL-2300 Indigenous Philosophy of the Americas; and/or PHIL-4260 Philosophy of Law.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Combined Bachelor of Arts in Forensics and Criminology (Applied Forensic Science Stream) - Degree Completion Pathway

This program is for graduates of a two-year Ontario College Diploma in Police Foundations from a qualifying Ontario College of Applied Arts and Technology (CAAT) or for graduates of any program from an Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Admission Requirements

- 2) Graduates of a two-year Ontario College Diploma in Police Foundations (MCU Code 53008) from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of at least a B (73%) grade), are eligible for admission to the Combined Bachelor of Arts in Forensics - Applied Forensic Science Stream degree program offered by the Faculty of Science at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.
- 2) In addition to the appropriate two-year Diploma and grade point average, applicants of the Combined Bachelor of Arts in Forensics - Applied Forensic Science Stream are required to have successfully completed MHF4U and SBI4U or their equivalent courses. Students who have not completed these courses or their equivalents will be required to complete the equivalent courses within the Foundations of Science Preparation Program.
- 3) Students admitted to the Combined Bachelor of Arts in Forensics - Applied Forensic Science Stream will obtain the equivalent of 2 years of Advanced Standing (or awarded up to 20 course transfers).
- 4) Students are required to complete twenty (21) courses at the University of Windsor in fulfillment of the requirements of the Combined Bachelor of Arts in Forensics - Applied Forensic Science Stream.

Recognized programs include:

Police Foundations (MCU Code 53008)

Any program from a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Note: Three-year diplomas programs in relevant fields will be analyzed for additional potential credit transfer on an ad-hoc basis, while considering minimum residency and core course requirements.

Degree Requirements

Total Courses: 21 (list of remaining courses required for completion of degree program.)

(a) Forensics (12 courses): BIOL-1101; BIOL-1111; BIOL-2063; SOSC-2500 or STAT-2910; FRSC-1000; FRSC-2101; FRSC-3105; FRSC-3111; FRSC-3231; FRSC-3900; LAWS-2190; one of the following: FRSC-4018, FRSC-4120, FRSC-4202; FRSC-4207; or FRSC-4217.

(b) Criminology (9 courses): SACR-1100; SACR-2910; SACR-2900; SACR-3080; SACR-3900; SACR-3730 or SACR-3910 or SACR-3560; one of the following: SACR-3620, SACR-3630, SACR-3650, SACR-3670, SACR-3700, SACR-3500, SACR-3740, SACR-3820 or SACR-3710; two SACR-4000-level courses, including one of SACR-4210, SACR-4500, SACR-4910, SACR-4600, SACR-4610, SACR-4640, SACR-4650 or SACR-4670.

RECOMMENDED COURSE SEQUENCING

Year 1: Fall: FRSC-1000; FRSC-2101; BIOL-1101, BIOL-2063, SACR-1100

Winter: BIOL-1111, SOSC-2500, SACR-2900, SACR-2910, FRSC-3105 or FRSC-3231

Intersession: SACR-3080

Year 2: Fall: FRSC-4207, LAWS-2190, SACR-3900; one of SACR-3560, SACR-3730, SACR-3910; one SACR-3XXX from list

Winter: FRSC-3111, FRSC-3105 or FRSC-3231; FRSC 4XXX; two SACR-4XXX from list.

Certificate in Film and Media for Sciences

Admission Requirements

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for Faculty of Science or the Faculty of Arts, Humanities, and Social Sciences programs.

Certificate Requirements

Total Courses: 10

- 1) Introduction to Science Communication
 - a. SCIE-1000
- 2) Scientific Principles and Knowledge (4 courses)
 - a. Three of the following (only one from each of i – viii)
 - i. BIOL 1003, BIOL 1101, BIOL 1111
 - ii. CHEM 1000, CHEM 1100
 - iii. ESCI 1100, ESCI 1130
 - iv. PHYS 1300, PHYS 1400
 - v. MATH 1720, 1250 (MATH 1760, MATH 1260 if MCV4U not taken)
 - vi. ECON 1100
 - vii. COMP 1000, COMP 1400
 - viii. PSYC 1150, PSYC 1160
 - b. STAT 2910 OR STAT 2920 OR SOSC 2500
- 3) Knowledge, Ethics and Practice in Science (1 course)
 - a. Science students: ESCI 3801 OR BIOL 3022 OR PHYS-4000 OR ECON 4070 (where available as a requirement or option within a degree program) OR PHIL 2550 OR PSYC-2300
 - b. FAHSS students (or non-science students): PHIL 2550 OR PSYC-2300 OR One 2000+ level course in science that counts as a credit for a major.

- 4) Journalism, Communications and Media Principles (or other courses in the spirit of this requirement, with the permission of the Dean or Delegate) (3 courses)
 - a. CMAF 1010 and two of FILM-1100, FILM-1110, CMAF-2250, CMAF 2130, CMAF 2610, CMAF 3610, SCIE-3700 (if appropriate)
- 5) Capstone: Bringing it all together
 - a. SCIE-4000:

Certificate in Science Communication

Admission Requirements

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for Faculty of Science or the Faculty of Arts, Humanities, and Social Sciences programs.

Certificate Requirements

Total Courses: 10

- 1) Introduction to Science Communication
 - a. SCIE-1000 Communicating Science in the Wider World
- 2) Scientific Principles and Knowledge (4 courses)
 - a. Three of the following (only one from each of i – viii)
 - i. BIOL 1003, BIOL 1101, BIOL 1111
 - ii. CHEM 1000, CHEM 1100
 - iii. ESCI 1100, ESCI 1130
 - iv. PHYS 1300, PHYS 1400
 - v. MATH 1720, 1250 (MATH 1760, MATH 1260 if MCV4U not taken)
 - vi. ECON 1100
 - vii. COMP 1000, COMP 1400
 - viii. PSYC 1150, PSYC 1160
 - b. STAT 2910 OR STAT 2920 OR SOSC 2500
- 3) Knowledge, Ethics and Practice in Science (1 course)
 - a. Science students: ESCI 3801 OR BIOL 3022 OR PHYS 4000 OR ECON 4070 (where available as a requirement or option within a degree program) OR PHIL 2550 OR PSYC-2300
 - b. FAHSS students (or non-science student): PHIL 2550 OR PSYC-2300 OR One 2000+ level course in science that counts as a credit for a major.
- 4) Journalism, Communications and Media Principles (or other courses in the spirit of this requirement, with the permission of the Dean or Delegate) (3 courses)
 - a. CMAF 1010 and two of FILM-1100, FILM-1110, CMAF-2250, CMAF 2130, CMAF 2610, CMAF 3610, SCIE-3700 (if appropriate)
- 5) Capstone: Bringing it all together
 - a. SCIE-4000: Science in the Media

Certificate in Biological Conservation

Admission Requirements

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for Faculty of Science programs.

Total courses: 10

Certificate Requirements

Complete all three courses:

BIOL-2101. Ecology

BIOL-3142. Evolution

BIOL-4270. Conservation biology

Select six courses from the following:

BIOL-3291. Invertebrate biology

BIOL-3241. Fish and Fisheries

BIOL-3261 Ornithology

BIOL-3201/FRSC 3201. Applied Entomology

BIOL-3281. Plant Ecology

BIOL-2080. Economic Botany

BIOL-3212 Environmental Physiology

BIOL-3230. Animal Behaviour

BIOL 4008 Special Topics in Biology (With departmental permission, if topic relevant)

BIOL-4280. Limnology

BIOL-4212. Speciation

BIOL-4241. Stream Ecology

BIOL-3250. Population and Community Ecology

ESCI-2210. Introduction to Climate Change

ESCI-2300. Introduction to Oceanography

ESCI-2600. Principles of Resource Management

ESCI-3310. Global Water Crisis

ESCI-4500. Ecosystem Health

ESCI-4808. Special Topics in Earth and Environmental Sciences (With departmental permission, if topic relevant)

ESTU-2500. Concepts for Ecosystem Management

ESTU-3310. Great Lakes Water Quality Agreement

Select one course from the following:

BIOL-4904. Undergraduate Research in Biology

SCIE-3900. Undergraduate Research Experience

BIOL-4864. Great lakes Field Biology

ESCI-3735. Field methods for Environmental Science

ESCI-3755. Methods in Great Lakes Geomicrobiology

ESCI-3806. School of the Environment: Global Perspectives in Science

ESCI 4900 Thesis Research in Environmental Science

SCIE-3990. Internship

Certificate in Environmental Assessment

Admission Requirements

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for Faculty of Science programs.

Certificate Requirements

Total courses: 10

Select one course from the following:

SCIE-1000. Communicating Science in the Wider World

ESCI-3801. Scientific Writing and Data Management

Select two courses from the following:

ESCI-2131. Introduction to Geochemistry

ESCI-2141. Hydrology

ESCI-2210. Introduction to Climate Change

Complete all five courses (with the exception of choosing between two field courses):

ESCI-1151. Fundamentals of Geographical Information Systems

ESCI-2111. Aerial photography and Introductory Remote Sensing

ESCI-2705. Applied Geophysics

ESCI-3711. Principles of Instrumental Analysis

ESCI-3735. Field Methods for Environmental Sciences OR ESCI 3755 Methods in Great Lakes Geomicrobiology

Complete both courses:

ESCI-3610. Environmental Impact Assessment

ESCI-4710. Environmental Site Assessment

Certificate in Greenhouse Science

Admission Requirements

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for Faculty of Science programs.

Certificate Requirements

Total courses: 10

Complete the following 8 courses:

ESCI-1100. Introduction to Environmental Science

ESCI-2131. Introduction to Geochemistry

ESCI-2201. Climatology

BIOL-2080. Economic Botany

BIOL-3281. Plant Ecology

BIOL-3201/FRSC-3201. Applied Entomology

SCIE-3990. Internship

ESCI-4808. (section 25) Integrated Pest Management

Select two courses from the following:

ESCI-4721. Biogeochemistry

ESCI-3751. Environmental Geochemistry

ESCI-2421. Soils and sediments

ESCI-2600. Principles of Resource Management

ESCI-2210. Introduction to Climate Change

ESCI-3735. Field Methods for Environmental Science or ESCI-3755 Methods in Great Lakes

Geomicrobiology

BIOL-3250. Population and Community Ecology

FACULTY OF SCIENCE COURSES

SCIENCE COURSES

SCIE-1000. Communicating Science in the Wider World

Through the lenses of UWindsor's "grand challenges" (Environment, Health, Advanced Materials and Big Data), students will learn fundamental written and oral communication skills using both online and face-to-face methods. Lessons, labs, group work, and writing and presentation assignment will be incorporated in increasing literacy, numeracy and critical thinking skills. (1 lecture hours and 2 laboratory hours per week)

SCIE-1001. Exploring Science

This course will introduce students to the principles of scientific research and provide practical experience in a field and/or lab environment. Students will be exposed to the methods and techniques of conducting research, including data collection, sampling, analysis, and knowledge dissemination. Current research topics and techniques in science will be included. This is a one-week course where students are required to participate in field and/or lab work. This course is only available for prospective undergraduate students and cannot be counted for credit for any current University of Windsor student. Students need approval from the Dean of Science (or designate). Grading as Pass/Fail based on successful completion of the course.

SCIE-1900. First-Year Seminar in Science

First-year students in the Faculty of Science will engage with faculty experts on a specific science topic of broad, interdisciplinary interest. Enrolment is limited to 24 students per section to allow for rich engagement between faculty and students, group discussions, and creative lines of inquiry. Classes will meet on average for an hour per week, and assessments will be based on in-class reflective exercises. The science topic of the First-Year Seminar will vary depending on the instructor(s) of that section. Course is open to first-year Science students only. A student may take the First-Year Seminar course only once. (Non-credit course. However, the course will appear on the student transcript. Participation will count towards activities leading to the L.E.A.D. medallion in the Faculty of Science.)

SCIE-3700. Special Topics in Science

Selected topics of current interest in Science. Examples include: Science on the Stage: exploring the use of drama to enhance understanding of the role of science in society; Debating Science with Non-scientists: debate and argumentation techniques; The Science of Wine. (Prerequisite: consent of instructor and a program advisor.) (3 lecture or project hours a week.) (May be repeated for credit if content changes.)

SCIE-3800. Service Learning

Participation in experiential learning with community partners to provide students direct experience with the subject matter they are studying in the curriculum. Students are given an opportunity to enhance their academic learning by engaging with community partners to analyze and address community needs and solve problems related to social issues and community needs. Students will also reflect on their service experiences, and personal growth. May be repeated 2 times for credit. Prerequisite: Approval from the Course Instructor and the Dean of Science (or designate). This course will be graded Pass or Fail (3.0 credits). Students may take 2 courses from SCIE-3800, SCIE-3900, and SCIE-3990 for credit, including repeating one of the three courses twice. However, students may not take more than one of the courses from SCIE-3800, SCIE-3900, and SCIE-3990 in the same semester. (This is an experiential learning course.)

SCIE-3900. Undergraduate Research Experience

Participation in discipline specific research activities under the direction of a faculty member in the Faculty of Science. Students will gain experience in the methods, techniques and ethical conduct of research. Grading as Pass/Fail based on successful participation in research and submission of reflective assignment. Prerequisite: Students need approval from the faculty mentor and the Dean of Science (or designate). This course will be graded Pass or Fail (3.0 credits). Students may take 2 courses from SCIE-3800, SCIE-3900, and SCIE 3990 for credit, including repeating one of the three courses twice. However, students may not take more than one of the courses from SCIE-3800, SCIE-3900, and SCIE-3990 in the same semester. (This is an experiential learning course.)

SCIE-3990. Internship

Students will participate in a 12-week work placement and complete an Internship Report. The internship is designed to enhance and complement their academic learning. The course requirements are structured to enable students to make connections between academic learning and on-the-job training, to further develop analytical and interpersonal skills, and to practice business writing skills. The internship experience also helps students gain a clearer sense of potential career paths and provides an opportunity to build professional networks. Prerequisite: Approval from the Course Instructor and the Dean of Science (or designate). This course will be graded Pass or Fail. (3.0 credits). Students may take 2 courses from SCIE-3800, SCIE-3900, and SCIE-3990 for credit, including repeating one of the three courses twice. However, students may not take more than one of the courses from SCIE-3800, SCIE-3900, and SCIE-3990 in the same semester. (This is an experiential learning course.)

SCIE-4000. Science in the Media

In this project-driven course, the students will choose (or be assigned) a scientific topic and focus on preparation of a portfolio of communications: from a critical analysis of the topic to newspaper articles to social media posts to interviews for broadcast to multi-media presentations. Topics may include broad concepts such as climate change or air pollution, or may be more narrowly focused onto a single scientific journal article. (Prerequisite: SCIE-1XXX (to be developed). Restricted to Semester 6, 7 and 8 students.) (1 lecture hours and 2 seminar/tutorial hours per week.)

FORENSIC SCIENCE COURSES

FRSC-1000. Introduction to Forensic Science

This course will survey the many disciplines of Forensic Science from the crime scene, to the laboratory, and ultimately to the courtroom. It will incorporate expertise in crime scene and death investigations including bloodstain pattern analysis, forensic pathology, entomology, and anthropology. It will also include guest speakers from the fields of forensic biology, chemistry, and pattern and impression evidence. Guest lectures by a range of practicing forensic scientists will give students direct contact with these experts, and a greater understanding of the role they play in the collection, analysis and

presentation of evidence in court (3 lecture hours). This course is restricted to forensic science majors. (Anti-requisite: FRSC-2007)

FRSC-1107. Introductory Crime Scene Investigation

This course will introduce students to the theoretical background of scientific methods used in Forensic Sciences and their practical applications to crime scene investigation within the multidisciplinary Forensic fields. The focus of the course is exploration and examination of evidence found at crime scenes. The students learn the discovery, identification, collection, examination and processing of various types of Forensic evidence. The course may not be used to fulfill the major requirements of any major or concentration in a Forensic Science program. (3 lecture hours a week).

FRSC-2007. Overview of Forensic Science

This course will introduce students to the various specializations of forensic science including forensic pathology; entomology; anthropology; toxicology; digital forensics; as well as DNA, blood stain and fingerprint analysis. The students will learn the theory and practices of forensic evidence identification and analysis. The course may not be used to fulfill the major requirements of any major or concentration in a forensic program. (3 lecture hours a week).

FRSC-2101. Applied Crime Scene Techniques

This course will build upon the initial knowledge acquired during the prerequisite FRSC-1000 Introduction to Forensic Science course. It will involve the application of techniques used in the field of Crime Scene Investigation. The course will provide students with an introduction to the ethical, legal and professional practice requirements in forensic investigations. It will expand on the student's prior knowledge relating to evidence identification, collection and processing, by introducing practical laboratories that teach the student how to enhance, recover, and interpret evidence typically located at crime scenes. This can include fingerprint, footwear and tire impressions; firearms discharge residue; toolmarks; and basic bloodstain patterns. (This course is restricted to students enrolled in a forensic science major program.) (Prerequisites: FRSC-1000.) (3 lecture, 3 lab hours a week.)

FRSC-3010. Expert Witness in Forensic Science

Examination of current concepts and controversies in the collection, preservation, and analysis of forensic evidence, and the role of the expert witness. While exploring various forensic specializations students will practice the presentation of evidence in various formats and contexts including short and long presentations, reports, cross-examination, mock trials, etc. (Prerequisite: LAWS-2190). (This course is restricted to students enrolled in a Forensic Science major program.) (3 lecture hours a week).

FRSC-3101. Laboratory in Forensic Science

Laboratory methods used by forensic scientists can include physical, chemical, and biological techniques. This course is a survey of the techniques used, particularly for trace evidence, and the interpretation of the results. The goal of the course is to familiarize the student with not only the techniques but also their limitations, and the range of practices employed by professionals for the analysis of trace evidence. (Prerequisite: FRSC-1000, BIOL 1111 and CHEM-1110 and semester 5 standing or above. Enrollment in this course is limited to Bachelor of Forensic Science Program Majors.) (3 lecture, 3 lab hours a week).

FRSC-3105. Forensic Identification

Practical application of principles and protocols used in forensic identification. Topics range from the expectations of the public in forensic practices to the legal responsibilities of crime scene specialists for evidence identification. Fingerprint theory and practice, image capture and enhancement, crime scene protocols and management, biometrics, and identification as contrasted to systematics are studied.

(Prerequisite: FRSC-2101.) (This course is restricted to students enrolled in a Forensic Science major program.) (3 lecture, 3 lab hours a week).

FRSC-3111. Digital Photography in Forensic Science

Use of photography in forensic investigations covers a range of techniques. Students will become familiar with different methods of solving problems of focal length, lighting conditions, lens and filter considerations and apply this knowledge in the practical application of crime scene photography. The course will cover the equipment, methodology and preparation of photographic evidence, as well as the current state of technology in the use of digital photography and photographic evidence. (Prerequisites: FRSC-2101)(3 lecture/lab hours a week).

FRSC-3201. Applied Entomology

Students will become familiar with insect taxonomy, anatomy, physiology, behaviour and ecology and apply this knowledge in studying the utility of insects within the applications of pest management, disease transmission and legal investigations. The course will cover the detection, collection, identification and analysis of insect evidence, as well as the current state of knowledge in the use of insect evidence. (Prerequisites: BIOL-2101 and semester 5 standing or above) (Cross-listed with BIOL-3201) (3 lecture, 3 lab hours a week).

FRSC-3217. Forensic Serology and DNA Applications

This course introduces the detailed types, techniques, and analysis of the various important biological fluids and DNA. The course will provide insight into new emerging technologies and tools in forensic serological and DNA analysis. The course will also be important in understanding the issues and ethics involved in the analysis and presentation of these evidence types in court. Pre-requisites: FRSC-1000 and BIOL-2111 or Instructor approval) (3 lecture hours a week).

FRSC-3231. Forensic Anthropology

An overview of anthropological methods as applied to death investigations. Topics may include human osteology; differentiating between human and faunal remains; data collection and analysis of human skeletal remains; methods of preliminary identification and individualization; and the reconstruction of events that occurred around the time of death. (Prerequisite or Corequisite: BIOL-2063 or BIOL-2150). (3 lab hours a week).

FRSC-3900. Research Methods in Forensic Science

In this course, students will learn how to utilize the scientific method to plan a complex project as part of a research team and to write an effective research proposal. Assignments for the course are designed to help students develop effective written, verbal and research skills to achieve these two objectives. This course is restricted to students enrolled in a forensic science major program. (Prerequisite: Students enrolled in semester 6 or above). (3 lecture hours a week.) (1 semester, 3 credit course.) (This is an experiential learning course.)

FRSC-4002. Practicum in Forensic Sciences

Students are assigned a mentor in the profession of Forensic Science. The student will be required to spend 100 hours during the semester with the mentor. This time will be utilized to develop skills in a laboratory setting or related facility (Prerequisite: A FRSC-3XXX course. Instructor approval required. Enrolment limited to majors in Forensic Sciences and majors in B.A. Combined in Forensics). (This is an experiential learning course).

FRSC-4018. Special Topics in Forensic Science

Selected topics of current interest which may vary from year to year, and by instructor. (May be repeated for credit if content changes.) (Prerequisites: FRSC-1000 or consent of instructor).(3 lecture hours a week).

FRSC-4120. Human Skeletal Variation

This course is an advanced critical review of theories and methods for collecting, analyzing, and interpreting data from human skeletal remains in bioarchaeological (paleopathology, paleodemography, etc.) and forensic contexts. Students will learn to pursue a biocultural approach for the study of human skeletal variation. (Prerequisite or Corequisite: FRSC-3231). (3 lecture hours a week).

FRSC-4202. Death Investigation

This course will introduce students to a variety of disciplines that can assist in medico-legal death investigations involving human remains. The investigation of human remains encompasses the examination of unexplained deaths resulting from a variety of circumstances – these include missing persons, homicide or manslaughter, mass disasters, and acts of genocide. The victim(s) may be recently deceased, may have undergone degrees of decomposition, or may be completely skeletonised by the time of discovery and recovery. This course will outline the different expertise required and the overall aims of a death investigation involving human remains, and specifically focus on the search and recovery aspects in distinct environments. This course is restricted to students enrolled in a forensic science major program. (3 lecture hours a week.) (Prerequisite: Students enrolled in semester 7 or above) (Credit cannot be obtained for both FRSC-4202 and FRSC-4018 section 3.)

FRSC-4207. New Perspectives in Forensic Evidence Analysis

This course builds on the basic techniques learned in the previous forensic courses and applies them to the advanced approaches to forensic evidence analysis. The course will provide insight to the latest techniques available spanning histology and pathology, human remains, advance analytical techniques for organic and inorganic analysis, new frontiers in DNA analysis, microbial forensics, medical forensic imaging techniques, digital evidence and mobile forensics, as well as new instrumentation and future considerations in the fields of forensic evidence analysis. (Prerequisites: FRSC-1000 or permission of the instructor). (3 lecture hours a week).

FRSC-4201 Forensic Chemistry

Forensic chemistry introduces the application of analytical and instrumental chemistry to forensic science. It is distinguished from other types of chemistry by the legal context in which the work is conducted, the types of samples and matrices analysed, and the extensive use of instrumentation to the interpretation of forensic evidence. The course will review fundamental principles and chemical concepts from a forensic perspective, including sample collection and preparation, internal and external standards, calibration, quality assurance and control, and chemometrics. The course focuses on microscopic, spectroscopic and separation techniques and their applications to drugs and poisons, combustion evidence, and other types of trace evidence. (Prerequisites: CHEM-2200, CHEM-3210) (3 lecture hours, 3 lab hours).

FRSC-4217. Advances in Human Identification

This course is designed to familiarize students with latest advances in Forensics human identification and identity management techniques. Traditional identification techniques and latest identification techniques from hard and soft tissues, biological and non-biological evidences, human scent evidence, digital and biometric methods and future considerations will be covered. (Prerequisites: FRSC-1000 or permission of the instructor) (3 lecture hours a week.)

FRSC-4900. Capstone Project in Forensic Sciences

The capstone project is intended to provide students with an experiential learning opportunity that provides professional practice relevant to their future careers in science, policing or criminal justice. A minimum of three semester hours (10 hours per week) is required that should result in a capstone presentation, publication, or similar scholarly product. This requirement can be met through supervised research, independent research, a practicum placement, or a study abroad program. The capstone project will produce a thesis or written report of a high scientific quality. Both the thesis/report and presentation will be evaluated. This course is restricted to students enrolled in a forensic science major program. May be repeated for credit. (Prerequisite: FRSC 3900. Instructor approval required). (10 practical hours per week) (1 semester, 3 credit course.) (This is an experiential learning course.)

BIOMEDICAL SCIENCES

PROGRAMS

Honours Biomedical Science

Degree Requirements:

Total courses: 40

(a) BIOL-1101, BIOL-1111, BIOL-2111, BIOL-2040, BIOL-2071, BIOM-2131, BIOM-3500, BIOM-3530.

(b) Eight courses from: BIOM-2021, BIOL-2480*, BIOM-3070 or BIOM-3071, BIOM-3400, BIOM-3540, BIOM-3550, BIOM-3560, BIOM-3581**, BIOM-3750, BIOM-4008, BIOM-4440* BIOM-4510, BIOM-4530, BIOM-4540, BIOM-4550, BIOM-4560, BIOM-4590, BIOM-4904**, BIOL-4450*, BIOL-4481*, BIOL-4904**, CHEM-4900**

(c) CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130.

(d) MATH-1720 (or MATH-1760)***, STAT-2910, and one pair of both PHYS-1400 and PHYS-1410 or both PHYS-1300 (or PHYS-1400) and PHYS-1310

(e) Three courses from: BIOL-2050, BIOL-3022, BIOL-2142, BIOL-3571, CHEM-2200, CHEM-2310, CHEM-2500, CHEM-3210, BIOC-4010, BIOC-4030, BIOC-4050, PHYS-3700.

(f) Six courses from any Science area.

(g) Four courses from any area of study. (Recommended: at least one Arts course and one Social Science course).

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area of study.

Recommended Course Sequence

First Year: ten courses, including BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110, MATH-1720 (or MATH-1760)***, PHYS-1300 or PHYS-1400, PHYS-1310 or PHYS-1410, and STAT-2910.

Second Year: ten courses, including BIOL-2040, BIOL-2071, BIOL-2111, BIOM-2131, CHEM-2300, and BIOC-2010.

Third Year: ten courses, including BIOM-3500, BIOM-3530, BIOC-3100, BIOC-3110, and BIOC-3130.

Fourth Year: ten courses.

*BIOM-4440, BIOL-4450, and BIOL-4481 require the pre-requisite BIOL-2480.

**BIOM-3581, BIOM-4904, BIOL-4904 and CHEM-4900 are 6 credit, 2 semester courses. Only students who have maintained a major average of 70% and a cumulative average of 60% will be considered for enrolment in BIOM-4904. Registration in BIOM-4904 is competitive and requires the consent of the Head of Department.

***It is recommended that students also take MATH-1730, particularly those students interested in PHYS-1410.

Honours Biochemistry and Biomedical Science (Health Stream)

This program is jointly offered with the Department of Chemistry and Biochemistry.

Degree Requirements:

Total courses: forty.

(a) twenty courses including BIOL-1101, BIOL-1111, BIOM-2021, BIOL-2040, BIOL-2050, BIOL-2111, BIOM-2131, BIOL-2071, BIOL-2480, BIOM-3500 or BIOM-3530, BIOL/BIOC-3581(6.0 credits), CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, BIOC-2010, BIOC-3100, BIOC-3130.

(b) six courses from the following: BIOM-3550, BIOM-3070*, BIOC-3110, BIOC-3310, BIOC-3030, BIOM-3500, BIOM-3071*, BIOM-3530, BIOL-3571, CHEM-2400, CHEM-3210, CHEM-3310, CHEM-3300, BIOM-4440, BIOL-4481, BIOL-4904**, CHEM-4900**
BIOM-4530, BIOM-4540, BIOM-4550, BIOM-4560, BIOM-4590, BIOL-4904**, BIOM-3400, BIOM-3560, BIOM-3750, BIOM-3540, BIOM-4510, BIOM-4008, BIOM-4904**, CHEM-4900**, BIOC-4010, BIOC-4030, BIOC-4050, BIOC-4020, CHEM-4308, CHEM-4520, CHEM-4680, PHYS-3700, of which at least two must be at the 4000 level.

(c) five science courses, including: PHYS-1400, PHYS-1410, MATH-1720, MATH-1730, STAT-2910;

(d) four courses from Arts/Languages or Social Sciences, with at least one from each;

(e) five courses from any area of study, and CHEM-4007 is recommended.

* Note that BIOM-3070 and BIOM-3071 are antirequisites.

** Undergraduate research courses are taken both in Fall and Winter (as two courses). Only students who have maintained a major average of 70% and a cumulative average of 60% will be considered for enrolment in BIOM-4904 and BIOL-4904. Similarly, students who have maintained a major average of 70% and a cumulative average of 70% will be considered for enrolment in CHEM-4900. Registration in BIOL-4904 and CHEM-4900 is competitive and requires the consent of the appropriate Head of Department.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Students considering application to some Pharmacy schools are advised to take CHEM-2400.

Students planning to write the MCAT may wish to take PSYC-1150 and PSYC-1160 as Social Science courses.

Qualified students who find a supervisor may complete a thesis option (BIOM-4904, BIOL-4904 or CHEM-4900) as part of their degree program.

Students considering applying to professional schools are advised to look at individual admission requirements for programs of interest when choosing courses. Regular (annual) academic advising is strongly recommended for all students in this program.

Honours Biomedical Science – Interdisciplinary Health Science (IHS) Stream

- (a) BIOL-1101, BIOL-1111, BIOL-2111, BIOL-2040, BIOL-2071, BIOM-2131, BIOM-3500, BIOM-3530
- (b) Eight courses from: BIOM-2021, BIOL-2480*, BIOM-3070 or BIOM-3071, BIOM-3400, BIOM-3540, BIOM-3550, BIOM-3560, BIOM-3581**, BIOM-3750, BIOM-4008, BIOM-4440* BIOM-4510, BIOM-4530, BIOM-4540, BIOM-4550, BIOM-4560, BIOM-4590, BIOM-4904**, BIOL-4450*, BIOL-4481*. Take 2 courses from: BIOL-2050, BIOL-3022, BIOL-2142, BIOL-3571, CHEM-2200, CHEM-2310, CHEM-2500, CHEM-3210, BIOC-4010, BIOC-4030, BIOC-4050, PHYS-3700.
- (c) CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130
- (d) MATH-1720 (or MATH-1760)***, STAT-2910, and one pair of both PHYS-1400 and PHYS-1410 or both PHYS-1300 (or PHYS-1400) and PHYS-1310
- (e) Three IHS core courses; IHSC-1000, IHSC-3000, IHSC-4000
- (f) Eight courses from one selected IHS concentration

*BIOM-4440, BIOL-4450, and BIOL-4481 require the pre-requisite BIOL-2480

**BIOM-3581 and BIOM-4904 are 6 credit, 2 semester courses. Only students who have maintained a major average of 70% and a cumulative average of 60% will be considered for enrolment in BIOM-4904. Registration in BIOM-4904 is competitive and requires the consent of the Head of Department.

***It is recommended that students also take MATH-1730, particularly those students interested in PHYS-1410.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area of study.

BIOMEDICAL SCIENCES COURSES

BIOM-1003. Biology of Organisms

Properties of living organisms from the level of the cell through tissues, organs and organ systems, genetics, to the functioning, integrated organism. This course is offered on-campus and as a distance course. (Intended for non-majors and students requiring preparation for BIOL-1111 and BIOL-1101) (Not counted for credit in any Faculty of Science program.) (2 lecture hours a week.)

BIOM-1073. Introductory Medical Microbiology

This introductory course provides a foundation in microbiology relating to Nursing. Key concepts in the biology of infectious agents, human-microbe interactions, mechanisms of microbial diseases, control of microbial growth, immunology, epidemiology, and public health. (Open only to Nursing students. May not be used for credit in any Science program.) (Co-requisite: Registration in all courses required for 1st year fall semester.) (Antirequisites: BIOL-2070, BIOL-2071, BIOM-3070, BIOM-3071.)

BIOM-2021. Human Anatomy

Systemic analysis of the structure of the human body, including gross and microscopic morphology. Topics include anatomical terminology and structures of cells, tissues and the major organ systems. Practical laboratory work will complement lectures with emphasis on gross dissection. (Prerequisites: BIOL-1101 or KINE-1650.) (3 lecture, 2 laboratory hours a week.)

BIOM-2033. Introductory Molecular Biology

Basic introduction to the molecular biology of the cell with emphasis on basic life processes in animals. The major topics covered include: Regulation of eukaryotic gene expression, genome structure, chromosomal structure, fundamental aspects of recombinant DNA technology, DNA cloning, microarrays, and protein structure and function. (Antirequisite: BIOM-2131; Prerequisite: BIOL-1111 and BIOL-1101) (3 lecture hours or equivalent a week.) (A distance course restricted to graduates of programs in Medical Technology from a College of Applied Arts and Technology with more than 100 hours of certified laboratory experience; or by consent of the instructor.)

BIOM-2093. Genetics

The course reviews transmission genetics and principles of inheritance. The material also includes non-nuclear inheritance and gene linkage, gene expression and regulation, mechanisms and phenotypic effects of DNA mutation and repair, and the principles and applications of population and quantitative genetics. Students will be exposed to molecular genetic techniques such as PCR and DNA sequencing. This is a distance course designed primarily for graduates of programs in Medical Technology from a College of Applied Arts and Technology. This course may not count as a major requirement for Biology Majors. (Antirequisite: BIOL-2111; prerequisites: BIOL-1111 and BIOL-1101, or the equivalent.) (3 lecture hours or equivalent a week.)

BIOM-2131. Introductory Molecular Biology

Basic introduction to the molecular biology of the cell with emphasis on basic life processes in both plants and animals, including metabolism, energy transformations, transport mechanisms, signal transduction, and other general functions. The major topics covered include: Regulation of eukaryotic gene expression, fundamental aspects of recombinant DNA technology, DNA cloning, hybridization analysis, microarrays, and protein structure and function. Practical laboratory work will complement the lectures. (Antirequisite: BIOM-2033; Prerequisite: BIOL-1111, BIOL-1101, and BIOL-2111.) (Suggested Corequisite: BIOC-2010.) (3 lecture, 3 laboratory hours or equivalent a week.)

BIOM-3070. Medical Microbiology

Viral and bacterial pathogenesis, including the processes and genetic control of human diseases. This course is offered on-campus and as a distance course. (Antirequisite: BIOM-3071; Prerequisite: BIOL-2070 or BIOL-2071.) (3 lecture hours a week.)

BIOM-3071. Medical Microbiology and Techniques

Viral and bacterial pathogenesis, including the processes and genetic control of human diseases. (Antirequisite: BIOM-3070; prerequisite: BIOL-2071.) (3 lecture, 3 laboratory hours a week including follow-up visits outside scheduled lab times.)

BIOM-3400. Neurobiology of the Synapse

Synapses are specialized structures where nerve cells communicate with each other through a process called synaptic transmission. Synapses are the functional units of the brain and are targets of many diseases and drugs. The ability of synapses to transmit information from one neuron to another, changes with experience (synaptic plasticity) in processes such as learning and memory. This course will help students understand aspects of synapses from a cellular and molecular perspective. Topics such as synaptic vesicle cycling, synaptic plasticity, learning and memory, and neurological diseases originating at the synapse will be covered. Synapses from both the peripheral and central nervous systems of invertebrates and vertebrates will be discussed. (Prerequisite: BIOL-2480.) (Recommended for 3000/4000 level student.) (3 lecture hours/week.)

BIOM-3500. Molecular Cell Biology

An integration of recent findings in molecular and cell biology with those in genomics. The course emphasizes the general behaviour of biological macromolecules and energy transfer mechanisms, leading to in-depth review of the regulation of genome replication and recombination, gene transcription, protein translation, and epigenetic mechanisms governing gene regulation. This course is offered on-campus and as a distance course. (Prerequisites: BIOL-2111 and BIOM-2131, or BIOM-2093, and BIOM-2033 with appropriate laboratory experience and signature of instructor.) (3 lecture hours a week.)

BIOM-3530. Advanced Cell Biology

This course will examine, at the molecular level, the basic working of a cell, dealing with several aspects of eukaryotic cell biology including intracellular transport, cell-to-cell communication and signal transduction, the cytoskeleton, cell growth and division, apoptosis, cell adhesion and cell migration. In addition to exploring the current state of the field, lecture material will highlight some of the critical experiments in diverse areas of molecular biology, genetics, biochemistry and cell imaging that have contributed to our current understanding. (Prerequisites: BIOL-2111 and BIOM-2131, or BIOM-2093 and BIOM-2033 with appropriate laboratory experience and permission of instructor.) (3 lecture hours a week.)

BIOM-3540. Immunology

This course is an introduction to cellular and molecular immunology. Students will be introduced to topics, such as cells and organs of the immune system, development and differentiation of immune cells, innate and adaptive immune responses, structure and function of immune receptors, antigen processing and presentation, immune cell activation, and immune system in health and disease. (Prerequisite: BIOL-2111 and BIOM-2131.) (Recommended for 3rd year students.) (3 lecture hours/week.)

BIOM-3550. Embryology

Cellular, molecular, and biochemical mechanisms of gametogenesis, fertilization, cleavage, and organogenesis in a variety of animal systems. A major paper is required. (Prerequisites: BIOL-2111, and BBIOM-2131.) (3 lecture hours a week.)

BIOM-3560. Homeostasis in Human Physiology

This course will explore the amazing variety of signals in the animal body, and how they are sent and received by cells in different tissues to maintain homeostasis. Particular attention will be paid to the cellular and molecular mechanisms underlying blood pressure, thermoregulation, circadian rhythms and sleep, metabolism, inflammation and stress, and adult tissue stem cells. This course will focus on how signals are propagated between and within cells of different tissues, and how they relate to animal biology, health and disease. (Prerequisite: BIOM-2131) (3 lecture hours a week).

BIOM-3581. Biotechnology Laboratory

This intensive laboratory course will primarily simulate the discovery and rapid protein characterization of genes and gene products. Laboratory experiments will include cutting edge biotechnology techniques and traditional biochemical and molecular biology methodology. For example, DNA/plasmid isolation, cloning, DNA sequencing and analysis, introduction to bioinformatics and microarray technology, characterization of cloned products, protein isolation and characterization, and determination of enzymatic catalysis and regulation will be used to study this enzyme on a genetic and protein level. Other topics include forensic genetics and plant biotechnology. (Prerequisite: BIOM-2131 and BIOC-2010.) (1 tutorial/lecture hour and 6 laboratory hours per week over two terms, 6 credit course.) (Registration priority will be given to students for which this course is a program requirement.)

BIOM-3750. Cancer Undergraduate Research Education (CURE).

CURE will engage students in learning about the science of cancer and directions in cancer research. Students will interact with scientists conducting a spectrum of multidisciplinary research and will work in collaborative teams to design and implement tools to communicate cancer research to the public, to patients, to other students and to the government. Students will discuss ethical fundraising and marketing of research and will compose ideas to support cancer research. This course will be hands on learning where your ideas will directly contribute to moving cancer research forward in Windsor-Essex. (Prerequisites: BIOL-1101 and registration in third year of a program.) (Previously offered as SCIE-3750, this course does not count towards a major course credit in Biological Sciences or BCN degrees but can be used as an additional Science course or any area of study credit.) (3 hours a week lecture/ experiential learning). (This is an experiential learning course.)

BIOM-4008. Special Topics in Biomedical Sciences

Selected topics of current interest in the fields of Biomedical Sciences which may vary from year to year. (May be only repeated for credit if content changes. Will be covered with a different section number.)(Prerequisites: BIOM-3530 or BIOM-3500.)

BIOM-4440. Neurophysiology

This course examines functions of the brain and physiological processes that are responsible for these functions at the system, cellular, and molecular levels. Topics include the generation, transmission, and integration of neural signals. They also include neural signaling related to the processing of sensory information, controlling of movement, and generation of complex mental activity Modern research methods that are used in the study of brain functions and underlying physiological processes are also discussed. (Prerequisite: BIOL-2480 or permission from the instructor.) (3 lecture hours a week.)

BIOM-4510. Stem Cells

Stem cells are populations of cells present in the body that divide to make all the cells that compose specific tissues and organs. What we know about stem cells is the result of rapidly evolving, and sometimes controversial, research. This seminar course deals with current research topics in stem cell biology. Topics will include: stem cell potency, embryonic precursors vs adult tissue stem cells, symmetry of division versus clonal drift, regeneration and healing, and whether stem cells contribute to ageing. The purpose of this course is to develop a knowledge of core concepts that guide research in this area. (Prerequisites: BIOL-2111 and BIOM-2131.) (3 lecture hours a week.)

BIOM-4530. Biology of Cell Transformation

Molecular and cellular mechanisms of cell transformation and tumor development with emphasis on the role of oncogenes and environmental factors in cell transformation, and on the cellular and molecular biology of malignantly transformed (cancerous) cells, experimental analysis and applications. A major paper and/or seminar is required. (Prerequisites: BIOM-3500 or BIOM-3530, CHEM-2300, BIOC-2010, and consent of instructor.) (3 lecture hours).

BIOM-4540. Regenerative Biology and Disease

With the explosion of knowledge from molecular biology and the burgeoning interest in generating or regenerating tissues or organs through various bioengineering or stem cell approaches, this course will explore the phenomenon of regeneration and continual post-natal development from a broad biological perspective. This will involve analysing molecular pathways regulating stem cell differentiation, how specialized cells proliferate and undergo programmed cell death and how the architecture of tissues is preserved despite the constant replacement of old cells by new. We will also discuss how abrogation of these programs underlie a large number of disease states. (Prerequisites: Any 1 course chosen from BIOM-3500, BIOM-3530 or BIOM-3550.) (3 lecture hours a week.)

BIOM-4550. Developmental Signaling and Developmental Genetics

Analysis at the molecular level of the activation and control of genes and proteins during oogenesis and early development in lower and higher eukaryotes. (Prerequisite: Any 2 courses chosen from BIOM-3500, BIOM-3530 or BIOM-3550.) (3 lecture hours a week.)

BIOM-4560. Molecular Biotechnology

Introduction to the techniques and applications of recombinant DNA technology and genetic engineering. Topics include the generation of transgenic organisms (microbes, plants, and animals) and their impact on agriculture and medicine. The social ramifications of these technologies will be discussed. (Prerequisites: BIOM-3500 or BIOM-3530.) (3 lecture hours a week.)

BIOM-4590. Epigenetics

This course will examine our current understanding of “Epigenetics”, the study of heritable changes in gene expression that occur without a change in DNA sequence. Epigenetics is an area under intensive scientific investigation. The goal of the course is to provide an introduction to the fundamentals of epigenetic control along with an understanding of the interplay between epigenetics and disease, health, behaviour, and the environment. (Prerequisite: BIOM-3500 or BIOM-3530.)

BIOM-4904. Undergraduate Research in Biomedical Sciences I

Completion of an undergraduate research project, including an oral presentation at an annual colloquium and submission of written final report. (10 laboratory hours a week; offered over two terms.) (A 6.00 credit hour research project which counts as two courses.) (Registration and selection of a supervisor requires the consent of the Department Head) (Prerequisites: major average of 70% and a cumulative average of 60%.) (Prerequisites: BIOM-3530 or BIOM-3500.)

BIOM-4914. Undergraduate Research in Biomedical Sciences

Completion of an undergraduate research project, including an oral presentation at an annual colloquium and submission of written final report. (10 laboratory hours a week; offered over two terms.) (A 6.00 credit hour research project which counts as two courses.) (Registration and selection of a supervisor requires the consent of the Department Head) (Prerequisites: BIOM-4904 and major average of 70% and a cumulative average of 60%.)

CHEMISTRY AND BIOCHEMISTRY

PROGRAMS

Chemistry and Biochemistry Program Regulations

- 1) The prerequisite for CHEM-4900 is a major average of 70% and a cumulative average of 70%.
- 2) Unless otherwise stated, students in Chemistry and Biochemistry must take the course with laboratory where two offerings differing only in the presence or absence of a laboratory component are listed. This regulation is effective beginning Fall 2010 for all Chemistry and Biochemistry courses counted towards the major requirements, regardless of the student's calendar.

Standing Required for Continuation in Programs

For Continuation in any Chemistry or Biochemistry program at the second level, a student must obtain a minimum of 60% in both Chemistry CHEM-1100 and CHEM-1110, or the equivalent. Students in Biochemistry also must obtain a minimum of 60% in both Biology BIOL-1101 and BIOL-1111.

Canadian Society for Chemistry Accreditation

The Department offers three Honours programs which are accredited by the Canadian Society for Chemistry: Honours Chemistry, Honours Chemistry and Physics, and Honours Biochemistry, as well as a program in Honours Biochemistry and Biotechnology.

Preparation for Graduate and Professional Schools

Courses are available to permit the student to become fully prepared for entry into medical, dental, and pharmacy schools, as well as graduate programs in the physical and life sciences. Students should determine as early as possible the specific requirements for graduate or professional schools and programs that they may wish to apply for after completing all or part of a Chemistry or Biochemistry program. Academic advisors are available. Since many graduate schools have language requirements, students who may subsequently choose to enter graduate school are strongly advised to consider a selection of courses which includes the prominent scientific languages, French and German.

Program Regulations for Internship Option in Chemistry and Biochemistry Programs

Internship Degree Requirements

2-4 internship courses over and above 40 course degrees in Chemistry and Biochemistry programs.

CHEM-3909. Internship I

CHEM-4908. Internship II

Honours Chemistry

Degree Requirements

Total courses: forty courses

- (a) CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710, BIOC-2010, one BIOC or CHEM at 3XXX or 4XXX level, and three additional courses from CHEM 4XXX (excluding CHEM-4007).
- (b) MATH-1760 or MATH-1720, MATH-1730, PHYS-1400 and PHYS-1410;
- (c) MATH-1250 and a minimum of two additional courses from the following list: COMP-2067, MATH-2780, MATH-2790, PHYS-2200 or PHYS-3250;
- (d) four courses from Arts, Languages or Social Sciences;
- (e) nine courses from any area of study (CHEM-4007 is recommended).

Note: An internship option is available.

Recommended Course Sequence

First Year: ten courses, including CHEM-1100, CHEM-1110, MATH-1250, MATH-1720, MATH-1730, PHYS-1400 and PHYS-1410.

Second Year: ten courses, including CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500 and CHEM-2510.

(Recommended: fulfill at least two requirements from (c) above).

Third and Fourth Years: twenty courses, including BIOC-2010, CHEM-3210, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710 and five additional Chemistry and Biochemistry courses at the 3XXX or 4XXX level (see (a) above).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Chemistry with Thesis

Degree Requirements

Total courses: forty courses

- (a) CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710, CHEM-4900, BIOC-2010, one CHEM or BIOC at 3XXX or 4XXX level, and one additional course from CHEM-4XXX (excluding CHEM-4007).
- (b) MATH-1760 or MATH-1720, MATH-1730, PHYS-1400 and PHYS-1410;
- (c) MATH-1250 and a minimum of two additional courses from the following list: COMP-2067, MATH-2780, MATH-2790, PHYS-2200 or PHYS-3250;
- (d) Four courses from Arts, Languages or Social Sciences;
- (e) Nine courses from any area of study (CHEM-4007 is recommended).

Note: An internship option is available.

Recommended Course Sequence

First Year: ten courses, including CHEM-1100, CHEM-1110, MATH-1250, MATH-1720, MATH-1730, PHYS-1400 and PHYS-1410.

Second Year: ten courses, including CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500 and CHEM-2510. (Recommended: fulfill at least two requirements from (c) above).

Third and Fourth Years: twenty courses, including BIOC-2010, CHEM-3210, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710, CHEM-4900, and three additional CHEM or BIOC courses at the 3XXX or 4XXX level (see (a) above).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Chemistry (Applied Chemistry Stream)

Admission Requirements

Pathway for St. Clair College:

1) Graduates of a three-year Ontario College Advanced Diploma in Chemical Laboratory Technology programs (MCU 61302) from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of at least a B (73%) grade, are eligible for admission to Honours Chemistry - Applied Chemistry Stream degree program offered by the Department of Chemistry and Biochemistry at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

2) Students admitted to the Honours Chemistry - Applied Chemistry Stream will obtain the equivalent of 3 years of Advanced Standing (or awarded up to 27 course transfers).

3) Students are required to complete eighteen (18)* courses at the University of Windsor in fulfillment of the requirements of the Honours Chemistry - Applied Chemistry Stream.

*Through the completion of specific optional courses at St. Clair College, students can reduce the number of required courses to 13.

Recognized programs include:

- Any chemistry-related program from a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Note: Two-year diploma programs will be analyzed for potential credit transfer on an ad-hoc basis, while considering minimum residency and core course requirements.

Degree Requirements

Total courses: 18*

(a) PHYS-1400, PHYS-1410, MATH-1720 or MATH-1760, MATH-1730, MATH-1250, BIOC-2010, CHEM-2500, CHEM-2510, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710, three of CHEM-4XXX (excluding CHEM-4007), two of COMP-2067, MATH-2780, MATH-2790, PHYS-2200 or PHYS-3250.

*Through the completion of specific optional courses at St. Clair College, students can reduce the number of required courses to 13:

- SCC MTH 605 (optional math course) credit towards UWin MATH 1720 or MATH-1760 and MATH-1730. At minimum, it is strongly recommended that students complete MTH 605 at St Clair College to ensure a seamless and efficient transfer pathway.
- SCC MTH 505 (optional math course) credit towards UWin MATH-1250
- SCC MTH 705 (optional math course) credit towards UWin MATH-2780
- SCC MTH 805 (optional math course) credit towards UWin MATH-2790

Notes:

- Students wishing to complete a research project will also complete CHEM-4900 in addition to the fulfilling the degree requirements. However, this is a 6-credit course and so it would result in those students taking a supernumerary course and complete an additional year of study.

Courses used to calculate the major average are: All courses listed under section (a).

Combined Honours Chemistry Programs

Programs combining Chemistry with another major will consist of the following:

Degree Requirements

Total courses: forty.

- (a) Chemistry and Biochemistry: CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, CHEM-3300 (or CHEM-3310), CHEM-3400, and BIOC-2010; plus two additional courses at the 3XXX or 4XXX level.
- (b) Course requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) MATH-1250, MATH-1760 or MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and PHYS-2200;
- (d) additional courses, if necessary, from any area of study to a total of forty courses.

Note: An internship option is available.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Chemistry

Major Concentration: CHEM-2200; CHEM-2300; CHEM-2310; CHEM-2400; CHEM-2410; CHEM-2500; CHEM-2510; BIOC-2010; four of CHEM-3210, CHEM-3300, CHEM-3310, CHEM-3400, CHEM-3500, CHEM-3710.

Minor Concentration: two of CHEM-2300, CHEM-2400, CHEM-2500; four of CHEM-2200 or, CHEM-2310 or, CHEM-3210 or, CHEM-2410 or, CHEM-2510 or, one pair of courses at the 3XXX-level. (or permission of instructor). (Additional requirements: CHEM-1100, CHEM-1110, MATH-1760 or MATH-1720, MATH-1730.)

Minor in Chemistry

The minor in Chemistry consists of six courses, including CHEM-1100 and CHEM-1110, plus four courses at the 2000 level or above, one of which must be at the 3XXX level or above. All four courses at the 2XXX level and above must be in organic, inorganic, physical and/or analytical chemistry. Selected courses leading to the minor may not consist of anti-requisites to courses in the student's degree program. Students must also remember to select only courses, which may be otherwise counted for credit towards their degree programs. The following courses cannot be used towards the minor in Chemistry: BIOC-2015, CHEM-2003, CHEM-2305, CHEM-3305, CHEM-3315. An overall average of 67% or higher must be obtained, with no individual course having a grade lower than 60%.

Honours Biochemistry

Degree Requirements

Total courses: forty courses

- (a) CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course) and four additional courses at the 3XXX or 4XXX level.
- (b) BIOL-1101, BIOL-1111, BIOL-2111, BIOM-2131, MATH-1760 or MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and STAT-2910;
- (c) Four courses from Arts, Languages or Social Sciences;
- (d) Seven courses from any area of study.

Note: An internship option is available.

Recommended Course Sequence

Note: STAT-2910 can be taken anytime in second, third or fourth year.

First Year: ten courses, including BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110, MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and two other courses.

Second Year: ten courses, including BIOL-2111, BIOM-2131, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, BIOC-2010 and one other course.

Third and Fourth Years: twenty courses, including CHEM-2200, CHEM-3210, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course) and four additional courses at the 3XXX or 4XXX level.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Biochemistry with Thesis

Degree Requirements

Total courses: forty courses.

(a) CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course), CHEM-4900 (6-credit, 2 semester course) and two additional CHEM or BIOC courses at the 3XXX or 4XXX level.

(b) BIOL-1101, BIOL-1111, BIOL-2111, BIOM-2131, MATH-1760 or MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and STAT-2910;

(c) Four courses from Arts, Languages or Social Sciences;

(d) Seven courses from any area of study, and CHEM-4007 is recommended.

Note: An internship option is available.

Recommended Course Sequence

Note: STAT-2910 can be taken anytime in second, third or fourth year.

First Year: ten courses, including BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110, MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and two other courses.

Second Year: ten courses, including BIOL-2111, BIOM-2131, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, BIOC-2010 and one other course.

Third and Fourth Years: twenty courses, including CHEM-2200, CHEM-3210, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course), CHEM-4900 (6-credit, 2 semester course) and two additional CHEM and BIOC courses at the 3XXX or 4XXX level.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Biochemistry (Pharmacy Stream)

Degree Requirements

Total courses: forty courses.

(a) 20 Courses: CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course), BIOC-3310, BIOC-4050 and two additional CHEM/BIOC courses at the 3XXX or 4XXX level (CHEM-3310 is recommended).

(b) 10 Courses: BIOL-1101, BIOL-1111, BIOL-2111, BIOL-2071, BIOM-2131, MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and STAT-2910;

(c) 4 Courses: ENGL-1001 and three courses from Arts, Languages or Social Sciences; CMAF-2100 strongly recommended

(d) 6 courses from any area of study; BIOM-2021, BIOL-2040, BIOL-2050 strongly recommended.

Note: An internship option is available.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Biochemistry (Pharmacy Stream) with Thesis

Degree Requirements

Total courses: forty courses.

- (a) 20 Courses: CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, BIOC-2010, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-3581 (6-credit, 2 semester course), BIOC-3310, BIOC-4050 and CHEM-4900 (6-credit, 2 semester course).
- (b) 10 Courses: BIOL-1101, BIOL-1111, BIOL-2111, BIOL-2071, BIOM-2131, MATH-1720, MATH-1730, PHYS-1400, PHYS-1410 and STAT-2910;
- (c) 4 Courses: ENGL-1001 and three courses from Arts, Languages or Social Sciences; CMAF-2100 strongly recommended
- (d) 6 courses from any area of study; BIOM-2021, BIOL-2040, BIOL-2050, CHEM-3310 strongly recommended.

Note: An internship option is available.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Biochemistry and Biomedical Science (Health Stream)

This is a joint offering between the Department of Chemistry and Biochemistry and the Department of Biomedical Sciences. See Department of Biomedical Sciences for details.

Combined Honours Biochemistry Programs

Programs combining Biochemistry with another major will consist of the following:

Degree Requirements

Total courses: forty.

- (a) Chemistry and Biochemistry: CHEM-1100, CHEM-1110, CHEM-2200, CHEM-2300, CHEM-2310, CHEM-2400, CHEM-2410, CHEM-2500, CHEM-2510, CHEM-3210, BIOC-3100, BIOC-3110, BIOC-3130, BIOC-2010, and one additional course at the 3XXX or 4XXX level.
- (b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) BIOL-1101, BIOL-1111, BIOL-2111, BIOM-2131, MATH-1760 or MATH-1720, MATH-1730, PHYS-1400, and PHYS-1410;
- (d) additional courses, if necessary, from any area of study to a total of forty courses.

Note: An internship option is available.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Biochemistry

Major Concentration: CHEM-2200, CHEM-2300, CHEM-2400, CHEM-2500, BIOC-2010, five of BIOC-3100, BIOC-3110, BIOC-3130, BIOC-4030, BIOC-4050, BIOC-4XXX; plus BIOL-2111 and BIOM-2131. (additional requirements: CHEM-1100, CHEM-1110, BIOL-1111, BIOL-1101.)

Minor Concentration: CHEM-2300, BIOC-2010; four of BIOC-3100, BIOC-3110, BIOC-3130, CHEM-2200, CHEM-2310. (additional requirements: BIOL-1111, BIOL-1101, CHEM-1100, CHEM-1110, MATH-1760 or MATH-1720, MATH-1730)

Minor in Biochemistry

The minor in Biochemistry consists of seven courses, including CHEM-1100, CHEM-1110, CHEM-2300, and BIOC-2010, plus three courses chosen from BIOC-3XXX and BIOC-4XXX, one of which must be at 4XXX level. Selected courses leading to the minor may not consist of anti-requisites to courses in the student's degree program. Students must also remember to select only courses, which may be otherwise counted for credit towards their degree programs. The following courses cannot be used towards the minor in Biochemistry: BIOC-1303, BIOC-2015, CHEM-2003, CHEM-2305, CHEM-3305, CHEM-3315. An overall average of 67% or higher must be obtained, with no individual course having a grade lower than 60%.

CHEMISTRY AND BIOCHEMISTRY COURSES

All courses listed will not necessarily be offered each year.

The prerequisite of all 2000-level courses, unless otherwise indicated, will be both CHEM-1100 and CHEM-1110.

The prerequisite for all 4000-level courses will be the consent of the instructor, except as noted.

BIOCHEMISTRY COURSES

BIOC-2010. Organic Chemistry of Biomolecules

An extension of the principles covered in CHEM-2300 to the structure and properties of organic molecules of biological significance (i.e., proteins, nucleic acids and lipids). (Prerequisite: CHEM-2300.) (3 lecture, 3 laboratory hours a week.)

BIOC-2015. Organic Chemistry of Biomolecules

The same as BIOC-2010 but without the laboratory. (Prerequisite: CHEM-2300 or CHEM-2305 or consent of the department.) (3 lecture hours a week.) (Not available for credit to students majoring in Chemistry, Biochemistry, Biochemistry-Biotechnology, Biology-Biotechnology or Biological Sciences or students minoring in Chemistry or Biochemistry.) (BIOC-2015 may not be used as a pre-requisite for BIOC-3100, BIOC-3110, BIOC-3130 or BIOC-3581 nor as one of the eight additional Science courses at the 2000 level or above for students majoring in General Science)

BIOC-3030. Natural Health Products and Their Mechanisms of Actions

The applications of chemical and biochemical processes used in the isolation, identification and evaluation of bioactive constituents found in plants. Topics may include (i) the principle of medicinal chemistry in which plant extracts are prepared and tested for their biological actions, (ii) how Natural-Health Products (NHP) which are plant extracts with medicinal properties are subjected to scientific validation for their further development into natural product drugs, and (iii) the challenges associated with the NHP quality controls (Prerequisite: BIOC-2010). 3 lecture hours/week and 1 tutorial hour/week.

BIOC-3100. Metabolism I

Catabolism and the generation of phosphate bond energy. Introduction to chemistry of life, principles of bioenergetics, glycolysis, glycogen breakdown, citric acid cycle, electron transport/oxidative phosphorylation, pentose phosphate pathway, fatty acid oxidation - ketone bodies, amino acid degradation energy metabolism. (Prerequisite: BIOC-2010.) (3 lecture hours a week.)

BIOC-3110. Metabolism II

The utilization of phosphate bond energy will be illustrated by carbohydrate, fatty acid, nucleotide and lipid biosynthesis, hormonal (G-proteins) and metabolite regulation, biological membranes (structure and transport mechanisms) and contractile processes (muscle biochemistry). (Prerequisite: BIOC-3100.) (2 lecture hours a week.)

BIOC-3130. Protein and Nucleic Acid Chemistry

The covalent and three-dimensional structures of these macromolecules will be described in conjunction with study of the chemical and physical methods used in their purification and characterization. (Prerequisite: BIOC-2010.) (2 lecture hours a week.)

BIOC-3140. Protein and Enzyme Engineering

The objective of this course is to explore current methods and approaches to design, modify and characterize proteins and enzymes for applications in biotechnology and medicine. We will start from the fundamental principles of molecular genetics, as well as protein and enzyme structure and function to better understand the current opportunities and challenges to engineering proteins and enzymes for specific applications. At the end of the course, you should have a deeper understanding of how the fundamental principles in molecular biology and protein biochemistry can be harnessed to help develop practical solutions to a wide range of important applications. (Prerequisite: BIOC-2010.) (3 lecture hours a week.)

BIOC-3310. Pharmacology for Health Sciences

A lecture course of particular interest to students in the health sciences areas. The course material includes the principles of pharmacokinetics and pharmacodynamics, and is aimed at developing an understanding of the function of the human body with respect to the use and effects of drugs in health and disease. (Prerequisites: One of BIOC-2010 or BIOC-2015.) (3 lecture hours a week.)

BIOC-3581. Biotechnology Laboratory

This intensive laboratory course will primarily simulate the discovery and rapid characterization of genes and gene products. Laboratory experiments will include cutting edge biotechnology techniques and traditional biochemical and molecular biology methodology. For example, DNA/plasmid isolation, cloning, DNA sequencing and analysis, introduction to bioinformatics and microarray technology, characterization of cloned products, protein isolation and characterization, and determination of enzymatic catalysis and regulation will be used to study gene products on a genetic and protein level. Other topics include forensic genetics and plant biotechnology. (Prerequisites: BIOC-2010 and BIOM-2131, Recommended co-requisites: BIOC-3100, BIOC-3110, and BIOC-3130.) (6 laboratory hours per week over two terms, 6 credit course.)

BIOC-4008. Special Topics in Biochemistry

This course will present advanced and contemporary topic(s) in biochemistry, which may vary from year to year. (May be repeated for credit if content changes.) (Prerequisite: BIOC-2010 or consent of instructor.)

BIOC-4010. Bioinformatics/Genomics/Proteomics

Bioinformatics is an interdisciplinary research area that uses computer science technology to efficiently store, retrieve, and analyze information related to biomacromolecules, such as nucleic acids and proteins. This course provides an introductory overview of essential bioinformatics algorithms and hands-on experience with bioinformatics software. It will discuss the organization of biomolecular data, and the interpretation of the data through evidence-based reasoning. The course is designed for students in biochemistry and biology-related programs who do not have a computer science background but have an interest in pursuing a bioinformatics-related career or will be working on a research project involving the functions of genes, proteins, and cells. (Prerequisite: BIOC-2010/2015 or BIOM-2131/2033.) (2 lecture hours and 1.5 computer lab hours per week.)

BIOC-4020. Lipids, Lipoproteins, and Signaling

Biochemistry and cell biology of lipids and their role in cellular signaling, with a special emphasis on the experimental basis of current knowledge. Topics covered include lipid and membrane biochemistry, lipoprotein structure and metabolism, small molecules such as steroids and leukotrienes, and an integrative assessment of the role of lipids in cellular processes such as protein trafficking and intracellular signaling. (Prerequisites: One of BIOC-2010 or BIOC-2015 or permission of the instructor.)

BIOC-4030. Enzymology and Biotechnology

This course will focus on the structural and mechanistic properties of biological enzymes. Topics to be covered include, chemical catalysis, kinetics, activity inhibition, catalytic mechanisms, and an overview of modern approaches to studying enzymes. Molecular mechanisms regulating the activities of enzymes in the cell will be discussed. (Prerequisite: BIOC-2010.) (2 lecture hours per week.)

BIOC-4050. Drug Design

Lectures cover various aspects of drug discoveries and designs. Beginning with basic knowledge in pharmacokinetics and pharmacodynamics, students should learn how lead is discovered and how the lead is modified to yield potent therapeutic agents. Several techniques in the area of molecular biology, biochemistry, organic chemistry and computational biology will be discussed and presented. (Prerequisite: BIOC-3310.) (3 lecture hours per week.)

BIOC-4580. The Human Subject: Animal-Free Methods in Biomedical Research and Toxicology

The future of biomedical research and chemical safety testing is human-centred. In line with emerging global trends, this course exposes students to key concepts and methodologies in alternatives to animal testing. From genomics to whole body physiology and systems biology to personalized medicine and computational toxicology, the course offers a comprehensive overview of human biology-based in vitro platforms for disease modeling and toxicology. Content will be complemented by case studies in biomedical research and chemical safety testing from academic, industry, and government experts. (Prerequisites: One of BIOC-2010 or BIOC-2015 or permission of the instructor.) (3 lecture hours per week).

CHEMISTRY COURSES

CHEM-1003. Alchemy to Chemistry: Science Through the Ages

Science and technology shape the world in which we live. Nevertheless, sometimes the societal impact of scientific breakthroughs is not realized for a generation or more. In this course, key scientific discoveries and developments will be examined and discussed through the lens of a Chemist. Starting with the “ancients”, the course works through time to the present looking at how theories and the scientific method has developed and evolved over time. The course will focus on topics pertaining to chemistry, the science of substances and interactions. (It may be taken by Science students for credit, but does not count as a Science option towards the fulfilment of the specified requirements for a Science degree.) (3 lecture hours per week)

CHEM-1100. General Chemistry I

Introductory concepts in chemistry, including reactions of atoms, ions, and molecules, solution stoichiometry, thermochemistry, electronic structure of atoms, basic chemical bonding and molecular geometry, periodic properties of the elements, and the theory of gases. (Prerequisite: Grade 12 “U” Chemistry or equivalent, or consent of the instructor.) (3 lecture, 3 laboratory/tutorial hours a week.)

CHEM-1103. Topics in General Chemistry

An introduction to selected topics in modern chemistry for engineering: atomic and molecular structure, properties of matter and the periodic table, macroscopic chemical systems, stoichiometry, properties of the equilibrium state and applications to thermochemistry and electrochemistry. (Prerequisite: Grade 12 “U” Chemistry or equivalent.) (3 lecture, 3 laboratory hours a week.)

CHEM-1110. General Chemistry II

A continuation of CHEM-1100 covering topics such as chemical kinetics, general equilibrium theory, acid-base theory, chemical thermodynamics, and introduction to organic chemistry. (Prerequisite: CHEM-1100.) (3 lecture, 3 laboratory/tutorial hours a week.)

CHEM-2003. Contemporary Chemistry

What has chemistry done for you lately? Chemistry is a branch of science that investigates molecules – the fundamental building blocks of matter. It surrounds us (inside and out!), affecting everything from what we eat and how we feel, to the cell phone in our pocket and the computer that sits on our desk. Chemistry is an enabling technology that will deliver solutions to many of our planet’s problems, including topics related to clean energy production, environmental health, and sustainable food production. This course provides a venue to interpret the underlying chemistry in our everyday lives – we will start with a “big bang”, surveying how the universe first began, moving quickly to a broad array of special topics including clean energy production, environmental toxicology, metals in biology, the fundamental science underlying display technologies, and more! The course is intended for students with no formal background in chemistry. (Not open to first-year students. May not be used for credit as a Science Course in any Science program.) (2 lecture hours per week.)

CHEM-2200. Analytical Chemistry

Fundamental chemical principles and theory that are important to classical, or “wet” analytical chemistry are presented, and illustrated using practical applications. The topics covered in this course include aqueous-solution chemistry, equilibria in complex systems, electrolytes, and titrimetric methods of analysis (gravimetric, precipitation, acid-base, compleximetric and reduction-oxidation). Theory and applications of electrochemical techniques include potentiometric and amperometric titrations. (Prerequisite: CHEM-1110 or consent of instructor.) (3 lecture hours, 3 laboratory hours a week.)

CHEM-2300. Introductory Organic Chemistry

Introduction to organic chemistry, with emphasis on structure, stereochemistry, and reactions of aliphatic and alicyclic compounds and their functionalized derivatives. (Prerequisites: CHEM-1100 and CHEM-1110, or CHEM-1103.) (Antirequisite: CHEM-2305.) (3 lecture, 3 laboratory hours a week.)

CHEM-2305. Introductory Organic Chemistry

The same as CHEM-2300 but without the laboratory. (Prerequisites: CHEM-1100 and CHEM-1110.) (Antirequisite: CHEM-2300.) (3 lecture hours a week.) (Not available for credit to students majoring in Chemistry, Biochemistry, or Biological Sciences or students minoring in Chemistry or Biochemistry.)

CHEM-2310. Introductory Organic Chemistry II

A continuation of CHEM-2300. Topics include the chemistry of nitrogen-containing compounds, aromatic chemistry and an introduction to spectroscopic methods. (Prerequisite: CHEM-2300.) (2 lecture hours a week.)

CHEM-2325. Fundamentals of Organic Chemistry

This course is for students who want to take only one organic chemistry course in their studies and covers the very essentials of what is taught in CHEM-2300, CHEM-2310, and CHEM-3310. It gives a general introduction to organic chemistry, with emphasis on molecular structure, stereochemistry, intermolecular interactions, physical properties of organic compounds, and the chemistry of important functional groups (halides, alcohols, thiols, amines, carboxylic acids, esters, amides and aromatic compounds). The course functions as a prerequisite for BIOC-2010 (Organic Chemistry of Biomolecules) but not CHEM-2310 (Introductory Organic Chemistry II). High scoring students may be admitted into CHEM-2310 by the consent of the instructor. (Prerequisites: CHEM-1110 or CHEM-1103.) (Antirequisites: CHEM-2300, CHEM-2305, CHEM-2325/Credit may be obtained for only one of CHEM-2300, CHEM-2305, and CHEM-2325.) (3 lecture hours a week.) (Not available for credit to students majoring in Honours Chemistry and Biochemistry programs.)

CHEM-2400. Introductory Physical Chemistry I

Properties of ideal and real gases, first and second laws of thermodynamics, physical transformations of substances, mixtures of substances and phase diagrams are applied to changes of state, chemical reactions and spontaneous processes. (Prerequisites: CHEM-1110, MATH-1760 or MATH-1720, and MATH-1730.) (3 lecture hours/week, 3 lab hours or 1.5 tutorial hours/week or equivalent)

CHEM-2410. Introductory Physical Chemistry II

Physical and chemical equilibrium, equilibrium electrochemistry, molecular motion and collisions, chemical reaction rates, kinetics and introduction to statistical mechanics. (Prerequisite: CHEM-2400) (3 lecture hours/week, 3 laboratory hours or 1.5 tutorial hours/week or equivalent.)

CHEM-2500. Introductory Inorganic Chemistry I

Introduction to inorganic chemistry. Topics include: the origin of trends in the periodic table, molecular symmetry, and chemical bonding (including ionic bonding and the molecular orbital and valence bond models for covalent bonding). These approaches will be used to explain the chemistry and properties of selected classes of main group compounds. Photoelectron, NMR, and vibrational spectroscopy are introduced as complementary tools in the examination of these molecular species. (Prerequisite: CHEM-1110.) (3 lecture hours/week, 1.5 tutorial hours/week.)

CHEM-2510. Introductory Inorganic Chemistry II

The coordination chemistry of transition metals will be discussed, with particular reference to the means of physical and spectroscopic characterization. Relevance of such compounds to bio-inorganic systems

will also be discussed. (Prerequisite: CHEM-2500.) (3 lecture hours/week, 3 laboratory hours or 1.5 tutorial hours/week or equivalent.)

CHEM-3210. Principles of Instrumental Analysis

The fundamental principles of operation and practical application of modern chemical analytical instrumentation are presented. This course will focus on the acquisition and assessment of qualitative and quantitative data from synthetic, biochemical and natural materials using instruments and methods that describes the elemental, isotopic, and molecular composition and structure of matter. Topics covered in this course may include atomic and molecular absorption and emission (photoluminescence) spectroscopy, atomic and molecular mass spectroscopy, X-ray spectroscopy, vibrational spectroscopy, and separation methods such as gas and liquid chromatography. (Prerequisite: CHEM-2200 or consent of instructor; Prerequisite for School of the Environment Majors: ESCI-2131 or consent of instructor.)(3 lecture, 3 laboratory hours a week.) (Cross-listed with ESCI-3711.)

CHEM-3300. Spectroscopic Structure Identification

Structure elucidation and the use of spectroscopic techniques in synthetic chemistry. The experimental and theoretical principles of mass spectrometry, UV/visible, infrared and nuclear magnetic resonance spectroscopy, with focus on applications of spectroscopic techniques to structure analysis. (Prerequisite: CHEM-2310 or consent of instructor.) (3 lecture, 3 laboratory hours a week.)

CHEM-3305. Spectroscopic Structure Identification

The same as CHEM-3300 but without the laboratory. Not available for credit to students minoring in Chemistry or Biochemistry.(Prerequisite: CHEM-2310 or consent of instructor.) (3 lecture hours a week.)

CHEM-3310. Intermediate Organic Chemistry

The methods of organic synthesis and the reaction mechanisms involved. (Prerequisite: CHEM-2310 or consent of instructor.) (3 lecture, 3 laboratory hours a week.)

CHEM-3315. Intermediate Organic Chemistry

The same as CHEM-3310 but without the laboratory. Not available for credit to students minoring in Chemistry or Biochemistry.(Prerequisite: CHEM-2310 or consent of instructor.) (3 lecture hours a week.)

CHEM-3400. Quantum Chemistry

Quantum chemistry is the application of quantum mechanics to the study of chemical systems. It is foundational to computational chemistry – the use of computers to model chemical systems – which has established itself as an important tool for studying chemical systems ranging from an atom to proteins, and in the design of new therapeutic drugs and materials. In this course we examine foundational principles and concepts of quantum chemistry relevant to understanding systems ranging from a single one-electron atom to multi-electron molecules. The study of multi-electron systems requires the use of approaches and approximations (e.g., Variational, Perturbation, or Molecular Orbital theory) that also lie at the core of the various possible computational methods. We will also gain experience in using computational chemistry to determine or predict the properties and behaviours of chemical systems. (Prerequisite: CHEM-2410.) (3 lecture, 3 laboratory hours per week.)

CHEM-3500. Organometallic Chemistry

This course provides an introduction to the organometallic chemistry of the transition metals. (Prerequisite: CHEM-2510 or consent of instructor.) (3 lecture, 3 laboratory hours a week.)

CHEM-3510. Heavy Metal Easy Listening

What are all those metals in the periodic table good for? The course focuses on applications of metals and inorganic in the modern society, with the assumption that the audience are not specialists and thus requires only a basic background in chemistry. Select topics include: metals in medical diagnosis/imaging; treatment of diseases such as cancer; the irreplaceable roles metals play in modern drug synthesis; electronic and clean energy applications; and a balanced consideration of the impacts of metals in the environment. The course will also consider how scientific discoveries are presented to non-specialized audiences in the modern media. (Prerequisite: BIOC-2010/2015.) (3 lecture hours a week.)

CHEM-3710. Materials Chemistry

Modern topics in materials science and solid state chemistry are discussed with an emphasis on properties, applications, and methods of characterization. The areas covered will include biometric materials, nanoscale engineering, liquid crystals, semiconductors, superconductors, organic metals, ferromagnetism and the ferroelectric effect, non-linear optical materials, thermochromic solids, scanning tunneling microscopy, and atomic force microscopy. Emphasis on applications to biomaterials engineering. (Prerequisite: CHEM-2510.) (3 lecture hours/week.)

CHEM-3909. Internship Work Term I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The internship work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Students must be enrolled in the Bachelor of Science Honours Chemistry/Biochemistry with Internship stream). Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the internship program.) (This is an experiential learning course.)

CHEM-4007. Development of Leadership Skills

Selected seminars will expose students to new research ideas and techniques as well as different presentation styles. Students will engage in service, outreach and leadership activities. Students will attend twelve research seminars over the course of two terms and submit written summaries of three seminars. (36 hours of service activities over two terms); (3 credit hours over two terms); (pass/fail grading). (Open to students in Honours Chemistry, and Honours Biochemistry, and Biochemistry and Biomedical Science). (Prerequisites: major and cumulative average of 72%).(This is an experiential learning course.)

CHEM-4308. Special Topics in Organic Chemistry

Topics may include polymer chemistry, natural product chemistry, advanced synthetic methodology, or design and execution of organic syntheses. (Prerequisite: CHEM-3310 or consent of instructor.) (2 lecture hours a week.) (May be repeated for credit if content changes.)

CHEM-4320. Dyes and Pigments - Design, Synthesis, and Properties

This course describes essential design criteria for organic dyes and pigments and common synthetic strategies for their preparation. Also covered are basic structure-property relations regarding their absorption and emission properties. This is an advanced organic chemistry course and requires a good understanding of intermediate organic chemistry and spectroscopic techniques. Pre-requisite: CHEM-2310 (Inorganic Chemistry II) or consent of instructor. (Cross-listed with CHEM-8320)

CHEM-4350. Advanced Organic Chemistry

Physical organic chemistry. Includes molecular orbital theory, stereochemistry, thermodynamics, and reaction mechanisms. (Prerequisite: CHEM-3310 or consent of instructor.) (2 lecture hours a week.)

CHEM-4410. Statistical Thermodynamics

This course covers the following topics: laws of thermodynamics, heat capacities, distribution laws, partition functions, and chemical equilibria and kinetics. The subject will be further illuminated by discussions of low temperature phenomena and spectroscopy. (Prerequisite: CHEM-2410.) (3 lecture hours a week.)

CHEM-4450. Advanced Physical Chemistry

Special topics in physical chemistry. (2 lecture hours a week.)

CHEM-4460. Molecular Spectroscopy

Symmetry elements, group theory, character tables, rotational and vibrational spectroscopy, electronic spectroscopy transitions, astrochemistry, lasers, photoelectron spectroscopy, introduction to nuclear magnetic resonance, electron spin resonance. (Prerequisite: CHEM-3400 or consent of instructor.) (Cross-listed with course CHEM-8468)(3 lecture, 3 laboratory hours per week.)

CHEM-4500. Special Topics in Main Group Chemistry

This course provides an introduction to the chemistry of main group elements with a particular focus on the elements of the p-block. The material will highlight the similarities and differences observed between organic molecules and those from the rest of the periodic table with respect to their structural features, bonding and reactivity. (Prerequisite: CHEM-2500.) (3 lecture hours a week.) (May be repeated for credit if content changes.)

CHEM-4510. Special Topics in Inorganic Chemistry

Advanced topics in inorganic chemistry, bioinorganic chemistry and organometallic chemistry may include analytical and spectroscopic methods of use to the inorganic chemist, advanced topics in main group chemistry, coordination chemistry, organometallic chemistry, free radical chemistry or the chemistry of the lanthanides and actinides. (Prerequisite: CHEM-3710 or Consent of instructor.) (2 lecture hours a week.) (May be repeated for credit if content changes.)

CHEM-4520. Free Radicals in Chemistry and Biology

This is an advanced level course that covers the principle of radical generation and stabilization, and the foundations of Electron Paramagnetic Resonance (EPR) spectroscopy for studying and characterizing free radicals. Experimental data, such as EPR spectra, will be used to probe the electronic structure of free radicals as well as provide local information on the coordination geometry for metal complexes including metallo-enzymes. A range of free radical reaction mechanisms will be surveyed, incorporating radical recombination reactions, radical abstraction reactions, radical addition reactions, and radical rearrangements. These will cover important chemical processes as well as examples drawn from biology including lipid peroxidation and lignin synthesis. (3 lecture hours per week) (Prerequisite: (Prerequisite: CHEM-2510 and CHEM-2310.)

CHEM-4528. Supramolecular Chemistry

Supramolecular chemistry can be defined as the study of chemical systems involving aggregates of molecules or ions held together by non-covalent interactions. This course will survey the concepts, major research areas and applications of modern supramolecular chemistry including intermolecular interactions, molecular recognition, supramolecular devices, self-assembly, supramolecular materials, molecular topology, biomimetic systems and molecular machines. (Prerequisite CHEM-2510.) (2 lecture hours a week.) (Cross listed with CHEM-8528.)

CHEM-4535. Organometallics for Clean Energy Conversion

This course exposes students to the use of organometallic chemistry for clean energy conversion. The content will be broken up into four major sub-sections regarding Earth's hydrogen, carbon, nitrogen, and oxygen cycles. Topics of interest will include (but are not limited to): i) assessing the energy challenge; ii) nuclear energy; iii) hydrogen as an energy carrier in fuel cells; iv) recent developments in CO₂ hydrogenation; v) assessing global need for ammonia formation and utilization; and vi) homogeneous water oxidation. In each of these areas, students are expected to develop a basic understanding of the factors that govern chemical reactivity in an effort to propose new catalysts from scratch. Emphasis will be placed on honing students' writing skills, mastering careful literature evaluation, and providing strong oral presentations. (Prerequisite CHEM-3500.) (3 lecture hours/week.) (Cross-listed with CHEM-8535.)

CHEM-4599. Applications of Inorganic Spectroscopy

The field of Inorganic Chemistry has relied on spectroscopy to gain insight into the structure and dynamics of species from small molecules to the active sites of metalloenzymes. The objective of this course is to learn different spectroscopic techniques that can be used in combination to identify and characterize inorganic compounds. This course will focus on three techniques with vastly different energies, spectroscopic timescales and resolution: NMR, EPR, and Mössbauer spectroscopy. All these spectroscopies have the influence of nuclear spin states in common, and are among the most informative available for the study of molecules. The course is aimed to be practical, with an emphasis on problem solving, so that it may aid you in your own research endeavours. (Prerequisite: CHEM-3500) (3 lecture hours a week.) (Cross-listed with CHEM-8599)

CHEM-4600. Surface Chemistry and Analysis

This course provides an introduction to the properties of surfaces with a focus on the formation, characterization and applications of self-assembled monolayers. Specific topics will include methods of preparation, molecular-level control of macroscopic surface properties, chemical reactions on the monolayer surface, and surface characterization techniques. The course will also cover applications of self-assembled monolayers such as their use as etch resists, as substrates for crystallization, and as model biological surfaces. (Prerequisite: CHEM-3500.) (3 lecture hours per week.)

CHEM-4610. Polymer Chemistry

This course provides an overview of the fundamental concepts and principles in polymer chemistry. It includes a comprehensive survey of the basic polymerization methods and characterization of polymers. In addition, development in modern polymerizations and advanced polymeric materials will be introduced. (Prerequisite: CHEM-2310.)

CHEM-4630. Self-Organization by Molecular Design

Self-organization is a ubiquitous phenomenon in nature (e.g., cell membranes, vesicles, and iridescent surfaces) and technology (e.g., block-copolymers, liquid crystals, and surfactants). This course will provide a basic understanding of the driving forces for self-organization and how the formation of specific self-organized structures (e.g., layers, micelles, tubes, columns, and cubic arrangements) can be programmed into molecules by rational design. The course will also provide an introduction to variable temperature polarized optical microscopy, thermal analysis (DSC and TGA), and variable temperature powder X-ray diffraction as important characterization techniques for these materials. (Prerequisite: CHEM-2300.) (2 lecture hours/week and 1 lab/tutorial/week.)

CHEM-4640. Organic Nanomaterials

This course examines the fundamental concepts, preparation strategies and properties of organic/carbon-rich nanomaterials at the nanoscale, and their applications in various areas of modern chemistry (materials, electronics, pharmaceutical, medicine, etc.). A special emphasis is also put on

methods and techniques utilized in materials science to characterize organic nanostructures. (Prerequisite for students in undergraduate course: CHEM-2310) (Cross-listed with CHEM-8740)

CHEM-4641. Bio- and Sustainable Materials

As technology makes increasing inroads into the chemical sciences, the development of new functional sustainable and biomaterials becomes increasingly important. This course focuses on the chemistry, characterization and applications of renewable and degradable polymers as well as on the chemistry of carbohydrates and amino acids, and the properties of their polymers. (Prerequisites: CHEM-2310, BIOC-2010.)

CHEM-4660. Special Topics in Chemistry

(2 lecture hours a week.) (May be repeated for credit if content changes.)

CHEM-4680. Applied Analytical Laboratory

Analytical chemistry remains a leading growth area in the chemistry-related job market. Core skills include not only the technical experience with the instrumentation and the fundamental chemistry concepts, but also good-laboratory practice policies which ensure the uniformity, reproducibility, reliability, and integrity of analysis. This two-semester course focuses on developing these skills as well as sample management, report preparation and interaction with the private sector to provide professional training as well as fundamental academic learning in analytical chemistry as related to the beverage industry in Windsor-Essex. Students will work in a simulated industrial laboratory environment and develop advanced skills and knowledge of analytical chemistry, laboratory management, sample management and policy related to analytical laboratories (Pre-requisite: CHEM-2200) (1 lecture and 6 laboratory hours per week over two terms.) (6 credit course).

CHEM-4832. Magnetochemistry

This course covers the requisite theory underpinning the field of magnetic materials. It provides the necessary skills set for students to interact effectively in this sub-discipline with researchers in the fields of physics, materials science and engineering. Knowledge gained from this course provides current state-of-the-art knowledge in conventional magnetic materials ('hard' and 'soft' magnets and their applications) as well as emerging fields such as low dimensional magnetic materials and single molecule magnets with applications in next-generation quantum computing. (3 lecture hours/week or 2 lecture hours and 1 lab hour per week.) (Cross-listed with CHEM-8832.) (Prerequisite: CHEM-2510 or consent of instructor.)

CHEM-4900. Research

Original laboratory research under the direction of a faculty member. Student must present three seminars discussing their research project. (1 lecture, 12 laboratory hours per week over two terms; 6 credit hours.) (Only open to students in Chemistry Honours, Biochemistry Honours; please consult the "Program Requirements" section above.) (Prerequisites: major average of 72% and a cumulative average of 72%.) (This is an experiential learning course).

CHEM-4908. Internship Work Term II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The internship work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Students must be enrolled in the Bachelor of Science Honours Chemistry/Biochemistry with Internship stream). Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course

cannot continue in the internship program.) (Prerequisite: CHEM-3909.) (This is an experiential learning course.)

COMPUTER SCIENCE

PROGRAM AND CO-OPERATIVE EDUCATION REGULATIONS

ENGLISH PROFICIENCY

It is highly recommended that students take English ENGL-1001 (Composition) as students in Computer Science should develop good oral and written communications skills, besides technical proficiency in the basic science.

SELECTION OF COURSES

In selecting courses to meet the requirements of the programs outlined below, the following general regulations also must be observed:

- 1) A student registering in a course without having successfully completed the prerequisite course(s) will be required to drop that course unless the consent of the Director of Computer Science (or her/his designate) is obtained.
- 2) If two or more courses cover essentially the same material, only one may be taken for credit.
- 3) The prior approval of the Director of Computer Science (or her/his designate) must be obtained in order to substitute any courses for required ones.
- 4) Statistics courses other than those specifically listed as being required for the degree, or ones for which the required statistics courses are themselves prerequisites, may not be taken for credit.
- 5) In general, Computer Science courses offered in other areas may not be taken for credit. COMP-1047, COMP-2067, COMP-2057, COMP-2077, COMP-2707, and COMP-3057 may not be used to satisfy the major requirements of any degree program in Computer Science, or in joint programs with Computer Science, unless permission is obtained from the Director of Computer Science (or her/his designate).

CO-OPERATIVE EDUCATION

The Co-operative Education Program is available for the following degrees:

- Bachelor of Computer Science (Honours)
- Bachelor of Computer Science (Honours Applied Computing)
- Bachelor of Science (Honours Computer Information Systems)
- Bachelor of Science (Honours Computer Science with Software Engineering Specialization)

Introduction

The Co-operative Education Program offers students the opportunity to combine their classroom experiences with related work experiences. Students who apply and are accepted into the Co-operative Education Program must successfully complete at least three paid work experiences interspersed

throughout the four-year Honours program. The experience gained while participating in these structured and supervised work placements is viewed as an integral component of the student's educational program.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

Academic Regulations

Computer Science Co-op students must maintain full-time academic status and satisfy the following:

- (a) Must maintain a minimum average of 60%, and
- (b) Must maintain a minimum major average of 65%,
- (c) Must not have more than one grade below 50% on their transcript, and;
- (d) Must maintain a minimum major average of 65% during the one semester probation period.

General Information

Withdrawal from the Co-op program will be granted on an exception basis only as it must be determined that the student has no outstanding commitments to employers. Students who wish to withdraw must meet with a Co-op Coordinator and complete a withdrawal form. However, the only time a student may withdraw from an undergraduate Co-op program without further Co-op fee payment implications is by the 1st Friday of classes after their first Co-op work term. Students who withdraw from Co-operative Education at any other time will be liable for paying the Co-op fee for the term in which they are dropping and one additional term. This will help offset the costs of developing another student for placement.

In the interest of building solid partnerships with employers, students who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Sequence of Work and Study Terms

<i>Year of Study</i>	<i>Fall Semester</i>	<i>Winter Semester</i>	<i>Summer Semester</i>
Year 1	Study	Study	Off
Year 2	Study	Study	Work
Year 3	Study	Work	Study
Year 4	Work	Study	Work
Year 5	Study		

PROGRAMS

Bachelor of Computer Science (General)

Degree Requirements

Total courses: thirty.

(a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340 (or COMP-3670), plus two additional Computer Science courses (excluding COMP-XXX7).

(b) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), and STAT-2910;

(c) one course from Arts/Languages, and one from Social Sciences;

(d) eleven other courses from any area of study, including Computer Science.

The major average will be calculated on the basis of the grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, and either COMP-3340 or COMP-3670 or both.

Recommended Course Sequence

First Year: ten courses, including COMP-1000, COMP-1400, COMP-1410, MATH-1250 or MATH-1260, MATH-1720 (or MATH-1760).

Second Year: ten courses, including COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, and STAT-2910.

Third Year: ten courses, including COMP-3150, COMP-3220, COMP-3300, and COMP-3340 (or COMP-3670).

Note: Students who plan to complete an Honours Computer Science degree at a later date should restrict the number of Computer Science courses they take as options, in order to transfer seamlessly into a Computer Science Honours program. These students should consult a program advisor.

Bachelor of Computer Science (Honours)

This program is available with or without Co-op). See Program and Co-operative Education Regulations above.

Degree Requirements

Total courses: forty.

(a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4400, COMP-4540, COMP-4960 or COMP-4990 (both 6.0 credit hour courses), plus one additional Computer Science course at the COMP-3XX0 or COMP-4XX0 level.

(b) MATH-1020, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-3940 (or MATH-3800) and STAT-2910 (or STAT-2920);

(c) three courses from Arts, Languages or Social Sciences, with at least one from Arts/Languages and one from Social Sciences;

- (d) three courses at the 2XXX-4XXX level from Mathematics/Statistics or Computer Science (excluding COMP-XXX7);*
- (e) seven other courses from any area of study, including Computer Science.

It is recommended that students pursuing a Multi-media specialization should pick 6 courses (in consultation with an academic advisor) from Visual Arts and Communication, Media and Film.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4400, COMP-4540, and either COMP-4960 or COMP-4990.

***Specializations**

Students may specialize in one of the following areas. A special annotation will be made on the transcript for a specialization in one of the following areas, if the specified courses are completed:

- i) Artificial Intelligence specialization: COMP-3710; (at least two of COMP-4730, or COMP-4740, or COMP-4770 (requires COMP-3770)); and COMP-4990 project course (or COMP-4960 Research Project) on an approved topic in Artificial Intelligence.
- ii) Multi-media specialization: COMP-3500; COMP-4500; at least one of COMP-3340 and COMP-3520; and COMP-4990 project course (or COMP-4960 Research Project) on an approved topic in Multi-media.
- iii) Networks and Security specialization: COMP-4670; at least two of COMP-3340, COMP-3680 and COMP-4680; and COMP-4990 project course (or COMP-4960 Research Project), on an approved topic in Networks and Security.
- iv) Game Development specialization: One of (COMP-3500 or COMP-3520) and COMP-3770, COMP-4770 and COMP-4990 project course (or COMP-4960 Research Project) on an approved topic in Game Development.

Recommended Course Sequence

First Year: ten courses, including COMP-1000, COMP-1400, COMP-1410, MATH-1020, MATH-1250 (or MATH-1260) , MATH-1720 (or MATH-1760), and MATH-1730.

Second Year: ten courses, including COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, and STAT-2910 (or STAT-2920).

Third Year: ten courses, including COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, and MATH-3940 (or MATH-3800).

Fourth Year: ten courses, including COMP-4400, COMP-4540, COMP-4990 (a 6.0 credit hour course)

Bachelor of Computer Science (Honours Applied Computing)

This program is available with or without Co-op. See Program and Co-operative Education Regulations above.

Degree Requirements

Total courses: forty.

- (a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-3670, COMP-4990 (6 credit course), COMP-4150, COMP-4200, COMP-4220, COMP-4250, and two other Computer Science courses (excluding COMP- XXX7).
- (b) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), and STAT-2910

- (c) One course from Arts/Languages, and one from Social Sciences
- (d) Thirteen other courses from any area of study, including Computer Science

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3400, COMP-3300, COMP-3340, COMP-3670, COMP-4150, COMP-4200, COMP-4220, COMP-4250, and COMP-4990.

Recommended Course Sequence

First Year: ten courses, including COMP-1000, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760).

Second Year: ten courses, including COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, and STAT-2910.

Third Year: ten courses, including COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-3670.

Fourth Year: ten courses, including COMP-4150, COMP-4200, COMP-4220, COMP-4250, COMP-4990 (a 6.0 credit hour course).

Bachelor of Science (Honours Computer Information Systems)

This program is available with or without Co-op. See Program and Co-operative Education Regulations above.

Degree Requirements

Total courses: forty.

(a) Computer Science: COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-4990 (a 6.0 credit hour course), plus two additional Computer Science course at the COMP-3XX0 or COMP-4XX0 level.

(b) Business: ACCT-1510, ACCT-2550, FINA-2700, MKTG-1310, and STEN-1000, plus four additional Business courses, but excluding MSCI-2020, MSCI-2130, MSCI-2200 and MSCI-3200.

(c) MATH-1250 (or MATH-1260), MATH-1720 or MATH-1760), and STAT-2910;

(d) three courses from Arts, Languages or Social Sciences, with at least one from Arts/Languages and one from Social Sciences;

(e) six additional courses from any area of study excluding Business;

(f) ECON-1100, ECON-1110.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-4990, ACCT-1510, ACCT-2550, FINA-2700, MKTG-1310, and STEN-1000.

Recommended Course Sequence

First Year: ten courses, including ECON-1100, ECON-1110, COMP-1000, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), ACCT-1510, and STEN-1000.

Second Year: ten courses, including COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, STAT-2910, and MKTG-1310, ACCT-2550 and FINA-2700;

Third Year: ten courses, including COMP-3150, COMP-3220, COMP-3300, COMP-3340, and COMP-3400.

Fourth Year: ten courses, including COMP-4990 (a 6.0 credit hour course) and two Computer Science courses at the 3XXX or the 4XXX level.

Bachelor of Science (Honours Computer Science with Software Engineering Specialization)

This program is available with or without Co-op. See Program and Co-operative Education Regulations above.

Degree Requirements

Total courses: forty.

(a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-2800, COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4110, COMP-4400, COMP-4540, COMP-4800, COMP-4960 or COMP-4990 (both 6.0 credit hour courses), plus one additional Computer Science course (excluding COMP-XXX7).

(b) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-1020, and STAT-2920 (or STAT-2910).

(c) four courses, one from each category: (i) Dynamics and Psychology: PSYC-1150, PSYC-2180, PHIL-2280, PHIL-1290, (ii) Communication skills: CMAF-2210, DRAM-2100, ENGL-1001, (iii) Professionalism: PHIL-2210, PHIL-2240, GART-2090, ENGL-1005, and (iv) Business and Management: MKTG-1310, MGMT-2400, STEN-1000.

(d) two courses from Arts, Languages or Social Sciences, including one from Arts/Languages and one from Social Sciences;

(e) four additional courses from any area of study, including Computer Science.

(f) one course at the 2XXX-4XXX level from Mathematics/Statistics or Computer Science (excluding COMP-XXX7).

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-2800, COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4110, COMP-4400, COMP-4540, COMP-4800, and either COMP-4960 or COMP-4990.

Recommended Course Sequence

First Year: ten courses, including COMP-1000, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730 and MATH-1020.

Second Year: ten courses, including COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-2800, and STAT-2920 (or STAT-2910).

Third Year: ten courses, including COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670.

Fourth Year: ten courses, including COMP-4110, COMP-4400, COMP-4540, COMP-4800, and COMP-4990 (a 6.0 credit hour course).

To remove any suggestion that the word "engineering," in the context of courses or programs in Computer Science implies the meaning of "engineering" as used in the context of courses or programs in Professional Engineering, it is hereby acknowledged that Software Engineering is a collection of principles, models, methods, and techniques for the development, maintenance, evolution, and reuse of

software that meets fundamental performance and quality requirements in an economic and competitive manner.

Honours Business Administration and Computer Science (with/without Co-op; with/without Thesis; with/without Specialization)

This is a joint offering between the School of Computer Science and the Odette School of Business. See Odette School of Business for details.

Honours Mathematics and Computer Science

This is a joint offering between the School of Computer Science and the Department of Mathematics and Statistics. See Department of Mathematics and Statistics for details.

Other Combined Honours Computer Science Programs

Degree Requirements

Total courses: forty.

- (a) Computer Science: COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3400, and COMP-4990, plus three additional Computer Science courses at the 3XXX level or above (excluding COMP-XXX7).
- (b) Course requirements - Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), and STAT-2910 (or STAT-2920);
- (d) any additional courses, excluding courses used to calculate the major average as determined by the second area of study;
- (e) additional courses, if necessary, from any area of study to a total of forty courses.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3400, and COMP-4990 and those major courses in the other area of specialization.

Students interested in pursuing a graduate degree in Computer Science are strongly encouraged to take MATH-1020, MATH-1730, COMP-2140, COMP-2310, COMP-3540 and COMP-4540 during their undergraduate studies to increase their chance of acceptance into a graduate program in Computer Science.

Bachelor of Computer Science (General) for University Graduates

Admission Requirements

- (i) A three-year General, four-year Major or four-year Honours degree from an accredited University (in a discipline other than Computer Science).
- (ii) Ontario Grade 12 “U” Advanced Functions or equivalent. Grade 12 “U” Calculus & Vectors is strongly recommended.

Degree Requirements

Total Courses: 16

University graduates with a three-year General, four-year Major or four-year Honours degree (from a discipline other than Computer Science) may apply to the BCS (General) degree for University Graduates.

*12-month Full time Degree Program (with Summer Entry)**

(a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340 or COMP-3670, plus one additional Computer Science course (excluding COMP-XXX7).

(b) MATH-1250 (or MATH-1260 or MATH-1270), MATH-1720 (or MATH-1760), and STAT-2910.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650 (or ELEC-2170), COMP-2660 (or ELEC-3270), COMP-3150, COMP-3220, COMP-3300, COMP-3340 and/or COMP-3670.

* Completion in 12 months is possible ONLY for those starting in Intersession/Summer semester. Those starting in Fall or Winter semesters, it may take longer to finish and such students may not be able to have a full course load in every semester. Also, students who get transfer credits should not expect to have a full course load every semester.

Recommended Program Sequence (for 12 month completion with summer entry)

This is a 16-course program. The normal course load is 5 courses per semester but to complete the program in 12 months, an extra course has to be taken in the last semester as per sequence given below:

Intersession/Summer

Intersession (6 week offering starting May): COMP-1400

Summer (6 week offering starting July): COMP-1410

12-week term (starting May): COMP-1000, COMP-2650 and STAT-2910

Fall

COMP-2120, COMP-2540, COMP-2560, COMP-2660, and MATH-1250 (or MATH-1260) or MATH-1720 (or MATH-1760).

Winter

COMP-3150, COMP-3220, COMP-3300, COMP-3340 or COMP-3670, Computer Science elective, and the remaining Math course.

Bachelor of Computer Science (Honours) for University Graduates

Admission Requirements

1. A three-year General, 4-year Major or a 4-year Honours Bachelor's degree from an accredited University in a discipline other than Computer Science and has exposure to math, statistics, computers, or science (e.g., Engineering, Science, Math, Business, Economics, etc.).
2. Ontario Grade 12 "U" Advanced Functions (MHF4U) or equivalent with a minimum of 70% average. Calculus and Vectors (MCV4U) or equivalent is strongly recommended.

This program is also suggested to those considering future application to the MSc Computer Science program.

Degree Requirements

Total courses: 27

- (a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650 (or ELEC-2170), COMP-2660 (or ELEC-3270), COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4400, COMP-4540, COMP-4960 or COMP-4990 (both are 6.0 credit hour courses), and one additional Computer Science COMP-3xx0/4xx0 course.
- (b) MATH-1020, MATH-1250 (or MATH-1260 or MATH-1270), MATH-1720 (or MATH-1760), MATH-1730, MATH-3940 (or MATH 3800), and STAT-2910 (or STAT-2920).

Courses used to calculate the major average are: COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650 (or ELEC-2170), COMP-2660 (or ELEC-3270), COMP-3110, COMP-3150, COMP-3220, COMP-3300, COMP-3540, COMP-3670, COMP-4400, COMP-4540, and COMP-4960 or COMP-4990.

Note: Potential credit transfer on an ad-hoc basis, while considering minimum residency and core course requirements.

Possible Program Sequence (with recommended Intercession/Summer entry)*

*This program is intended for those who would like to further continue their studies towards a graduate degree (e.g., master and/or PhD) in Computer Science. Those starting in Fall or Winter semesters getting transfer credits may not be able to have a full course load in every semester and may not be able to finish in five semesters.

Completion in 5 semesters may be possible only if the student decides to take two courses as overload courses in two different semesters. A course overload always needs approval from the School of Computer Science and Faculty of Science depending on student's performance.

Summer/Intercession (Semester 1)

Intercession (6 week offering starting May): COMP-1400

Summer (6 week offering starting July): COMP-1410

12-week term (starting May): COMP-1000, COMP-2650 and MATH-1020 and MATH-1250 (or MATH-1260) (as an overload but in any given period, students will be actually taking only 5 courses)

Fall (Semester 2)

12-week term: COMP-2120, COMP-2310, COMP-2540, COMP-2560 and COMP-2660

Winter (Semester 3)

12-week: COMP-2140, COMP-3150, one COMP-3xx0/4xx0 (as an overload), COMP-4990A (or COMP-4960A), and MATH-1720 (or MATH-1760).

Summer/Intercession (Semester 4)

12-week: COMP-3220, COMP-3300, COMP-3670, STAT-2910 (or STAT-2920) and MATH-1730.

Fall (Semester 5)

12-week: COMP-3110, COMP-3540, COMP-4400, COMP-4540, COMP-4990B (or COMP-4960B) and MATH-3800 (or MATH-3940).

Bachelor of Computer Science (Honours Applied Computing) for University Graduates

Admission Requirements

- (i) A three-year General or a four-year Honours Bachelor's degree from an accredited University (in a discipline other than Computer Science).
- (ii) Ontario Grade 12 "U" Advanced Functions or equivalent. Grade 12 "U" Calculus & Vectors is strongly recommended.

Degree Requirements

Total courses: 25

(a) COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650 (or ELEC-2170), COMP-2660 (or ELEC-3270), COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-3670, COMP-4150, COMP-4200, COMP-4220, COMP-4250, COMP-4990 (6 credit course), and two other Computer Science major courses (excluding COMP-XXX7).

(b) MATH-1250 (or MATH-1260, or MATH-1270), MATH-1720 (or MATH-1760), and STAT-2910.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650 (or ELEC-2170), COMP-2660 (or ELEC-3270), COMP-3150, COMP-3400, COMP-3220, COMP-3300, COMP-3340, COMP-3670, COMP-4150, COMP-4200, COMP-4220, COMP-4250, COMP-4990 (6 credit, two-semester course).

Possible Program Sequence (with recommended Summer entry)*

* Those starting in Fall or Winter semesters may not be able to have a full course load in every semester. Also, students who get transfer credits should not expect to have a full course load every semester.

Intersession/Summer (Semester 1)

Intersession (6 week offering starting May): COMP-1400

Summer (6 week offering starting July): COMP-1410

12-week term (starting May): COMP-1000, COMP-2650 and STAT-2910

Fall (Semester 2)

COMP-2120, COMP-2540, COMP-2560, COMP-2660, and MATH-1250 (or MATH-1260), or MATH-1720 (or MATH-1760).

Winter (Semester 3)

COMP-3150, COMP-3400, COMP-4200, COMP-4990 (Part 1), and Computer Science elective.

Summer (Semester 4)

COMP-3220, COMP-3300, COMP-3340, COMP-3670, and the remaining Math course.

Fall (Semester 5)

COMP-4150, COMP-4220, COMP-4250, Computer Science elective, and COMP-4990 (Part 2).

Bachelor of Computer Science (General) for Graduates of Qualifying Ontario and Other College Diploma Holders

Admission Requirements

Most Ontario three-year diploma graduates in a computer related program are eligible for admission under these degree pathway agreements including: St. Clair, Algonquin, Cambrian, Centennial, Conestoga, Durham, Fanshawe, George Brown, Georgian, Humber, Mohawk, Niagara, Northern, St. Lawrence, Seneca, Sheridan, and Sir Sandford Fleming. Other colleges with similar programs may also be eligible and should inquire through the Office of Enrolment Management – Recruitment or at ask.uwindsor.ca.

1. Graduates of three-year Computer Science related Diploma program from a qualifying Ontario or other college of applied Arts and Technology (CAAT) with a grade-point average of at least 3.0 out of 4.0 (or cumulative average of at least a B (73%) grade), are eligible, within 10 years of graduation, for admission to Bachelor of Computer Science (General) degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement.
2. Graduates of CAAT program, specified above, applying to the University of Windsor for the Bachelor of Computer Science (General) Degree Program more than 10 years after completing the Diploma Program, with a grade point average of at least 3.0 out of 4.0 (or a cumulative average of at least a B (73%)), will require the approval of the Director of the School of Computer Science.
3. In addition to the appropriate three-year Diploma and grade point average, applicants to the Bachelor of Computer Science (General) Degree Pathway Program are required to have successfully completed Grade 12U Advanced Functions. The successful completion of Grade 12U Calculus and Vectors is strongly recommended.
4. Students admitted to the Bachelor of Computer Science (General) Degree Pathway Program will obtain the equivalent of 1.5 years of Advanced Standing (or awarded 15 course transfers). Additional credit for courses taken toward the CAAT Diploma will not be permitted.
5. Students are required to complete fifteen (15) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Computer Science (General) Degree Pathway Program.

Degree Requirements

Total courses: 15

(a) COMP-1000, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340.*

(b) MATH-1250 (or MATH-1260) , MATH-1720 (or MATH-1760), and STAT-2910;

(c) one course from Arts/Languages;

No more than 7 courses can be at the 1000 level.

*Excluding courses COMP-1047, COMP-1400, COMP-2057, COMP-2707, COMP-2750, COMP-3057, COMP-3670.

The major average will be calculated on the basis of the grades obtained in COMP-1000, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340.

Possible Course Sequence

Semester 1: COMP-1000, COMP-1410, COMP-2650, MATH-1250, one course from Arts/Languages.

Semester 2: COMP-2120, COMP-2540, COMP-2560, COMP-2660, MATH-1720 (or MATH-1760)

Semester 3: COMP-3220, COMP-3150, COMP-3300, COMP-3340, STAT-2910.

Bachelor of Computer Science (Honours Applied Computing) (with and without Co-op) for Qualifying Ontario and Other College Diploma Holders

Admission Requirements

Most Ontario 3 year diploma graduates in a computer related program are eligible for admission under these degree pathway agreements including: St. Clair, Algonquin, Cambrian, Centennial, Conestoga, Durham, Fanshawe, George Brown, Georgian, Humber, Mohawk, Niagara, Northern, St. Lawrence, Seneca, Sheridan, and Sir Sandford Fleming. Other colleges with similar programs may also be eligible and should inquire through the Office of Enrolment Management – Recruitment or at ask.uwindsor.ca.

1. Graduates of three-year Computer Science related Diploma program from a qualifying Ontario or other college of applied Arts and Technology (CAAT) with a grade-point average of at least 3.0 out of 4.0 (or a cumulative average of at least a B (73%) grade), are eligible, within 10 years of graduation, for admission to Bachelor of Computer Science (Honours Applied Computing) degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement. Degree Pathway Program for BCS (Honours Applied Computing) for both Co-op and Non Co-op options) for Qualifying Ontario and Other College Diploma Holders.
2. Graduates of CAAT program, specified above, applying to the University of Windsor for the Bachelor of Computer Science (Honours Applied Computing) Degree Program more than 10 years after completing the Diploma Program, with a grade point average of at least 3.0 out of 4.0 (or a cumulative average of at least a B (73%)), will require the approval of the Director of the School of Computer Science.
3. In addition to the appropriate three-year Diploma and grade point average, applicants to the Bachelor of Computer Science (Honours Applied Computing) Degree Pathway Program are required to have successfully completed Grade 12U Advanced Functions. The successful completion of Grade 12U Calculus and Vectors is strongly recommended.
4. Students admitted to the Bachelor of Computer Science (Honours Applied Computing) Degree Pathway Program will obtain the equivalent of 1.5 years of Advanced Standing (or awarded 15 course transfers). Additional credit for courses taken toward the CAAT Diploma will not be permitted.
5. Students are required to complete twenty five (25) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Computer Science (Honours Applied Computing) Degree Pathway Program.
6. The Bachelor of Computer Science (Honours Applied Computing) Degree Pathway Program will be reviewed and amended, if appropriate, by the School of Computer Science every three years following the approval of the program.

Degree Requirements

This program is available with or without Co-op. See Program and Co-operative Education Regulations above.

Total courses: 25 courses

(a) COMP-1000, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-4150, COMP-4200, COMP-4220, COMP-4250 and COMP-4990 (6 credit course).*

(a) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), and STAT-2910

(b) One course from Arts/Languages

(c) Three other courses from any area of study, including Computer Science*

No more than 7 courses can be at the 1000 level.

*Excluding courses COMP-XXX7.

The major average will be calculated on the basis of grades obtained in COMP-1000, COMP-1410, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-2660, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-4150, COMP-4200, COMP-4220, COMP-4250, and COMP-4990.

Possible Course Sequence

Semester 1: COMP-1000, COMP-1410, COMP-2650, MATH-1250, one course from Arts/Languages.

Semester 2: COMP-2120, COMP-2540, COMP-2560, COMP-2660, MATH-1720 (or MATH-1760).

Semester 3: COMP-3150, COMP-3220, COMP-3300, COMP-3340, STAT-2910.

Semester 4: COMP-3400, COMP-4150, COMP-4200, COMP-4220, COMP-4990 (part 1).

Semester 5: Three electives from any area, COMP-4250, COMP-4990 (part 2).

For Co-op stream, in addition:

The successful completion of at least three Co-op work terms.

Bachelor of Computer Science (General) for Qualifying Ontario CAAT (or equivalent) Students with 2 Years of Study at CAAT (or equivalent) Diploma Program

Admission Requirements

Students who have successfully completed two years of a qualifying Ontario College of Applied Arts and Technology diploma program (or equivalent) with a cumulative average of 70% (B-) or higher may receive up to 8 courses of transfer credit toward a Bachelor of Computer Science (General) degree, provided they are within 10 years of the completion of the CAAT (or equivalent) courses, have successfully completed Grade 12U Advanced Functions, and have completed a full 2 years of study at a CAAT (or equivalent) including all recommended sequence of 20 courses as confirmed through audit or CAAT (or equivalent) diploma. Students who completed their courses more than 10 years ago may be admitted through this articulation agreement, following consultation and approval by the Director of the School of Computer Science. Students who have not successfully completed Grade 12U Advanced Functions will be required to take MATH-1280 (Access to Algebra) or its equivalent. The 8 University of Windsor courses students may receive transfer credits for consist of: COMP-3670 (Computer Networks), one other Computer Science course used to calculate the major average, COMP-1047 (Computer Concepts for End-Users), COMP-3057 (Cyber-Ethics), 4 Science courses. Contact the department for the course equivalency table used to determine transfer credit.

Degree Requirements

Total courses: 22 or more to be completed (subject to the number of transfer credits awarded)

(a) 13 Computer Science courses – courses to be determined based on the transfer credit awarded

(b) 9 additional courses – courses to be determined based on the transfer credit awarded

Bachelor of Computer Science (Honours Applied Computing) (Co-op) for Qualifying Ontario CAAT (or equivalent) Students with 2 Years of Study at CAAT (or equivalent) Diploma Program

Admission Requirements

Students who have successfully completed two years of a qualifying Ontario College of Applied Arts and Technology diploma program (or equivalent) with a cumulative average of 70% (B-) or higher may receive up to 8 courses of transfer credit toward a Bachelor of Computer Science (Honours Applied Computing) (with or without Co-op) degree, provided they are within 10 years of the completion of the CAAT (or equivalent) courses, have successfully completed Grade 12U Advanced Functions, and have completed a full 2 years of study at a CAAT (or equivalent) including all recommended sequence of 20 courses as confirmed through audit or college diploma. Students who completed their courses more than 10 years ago may be admitted through this articulation agreement, following consultation and approval by the Director of the School of Computer Science. Students who have not successfully completed Grade 12U Advanced Functions will be required to take MATH-1280 (Access to Algebra) or its equivalent. The 8 University of Windsor courses students may receive transfer credits for consist of: COMP-3670 (Computer Networks), one other Computer Science course used to calculate the major average, COMP-1047 (Computer Concepts for End-Users), COMP-3057 (Cyber-Ethics), 4 Science courses. Contact the department for the course equivalency table used to determine transfer credit.

Degree Requirements

Total courses: 32 to be completed (subject to the number of transfer credits awarded)

- (a) 20 Computer Science courses – courses to be determined based on the transfer credit awarded
- (b) 12 additional courses – courses to be determined based on the transfer credit awarded

Honours Bachelor of Information Technology (BIT)

This program is available with or without Co-op. See Program and Co-operative Education Regulations above.

Degree requirements:

Total courses: 40

- (a) COMP-1000, COMP-1047, COMP-2057, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-2707, COMP-3037, COMP-3057, COMP-3067, COMP-3077, COMP-3250, COMP-4990 (6 credit course).
- (b) 2 additional Computer Science courses at the 2xxx – 4xxx level
- (c) ECON-1100 and STA 2910
- (d) 3 courses from Arts/Languages and Social Sciences (at least 1 from each area)
- (e) MKTG-1310, MSCI- 1000, STEN-1000, MGMT-2400
- (f) 14 other courses from any area of study

Taking ACCT 1510, ACCT 2550, FINA 2700 will meet requirements for minor in Business.

Students in the Co-op stream will also be required to complete COMP-2980, COMP-3980, COMP-4970, COMP-4980 which correspond to the required work term placements.

Courses used to calculate the major average are: COMP-1000, COMP-1047, COMP-2057, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-2707, COMP-3037, COMP-3057, COMP-3067, COMP-3077, COMP-3250, COMP-4990.

Recommended Course Sequence

1st year: ten courses, including COMP-1000, COMP1047, COMP-2057, COMP-2067, COMP-2087, ECON-1100, MSCI-1000, STEN-1000

2nd year: ten courses, including COMP-2097, COMP-2547, COMP-2707, STAT-2910, MGMT-2400, MKTG-1310

3rd year: ten courses, including COMP-3037, COMP-3057, COM-3067, COMP 3077, COMP-3250

4th year: ten courses, including COMP-4990 (a 6.0 credit hour course)

Honours Bachelor of Information Technology (BIT) Degree Completion Pathway for Students from Web Development and Internet Applications)

Admission requirements:

Graduates of a two-year Ontario College Diploma from Web Development and Internet Applications from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of a least a B (3.0) are eligible for admission to Bachelor of Information Technology degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

In addition to the appropriate two-year Diploma and grade point average, applicants to the Bachelor of Information Technology are required to have successfully completed 1 of MDM4U, MHF4U, or MCV4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the UWindsor Prep Program.

Students are required to complete twenty (20) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Information Technology.

Degree requirements:

Total Courses: 20

(a) COMP-1000, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-3037, COMP-3250, COMP-4990 (6 credit course).

(b) 2 additional CS courses at the 2xxx – 4xxx level*

(c) ECON-1100 and STAT-2910

(d) MKTG-1310, MSCI-1000, STEN-1000, MGMT-2400

(e) 3 courses from any area of study*.

*The following courses cannot be used to fulfill the degree completion pathway requirements: COMP-1047, COMP-2057, COMP-2707, COMP-3057, COMP-3067 and COMP-3077. The topics in these courses are expected to be covered in courses taken for the CAAT programs.

Courses in categories (a) and (b) are used to calculate the major average.

Suggested Program Sequence (with recommended Fall entry)

Fall (Semester 1): 5 courses, including, COMP-1000, COMP-2067, ECON-1100, STAT-2910

Winter (Semester 2): 5 courses, including COMP-2087, COMP-2097, MKTG-1310, STEN-1000

Fall (Semester 3): 5 courses including COMP-2547, COMP-3037, COMP-4990 (A), MSCI-1000,

Winter (Semester 4): 5 courses including, COMP-3250, COMP-4990 (B), MGMT-2400

Honours Bachelor of Information Technology (BIT) Degree Completion Pathway (for Students from Computer Information Systems Technicians)

Admission requirements:

Graduates of a two-year Ontario College Diploma from Computer Systems Technician from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of a least a B (3.0) are eligible for admission to Bachelor of Information Technology degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

In addition to the appropriate two-year Diploma and grade point average, applicants to the Bachelor of Information Technology are required to have successfully completed 1 of MDM4U, MHF4U, or MCV4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the UWindsor Prep Program.

Students are required to complete twenty (20) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Information Technology.

Degree Requirements:

Total Courses: 20

(a) COMP-1000, COMP-2057, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-2707, COMP-3077,

COMP-3250, COMP-4990 (6 credit course).

(b) 2 additional Computer Science courses at the 2xxx – 4xxx level**

(c) ECON-1100 and STAT-2910

(d) MKTG-1310, MSCI-1000, STEN-1000, MGMT-2400

(e) 1 course from any area of study**.

**The following courses cannot be used to fulfill the degree completion pathway requirements: COMP - 1047, COMP-3037, COMP-3057, and COMP-3067. The topics in these courses are expected to be covered in courses taken for the CAAT programs.

Courses in categories (a) and (b) are used to calculate the major average.

Suggested Program Sequence (with recommended Fall entry)

Fall (Semester 1): COMP-1000, COMP-2057, COMP-2067, ECON-1100, STAT-2910

Winter (Semester 2): 5 courses, including COMP-2087, COMP-2097, COMP-2707, MKTG-1310

Fall (Semester 3): 5 courses including COMP-2547, COMP-4990 (A), MSCI-1000, STEN-1000

Winter (Semester 4): 5 courses including COMP-3077, COMP-3250, COMP-4990 (B), MGMT-2400

Honours Bachelor of Information Technology (BIT) Degree Completion Pathway (for Students from Computer Systems Technology – Networking at St. Clair College)

Admission Requirements:

Graduates of a three-year Ontario College Advanced Diploma from Computer Systems Technology Networking and Mobile Applications Development from St. Clair College, with a cumulative average of at least a B (3.0) are eligible for admission to Bachelor of Information Technology degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

In addition to the appropriate three-year Advanced Diploma and grade point average, applicants to the Bachelor of Information Technology are required to have successfully completed 1 of MDM4U, MHF4U, or MCV4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the UWindsor Prep Program.

Students are required to complete fifteen (15) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Information Technology.

Degree Requirements:

Total Courses: 15

(a) COMP-1000, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-3077, COMP-3250, COMP-4990 (6 credit course).

(b) ECON-1100 and STAT-2910

(c) MKTG-1310, MSCI-1000, STEN-1000, MGMT-2400

Courses in category (a) are used to calculate the major average.

Suggested Program Sequence (with recommended Winter entry)

Winter (Semester 1): COMP-1000, COMP-2067, COMP-2097, ECON-1100, STAT-2910

Fall (Semester 2): COMP-2087, COMP-2547, COMP-4990 (A), MSCI-1000, STEN-1000

Winter (Semester 3): COMP-3077, COMP-3250, COMP-4990 (B), MGMT-2400, MKTG-1310

Honours Bachelor of Information Technology (BIT) Degree Completion Pathway (for Students from Mobile Application Development at St. Clair College)

Admission Requirements:

Graduates of a three-year Ontario College Advanced Diploma from Mobile Applications Development from St. Clair College, with a cumulative average of a least a B (3.0) are eligible for admission to Bachelor of Information Technology degree program offered by the School of Computer Science at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

In addition to the appropriate three-year Advanced Diploma and grade point average, applicants to the Bachelor of Information Technology are required to have successfully completed 1 of MDM4U, MHF4U, or MCV4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the UWindsor Prep Program.

Students are required to complete fifteen (15) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Information Technology.

Degree Requirements:

Total Courses: 15

- (a) COMP-1000, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-3037, COMP-3250, COMP-4990 (6 credit course).
- (b) ECON-1100 and STAT-2910
- (c) MKTG-1310, MSCI-1000, STEN-1000, MGMT-2400

Courses in category (a) are used to calculate the major average.

Program Sequence (with recommended Winter entry)

Winter (Semester 1): COMP-1000, COMP-2067, COMP-2097, ECON-1100, STAT-2910

Fall (Semester 2): COMP-2087, COMP-2547, COMP-3037, COMP-4990 (A), MSCI-1000

Winter (Semester 3): COMP-3250, COMP-4990 (B), MGMT-2400, MKTG-1310, STEN-1000

Honours Bachelor of Information Technology (BIT) Degree Completion Pathway (for Graduates from Chitkara University)

Admission Requirements:

Students enrolled in the four-year Degree in Bachelor of Information Technology from Chitkara University with a cumulative average of 70% or better may receive the equivalent of twenty semesters course credits towards the Honours Bachelor of Information Technology (BIT) at the University of Windsor.

Degree Requirements:

Total Courses: 20

- (a) COMP-1000, COMP-2067, COMP-2087, COMP-2097, COMP-2547, COMP-2707, COMP-3037, COMP-3057, COMP-3067, COMP-3077, COMP-3250, COMP-4990 (6 credit course).
- (b) 2 additional Computer Science courses at the 2xxx – 4xxx level**
- (c) STAT-2910, MGMT-2400
- (d) 3 courses from any area of study**.

Courses in categories (a) are used to calculate the major average

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Computer Science

Major Concentration: COMP-1000, COMP-2120, COMP-2540, COMP-2560, COMP-2650, COMP-3150, COMP-3220, COMP-3300, COMP-3340, COMP-3400, COMP-3670; one course at the 3XXX-level or above. (additional requirements: COMP-1400, COMP-1410, MATH-1720, MATH-1730.)

Minor Concentration: COMP-1000, COMP-2120, COMP-2540, COMP-2560; one Computer Science course at the 2XXX-level or above; and one Computer Science course at the 3XXX-level or above. (additional requirements: COMP-1400, COMP-1410, MATH-1720, MATH-1730.)

Certificate in Applied Information Technology

Admission Requirements

Minimum admission requirements for undergraduate degrees.

Total courses: 8

The Certificate in Applied Information Technology consists of the following courses in which students must maintain an average of 60% or better: COMP-1047, COMP-2057, COMP-2067 (or COMP-1400), COMP-2097, COMP-2707, COMP-3057, and two of COMP-2087, COMP-3037, and COMP-3077.

Minor in Applied Information Technology

The minor in Applied Information Technology consists of 6 courses in which the student must maintain an average of 60% or better: COMP-1047, COMP-2057, COMP-2067 or COMP-1400, COMP-3057, and two of COMP-2087, COMP-2097, COMP-2707, COMP-3037, COMP-3077.

Minor in Computer Science

The minor in Computer Science consists of the following courses in which students must maintain an average of 60% or better: COMP-1000, COMP-1400, COMP-1410, COMP-2120, and two of COMP-2540, COMP-2560, or COMP-2650.

COMPUTER SCIENCE COURSES

Not all courses listed below will necessarily be offered every academic year.

All courses listed below are three lecture hours per week or equivalent, unless otherwise stated. In addition, laboratory/tutorial time may be scheduled as required.

Note: Most Computer Science courses require substantial time out of class in writing, correcting, and testing computer programs. Students should be prepared to devote a minimum of three to five hours a week per course to assignment work alone.

COMP-1000. Key Concepts in Computer Science

The objectives of this course are to excite students' interest in computer science and to give students a precise understanding of a number of difficult concepts that are fundamental to modern computer science. Topics may include: induction and recursion; algebraic characterization; syntax; semantics; formal logic; soundness, completeness, and decidability; specification, algorithm, and determinism; complexity. (Restricted to students registered in programs offered wholly or jointly by Computer Science or by Mathematics and Statistics, or with approval of Computer Science.) (3 lecture hours and 1.5 laboratory hours a week).

COMP-1047. Computer Concepts for End-Users

Introduction to the concepts of operation of a computer system, including hardware and software. Development of conceptual understanding of word processors, databases, spreadsheets, etc., and practical experience with their use. Networking concepts and data communication concepts will be introduced. The Internet will be introduced with students having access to internet resources. Management information systems including the systems development lifecycle will be discussed. Fundamental concepts of algorithm development and programming will be introduced. Hands-on experience with microcomputers as well as a distributed-computing environment will be involved. In addition to lecture time, laboratory/tutorial time may be scheduled as required. (May not be used to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program.) (3 lecture hours).

COMP-1400. Introduction to Algorithms and Programming I

This course is the first of a two-course sequence designed to introduce students to algorithm design and programming in a high-level language such as C. The main objectives of the course are to develop the ability to identify, understand and design solutions to a wide variety of problems. Topics include: computer system overview, hardware and software, problem solving steps, concepts of variables, constants, data types, algorithmic structure, sequential logic, decisions, loops, modular programming, one-dimensional arrays, text files. If possible, problems like searching/sorting will be addressed. (3 lecture hours and 1.5 laboratory hours a week).

COMP-1410. Introduction to Algorithms and Programming II

This course is the continuation of COMP-1400 that introduces students to more advanced algorithm design and programming in a high level language such as C. The main objectives of the course are to develop the ability to identify, understand, and design solutions to a wide variety of problems. Topics covered include: multi-dimensional arrays, pointers, strings, advanced modular programming, records, binary files, recursion, stacks, linked lists and introduction to algorithm analysis. (Prerequisite: COMP-1000 (or MATH-1720) and COMP-1400.) (3 lecture and 1.5 laboratory hours a week).

COMP-2057. Introduction to the Internet

Students will be introduced to the Internet as a global information infrastructure, including fundamental concepts in protocols and services, packaging of data, and data transmission. Common tools and multimedia such as HTML, CSS, and CMS, used for the development of websites will also be introduced. Web page design, quality, accessibility and security issues will be discussed. How Web browsers and search engines work will be demonstrated. Social networks and other current Internet applications will be examined. In addition to lecture time, laboratory/ tutorial time may be scheduled as required. (Prerequisite: COMP-1047 or COMP-2067 or COMP-1400.) (May not be used to fulfill the major requirements of any major or joint major in Computer Science.) (3 lecture hours a week).

COMP-2067. Programming for Beginners

This course introduces fundamental computer programming principles and structured programming concepts, with an emphasis on good programming. Stages of the software development cycles are introduced: analysis, design, implementation, debugging and deployment. May not be used to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT program.) (3 lecture hours).

COMP-2077. Problem Solving and Information on the Internet

Students will be introduced to logic and critical appraisals including reasoning skills and critical thinking in the computer age. Problem solving and heuristics will be discussed including how to solve problems by coming up with the right strategies. Searching using Boolean logic to pinpoint useful and reliable information will be introduced. Methods for being self-critical and critical of web information in order to perform evaluations will be studied. (Prerequisites COMP-1047 and COMP-2057.) (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science.) (3 lecture hours a week).

COMP-2087. Programming for Beginners II

This course is the continuation of COMP-2067 that introduces students to more advanced algorithm design and programming using Python. The main objectives of the course are to develop the ability to identify, understand, and design solutions to a wide variety of problems. Topics covered include: lists, dictionaries and files, functions and modules, testing and exception handling and object oriented approach. (Prerequisite: COMP-2067) (May not be used to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT program.) (3 lecture hours a week).

COMP-2097. Social Media Marketing for End Users

This course provides review, analysis and use of social media and mobile technologies. Topics to be covered include: a comprehensive review of available social media and mobile technology, use of social media and mobile technology for sharing of knowledge and for group interaction, security and privacy, ethical principles in social media, methods for analyzing end-user requirements for a social media application, strategies for designing, implementing, and maintaining an ethically-sound social media campaign, and measurement and assessment of social media analytics using industry standard tools and techniques. (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science except for the Bachelor of Information Technology (BIT program.) (3 lecture hours).

COMP-2120. Object-Oriented Programming Using Java

Concepts of classes and objects, Java applications, frames, event handling, control structures, methods, arrays, string manipulations, object-based programming, object-oriented programming - inheritance, polymorphism, interface and abstract classes, anonymous classes, data structures in Java, exception handling, introduction to graphical user interface. (Prerequisite: COMP-1410 or COMP-2087.) (3 lecture hours and 1.5 laboratory hours a week)

COMP-2140. Computer Languages, Grammars, and Translators

Pragmatic and theoretical aspects of grammars, recognizers, and translators for computer languages will be discussed. The topics covered will include regular languages and context-free languages, including parsers and parser generators for such languages. Attribute grammars, syntax-directed translation, interpreters and compilers will also be discussed. (Prerequisite: COMP-1000 and COMP-2120.) (3 lecture hours and 1.5 laboratory hours a week)

COMP-2310. Theoretical Foundations of Computer Science

An introduction to Mathematical Logic, Set Theory, and Graph Theory. Topics include propositional logic, first order logic, proof techniques, mathematical induction, sets, operations on sets, relations, operations on relations, functions, countable and uncountable sets, graph-theoretic concepts, such as graph connectivity, graph isomorphism, trees, Euler graphs. (Restricted to students in Computer Science.) (Prerequisite: COMP-1000 and MATH-1020.) (3 lecture hours and 1.5 laboratory hours a week)

COMP-2540. Data Structures and Algorithms

An introduction to the programming and analysis of linear and non-linear internal (main store) data structures and associated algorithms. Topics include the formal notion of an algorithm, elementary time and space complexity; linear lists (such as stacks, queues, linked structures.); non-linear lists (trees, binary trees); recursion; sorting techniques (such as heap sort, quick sort, merge sort, shell sort.); searching techniques (such as binary search, binary search trees, red-black trees, hashing.); algorithm design paradigms (such as divide-and-conquer, dynamic programming, greedy algorithms); and applications. (Prerequisite: COMP-1000 and COMP-1410. Restricted to Computer Science students or permission of the School of Computer Science.) (3 lecture hours and 1.5 laboratory hours a week.)

COMP-2547 Applied Algorithms and Data Structures

This course provides an introduction to the programming and analysis of both linear and non-linear data structures and their associated algorithms. Topics include the formal notion of algorithms; basics of time and space complexity; linear data structures (such as stacks, queues, linked lists); non-linear data structures (such as trees, binary trees); recursion; sorting techniques (such as heap sort, quick sort, merge sort); searching techniques (such as binary search, binary search trees, hashing); algorithm design paradigms (such as divide-and-conquer, greedy algorithms); and applications. (Prerequisite: COMP-1000 and 2087, Prerequisite or Co-requisite: COMP-2087. Antirequisite: COMP-2540) (May not be used to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program. This course can not be taken as a substitute for COMP-2540)(3 lecture hours a week).

COMP-2560. Systems Programming

This course introduces students to advanced software development techniques in system programming using the C language in the UNIX environment. Topics include introduction to modern operating systems, system calls, managing processes, the use of fork and exec, signals, file processing, filters, pipes, scripting languages, introduction to concurrency (e.g. synchronization), network programming (e.g. using sockets), client-server problems. (Prerequisite: COMP-1410 or COMP-2087)(3 lecture hours and 1.5 laboratory hours a week)

COMP-2650. Computer Architecture I: Digital Design

This course covers fundamental concepts of digital design and CPU architecture. Topics covered include number systems, switching algebra, logic gates, circuit minimization combinational circuit, read-only memory, random-access memory, programmable logic, synchronous and asynchronous sequential circuits, latches, flip-flops, registers, counters, register transfer language. and CPU architecture overview. (Prerequisite: COMP-1400 or COMP-2087) (3 lecture hours and 1.5 laboratory hours a week).

COMP-2660. Computer Architecture II: Microprocessor Programming

This course uses microprocessor programming to explore the structure of a CPU and related components. Topics include data representation, central processing unit, arithmetic logic unit, control unit, assembly language concepts, memory segmentation, programming a typical microprocessor (e.g. Intel processors), instruction set architecture-addressing modes and formats, register set, runtime stack, floating point processor. (Prerequisite: COMP-2650). (3 lecture hours and 1.5 laboratory hours a week)

COMP-2707. Advanced Web Design, Construction, and Deployment

This course is intended to teach the student about advanced website creation and to give an understanding of some of the technology behind websites, as well as an understanding of emerging web-related technologies. Topics covered will include JavaScript, Style Sheets, Dynamic HTML, XML, XHTML, Web Browser compatibility issues, and how web servers work. (Prerequisite: COMP-2057.) (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program.) (3 lecture hours a week).

COMP-2750. Selected Topics

Topics may differ from year to year. (Prerequisite: COMP-1000 or MATH-1720, and COMP-1410 (or COMP-2087)) (May be repeated for credit if content changes.) (3 lecture hours or equivalent.)

COMP-2800. Software Development

This is a software development course to advance students' programming skills and to introduce basic software engineering concepts and techniques through practice. Topics for advancing programming skills to be covered include event-driven programming and advanced GUI design, concurrent programming techniques, reflection and inter-process communication. Basic software engineering topics include requirements analysis and design, medium sized project management, and automated software engineering tool development. (Prerequisite: COMP-2120.) (3 lecture hours and 1.5 laboratory hours a week.)

COMP-2980. Co-op Work Term I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

COMP-3037 Information Security for IT

The course focuses on practical topics in information security that are encountered on a regular basis in the information technology ecosystem. The course discusses practical security problems and guidelines to help the user of information technology to make sound security decisions. Topics covered in this course include security policies, access controls, e-mail security, database security, WWW security, social network security, computer virus, and wireless network security. (Prerequisite: COMP-2057 or COMP-2067) (3 lecture hours). (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program.) (3 lecture hours).

COMP-3057. Cyber-Ethics

A number of key concerns about social welfare in our cyber age will be explored. Law, morality, public policy, and how these both influence and are influenced by the Internet will be examined. This course will critically appraise issues surrounding, but not limited to, free speech, property rights (especially intellectual property), privacy, security, and artificial intelligence. Issues raised by ethical theorists, policy makers, legal experts, and computer scientists will be analyzed in this course. (Prerequisites: COMP-2057 or COMP 2540) (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program.) (3 lecture hours a week)

COMP-3067 Applied Databases

This course will acquaint students with the basic concepts and application of relational database systems. The topic covered will include 3-level architecture, relational bases, Structured Query Language (SQL) and query formulation, and normalization concepts. Prerequisite: COMP-2547, Antirequisite: COMP-3150) (May not be used to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program. This course can not be taken as a substitute for COMP-3150) (3 lecture hours a week).

COMP-3077. Web-Based Data Management

This course is intended to teach students how to design and build interactive data-driven Web sites, by extending their knowledge of relevant programming concepts and techniques introduced in COMP-2707, and introducing new tools and techniques. Students will learn advanced use of PHP and MySQL to build objects and “glue” them together using protocols such as JSON, code libraries such as AJAX and jQuery, and learn how to incorporate API’s from Web service providers such as Google Maps. (Prerequisite: COMP-2707). (This course may not be taken to fulfill the major requirements of any major or joint major in Computer Science, except for the Bachelor of Information Technology (BIT) program.) (3 lecture hours a week.)

COMP-3110. Introduction to Software Engineering

This course introduces the fundamental concepts, common principles, and general techniques of software engineering. It discusses the main issues involved in the development life-cycle of nontrivial software systems, including process models, feasibility studies, requirements elicitation and definition, rapid prototyping, design methodologies, verification and validation, and software evolution. Students taking this course are required to work on projects, which are designed to go through the major phases of large-scale software system development. (Prerequisite: COMP-2120 and one of COMP-2540 or COMP-2547)(3 lecture hours a week)

COMP-3150. Database Management Systems

This course will acquaint students with the Basic concepts of Database Systems. The topics covered will include 3-level architecture, introduction to file structures: B-trees, B+ Trees and Hashed files, relational model, relational algebra and calculus, SQL, and database design with Normalization Theory. (Prerequisite: COMP-2540 and COMP-2560 or COMP-2650.) (3 lecture hours a week)

COMP-3220. Object-Oriented Software Analysis and Design

This course builds on the knowledge of object-oriented programming, data structures, systems programming. Students are introduced to object-oriented software analysis and design concepts (such as cohesion and coupling), and design practices currently used in industry , (such as design patterns and refactoring). These concepts and practices will be discussed through case studies and programming exercises. (Prerequisite: COMP-2120 and COMP-2540)(3 lecture hours a week)

COMP-3250 Data Analytics I

This course covers techniques for quantitative and qualitative data analysis and visualization of big data. It focuses on statistics for model building and evaluation. Topics include experimental research, correlation analysis, regression, and group comparisons. Students will learn how to utilize real datasets with graphs and numerical measures and work with unstructured data like texts and images. (Prerequisite: COMP-2547 (or COMP-2540) and STAT-2910) (3 lecture hours)

COMP-3300. Operating Systems Fundamentals

Operating system services, introduction to primary components of multi-programming operating systems, CPU scheduling, concurrent processes, process synchronization and interprocess

communication, deadlocks, memory management, file systems, virtual memory, disk scheduling. (Prerequisite: COMP-2120, COMP-2540, COMP-2560, and COMP-2650 or COMP-2660.)(3 lecture hours a week)

COMP-3340. World Wide Web Information Systems Development

This course is designed for people who want to make their data available to others over the Internet. Topics will include WWW authoring, WWW site planning, executable programs that create dynamic documents, the client-server model, multi-tier WWW software architecture, and security aspects. (Prerequisite: COMP-2120 and COMP-2540.) (3 lecture hours a week)

COMP-3400. Advanced Object Oriented System Design Using C++

The main objective of this course is to explore advanced topics of the object oriented paradigm through the use of the C++ programming language. Topics covered include: advanced object oriented design, the use of abstraction to manage complexity, objects and classes, inheritance and class hierarchies, multiple inheritance, operator and method overloading, namespaces and visibility, templates, dynamic binding and virtual functions, exception handling, multi-threading and C++ standard library. In addition, the course will include a practical project, solving a real-life problem, implemented in C++, involving the client/server methodology, and an interface to a database using a graphics toolkit. (Prerequisites: COMP-2120, COMP-2560.) (3 lecture hours a week)

COMP-3500. Introduction to Multimedia Systems

This course provides the student with basic concepts and techniques used in multimedia systems. Topics include: components of multimedia systems (text, audio, and video), media formats and standards, data compression techniques, hypermedia techniques, and authoring tools. (Prerequisite: COMP-2540 and COMP-2650.) (3 lecture hours a week)

COMP-3520. Introduction to Computer Graphics

An introduction to computer graphics hardware and software, interfaces, standards, programming libraries, fundamental algorithms, rendering techniques, and algorithms for 2D and 3D applications. Substantial programming work is vital to this course. (Prerequisite: COMP-2540 and MATH-1250.) (3 lecture hours a week)

COMP-3540. Theory of Computation

Finite Automata, regular expressions and languages; properties of regular languages; context-free grammars and languages; pushdown automata; properties of context-free languages. Introduction to Turing machines; recursive functions; undecidability. (Prerequisites: COMP-2140, COMP-2310 and COMP-2540.) (3 lecture hours a week)

COMP-3670. Computer Networks

This course is an introduction to computer networks and their protocols. Topics include: network architectures, transport, routing, and data link protocols, addressing, local area networks, flow and congestion control, and network security. Examples will be drawn primarily from the Internet (e.g. TCP, UDP, IP) protocol suite. (Prerequisite: COMP-2120, COMP-2540 or COMP-2547, COMP-2560 and COMP-2650. Recommended corequisite: COMP-3300.)

COMP-3680. Network Practicum

This course will acquaint the students with practical details of network software and hardware. Topics will include design, setup, configuration and implementation of various network functions. (Prerequisite: COMP-3300 and COMP-3670.) (3 lecture hours and 1.5 lab hours a week.)

COMP-3710. Artificial Intelligence Concepts

This course covers fundamental concepts in Artificial Intelligence. Topics include informed and uninformed search, problem solving using propositional and first-order logics, knowledge representation and reasoning, plausible and uncertain reasoning, machine learning, ethical implications. An overview of some applied Artificial Intelligence such as natural language processing, planning and agent systems will be included. (Prerequisites: COMP-2540 and (STAT-2910 or STAT-2920) (3 lecture hours a week)

COMP-3750. Selected Topics

Topics may differ from year to year. (Prerequisite: COMP-2120, COMP-2540, and COMP-2560. Additional courses may be required depending upon the subject.) (May be repeated for credit if content changes.) (3 lecture hours or equivalent a week)

COMP-3760. Selected Topics

Topics may differ from year to year. (Prerequisite: COMP-2120, COMP-2540, and COMP-2560. Additional courses may be required depending upon the subject.) (May be repeated for credit if content changes.) (3 lecture hours or equivalent a week)

COMP-3770. Game Design, Development and Tools

This course introduces professional game design and development tools. Students will become proficient in the use of a commercial grade game engine (e.g., Unity3D) and associated scripting/programming languages (e.g., C#) through programming intensive hands-on assignments. Topics may include game design and development concepts such as game objects and game components, game physics and collision handling, basic artificial intelligence, 2D and 3D graphics, textures and shaders, sprite animation, 3D animation, and audio. (Prerequisites: COMP-2120 and COMP-2540.) (3 lecture hours a week)

COMP-3980. Co-op Work Term II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

COMP-4110. Software Verification and Testing

This course covers fundamental concepts and techniques for software verification and testing. The students will learn through practice the testing process, automated software testing tools, and various test models together with the related test coverage criteria. (Prerequisites: COMP-3110 and COMP-3300.) (3 lecture hours a week)

COMP-4150. Advanced and Practical Database Systems

This course covers both advanced theoretical database materials as well as specific database application development tools needed in the industry. The course completes database design and theory initiated in COMP-3150 and then adds database application development languages. Students will be exposed to the running environments (e.g., their compilers) and applying these on the database theory and design of the first part to develop full application. (Prerequisites: COMP-3150 and COMP-3300.) (3 lecture hours a week)

COMP-4200. Mobile Application Development

Students taking this course will learn how to create a mobile application for the Android platform. The topics covered will include: use of the mobile application development environment, specification of the requirements for a mobile application, design and implementation of the end-user interface, managing data in a mobile application environment, interfacing with data and programs residing on remote servers, creation of object-oriented programs to implement the mobile application, use of libraries and third-party software resources, deployment of a mobile application so that it is available to the public, and documentation, including creation of end-user instructions, and design/program documentation. Students will work individually, and will develop a mobile application that has been approved by the instructor of the course. (Prerequisites: COMP-3150, COMP-3220.) (3 lecture hours a week.)

COMP-4220. Agile Software Development

This project-oriented course is designed to give students experience in developing projects using Agile software development process. The course will discuss principles of Agile methods for software development, with a concentration on the eXtreme Programming methodology, and will teach concepts related to its practices. Topics will include software and user interface design, build and development tools, data persistence, and proper software testing. Projects will involve the creation of industry-oriented software (e.g. in Java), and will expose participants to tools commonly used in industry. (Prerequisite: COMP-3220.) (3 lecture hours a week.)

COMP-4250. Big Data Analytics and Database Design

This course introduces topics in data mining and data analytics with emphasis on Big Data. Students will gain knowledge on the practical design principles as well as theoretical foundations of Big Data processing systems. Topics covered will include: data storage design and processing of big data systems such as NOSQL databases, MapReduce and Hadoop; introduction to data mining concepts such as frequent itemset and association rule mining, finding similar items, clustering, classification, link analysis, and mining data streams. (Prerequisite: COMP-3150 or COMP-3250.) (3 lecture hours a week.)

COMP-4400. Principles of Programming Languages

Basic concepts of programming languages. Comparative study of the major programming paradigms, including imperative, object-oriented, functional, logic, and concurrent programming. Principles of programming language design and evaluation. Syntax, semantics and implementation techniques of programming languages. (Prerequisite: COMP-2140, COMP-2310 and COMP-2540.) (Restricted to Computer Science students.) (3 lecture hours a week.)

COMP-4500. 3D Multimedia System Development

The aim of this course is to discuss and learn technologies for the development of multimedia application, modeling and development of standalone and/or, networked multimedia systems, and computer generated 3D animation. (Prerequisite: Year 3/4 standing in Computer Science or Communication, Media, and Film or Visual Art and consent of instructor.) (3 lecture hours a week.)

COMP-4540. Design and Analysis of Computer Algorithms

The intent of this course is to introduce the fundamental techniques in the design and analysis of computer algorithms. Topics include: asymptotic bounds, advanced data structures, searching, sorting, order statistics, oracle arguments, divide-and-conquer, greedy algorithms, dynamic programming, graph algorithms, NP completeness, and approximation algorithms. (Prerequisite: COMP-2310 and COMP-2540) (Restricted to students in any Honours Computer Science program or consent of instructor.) (3 lecture hours a week.)

COMP-4670. Network Security

This course will introduce students to advanced topics in network security. Topics will include encryption and authentication techniques, detection and analysis of intrusions, and the security of electronic mail and web access. (Restricted to Computer Science students) (Prerequisites: COMP-3670.) (3 lecture hours a week.)

COMP-4680. Advanced Networking

The course will introduce students to advanced topics in networking. (Restricted to Computer Science Students) (Prerequisites: COMP-3670 and COMP-3680.)

COMP-4700. Project Using Selected Tools

Students will complete a project using an advanced computing tool, such as a database package, simulation software, speech-recognition hardware module, etc. Students are required to submit a report describing the project and demonstrating mastery of the tool. Tools and the project are chosen by the student with the approval of the instructor. (Restricted to Computer Science Students) (Prerequisite: COMP-3150, COMP-3220, and COMP-3300.) (3 lecture hours or equivalent a week)

COMP-4730. Advanced Topics in Artificial Intelligence I

The course will introduce students to advanced topics in Artificial Intelligence. (Restricted to Honours Computer Science students) (Prerequisite: COMP-3710.) (3 lecture hours a week)

COMP-4740. Advanced Topics in Artificial Intelligence II

The course will introduce students to advanced topics in Artificial Intelligence. (Restricted to Honours Computer Science students.) (Prerequisite: COMP-3710.) (3 lecture hours a week)

COMP-4750. Selected Topics

In many cases the topics will coincide with a graduate course offering in a given year, and students will be required to complete the lecture component of that graduate course. Topics may include: advanced database management, graphics, artificial intelligence, information retrieval, theory of computation, functional programming, knowledge base systems, and foundations of programming languages. (Restricted to Semester 7 and Semester 8 students in Computer Science with permission of the instructor.) (May be repeated for credit if content changes.) (3 lecture hours or equivalent a week)

COMP-4760. Selected Topics

In many cases the topics will coincide with a graduate course offering in a given year, and students will be required to complete the lecture component of that graduate course. Topics may include: advanced database management, graphics, artificial intelligence, information retrieval, theory of computation, functional programming, knowledge base systems, and foundations of programming languages. (Restricted to Semester 7 and Semester 8 students in Computer Science with permission of the instructor.) (May be repeated for credit if content changes.) (3 lecture hours or equivalent a week)

COMP-4770. Artificial Intelligence for Games

This course provides students with an opportunity to explore theoretical and practical aspects of Artificial Intelligence for computer games. Topics may include agents, sensory systems, steering behaviours, pathfinding, decision making, planning, goal-oriented behaviour, multi-agents (groups, crowds) and learning. (Prerequisite: COMP-3770.) (Restricted to students in any Honours Computer Science program.) (3 lecture hours a week.)

COMP-4800. Selected Topics in Software Engineering

This course intends to connect emerging technologies with the student's theoretical background in Computer Science related to Software Engineering concepts and techniques. Selected application

domains include protocol security, web systems and distributed object systems and the theories involved include graph theory, set theory, automata and compiler theory. (Prerequisite: COMP-3110, COMP-3220 and COMP-3300.) (Restricted to Computer Science Students). (3 lecture hours a week)

COMP-4960. Research Project

This course consists of two components: a) development of research skills, and b) development of technical writing and project presentation skills. This course requires students to complete a research project in some area of Computer Science under the supervision of a faculty member. The course will typically involve the development of some software or the design and/or implementation of some algorithm. Each student will be required to submit a project report and give one or more seminars on the research project. (a 6 credit course restricted to Semester 7 or Semester 8 students in BCS (Honours) or B.Sc. (Honours Computer Science with Software Engineering Specialization) with a major average of 72% or better.) (Anti-requisite COMP-4990.) (3 lecture hours or equivalent a week, for two terms.)

COMP-4970. Co-op Work Term III

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

COMP-4980. Co-op Work Term IV

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

COMP-4990. Project Management: Techniques and Tools

This course requires students to complete an application development project in some area of Computer Science under the supervision of a faculty member. The course will typically involve the development of some software or the design and/or implementation of some algorithm. Students will be required to submit project reports and give presentations on the technical components of the project. (a 6 credit course restricted to Semester 7 or Semester 8 students in Computer Science.) (Antirequisite: COMP-4960.) (3 lecture hours or equivalent a week, for two terms.)

ECONOMICS

PROGRAMS

General Bachelor of Arts in Economics

Degree Requirements

Total courses: thirty.

- (a) ECON-1100, ECON-1110, ECON-2120, ECON-2210, and ECON-2310; and six 2XXX, 3XXX or 4XXX level courses. (With the approval of a program advisor, equivalent statistics courses may be substituted for ECON-2120.)
- (b) STAT-2920, or STAT-2910;
- (c) eight courses from outside Social Sciences with at least two from Arts/Languages and two from Sciences;
- (d) four courses from any area of study including Economics;
- (e) six courses from any area of study excluding Economics.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequencing

Year 1*

Fall: ECON-1100, plus four courses

Winter: ECON-1110, plus four courses

Year 2

Fall: ECON-2210*, ECON-2310, STAT-2920 (or STAT-2910)*, two courses

Winter: ECON-2120, two economics courses, two other courses

Year 3

Fall: two economics courses, three other courses

Winter: two economics courses, three other courses

Notes: STAT-2920 is recommended. If STAT-2920 is chosen instead of STAT-2910, MATH-1730 is required and should be taken in Year 1. A student who had successfully completed ECON-1100 could take ECON-2210 in the Winter of Year 1, rather than in Winter of Year 2.

Honours Bachelor of Arts in Economics

Degree Requirements

Total courses: forty.

(a) ECON-1100, ECON-1110, ECON-2120 (or STAT-2950), ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3060, ECON-3130, ECON-4140, ECON-4230, ECON-4330, ECON-4070 and seven additional courses, at least five of which have to be at the 3XXX or 4XXX level.

(b) MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), and either STAT-2910 or STAT-2920 (if taking STAT-2920, the student must take MATH-1730 as a prerequisite for STAT-2920).

(c) seventeen courses from any area of study, of which a maximum of two may be from Economics.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequencing

Year 1*

Fall: ECON-1100, MATH-1720 (or MATH-1760), MATH-1250 (or MATH-1260), plus two courses

Winter: ECON-1110, MATH-1730* (or other course), plus three courses

Year 2

Fall: ECON-2210*, ECON-2310, STAT-2920 (or STAT-2910)*, plus two courses

Winter: ECON-2220, ECON-2320, ECON-2120 (or STAT-2950), plus two courses

Year 3

Fall: ECON-3060, two economics courses, two other courses

Winter: two economics courses, three other courses

Year 4

Fall: ECON-3130, ECON-4230, ECON-4330, one economics course, one other course

Winter: ECON-4140, ECON-4070, two economics courses, one other course

Notes: STAT-2920 is recommended. If STAT-2920 is chosen instead of STAT-2910, MATH-1730 is required and should be taken in Year 1. A student who had successfully completed ECON-1100 could take ECON-2210 in the Winter of Year 1, rather than in Winter of Year 2. Also, conditional on satisfying the prerequisites, a student could move ECON-3130 and ECON-4140 from the fourth year to the third year.

Honours Bachelor of Arts in Economics (Applied Economics and Policy Stream)

Admission Requirements

Pathway 1: Computer Science-related CAAT programs:

- 1) Graduates of a two-year Ontario College Diploma from a computer science-related program from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of at least a B (73%) grade, are eligible for admission to Honours Bachelor of Arts in Economics

- Applied Economics and Policy Stream degree program offered by the Department of Economics at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.

- 2) In addition to the appropriate two-year Diploma and grade point average, applicants to the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream are required to have successfully completed MHF4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the Foundations of Science Preparation Program.
- 3) Students admitted to the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream will obtain the equivalent of 2 years of Advanced Standing (or awarded up to 17 course transfers).
- 4) Students are required to complete twenty-three (23) courses at the University of Windsor in fulfillment of the requirements of the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream.

Recognized two-year computer programs include:

- Computer programming (MCU 50503)
- Computer Programmer (no program standards)
- Computer Engineering Technician (MCU 50509),
- Software Engineering Technician (MTU 50504)
- Any computer science-related program from a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Notes: Three-year diploma programs in computer science will be analyzed for additional potential credit transfer on an ad-hoc basis, while considering minimum residency and core course requirements.

We are exploring opportunities for pathways from other college programs (e.g., environmental technician, forestry technician, horticulture, and health-based programs) that have relevance to economic policy. Students from these programs would complete Pathway 1 while considering potential course equivalencies.

Pathway 2: Business CAAT program:

- 1) Graduates of a two-year Ontario College Diploma from a business-related program from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of at least a B (73%) grade, are eligible for admission to Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream degree program offered by the Department of Economics at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.
- 2) In addition to the appropriate two-year Diploma and grade point average, applicants to the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream are required to have successfully completed MHF4U or the equivalent course. Students who have not completed this course or its equivalents will be required to complete the equivalent course within the Foundations of Science Preparation Program.

- 3) Students admitted to the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream will obtain the equivalent of 2 years of Advanced Standing (or awarded up to 19 course transfers).
- 4) Students are required to complete twenty-one (21) courses at the University of Windsor in fulfillment of the requirements of the Honours Bachelor of Arts in Economics - Applied Economics and Policy Stream.

Recognized two-year Business programs include:

- Business (MCU code 50200)
- Any business-related program from a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Note: Three-year diplomas programs in business will be analyzed for additional potential credit transfer on an ad-hoc basis, while considering minimum residency and core course requirements.

Degree Requirements

Pathway 1: Computer Science-related CAAT Programs

Total courses: 23

- (a) ECON-1100, ECON-1110, ECON-2120 (or STAT-2950), ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3060, ECON-3130, ECON-4140, ECON-4230, ECON-4330, ECON-4070 and seven additional courses, at least five of which have to be at the 3XXX or 4XXX level.
- (b) MATH-1260 (or MATH-1250), MATH-1760 (or MATH-1720), and either STAT-2910 or STAT-2920 (if taking STAT-2920, the student must take MATH-1730 as a prerequisite for STAT-2920).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Pathway 2: Business CAAT Program

Total courses: 21*

- (a) ECON-2120 (or STAT-2950), ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3060, ECON-3130, ECON-4140, ECON-4230, ECON-4330, ECON-4070 and seven additional courses, at least five of which have to be at the 3XXX or 4XXX level.
- (b) MATH-1260 (or MATH-1250), MATH-1760 (or MATH-1720), and either STAT-2910 or STAT-2920 (if taking STAT-2920, the student must take MATH-1730 as a prerequisite for STAT-2920).

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Notes:

- *We anticipate 21 required courses for the first cohort of students but with advising and consultation with colleges we believe the required number of courses in the future will be 20. The Faculty of Science will be collaborating with colleges to provide course offerings that will reduce student degree requirements to 20 courses. Colleges will also help advise students on the appropriate electives to complete.

Recommended Course Sequencing

Pathway 1: Computer Science-related CAAT Programs

Year 1:

Summer: ECON-1100, ECON-1110

Fall: ECON-2210, ECON-2310, MATH-1250 (or MATH-1260), MATH 1720 (or MATH-1760), STAT-2910 (or STAT 2920)

Winter: ECON-2120 (or STAT-2950), ECON-2220, ECON-2320, ECON-3060, ECON-XXXX, ECON-XXXX*

*Can be taken as overload or within summer/intersession.

Year 2:

Fall: ECON-3130, ECON-4230, ECON-4330, ECON-3XXX/4XXX, ECON-3XXX/4XXXX

Winter: ECON-4070, ECON-4140, ECON-3XXX/4XXX, ECON-3XXX/4XXXX, ECON-3XXX/4XXXX

Pathway 2: Business CAAT Program

Year 1:

Fall: ECON-2210, ECON-2310, MATH-1250 (or MATH-1260), MATH 1720 (or MATH-1760), STAT-2910 (or STAT 2920)

Winter: ECON-2120 (or STAT-2950), ECON-2220, ECON-2320, ECON-3060, ECON-XXXX, ECON-XXXX*

*Can be taken as overload or within summer/intersession.

Year 2:

Fall: ECON-3130, ECON-4230, ECON-4330, ECON-3XXX/4XXX, ECON-3XXX/4XXXX

Winter: ECON-4070, ECON-4140, ECON-3XXX/4XXX, ECON-3XXX/4XXXX, ECON-3XXX/4XXXX

Honours Bachelor of Science in Economics

Degree Requirements

Total courses: forty.

(a) ECON-1100, ECON-1110, ECON-2120 (or STAT-2950), ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3060, ECON-3130, ECON-4140, ECON-4230, ECON-4330, ECON-4060, ECON-4240, ECON-4340, and five Economics elective courses at the 3XXX or 4XXX level.

(b) COMP-1047, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-1020, STAT-2920, plus one additional course (2XXX-level or higher) from the Department of Mathematics and Statistics.

(c) An additional 13 courses, a maximum of which two may be Economics courses.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Recommended Course Sequencing

Year 1*

Fall: ECON-1100, MATH-1720 (or MATH-1760), MATH-1250 (or MATH-1260), COMP-1047 (or other course), plus one course

Winter: ECON-1110, MATH-1730, MATH-1020, COMP-1047 (or other course), plus one course

Year 2

Fall: ECON-2210*, ECON-2310, STAT-2920, plus two courses

Winter: ECON-2220, ECON-2320, ECON-2120 (or STAT-2950), plus two courses

Year 3

Fall: two economics courses, one MATH, STAT or ACSCs course, two other courses

Winter: ECON-3060, two economics courses, two other courses

Year 4

Fall: ECON-3130, ECON-4230, ECON-4330, ECON-4060, one other course

Winter: ECON-4140, ECON-4240, ECON-4340, one economics course, one other course

Notes: A student who had successfully completed ECON-1100 could take ECON-2210 in the Winter of Year 1, rather than in Winter of Year 2. Also, conditional on satisfying the prerequisites, a student could move ECON-3130 and ECON-4140 from the fourth year to the third year.

Combined Honours Bachelor of Arts in Economics Programs

Degree Requirements

Total courses: forty.

(a) Economics: ECON-1100, ECON-1110, ECON-2120 or (STAT-2950), ECON-2210, ECON-2220, ECON-2310, ECON-2320 and six additional in Economics, at least four of which have to be at the 3XXX or 4XXX level.

(b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) STAT-2910 (or STAT-2920)

(d) additional options to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

The critical requirement for the four-year Economics Honours is the inclusion of Economics ECON-1100 and ECON-1110 in the first year of the program. Similarly Economics ECON-2210, ECON-2220, ECON-2310, and ECON-2320 should be included in the second year of the program.

Students intending to specialize in Economics in a four-year Honours program should satisfy the Mathematics requirements as early as possible in the program.

Combined Honours Bachelor of Science in Economics Programs

Bachelor of Science honours programs combining Economics with a second Honours area of study will consist of:

Degree Requirements

Total courses: forty.

(a) Economics: ECON-1100, ECON-1110, ECON-2120 or STAT-2950*, ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3060, ECON-3130, ECON-4060, ECON-4140, ECON-4230, ECON-4240, ECON-4330 and ECON-4340.

(b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) MATH-1250 or MATH-1260, MATH-1760 or MATH-1720, MATH-1730, MATH-1020, STAT-2920 and one additional course* from the Department of Mathematics & Statistics (MATH, STAT or ACSC) at the 2XXX-level or higher.

(d) additional courses, if necessary, from any area of study to a total of forty courses.

* STAT-2950 is required if Mathematics and Statistics is the other subject. Also, STAT-2950 may be the 'additional course' in (c) above.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Honours Business Administration and Economics (with/without Thesis and with/without Specialization)

This is a joint offering between the Department of Economics and the Odette School of Business. See Odette School of Business for details.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Economics

Major Concentration: ECON-2120, ECON-2210, ECON-2220, ECON-2310, ECON-2320, ECON-3130, ECON-4140, ECON-4230, ECON-4330; three additional courses at the 3XXX-level or above. (If General Science Major ECON-4240 and ECON-4340 are required.) (additional requirements: ECON-1100, ECON-1110, STAT-2910.)

*(Note: If a student is considering graduate studies in Economics they should take MATH-1720 (BIAS core), MATH-1730 (BIAS core), STAT-2920 (replaces core STAT-2910) and STAT-2950 (replaces ECON-2120) and ECON-4240 and ECON-4340 (replaces two of the three additional 3000 level or above), and one additional Economic course at the 3000 level or above.

Minor Concentration: ECON-2120, ECON-2210, ECON-2220, ECON-2310, ECON-2320; one 3000-level or above course.

Other requirements: ECON-1100, ECON-1110, STAT-2910.

Certificate in Economic Analysis and Policy

Admission Requirements

Open only to students currently enrolled in a degree program and in good academic standing in their program.

Degree requirements

Total courses: 8

Required courses: (4 courses)

ECON-1100 Introduction to Economics I

ECON-2210 Intermediate Microeconomics

ECON-3100 Environmental and Resource Economics

ECON-4600 Cost Benefit Analysis

Take 4 Additional Courses:

ECON-2900. Health Economics

ECON-3850. Public Sector Economics: Expenditure

ECON-3730. International Economics: Trade Theory and Policy

ECON-4160. Urban and Regional Economics

ECON-4860. Public Sector Economics: Finance (prerequisite is 2220)

ECON-3310. The Economics of Legal Procedures, Crime and Punishment

ECON-4300. Economic Analysis of Law

ECON-3530. Labour Institutions

POLS-3540. Political Problems of Economic Development

POLS-3550. Political Economy of International Trade

POLS-2120. Environmental Policy and Politics

While this certificate program is designed for economics students, it is available to any student with an interest in economic analysis for public policy who has available electives. However, students in degree programs outside of economics will likely be required to take additional courses beyond what is included in their degree program.

Certificate in Quantitative Economics

Admission Requirements

Open only to students currently enrolled in a degree program and in good academic standing in their program.

Degree requirements

Total courses: 8

Required courses: (5 courses)

ECON-1100 Introduction to Economics I

ECON-2120 Intermediate Statistical Methods (or STAT-2950 Introduction to Statistics)

ECON-3060 Mathematical Economics I

ECON-3130 Introduction to Econometric Methods I

ECON-4600 Cost-Benefit Analysis/Excel application in Economics

Take 3 Additional Courses:

ECON-3850 Public Sector Economics: Expenditure

ECON-4860 Public Sector Economics: Finance

ECON-3730 International Economics: Trade Theory and Policy

ECON-3740 International Economics: Exchange Rates and Balance of Payments
ECON-4140 Introduction to Econometric Method II
MSCI-1000. Introduction to Business Data Analysis
MKTG-3370. Quantitative Analysis for Marketing Decisions
FINA-2700. Business Finance I
COMP-2067 Programming for Beginners
COMP-1400 Introduction to Algorithms and Programming I
COMP-1410 Introduction to Algorithms and Programming II
COMP-1400 is a prerequisite and thus should be taken before enrolling in COMP-1410

While this certificate program is designed for economics students, it is available to any student with an interest in quantitative economics who has available electives (particularly mathematics, computer science, and business students). However, students in degree programs outside of science will likely be required to take additional courses beyond what is included in their degree program.

Minor in Economics

A minor shall consist of ECON-1100, ECON-1110, ECON-2210, ECON-2310, and two additional Economics courses. A minimum average of 60% or better is required in all six courses.

ECONOMICS COURSES

All courses listed will not necessarily be offered each year. All courses are one-term courses and are offered three hours a week unless otherwise indicated.

ECON-1100. Introduction to Economics I

An introduction to microeconomics intended to provide students with the tools necessary to begin to understand and evaluate how resources are allocated in a market economy. Specific topics include how markets function, theories of the business firm, of consumer behaviour and of income distribution. The economic roles of labour unions and government are also covered. The theories are applied to contemporary Canadian economic problems.

ECON-1110. Introduction to Economics II

This course is an introduction to macroeconomics. The emphasis is upon measuring and explaining what determines economic aggregates such as the total national product (GDP) and the level of prices and employment. The role of money and financial institutions, the impact of international trade and the policy options available to governments for coping with inflation and unemployment are discussed in detail.

ECON-2000. Life Choices and Economics

The course is designed for Arts and Social Sciences students. It will introduce them to key concepts and methods in Microeconomics. The application and understanding of economic analysis as applied to individual decision-making and public policy will be emphasized. The course provides a non-technical and intuitive way for students to master an understanding of real world problems. (May not be taken for credit in any program within the School of Business, or Faculty of Engineering. Science students may take the course only as a Social Sciences option.) (Antirequisite: ECON-1100.)

ECON-2010. Life Choices and Economics II

The course is designed for Arts and Social Sciences students. It will introduce them to key concepts and methods in Macroeconomics. Key Macroeconomic concepts, such as unemployment, inflation, international trade, and investment will be examined. The course will be a non-technical look at the Canadian and world economies. (May not be taken for credit in any program within the School of Business, or Faculty of Engineering. Science students may take the course only as a Social Sciences option.) (Antirequisite: ECON-1110.)

ECON-2100. Games and Behaviour

The course is designed for Arts, Social Science and Business students. It is intended to introduce them to key concepts and methods in game theory. The application and understanding of behavioral analysis as applied to individual decision making and public policy will be emphasized. The course provides a non-technical and intuitive way for students to master an understanding of real world problems and decision making. Students will learn about strategies for conflict resolutions, Co-operation, social interaction, voting strategies, individual and business behaviour. (May not be taken for credit in Economics or joint programs with Economics, Science or the Faculty of Engineering.)

ECON-2120. Intermediate Statistical Methods

An application of statistical methods to economic theory. (Prerequisite: one of SOSC-2500, STAT-2920, STAT-2910, or MSCI-2020.) (Credit will not be given for more than one of ECON-2120, STAT-2950, or any equivalent intermediate statistics course from another area.)

ECON-2210. Intermediate Microeconomics I

The theory of markets, the theory of consumer behaviour and demand; the firm, production, cost, and supply. (Prerequisite: ECON-1100.)

ECON-2220. Intermediate Microeconomics II

Extensions of the theory of consumer and firm behaviour; pricing under different market structures; distribution; general equilibrium and economic welfare. (Prerequisite: ECON-2210.)

ECON-2310. Intermediate Macroeconomics I

A theoretical and policy oriented treatment of the determination of employment, output, interest rates, and the price level; stabilization policies and their effectiveness. (Prerequisites: ECON-1110.)

ECON-2320. Intermediate Macroeconomics II

Effectiveness of stabilization policies in open economies; causes and cures of inflation; simple growth models. (Prerequisite: ECON-2310.)

ECON-2510. Macroeconomics for the Real World

This course will focus on the application of techniques of economics to the analysis of practical problems in areas of current interest like globalization, inequality, protectionism and government spending and taxes. The course will emphasize more policy, as opposed to theoretical, aspects of macroeconomics. (May not be taken for credit in Economics or combined major programs with Economics). (Prerequisite ECON-1110 or ECON-2010) (Anti-requisite: ECON-2310).

ECON-2660. Selected Issues in Economics

(Prerequisites: ECON-1100 and ECON-1110.)

ECON-2900. Health Economics

This course will explore the unique economic features of health care with emphasis on international models of delivery, determinants of the demand and supply of health services, and public versus private

health care systems. The Canadian experience will be considered with a focus on demographic patterns and legislation. (Pre-requisites: ECON-1100, ECON-1110; plus any university-level course in statistics.)

ECON-3060. Mathematical Economics I

Economic applications of differential calculus and linear algebra, with an emphasis on problem solving and employing software used widely by economists. Topics include input-output analysis, optimization of linear microeconomic models, computer methods for comparative static exercises to analyze closed- and open-economy macroeconomic models, and unconstrained and constrained optimization of non-linear microeconomic models. (Prerequisites: MATH-1720 (or MATH-1760), MATH-1250 (or MATH-1260 or MATH-1270), ECON-2210, and ECON-2310.)

ECON-3100. Environmental and Resource Economics

An examination of economic behaviour in renewable and non-renewable resource markets and an economic treatment of policy issues related to environmental quality and common property resources. (Prerequisite: ECON-2210, or the combination of ECON-1100 and one of MATH-1300, MATH-1760 or MATH-1720.)

ECON-3130. Introduction to Econometric Methods I

Development of the classical regression model and problems associated with this model such as multicollinearity, heteroscedasticity, and autocorrelation. (Some familiarity with linear algebra and calculus will be beneficial.) (Prerequisites: (a) ECON-2120 or STAT-2950; (b) one of MATH-1300, MATH-1760 or MATH-1720; and, (c) one of MATH-1250, MATH-1260 or MATH-1270.)

ECON-3310. The Economics of Legal Procedures, Crime, and Punishment

The application of microeconomic principles in the analysis of legal procedures, crime, and punishment. Economic models of filing suit, bargaining, and going to trial will be discussed. Traditional and economic models of criminal activity will be compared and contrasted, along with the economics of civil and criminal punishment. Additional topics from other areas of law may be included. (Prerequisite: ECON-2210.)

ECON-3350. Money and Banking

The banking system and other financial institutions; money demand and money supply; money and the level of economic activity; money and inflation; issues in monetary policy. (Prerequisite: ECON-2310.)

ECON-3410. Economic Growth and Development Theory

Modern theories of growth and development with emphasis upon less developed countries. (Prerequisites: ECON-2210 and ECON-2310, or consent of instructor.)

ECON-3500. Labour Theory

Wage theories, wage structure, unemployment, labour supply and related topics. (Prerequisite: ECON-2210.)

ECON-3530. Labour Institutions

Canadian and American labour movements, collective bargaining, union philosophy and labour legislation in Canada and the United States. (Prerequisite: ECON-2210 or consent of instructor.)

ECON-3730. International Economics: Trade Theory and Policy

A survey of traditional and contemporary theories of international trade and trade policy. (Prerequisite: ECON-2210.)

ECON-3740. International Economics: Exchange Rates and Balance of Payments

Theory of exchange rate determination and balance of payments adjustment; macroeconomic policy in an open economy; current problems of the international monetary system. (Prerequisite: ECON-2310.)

ECON-3800. Game Theory

The study of strategic interactions among decision makers. Equilibrium concepts, such as Nash equilibrium, sub-game perfect equilibrium, etc, will be introduced and their applications to economic, political and biological decision making will be discussed. (Prerequisite: ECON-2210 or the combination of ECON-1100 and one of MATH-1760 or MATH-1720.)

ECON-3850. Public Sector Economics: Expenditure

Theory of the role of government in the economy; public expenditure theories and practice; public choice and government decision-making; government grants. (Prerequisites: ECON-2210.)

ECON-4060. Mathematical Economics II

Topics will include general equilibrium theory, dynamic analysis, oligopoly, behaviour under uncertainty, and growth theory. (Prerequisites: ECON-2220, ECON-2320, ECON-3060, and MATH-1730.)

ECON-4070. Senior Research Workshop

This course is intended to develop independent research and presentation skills. Students will be assigned a topic (or topics). Students will be expected to conduct a literature survey, collect data, present data in a descriptive format, formulate and carry out formal econometric tests. Students will be assessed on the basis of classroom presentations classroom discussion and written assignments. (Prerequisites: ECON-3130, ECON-4230 and ECON-4330.) (This course is open to students who are enrolled in an Honours Economics program.)

ECON-4140. Introduction to Econometric Methods II

A continuation of ECON-3130. (Prerequisite: ECON-3130.)

ECON-4160. Urban and Regional Economics

Economics of cities and urban problems; effects on production and trade; urban problems such as poverty, congestion, pollution and crime.

ECON-4230. Advanced Microeconomics I

The use of mathematical techniques and economic analysis with special emphasis on consumer theory, producer theory, and theory of markets. (Prerequisites: ECON-2210, ECON-2220, ECON-3060, or consent of instructor.)

ECON-4240. Advanced Microeconomics II

Selected topics in microeconomic theory. (Prerequisite: ECON-4230.)

ECON-4300. Economics Analysis of Law

The application of microeconomic principles to the study of property, contract, and tort law. The economic principles underlying property rights, torts, and contracts are surveyed. Selected problems in property, tort, and contract law are considered. Additional topics from other areas of law may be included. (Prerequisite: ECON-2210.)

ECON-4330. Advanced Macroeconomics I

Modern interpretations of macroeconomics, including inflation, unemployment, and policy implications. (Prerequisites: ECON-2320 and ECON-3060)

ECON-4340. Advanced Macroeconomics II

Selected topics in macroeconomic theory. (Prerequisite: ECON-4330.)

ECON-4600. Cost-Benefit Analysis

The techniques and application of cost-benefit analysis to public sector policies and projects. Topics include the welfare foundations of cost-benefit analysis, investment decision rules, the choice of a social discount rate, risk and uncertainty, shadow pricing of inputs and outputs, public sector pricing and the assessment of the value of intangibles such as time, life and noise. (Prerequisite: ECON-2210, or the combination of ECON-1100 and one of MATH-1300 or MATH-1720.)

ECON-4860. Public Sector Economics: Finance

Government taxation, user charges, borrowing, and the public debt in theory and practice; use of taxation as fiscal policy; and intergovernmental tax relations. (Prerequisites: ECON-2220.)

ECON-4950. Economics Internship

The economics internship course provides an opportunity for Economics students to combine their university education with career-related experience in their field of study. The course will increase the student's skills and knowledge while working on practical tasks and projects. Students are placed with companies that provide training, a structured work environment and professional supervision of their work. The students are expected to accept and complete a minimum of 96 hours working on assignments at the host organization during one full semester. The students will attend an orientation class at the beginning and a class for course evaluation at the end of the semester. (This is an experiential learning course.)

ECON-4990. Selected Topics in Economics

(May be repeated for credit with consent of an advisor in Economics.) (Prerequisite: consent of the instructor.)

SCHOOL OF THE ENVIRONMENT

PROGRAMS

Minor in Earth Science
Minor in Environmental Science
Minor in Geography

CERTIFICATE

Certificate in Geographic Information Science (GISc)

BSc Honours Environmental Science

Degree Requirements

Total courses: forty

(a) BIOL-2101, ESCI-1100, ESCI-1151, ESCI-2131, ESCI-2141, ESCI-2210, ESCI-2421, and ESCI-3735 or ESCI-3755.

(b) twelve courses from: BIOL-2111, BIOL-3250, BIOL-3281, , BIOL-4241, BIOL-4270, BIOL-4280, BIOL-4864, ESCI-1141, ESCI-2101, ESCI-2721, ESCI-2400, ESCI-2705, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3701, ESCI-3711, ESCI-3721, ESCI-3751, ESCI-4301, ESCI-4500, ESCI-4710, ESCI-4721.

(c) BIOL-1111 or BIOL-1013 (with School of the Environmental approval), CHEM-1100, CHEM-1110, MATH-1720 (or MATH-1760), STAT-2910, ESCI-1111, ESCI-3801.

(d) Thirteen additional courses. Minimum of five courses from the Faculty of Science and a minimum of two courses from any area of study other than Science.

Courses used to calculate the major average are: courses listed under requirement (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: ten courses, including BIOL-1111, BIOL-1101, CHEM-1100, CHEM-1110, MATH-1720 (or MATH-1760), STAT-2910, ESCI-1111, ESCI-1100

Second Year: ten courses, including BIOL-2101, ESCI-1151, ESCI-2210, ESCI-2131, ESCI-2141, ESCI-2421

Third and Fourth Years: twenty courses, including ESCI-3801, ESCI-3735 or ESCI-3755, and eleven additional courses from BIOL-2111, BIOL-3250, BIOL-3281, BIOL-4241, BIOL-4270, BIOL-4280, BIOL-4864, ESCI-1141, ESCI-2101, ESCI-2721, ESCI-2400, ESCI-2705, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3701, ESCI-3711, ESCI-3721, ESCI-3751, ESCI-4301, ESCI-4500, ESCI-4710, and ESCI-4721.

BSc Honours Environmental Science (with Thesis)

Degree Requirements

Total courses: forty

(a) BIOL-2101, ESCI-1100, ESCI-1151, ESCI-2131, ESCI-2141, ESCI-2210, ESCI-2421, ESCI-3735 or ESCI-3755, and ESCI-4900.

(b) ten courses from: BIOL-2111, BIOL-3250, BIOL-3281, , BIOL-4241, BIOL-4270, BIOL-4280, BIOL-4864, ESCI-1141, ESCI-2101, ESCI-2721, ESCI-2400, ESCI-2705, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3701, ESCI-3711, ESCI-3721, ESCI-3751, ESCI-4301, ESCI-4500, ESCI-4710, ESCI-4721.

(c) BIOL-1111 or BIOL-1013 (with School of the Environment approval), CHEM-1100, CHEM-1110, MATH-1720 (or MATH-1760), STAT-2910, ESCI-1111, ESCI-3801.

(d) Thirteen additional courses. Minimum of five courses from the Faculty of Science and a minimum of two courses from any area of study other than Science.

Courses used to calculate the major average are: courses listed under requirement (a) and (b), and any courses taken in the major area(s) of study.

Recommended Course Sequence

First Year: ten courses, including BIOL-1111, BIOL-1101, CHEM-1100, CHEM-1110, MATH-1720 (or MATH-1760), STAT-2910, ESCI-1111, ESCI-1100

Second Year: ten courses, including BIOL-2101, ESCI-1151, ESCI-2210, ESCI-2131, ESCI-2141, ESCI-2421

Third and Fourth Years: twenty courses, including ESCI-3801, ESCI-3735 or ESCI-3755, ESCI-4900 and nine additional courses from BIOL-2111, BIOL-3250, BIOL-3281, BIOL-4241, BIOL-4270, BIOL-4280, BIOL-4864, ESCI-1141, ESCI-2101, ESCI-2721, ESCI-2400, ESCI-2705, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3701, ESCI-3711, ESCI-3721, ESCI-3751, ESCI-4301, ESCI-4500, ESCI-4710, and ESCI-4721.

BSc Honours Environmental Science (Applied Environmental Science Stream)

Admission Requirements

- 1) Graduates of a two-year Ontario College Diploma from an environmental-related program from a qualifying Ontario or equivalent College of Applied Arts and Technology (CAAT), with a cumulative average of a least a B (73%) grade), are eligible for admission to Bachelor of Science Honours Environmental Science-Applied Environmental Science Stream degree program offered by the School of the Environment at the University of Windsor under the provisions of this agreement. The Dean of Science or their designate has the authority to admit students from qualifying colleges in equivalent diploma programs within Canada pending that they meet all other admission requirements.
- 2) In addition to the appropriate two-year Diploma and grade point average, applicants to the Bachelor of Science Honours Environmental Science-Applied Environmental Science Stream are required to have successfully completed MHF4U, SCH4U, and SBI4U or their equivalent courses. Students who have not completed these courses or their equivalents will be required to complete the equivalent courses within the Foundations of Science Preparation Program.
- 3) Students admitted to the Bachelor of Science Honours Environmental Science-Applied Environmental Science Stream will obtain the equivalent of 2 years of Advanced Standing (or awarded 20 course transfers).

- 4) Students are normally required to complete twenty (20) courses at the University of Windsor in fulfillment of the requirements of the Bachelor of Science Honours Environmental Science-Applied Environmental Science Stream.

Recognized environmental-related programs include:

- Environmental Technician (MCU code 52700)
- Forestry Technician (MCU 54203)
- Any environmental-related program from a qualifying Ontario CAAT or other Canadian College deemed equivalent by the Dean of Science or their designate.

Note: Three-year diploma programs in relevant environmental fields will be analyzed for additional potential credit transfer on an *ad hoc* basis, while considering minimum residency and core course requirements.

Degree Requirements

Pathway 1: Environmental Technician

Total courses: 20

(a) BIOL-1111 or BIOL-1013, CHEM-1100, CHEM-1110, MATH-1760 or MATH 1720, STAT 2910, BIOL-2101, ESCI-1111, ESCI-2131, ESCI-2210, ESCI-2421

(b) BIOL-3250, BIOL-4241, BIOL-4280, ESCI-2141, ESCI-2705, ESCI-1141, ESCI-2721, ESCI-2400, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3711, ESCI-3751, ESCI-4500, ESCI-4710, ESCI-4721

Courses used to calculate the major average are:

BIOL-2101, ESCI-1111, ESCI-2131, ESCI-2210, ESCI-2421, BIOL-3250, BIOL-4241, BIOL-4280, ESCI-2141, ESCI-2705, ESCI-1141, ESCI-2721, ESCI-2400, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3711, ESCI-3751, ESCI-4500, ESCI-4710, ESCI-4721

Pathway 2: Forestry Technician

Total courses: 20

(a) CHEM-1100, CHEM-1110, MATH-1760 or MATH 1720, BIOL-2101, ESCI-1100, ESCI-1111, ESCI-2131, ESCI-2210, ESCI-2141, STAT-2910

(b) BIOL-3250, BIOL-4241, BIOL-4280, ESCI-2421, ESCI-2705, ESCI-1141, ESCI-2721, ESCI-2400, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3711, ESCI-3751, ESCI-4500, ESCI-4710, ESCI-4721

Courses used to calculate the major average are: BIOL-2101, ESCI-1100, ESCI-1111, ESCI-2131, ESCI-2210, ESCI-2141, BIOL-3250, BIOL-4241, BIOL-4280, ESCI-2421, ESCI-2705, ESCI-1141, ESCI-2721, ESCI-2400, ESCI-3301, ESCI-3310, ESCI-3400, ESCI-3610, ESCI-3711, ESCI-3751, ESCI-4500, ESCI-4710, ESCI-4721

Recommended Course Sequencing

Pathway 1: Environmental Technician

Year 1:

Summer: BIOL-1013

Fall: BIOL-2101, CHEM-1100, MATH-1760 or MATH-1720, ESCI-2210, STAT-2910
Winter: ESCI-1111, CHEM-1110, ESCI-2421, 1 elective

Year 2:

Fall: ESCI 2131, 4 Electives

Winter: 5 Electives

Pathway 2: Forestry Technician

Year 1:

Fall: BIOL-2101, CHEM-1100, MATH-1760 or MATH-1720, ESCI-1100, STAT-2910

Winter: ESCI-1111, CHEM-1110, ESCI-2141, 2 Electives

Year 2:

Fall: ESCI-2131, ESCI-2210, 3 Electives

Winter: 5 Electives

Honours Bachelor of Environmental Studies (BES)

This program is truly interdisciplinary in approach and will introduce students to the social, cultural, economic, political, legal, and ethical factors affecting human interaction with the environment while at the same time ensuring they acquire a basic literacy in the physical and biological sciences. Graduates will understand the human dimensions of environmental issues and will be knowledgeable, skilled individuals capable of analyzing complex human-environmental situations and formulating effective political and social strategies to address human impact.

Degree Requirements

Total Courses: forty.

(a) PHIL-2270 or PHIL-2280, PHIL-3230, POLS-2120, SACR-3400 or POLS-2490, BIOL-1013 or BIOL-1111, ESTU-1100, ESTU-2100, ESCI-1100, ESCI-1120, ESCI-1130, ESCI-2010, ESCI-1141, ESCI-1151, ESCI-2600, ESCI-2610, ESCI-3601, ESCI-3610, LAWS-2180

(b) eight courses from one of the following areas of concentration: Resource Management or Environmental Values and Policy.

(c) SOSC-2500, POLS-2300, SACR-1100, SACR-3080

(d) ten courses from any area of study, including either Area of Concentration.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Area of Concentration: Resource Management

At least 3 of the following must be taken: ESCI-2201, ESCI-2141, ESCI-2400, ESCI-3701, ESCI-3745.

BIOL-1101. Cell Biology

BIOL-2080. Plants and Society

CHEM-2003. Chemistry in the Marketplace

ESCI-1111. Introduction to Earth Science

ESCI-2000. Science, Technology and Society

ESCI-2141. Hydrology
ESCI-2201. Climatology
ESCI-2210. Introduction to Climate Change
ESCI-2300. Introduction to Oceanography
ESCI-2400. Geomorphology
ESCI-2620. Environmental Auditing in Mineral Resource Development
ESCI-2630. Geology and International Development
ESCI-3701. Environmental Modelling and Decision Analysis
ESCI-3745. Field Methods for Environmental Studies
ESTU-4808. Special Topics in Environmental Studies
ESTU-4900. Environmental Studies Research Project
ESTU-4910. Environmental Research/Leadership Experience
PHIL-3290. Animals and Ethics
PHYS-2060. Physics and Society –The Present
POLS-2490. Political Economy of Agriculture and Food
POLS-3350. Political Geography
SACR-3400. Food and Global Sustainability
STEN-1000. Introduction to Business
VSAR-3850. Green Corridor

Area of Concentration: Environmental Values and Policy

ESCI-3745. Field Methods for Environmental Studies
ESTU-4808. Special Topics in Environmental Studies
ESTU-4910. Environmental Research/Leadership Experience
ESTU-4900. Environmental Studies Research Project
PHIL-2270. Environmental Ethics
PHIL-2280. Technology, Human Values and the Environment
PHIL-3230. Human Rights and Global Justice
PHIL-3290. Animals and Ethics
PHIL-3300. Environmental Philosophy
POLS-1600. Introduction to International Relations
POLS-2130. Public Opinion, Mass Media and Canadian Democracy
POLS-2140. Legal Process in Canada
POLS-2200. Introduction to Public Administration
POLS-2210. Canadian Public Administration and Policy
POLS-2490. Political Economy of Agriculture and Food
POLS-2680. International Organization
POLS-2750. Introduction to Research Methods
POLS-3260. Local Government
POLS-3350. Political Geography
POLS-3600. International Conflict and its Resolution
POLS-3630. Principles of International Law
SACR-3270. Social Movements
SACR-3400. Food and Global Sustainability
SACR-3520. Citizenship, Rights, and Social Justice
STEN-1000. Introduction to Business
VSAR-3850. Green Corridor
WGST-3530. Women, Power, and Environments (also offered as SACR-3530)

Students may take courses from both Areas of Concentration, but at least eight courses must be taken in one of the Areas of Concentration.

If both PHIL-2270 and PHIL-2280 are taken, one course fulfills requirement (a) and the other course contributes to the Environmental Values and Policy Area of Concentration.

If both PHIL-3230 and SACR-2270 are taken, one course fulfills requirement (a) and the other course contributes to the Environmental Values and Policy Area of Concentration.

If both POLS-2490 and SACR-3400 are taken, one course fulfills requirement (a) and the other course contributes to either the Resource Management or the Environmental Values and Policy Area of Concentration.

Certificate in Geographic Information Science (GISc)

Admission Requirements

Open only to students currently enrolled in a degree program and in good academic standing in their program.

Certificate Requirements

Total courses: Nine

ESCI-1141. Cartography and Digital Mapping
ESCI-1151. Fundamentals of Geographic Information Systems
ESCI-2721. Introduction to Image Processing & Remote Sensing
ESCI-2701. Geospatial Data Collection & Database Design
ESCI-2711. Scripting and Programming in GIS
ESCI-3701. Spatial Modelling in GIS
ESCI-3761. Geostatistical Analysis in GIS
ESCI-3771. GeoWeb and Geoportal Development
ESCI-491. GIS Capstone Research Project

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - School of the Environment

Major Concentration: ESCI-1111, ESCI-1100, and ten additional ESCI-XXXX courses, except for ESCI-1000, ESCI-1010, ESCI-2000, ESCI-2300, or ESCI-2010. A minimum of three ESCI-2XXX, two ESCI-3XXX and one ESCI-4XXX courses is required.

Minor Concentration: ESCI-1111, ESCI-1100, and four additional ESCI-XXXX courses, except for ESCI-1000, ESCI-1010, ESCI-2000, ESCI-2300, or ESCI-2010.

Minor in Earth Science

A minor in Earth Science consists of a total of six courses as follows:

- (a) ESCI-1111
- (b) ESCI-1100 (if not enrolled in a program that includes ESCI-1100 as a course used to calculate the major average)

(c) courses chosen from the following list to make up a total of six courses for the minor: ESCI-1020, ESCI-1120, ESCI-2101, ESCI-1141, ESCI-1151, ESCI-2131, ESCI-2141, ESCI-2400, ESCI-2411, ESCI-2421, ESCI-3301, ESCI-3400, ESCI-3411.

A minimum average of 60% must be attained for all courses counted toward the minor.

Minor in Environmental Science

A minor in Environmental Science consists of a total of six courses as follows:

(a) ESCI-1100

(b) BIOL-1111 (if not enrolled in a program that includes BIOL-1111 as a course used to calculate the major average);

(c) courses chosen from the following list to make up a total of six courses for the minor: ESCI-1120, ESCI-1130, ESCI-2101, ESCI-1151, ESCI-2131, ESCI-2141, ESCI-2210, ESCI-2300, ESCI-2400, ESCI-2421, ESCI-3301, ESCI-3400, ESCI-3701, ESCI-3711, ESCI-3721, ESCI-3735, ESCI-3751, ESCI-4301, ESCI-4500, ESCI-4710, ESCI-4721.

A minimum average of 60% must be attained for all courses counted toward the minor.

Minor in Geography

(Administered by the School of the Environment)

(a) ESTU-2100

(b) one course from ESTU-1100, POLS-2300 and POLS-2490

(c) one course from ESCI-1130, ESCI-2201, ESCI-2210 and ESCI-2400

(d) one course from ESCI-1141, ESCI-1151 and ESCI-2721, and

(e) two courses from POLS-2300*, POLS-2490*, POLS-3350, ESTU-1100*, ESCI-1130*, ESCI-1141*, ESCI-1151*, ESCI-2141, ESCI-2201*, ESCI-2210*, ESCI-2400*, ESCI-2600, ESCI-2721*, ESCI-3310, ESCI-3610, ESCI-3701, ESCI-3745.

*if not taken to fulfill the requirements under (a), (b), (c) or (d).

A minimum average of 60% must be attained for all courses counted toward the minor.

SCHOOL OF THE ENVIRONMENT COURSES

ENVIRONMENTAL SCIENCE COURSES

ESCI-1000. Natural Hazards and Disasters

The Earth's component systems and their interrelationships. Earth hazards and the Earth's interior processes: volcanism and earthquakes. Hazards and surface processes: landslides and floods.

Atmospheric hazards: storms, hurricanes and tornadoes. (May be taken by Science students for credit, but does not count as a Science option towards the fulfillment of the specified requirements for a Science degree). (2 lecture hours per week)

ESCI-1010. Our Changing Earth

Origin of the universe and solar system; focus on the Earth and moon; earliest life forms. Measurement of geological time. Global climatic change in geological history; drifting continents; deserts, floods and ice sheets. Fossils and evolution; extinctions and probable causes. Human evolution and migrations; early

technologies. (May be taken by Science students for credit, but does not count as a Science option towards the fulfillment of the specified requirements for a Science degree). (2 lecture hours a week)

ESCI-1020. Introduction to Planetary Science

An introduction to the origin of the Universe and Solar System. Topics include: the Big Bang theory; origin and organization of matter; and formation of galaxies, nebulae, stars, and planetary systems. The focus is on the geological features of planets, moons, asteroids, and comets. Coverage includes historical perspectives and current theory on astronomy, measurement of the ages of the Universe and Solar System, space exploration, Moon and Mars missions, analyses of NASA satellite images, the origin and evolution of life in the Solar System, and the search for possible extra-terrestrial life and intelligence in the Universe. (May be taken by Science students for credit, but does not count as a Science option towards the fulfillment of the specified requirements for a Science degree.) (3 lecture hours a week.)

ESCI-1100. Environmental Systems - An Introduction to Environmental Science

An introduction to the components of Earth's environment (geosphere, biosphere, atmosphere, and hydrosphere) and the principles and processes defining and influencing environmental systems (energy and matter cycles). Human interactions with, and influences on, the environment will be examined (resource and land use, waste and pollution, development, conservation and sustainability). This course is designed for Science majors. (3 lecture hours a week, optional field trips).

ESCI-1111. Introduction to Earth Science

An introduction to Earth's physical character and the processes that shape our planet. The focus is on the geosphere: Earth materials, weathering, sedimentation, magmatism and volcanism, metamorphism, deformation, earthquakes, mountain building, and Earth's internal structure. These will be examined in the context of the origin of Earth, geologic time, and plate tectonics. The nature of mineral and energy resources will also be examined. This course is designed for Science majors. (3 lecture, 2.5 laboratory or tutorial hours a week).

ESCI-1120. Introduction to Geomorphology

The landscapes of the earth, with particular reference to the glaciers, coastlines, rivers, and northern permafrost regions of Canada. (3 lecture hours a week.)

ESCI-1130. Atmosphere and Climate

An introduction to the atmosphere and the basic principles of meteorology and climatology. Topics include weather systems, atmospheric pollution and inadvertent climate modification, climate change and relationships between climate and living organisms. (3 lecture hours a week.)

ESCI-1141. Cartography and Digital Mapping

This introductory course focuses on the key elements of map design, representation of spatial data and map interpretation. Topics will include projections, datums and coordinate reference systems, scale properties and unit calculations, map symbology and map accuracy. Different mapping approaches, such as choropleth, isoline and dot mapping will be utilized throughout the course. Web-based mapping will be introduced. Maps will be designed, generated, and interpreted using paper-based media and modern cartographic software in a laboratory setting. (2 lecture, 2 laboratory hours a week.)

ESCI-1151. Fundamentals of Geographic Information Systems and Science

This introductory course focuses on the basic principles, techniques, applications, and impacts of geographic information systems. Vector and raster data structures will be introduced, as well as methods for acquiring, storing, manipulating, and analyzing spatial and non-spatial data. Spatial data conversion,

data reformatting, and basic database development techniques will also be explained. Geographic layers will be created and different overlay and spatial query procedures to address various real-world problems will be presented using proprietary and open source GIS software in a laboratory setting. (It is recommended that students take ESCI-1141 before taking this course.) (2 lecture, 2 laboratory hours a week.)

ESCI-2000. Science, Technology, and Society

This course is designed to explore the complex inter-relationships between science, technology, and society. The nature of science and scientific method and selected current issues in science and technology will be discussed. Topics may include chemicals in society, biotechnology and related issues, nuclear energy, and the impact of these technologies on society. Technology, as it relates to human values and public awareness, will also be considered. (Not open to Semester 1 and 2 students.) (May not be taken for credit towards a B.Sc. Degree in Environmental Science.) (3 lecture hours a week.)

ESCI-2010. Geology and the Environment

Effect of geological factors on the environment; pollution of groundwater, ground subsidence, nuclear waste disposal, subsurface disposal of liquid wastes, earthquake prediction and control. This course is designed specifically for the non-scientist. (May not be taken for credit towards a B.Sc. Degree in Environmental Science.) (2 lecture hours a week or equivalent.)

ESCI-2020. Discovering Dinosaurs

The origin, evolution, behaviour, ecology, and extinction of dinosaurs, and how these aspects of dinosaur science are understood through the study of their fossils. How the public perception and scientific interpretation of dinosaurs have changed over time as a result of new discoveries. (3 lecture hours per week)

ESCI-2101. Earth Materials

An introduction to the fundamental properties and characteristics of Earth materials. Topics include the nature of minerals (the principal components of sediments, soils and rocks), and the general chemical, mineralogical and physical characteristics of Earth materials. Coverage includes how geochemical and geophysical methods are used to determine the properties of Earth materials. (2 lecture and 3 laboratory hours/week.) (Prerequisites: ESCI-1111 or ESCI-1100 or consent of instructor.)

ESCI-2131. Introduction to Geochemistry

Introduction to the application of chemical principles to the natural environment. Fundamental concepts in thermodynamics, acid-base equilibria, solubility, reduction-oxidation, organic chemistry, environmental mineralogy, and isotope geochemistry will be discussed in the context of the chemical character of environmental material, and environmental problems. (Prerequisites: CHEM-1100, CHEM-1110.) (3 lecture and/or tutorial hours per week.)

ESCI-2141. Hydrology

Fundamental processes in physical hydrology that control movement and storage of water within a watershed or catchment basin. Components of the water balance (precipitation, interception, infiltration, evapotranspiration, runoff, storage) and their variations in space and time. Theoretical and practical approaches to measurement and forecasting of components and their linkages. Special consideration of snowmelt, streamflow, wetlands, and human impacts. (Prerequisites: one of ESCI-1120, ESCI-1130 or ESCI-1100; and one of SOSC-2500, STAT-2910, or other University-level mathematics or statistics course; or consent of instructor.) (3 lecture, 2 laboratory hours a week.)

ESCI-2201. Climatology

A study of the major climatic elements, with special emphasis on the radiation budget, energy systems, and the hydrological cycle of Earth and the human environment. Climate classification, climatic change, climatological techniques, and aspects of applied climatology also will be examined. (Prerequisites: ESCI-1130.) (2 lecture, 2 laboratory hours a week.)

ESCI-2210. Introduction to Climate Change

A study of the drivers of past, present, and future climate change. Topics include paleoclimate records, future climate projections (both global and regional), and the impact of these changes on the environment. The influence of politics and the media upon climate change are also explored (Prerequisite: ESCI-1100 or ESTU-1100) (3 lecture hours a week.)

ESCI-2300. Introduction to Oceanography

Examination of the physical, chemical, geological and biological aspects of the oceans. Topics will include the interconnectedness of global climate, ocean currents, waves and tides, anthropogenic stressors, and their influence on marine biodiversity and ecosystems. (3 lecture hours a week.)

ESCI-2400. Geomorphology

The geological processes operating on or near Earth's surface and the development and evolution of erosional and depositional landforms as a result of glacial ice, permafrost, wind, running water, gravity, waves and tides, and exposure to the atmosphere. (3 lecture hours a week.)

ESCI-2410. Coastal Geomorphology

Coastal processes such as wave dynamics, current generation, water-level fluctuations, hydrodynamics, and sediment transport will be presented and simulated to showcase how these processes occur, and how they impact various beach, wetland, and estuarine environments. Case studies will be presented to cover topics such as: beach and barrier shorelines, estuaries and tidal wetlands, rocky and sandy coasts and cliffs. Focus will also be given to addressing how shorelines of the Great Lakes are measured and monitored and how they morphologically change and evolve with increased development and climate change. Real-time data, modeling software, observation techniques, and analysis tools will also be utilized to visualise and simulate these environments.

ESCI-2411. Introduction to Petrology

Petrography, textures, composition and classification of igneous and metamorphic rocks. Evolution of magmatic systems. Nature and causes of metamorphism. Relationship between global tectonics and magmatic and metamorphic processes. (Prerequisite: ESCI-2101 or consent of instructor.) (2 lecture, 3 laboratory hours a week.)

ESCI-2421. Soils and Sediments

An introduction to the properties and characteristics of soils and sediments, the materials that cover much of Earth's surface and underlie surface water bodies. Topics include the formation and structure of soils and sediments, and how they are described, classified, and analyzed. Coverage includes the geographic distribution of soils and their importance as an environmental resource. (3 lecture and 2 laboratory hours per week.) (Prerequisites: ESCI-1111 or ESCI-1100).

ESCI-2600. Principles of Resource Management

Systems analysis methodologies, scientific theories, ecological approaches, and sustainable resource management principles will be presented to examine the interrelationships governing the availability and cumulative impacts of utilizing both renewable and non-renewable resources. Resource management auditing methods and techniques will be applied for the assessment of several indicators, including carrying capacity, ecological footprints, demographic transition, energy flows, agrosystems, land

degradation, air and water quality, deforestation, biodiversity and successional changes. Discussions will also focus on integrative and adaptive resource management techniques and best management practices. (3 lecture hours a week.)

ESCI-2610. Environmental Decision Analysis

Earth systems, including climatic extremes, the industrialized ecosystem; decisions under uncertainty in mineral-resource exploration and development; rational approach to decision making, alternatives to decision analysis; environmental impact assessment and risk management, expert systems approach to environmental problem solving, applications in less developed countries. (3 lecture hours a week.)

ESCI-2620. Environmental Auditing in Mineral Resource Development

Cyclical flow of energy and matter in nature, human interaction with environmental processes, elements of policy analysis; environmental management systems and environmental impact assessment; environmental audit processes, steps in design and delivery; mineral resource development and the audit protocols; from audit to action plan, auditing the audit. (3 lecture hours a week.)

ESCI-2630. Geology and International Development

Aid, international development, and Earth processes; integration of water-resource management, soil conservation and agroforestry; geological hazards in a tropical setting; small-scale mining and conservation of mineral resources; engineering an improved quality of life in developing nations. (May not be taken for credit towards a B.Sc. Degree in Environmental Science.) (2 lecture hours a week or equivalent.)

ESCI-2701. Geospatial Data Collection and Database Design

Geospatial data are continuously being collected in real-time and in large quantities, at different scales and for different purposes. This course will explore fundamental database concepts in non-spatial contexts (entity-relationship model, object-oriented database design) and introduce spatial considerations (geometric objects, topology, connectivity) when creating geodatabases. Methods for building effective relational and spatial databases using modern geospatial and non-geospatial software, as well as query-based languages such as SQL. Data capture equipment and tools, such as UAVs (drones), total survey stations, GPS, and online spatial catalogues (including census, climate, and municipal) will be utilized to collect and import spatial and aspatial data into geodatabases. Data quality and assurance, database management systems and geodatabase enterprise solutions, mining of big spatial data, implications of data sharing, and construction of metadatabases will also be discussed. (Prerequisite: ESCI-1151.) (2 lecture, 2 laboratory hours per week.)

ESCI 2705. Applied Geophysics

Fundamental physical properties and parameters of matter, including density, conductivity, radioactivity, magnetism, dielectric constant and seismic velocity. Theory and principles of geophysical techniques used to assess and monitor near-surface variations in physical properties, including resistivity imaging, electromagnetic mapping, magnetometry, ground penetrating radar, and seismic imaging. Applications will focus on environmental problems, but may include geological, forensic, and archaeological studies. May be offered as a full-time two-week course during Inter/Summer session, or as a lecture and laboratory course during the Fall semester. (Prerequisite: ESCI 1111.) (MATH 1720/1760 and PHYS 1310/1410 recommended.)

ESCI-2711. Scripting and Programming in GIS

Knowledge and competence in programming are an essential skill set and a critical requirement for most geospatial job opportunities. This course will introduce the basics of constructing scripts (lists, loops, syntax, classes, objects) and programming them into a GIS framework for the purpose of automating

workflows, visualizing geospatial data, building and running tools from GUIs and APIs. Other topics will include: methods to enhance functionalities within current geospatial software and web-based systems, the utilization of geospatial libraries, and the construction of effective tools for spatial analysis purposes using Python and other programming languages. (2 lecture, 2 laboratory hours per week.)

ESCI-2721. Introduction to Image Processing and Remote Sensing

This course will introduce how changes to the Earth's surface can be examined by utilizing aerial photography and satellite imagery and the key elements of image interpretation. Discuss how different satellite sensors and platforms (LANDSAT, RADARSAT, SPOT, MODIS), and how electromagnetic radiation, in conjunction with remote sensing software, can be used to identify key spectral signatures of the Earth's diverse environments (water, vegetation, urban). Emphasis will be placed on how remote sensing constrains and permits the derivation of useful attributes of the Earth's surface, and how imagery is processed, classified, and interpreted. This course will involve completing application-based assignments using specialized remote sensing software. (Prerequisites: ESCI-1151.) (2 lecture, 2 laboratory hours per week)

ESCI-3301. Hydrogeology

Fundamental physics and properties of groundwater flow in porous geologic material, develops an intuitive, problem-solving approach to hydrogeologic problems. Topics include: groundwater flow equations, flow nets, aquifer pumping, contaminant transport processes, two-phase flow, and dense non-aqueous phase liquids. Computer application will be emphasized. (Prerequisites: ESCI-1100, MATH-1720 (or MATH-1760) or consent of instructor.) (ESCI-2141 is recommended) (2 lecture, 3 laboratory hours a week.)

ESCI-3310. Global Water Crisis

Examination of the threats to global freshwater resources due to projected human population growth to 2050 and the potential impacts of this growth on water quantity and water quality. Application of the concept of the water, food, energy nexus to demonstrate how water consumption and virtual water transport through international trade of food and energy impact water availability and contribute to water stress to humans and to freshwater ecosystems. The course also examines interactions between water availability, climate change, water pollution, and trends in global consumer demands to address questions about the sustainability of our freshwater resources in the coming decades. (Prerequisite: ESCI-1100.) (3 lecture hours per week.)

ESCI-3400. Environmental Sedimentology

Description and analysis of depositional and diagenetic processes, facies, environments and sequences. The impact of natural processes and anthropogenic activities on the nature, production, and accumulation of sediments. Effects of changes in hydrologic reservoirs and fluxes. (3 lecture hours per week, field trips). (Prerequisite: ESCI-2421 or consent of the instructor.)

ESCI-3411. Structural Geology

Rock deformation; primary and secondary structures; analysis and classification of folds and faults; interpretation of geologic maps; solution of structural problems. (Prerequisite: ESCI-2411 or consent of instructor.) (3 lecture, 3 laboratory hours a week.)

ESCI-3601. Issues in Resource and Environmental Systems

The complexities and nonlinear feedback mechanisms influencing the dynamic interactions between the allocation and utilization of biotic and abiotic resources in the spatial and temporal domains will be addressed within the conceptual framework of resource management paradigms, theories, and analytical methodologies. Contemporary problems and issues in resource and environmental systems will then be

critically assessed, and best management practices will be appraised. (Prerequisites: ESCI-2600 or consent of instructor.) (3 lecture and/or tutorial hours per week.)

ESCI-3610. Environmental Impact Assessment

History, theories, and principles of environmental impact assessment (EIA) are examined and various methodologies for EIA preparation are evaluated. Relevant environmental ethics, laws, administrative requirements, and case studies for EIAs in Canada are examined. These principles and methods are applied to preparation of an EIA major project (2 lecture hours and 1 tutorial hour per week) (Prerequisites: ESCI-2141 and ESCI-2421) (This is an experiential learning course). (This is an experiential learning course).

ESCI-3701. Spatial Modelling in GIS

This course will explore several types of advanced spatial models (conceptual, mathematical-statistical, process, and spatial) and how these models are used for decision making in various real-world applications. The modelling approaches that may be explored include: multi-criteria decision analysis, fuzzy logic, network models (routing vs. hydrologic), 3-D and terrain assessment, agent-based modelling and artificial intelligence. These approaches will be applied to both vector and raster formats within a GIS framework. Other topics that will be examined include: model selection, calibration, uncertainty and error identification, sensitivity analysis, and validation procedures. (3 lecture and 2 laboratory hours per week). (Prerequisite: ESCI-2701 and 2711).

ESCI-3711. Principles of Instrumental Analysis

The fundamental principles of operation and practical application of modern chemical analytical instrumentation are presented. This course will focus on the acquisition and assessment of qualitative and quantitative chemical data from synthetic, biochemical, and natural materials using instruments and methods that describe the elemental, isotopic, and molecular composition and structure of matter. Topics covered in this course may include atomic and molecular absorption and emission (photoluminescence) spectroscopy, atomic and molecular mass spectroscopy, X-ray spectroscopy, vibrational spectroscopy, and separation methods such as gas and liquid chromatography. (Prerequisite: CHEM-2200 or consent of instructor; Prerequisite for School of the Environmental Majors: ESCI-2131 or consent of instructor.) (3 lecture and 3 laboratory hours per week.) (Cross-listed with CHEM-3210.)

ESCI-3721. Environmental Geophysics

An introduction to the use of seismic, electrical, electromagnetic and other geophysical methods used in near-surface environmental assessment studies. (Prerequisite: ESCI-2101 or consent of instructor) (2 lecture, 3 laboratory hours a week.)

ESCI-3735. Field Methods for Environmental Science

Introduction to field sampling and measurement techniques for environmental science. Includes physical and chemical characterization of soil/sediment, water, air, and biological samples, and the measurement, evaluation, visualization, and reporting of spatial and temporal data. Designed for Environmental Science students. (Prerequisites: ESCI-1100 and ESCI-2131 or consent of instructor.) Requires student participation in field work or lab work of up to 2 weeks in duration. Course schedule and location may vary with term). (This is an experiential learning course).

ESCI-3745. Field Methods for Environmental Studies

An introduction to field and mapping methods with particular emphasis on vegetation, water, and soil/sediment sampling and analysis. Landform identification. Interpretation of topographic maps, use of compass and GPS units. Observation and assessment of sustainable land use practices. (Prerequisites:

ESCI-1120, and ESTU-1100 or consent of instructor.) Requires student participation in field work or lab work of up to 2 weeks in duration. Course schedule and location may vary with term).

ESCI-3751. Environmental Geochemistry

Processes such as element and nutrient cycling, and contaminant mobility in near-surface geologic settings. Topics covered will build knowledge of environmental systems by expanding on concepts of chemical phase equilibria, chemical kinetics, and redox reactions in natural systems. The transformation of both natural and anthropogenic chemical compounds will be discussed. Interactions between terrestrial, freshwater, and marine systems will be covered and will include legacy and emerging contaminants (e.g., acid mine drainage). (Prerequisite: CHEM-2400 or ESCI-2131) (3 lecture and/or tutorial hours per week.)

ESCI-3755. Methods in Great Lakes Geomicrobiology

Field methods used to sample, study and quantify biogeochemical processes across sediment-water environments (wetlands, lakes, and the sediment /water interface) will be emphasized. Attention will focus on microbial field-based water and sediment measurements, as well as sample collection for laboratory determination of fluxes for metals and nutrients. Comparison between stream sediments and suspended particulates will be examined. The course will include an introduction to the ecology of microbially driven redox reactions common in these systems. This course will normally run over two weeks during the summer semester. (Prerequisites: ESCI-1100, ESCI-2131, or consent of instructor.) (This is an experiential learning course.)

ESCI-3761. Geostatistical Analysis in GIS

This course will provide comprehensive examination of geostatistical approaches and how they can be incorporated into a spatial and statistical framework to determine how and why spatial distributions and patterns occur between and amongst humans and their environments. The specific geostatistical approaches that will be covered include methods that analyze patterns (spatial autocorrelation, nearest neighbour), map clusters (hot-spot, groupings and outliers), measure geographic distributions, and model spatial relationships (weighted/land use regressions, correlation matrices). (Prerequisites: ESCI-2711 and STATS-2910 or SOSC-2500 (2 lecture, 2 laboratory hours per week)

ESCI-3771. Geo-Web and Geoportal Development

Internet mapping has become a conventional approach used by the public (citizen science) and various organizations (government, health, utilities) to store, manage and share spatial data. Knowing how to design, construct and administer these online systems has become a necessary skill in the workplace. This course will explore the history of internet mapping, what software is available (proprietary vs. open source) to map spatial data online and how to design interfaces, construct tools and visualize spatial data within geoweb based GUIs and APIs. Process, storage and querying mechanisms for online geodatabases will also be covered. (Prerequisites: ESCI-2711.) (2 lecture, 2 laboratory hours per week.)

ESCI-3801. Scientific Writing and Data Management

Effective communication is fundamental to society and is particularly important in scientific endeavours. The ability to collect, process, analyze, and interpret data, and then communicate the significance of data to others, is fundamental to the scientific researcher and consultant. Students will develop skills in the written and oral communication of scientific thought through exercises in specific grammatical, writing, data processing, and management techniques. (2 lecture, 1 tutorial and 2 laboratory hours per week.) (Prerequisites: ESCI-1100, STAT-2910 or consent of instructor.)

ESCI-3806. School of the Environment: Global Perspectives in Science

This course comprises a trip in Canada or abroad that provide students with global perspectives on earth and environmental science and studies that are inherent to the destination. There will typically be a significant field component to the course in which students will be exposed to various aspects of environmental and earth science. Ancillary fees will apply. Prerequisites will vary depending on the content of a particular section. Trip duration is typically two weeks.

ESCI-4301. Contaminant Hydrogeology

Application of elements of geology, geochemistry, physical chemistry, toxicology, biogeochemistry, and physical hydrogeology toward understanding and quantifying the movement, fate and toxicity of organic and inorganic substances (i.e., contaminants) in environmental systems. Selected topics include site characterization, physicochemical properties of contaminants, human and environmental toxicology, risk assessment, remediation technologies and feasibility, and contaminant transport and attenuation modeling. (2 lecture and 2.5 laboratory/tutorial hours per week.)(Prerequisites: ESCI-2131 and ESCI-3301 or consent of instructor.) (ESCI-3751 is recommended.)

ESCI-4500. Ecosystem Health

The fundamental mechanisms and processes that structure ecosystems, anthropogenic activities that can alter them, and the policy and management used to protect them. Through class discussions and case studies, students develop a practical, problem-solving approach to issues associated with ecosystem health. Topics include food web and ecosystem ecology, ecosystem models, anthropogenic stressors, management methods and models, and national and international policies. (3 lecture hours per week.)(Prerequisites: BIOL-2101 and ESCI-1100 or consent of instructor.)

ESCI-4710. Environmental Site Assessment

An examination of environmental site assessment (ESA) methods and procedures as applied to greenfield and brownfield properties. Includes: major phases of site characterization and assessment (e.g., Phase I and II ESA, risk assessment, feasibility study, corrective action); applicable North American standards and regulations; and critical examination of ESA case studies. (2 lecture hours and 1 tutorial hours per week.) (Prerequisites: ESCI-2101 and ESCI-2131, ESCI-3751 is recommended.)

ESCI-4721. Biogeochemistry

An investigation of global change focusing on the chemical, physical, and biological processes that cycle elements through Earth's systems. Topics covered in this course will include: the role of bacteria in mediating element cycles, the conundrum of the origin of life, microbial impacts on global element cycles, microbe-water-rock interactions (including sorption, oxidation-reduction, methylation of metals, biological degradation of organic molecules). Introduction to molecular biology and isotope techniques to solve environmental problems). (Prerequisites: ESCI-2131) (3 lecture and/or tutorial hours per week.)

ESCI-4808. Special Topics in Earth and Environmental Sciences

Selected topics of current interest. (Prerequisite: consent of instructor and a program advisor.) (3 lecture or project hours a week.) (May be repeated for credit if content changes.)

ESCI-4900. Thesis Research in Environmental Science

Each student will be required to carry out an original research project in Environmental Science and write a report under the supervision of one or more faculty members. The results of the research will also be presented in a public seminar. Students must consult with an Environmental Science counselor prior to enrolling in this course. (A 6.00 credit, two-semester course.) (Restricted to semester 7 and 8 students with a major average of 70% higher.) (This is an experiential learning course).

ESCI-4911. GIS Capstone Research Project

This course will involve designing, managing, and completing a research project that emphasizes the use of a geographic information system (GIS) for a specific application, either individually or in groups of 3 to 4, based on the scope and complexity of the project. Each group or individual will select a suitable spatial problem, with guidance from the instructor, and try to solve the problem by acquiring, organizing, and analyzing data within a GIS by using the necessary theories, tools, programs, etc. that they learned throughout the certificate. Projects must include an extensive analytical component where GIS is central to the methods used. The course will also cover conducting literature reviews, project methodology and organizational design, proper reporting of results and overall project management. Projects may also be undertaken in participation and collaboration with outside community partners, GIS organizations and/or GIS professionals. (Prerequisites: ESCI-3701, ESCI-3761, and ESCI-3771.) (2 lecture hours per week and project work.)

ENVIRONMENTAL STUDIES COURSES

ESTU-1100. Humans and the Environment - An Introduction to Environmental Studies

Humans use energy and resources from our natural surroundings to live, and to develop our societies and cultures. This use has an impact on other animals and plants, and on the air, water, and land. Our impact is now so great that we are in danger of depleting or destroying many of the natural systems on which we depend. This course will examine our relationship with, and impact on, the environment; with reference to the physical, cultural, economic, political, and ethical elements. Sustainable practices will also be discussed. Topics may include: human sustainability and population growth, aquatic and terrestrial sustainability, food and agriculture, water resources, energy production, and climate change. (Can be taken as a Social Science option.) (Three lecture hours per week.)

ESTU-2100. Canadian Regional Environments

Canada is a complex and varied nation. The environmental issues that concern each region of the country are also complex and varied. This course surveys the dominant environmental issues and impacts in each region of Canada, and explores the reasons for the regional variation through a variety of lenses: its physical landscape, its resource opportunities and challenges, its historical settlement patterns and economic development, and its social, cultural, and demographic structure. This context is used to develop an understanding of current environmental news and events across the country. (Can be taken as a Social Science option.) (Three lecture hours per week.)

ESTU-2500. Concepts for Ecosystem Management

An introduction to ecosystem management and how ecological information is used in Canadian environmental policy and programs. This course will examine the current biodiversity crisis, how it relates to ecosystem services and human well-being and common measurement techniques used to characterize and monitor ecosystems, their function and health. Topics will include an overview of ecosystem monitoring techniques including land and aquatic-based survey tools, quantifying ecosystem production, species presence, species diversity and habitat classification. Topics and case studies of ecosystem management related to environmental impact assessment, ecosystem restoration, conservation, non-native species, pest management, and species re-introductions will be introduced. Case studies will be placed in the context of major Canadian and Ontario environmental legislation that utilizes ecological concepts to demonstrate how environmental programs adopt measurements and metrics reviewed in the course. (3 lecture hours per week). (Prerequisites: ESTU-1100 or ESCI-1100; or BIOL-1013 or BIOL-1111).

ESTU-3310. Great Lakes Water Quality Agreement

An overview of the 1909 Boundary Water Treaty (BWT) and Great Lakes Water Quality Agreement (GLWQA) governing the binational strategy for managing water diversions and water quality of the

Laurentian Great Lakes. The course will provide an overview of the history of the agreement and its evolution over various amendments, evaluate major policies and environment programs adopted in Ontario and Canada developed to implement the agreement and demonstrate how the agreement has influenced environmental policy and programs outside of the Great Lakes Basin. The course will also examine the roles of public involvement through various environmental stakeholders and how science shaped the agreement. Case studies documenting historical and recent challenges to the BWT involving diversions of waters outside the Great Lakes, implementation of Remedial Action Plans, Lakewide Management Plans and indicator selection and evaluation will be discussed. (Prerequisite: ESCI-1100 or ESTU-1100 and Semester 3 or above standing, or permission of the instructor.)(3 lecture hours a week.)

ESTU-3500. The Living Earth: Biogeography and the Biosphere

Biogeography is the study of the spatial distribution of both plants and animals. This course will examine the nature of populations and communities influenced by geological, geographical, and biological processes and the factors leading to their distribution past and present (Prerequisites: ESTU-1100 or consent of instructor).

ESTU-3600. Coastal Management

Coastal management centers on the awareness, protection and defense, and development of coastal areas and zones. This course will focus on the history and current state of coastal development on the Great Lakes. Topics such as socio-economic impacts of a changing climate, coastal erosion and natural hazards, governmental legislation and policies, stakeholder perspectives, and sustainable management strategies will be presented and discussed. Pre-requisite: Semester 5 or above standing.

ESTU-4808. Special Topics in Environmental Studies

Students will examine selected environmental topics of current interest, to meet a demonstrated academic need that cannot be satisfied by regular course offerings. This course may be given as a seminar course, or as a directed, self-study course. (Prerequisite: consent of instructor and program counselor.)(Students may repeat the course for credit if the content changes.)

ESTU-4900. Research Project in Environmental Studies

Each student will be required to carry out an original research project in environmental studies and write a report under the supervision of one of more faculty members. The research topic can be in an area relevant to Environmental Studies (e.g., physical geography, sociology, philosophy, political science, etc.) or be interdisciplinary. (Prerequisite: Restricted to students in the BES program with semester 7 or 8 standing, and with a minimum major average of 73%. Students must consult with an Environmental Studies Coordinator and an appropriate faculty supervisor prior to enrolling in the course.) (6.0 credit hour course which counts as two courses, 2 semester course.) (This is an experiential learning course).

ESTU-4910. Environmental Research/Leadership Experience

Students will participate in research and/or leadership training in a field or applied regional, national or international setting, focused on environmental, conservation, and/or sustainability issues. (Prerequisite: permission of program counselor.) (May be repeated for credit if host program or content changes.) Several regional, national, and international programs invite students to participate in environmental research or leadership training in environmental settings around the world. Academic credits are granted through a host University, and may be transferred to the University of Windsor via a Letter of Permission, arranged before the program begins. Because enrolment in these programs may be limited, and visa or other immigration documents may be necessary for international programs, students should apply as early as possible. For further information, contact the program counsellor. (This is an experiential learning course).

INTEGRATIVE BIOLOGY

PROGRAM INFORMATION AND REGULATIONS

Placement

Students without Grade 12“U” Biology or equivalent and who were admitted to other University programs may be allowed to substitute Biology BIOM-1003 and BIOL-1013 as prerequisites for Biology BIOL-1101 and BIOL-1111 provided that a combined average of at least 70% is obtained in those courses. However, they will not receive credit towards a BSc degree in Biological Sciences for BIOM-1003 and BIOL-1013.

Areas of Study in Biological Sciences

The BSc in Biological Sciences provides entry to a broad range of teaching, research, and biomedical careers. Most require formal, post-graduate training, and it is the student's responsibility to determine, as early as possible, the specific requirements of programs to which he or she wishes to proceed.

Programs in Biological Sciences provide a solidly based background ensuring that the general requirements of post-graduate programs will be fulfilled. The array of courses offered is such that students may emphasize areas of particular interest or aptitude. Advice on career paths and on course selection is available to students through a student advising program. Pursuit of the Honours with thesis degree is strongly recommended for professional advancement in science.

Note:

1. ECON-XXXX courses will be counted as Social Science course in all programs in Biological Sciences.
2. Only students who have maintained a major average of 70% and a cumulative average of 60% will be permitted to enroll in BIOL-4904.

Preparation for Graduate and Professional Schools

Courses are available to permit the student to become fully prepared for entry into medical, dental, pharmacy, and other professional schools, as well as graduate programs in the biological sciences. Pre-professional advising is available in the Faculty of Science Office, Essex Hall. Students should seek advice on course selection early in their program.

PROGRAMS

Honours Biological Sciences

Undergraduate students may be allowed, with the consent of the instructor, to take one graduate course for credit.

Degree Requirements

Total courses: forty.

- (a) twenty courses, including the “Core” courses BIOL-1101, BIOL-1111, BIOL-2101, BIOL-2111, BIOM-2131, and BIOL-2142; and fourteen other Biology (BIOL-and BIOM-) courses. At least nine courses must be at the 3000 level or above. (Recommended: BIOL-2071 and BIOL-3022.)
- (b) eight Science courses, including CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, STAT-2910, MATH-1720 (or MATH-1760)*, and at least one pair of both ESCI-1100 and ESCI-1111, or both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310), or both COMP-1047 or COMP-2067 and COMP-2057, or both COMP-1400 and COMP-1410, or both ESCI-1130 and ESCI-2400;
- (c) six additional Science courses excluding *ECON-XXXX and including additional courses in Biology. At least two of these courses must be at the 3000 level or above;
- (d) four courses from Arts/Languages or Social Sciences, with at least one from each;
- (e) two courses from any area of study.

*ECON-XXXX courses will be counted as Social Science courses.

Courses used to calculate the major average are: courses listed under requirement (a), and any other BIOL and BIOM courses taken.

Honours Biological Sciences with Thesis

Undergraduate students may be allowed, with the consent of the instructor, to take one graduate course for credit.

Degree Requirements

Total courses: forty.

- (a) twenty courses, including the “Core” courses BIOL-1101, BIOL-1111, BIOL-2101, BIOL-2111, BIOM-2131, and BIOL-2142; and fourteen other Biology (BIOL-and BIOM-) courses including BIOL-4904 or BIOM-4904*. At least nine courses must be at the 3000 level or above. (Recommended: BIOL-2071 and BIOL-3022.)
- (b) eight Science courses, including CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, STAT-2910, and MATH-1720 (or MATH-1760)**, and at least one pair of both ESCI-1100 and ESCI-1111, or both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310), or both COMP-1047 or COMP-2067 and COMP-2057, or both COMP-1400 and COMP-1410, or both ESCI-1130 and ESCI-2400;
- (c) six additional Science courses, excluding **ECON-XXXX and including additional courses in Biology. At least two of these courses must be at the 3000 level or above;
- (d) four courses from Arts/Languages or Social Sciences, with at least one from each;

(e) two courses from any area of study.

*Only students who have maintained a major average of 70% and a cumulative average of 60% will be considered for enrolment permitted to enroll in BIOL-4904 or BIOM-4904. Registration in BIOL-4904 and BIOM-4904 is competitive and requires the consent of the Course Instructor.

**ECON-XXXX courses will be counted as Social Science courses

Courses used to calculate the major average are: courses listed under requirement (a), and any other BIOL or BIOM courses taken.

Honours Biological Sciences - Interdisciplinary Health Science (IHS) Stream

Degree Requirements

Total courses: forty.

- a) twenty courses, including the “Core” courses BIOL-1101, BIOL-1111, BIOL-2101, BIOL-2111, BIOM-2131, and BIOL-2142; and fourteen other Biology (BIOL- and BIOM-) courses. At least nine courses must be at the 3000 level or above. (Recommended: BIOL-2071 and BIOL-3022.)
- (b) eight Science courses, including CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, STAT-2910, MATH-1720 (or MATH-1760)*, and at least one pair of both ESCI-1100 and ESCI-1111, or both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410, or both COMP-1047 or COMP-2067 and COMP-2057, or both COMP-1400 and COMP-1410, or both ESCI-1130 and ESCI-2400;
- (c) three IHS core courses (IHSC-1000, IHSC-3000, IHSC-4000)
- (d) eight courses from one selected IHS concentration
- (e) one course from Arts/Languages or Social Sciences

*It is recommended that students who have taken MATH-1720 (or MATH-1760) also take MATH-1730.

**ECON-XXXX courses will be counted as Social Science courses.

Courses used to calculate the major average are: courses listed under requirement (a), and any other BIOL and BIOM courses taken.

BSc Honours in Behaviour, Cognition and Neuroscience (with Thesis)

This is a joint offering with the Department of Psychology.

Neuroscience is a strong and growing field that strives to understand brain function at the molecular, behavioural and cognitive levels. This interdisciplinary program comprises required courses primarily from the departments of Biological Sciences and Psychology. Students also participate in bi-weekly research colloquia. In their final year, students prepare a research-based thesis in behaviour, cognition or neuroscience. Students must maintain an average of 70% or higher in Biology and Psychology courses. Entry to the fourth-year thesis course, PSYC-4960, requires a psychology average of 80% or higher for Behaviour, Cognition and Neuroscience majors. Only students who have maintained a major average of 70% and a cumulative average of 60% will be considered for enrolment in BIOL-4904. Registration in BIOL-4904 is competitive and requires the consent of the Head of Department.

Degree Requirements

Total courses: forty.

- (a) Biological Sciences: BIOL-1101, BIOL-1111, BIOL-2040, BIOL-2101, BIOL-2111, BIOM-2131, BIOL-2480, BIOL-2142, BIOL-4450, and BIOL-4481; plus one additional biology (BIOL- and BIOM-) course.
- (b) Psychology: PSYC-1150, PSYC-1160, PSYC-2230, PSYC-2560, PSYC-3130, PSYC-3220 (or PSYC-3230), PSYC-3350, PSYC-3530, PSYC-3580 and one of PSYC-3370, PSYC-4230, or PSYC-4570.
- (c) Biological Sciences or Psychology: BIOL-3230 or PSYC-3550; BIOL-3022 (or PSYC-2300); and an honours thesis in the area of behavioural or cognitive neuroscience chosen from BIOL-4904, or BIOM-4904 or PSYC-4960 and PSYC-4970, or CHEM-4900, or KINE-4780.
- (d) STAT-2910 or SOSC-2500;
- (e) one pair of both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310), or both COMP-1047 (or COMP-2067) and COMP-2057, or both ESCI-1100 and ESCI-1111, or both ESCI-1130 and ESCI-2400;
- (f) CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010;
- (g) two courses from Arts and Social Sciences excluding Psychology;
- (h) four courses at 3000-level or above in Biology, Chemistry, Psychology, or Kinesiology;
- (i) two courses from any area of study MATH-1720 (or MATH-1760) is recommended).

Non-credit course: Colloquia and Seminars in Current Behaviour, Cognitive and Neuroscience Research: bi-weekly presentations of recent research by investigators within the university and from other universities and research institutions. Attendance by key faculty members and all students is expected. A notation will be added to the student's transcript upon successful completion of the course.

Recommended Course Sequence

First Year: ten courses, including BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110, PSYC-1150, PSYC-1160, SOSC-2500 or STAT-2910; at least one pair of both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310) or both COMP-1047 (COMP-2067) and COMP-2057, or both ESCI-1100 and ESCI-1111, or both ESCI-1130 and ESCI-2400, and one additional course (MATH-1720 (or MATH-1760) recommended).

Second Year: ten courses, including BIOL-2040, BIOL-2101, BIOL-2111, BIOM-2131, BIOL-2480, PSYC-2230, PSYC-2300, CHEM-2300 and BIOC-2010.

Third Year: ten courses, including PSYC-2560, BIOL-2142, BIOL-3230 or PSYC-3550*, PSYC-3130, PSYC-3530, and PSYC-3580

Fourth Year: ten courses: including PSYC-3220 (or PSYC-3230), PSYC-3350, BIOL-4481, one of PSYC-3370, PSYC-4230, or PSYC-4570, BIOL-4904 (or BIOM-4904 or PSYC-4960 and PSYC-4970, or CHEM-4900, or KINE-4780), and BIOL-4450.

*BIOL-3230 or PSYC-3550 should be taken in third or fourth year.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any other BIOL, BIOM, or PSYC courses taken.

BSc Honours in Behaviour, Cognition and Neuroscience (without Thesis)

This is a joint offering with the Department of Psychology.

Neuroscience is a strong and growing field that strives to understand brain function at the molecular, behavioural and cognitive levels. This interdisciplinary program comprises required courses primarily from the departments of Biological Sciences and Psychology. Students also participate in bi-weekly research colloquia.

Degree Requirements

Total courses: forty.

- (a) Biological Sciences: BIOL-1101, BIOL-1111, BIOL-2040, BIOL-2101, BIOL-2111, BIOM-2131, BIOL-2480, BIOL-2142, BIOL-4450, and BIOL-4481; plus one additional biology (BIOL- and BIOM-) course.
- (b) Psychology: PSYC-1150, PSYC-1160, PSYC-2230, PSYC-2560, PSYC-3130, PSYC-3220 (or PSYC-3230), PSYC-3350, PSYC-3530, PSYC-3580 and one of PSYC-3370, PSYC-4230, or PSYC-4570.
- (c) Biological Sciences or Psychology: BIOL-3230 or PSYC-3550; BIOL-3022 (or PSYC-2300);
- (d) STAT-2910 or SOSC-2500;
- (e) one pair of both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310), or both COMP-1047 (or COMP-2067) and COMP-2057, or both ESCI-1100 and ESCI-1111, or both ESCI-1130 and ESCI-2400;
- (f) CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010;
- (g) two courses from Arts and Social Sciences excluding Psychology;
- (h) six courses at 3000-level or above in Biology, Chemistry, Psychology, or Kinesiology;
- (i) two courses from any area of study MATH-1720 (or MATH-1760) is recommended).

Non-credit course: Colloquia and Seminars in Current Behaviour, Cognitive and Neuroscience Research: bi-weekly presentations of recent research by investigators within the university and from other universities and research institutions. Attendance by key faculty members and all students is expected. A notation will be added to the student's transcript upon successful completion of the course.

Recommended Course Sequence

First Year: ten courses, including BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110, PSYC-1150, PSYC-1160, SOSC-2500 or STAT-2910; at least one pair of both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410 (or PHYS-1310) or both COMP-1047 (COMP-2067) and COMP-2057, or both ESCI-1100 and ESCI-1111, or both ESCI-1130 and ESCI-2400, and one additional course (MATH-1720 (or MATH-1760) recommended).

Second Year: ten courses, including BIOL-2040, BIOL-2101, BIOL-2111, BIOM-2131, BIOL-2480, PSYC-2230, PSYC-2300, CHEM-2300 and BIOC-2010.

Third Year: ten courses, including PSYC-2560, BIOL-2142, BIOL-3230 or PSYC-3550*, PSYC-3130, PSYC-3530, and PSYC-3580

Fourth Year: ten courses: including PSYC-3220 (or PSYC-3230), PSYC-3350, BIOL-4481, one of PSYC-3370, PSYC-4230, or PSYC-4570.

*BIOL-3230 or PSYC-3550 should be taken in third or fourth year.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any other BIOL, BIOM, or PSYC courses taken.

Combined Honours Biological Sciences Programs

Degree Requirements

Total courses: forty.

(a) Biological Sciences: fourteen (BIOL-and BIOM-) courses, including the "Core" courses of BIOL-1101, BIOL-1111, BIOL-2101, BIOL-2111, BIOM-2131, and BIOL-2142. In addition to BIOL-2142, at least five courses must be at the 3000 level or above.

(b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) CHEM-1100, CHEM-1110, CHEM-2300, BIOC-2010, MATH-1720 (or MATH-1760), STAT-2910, and one pair of both COMP-1047 or COMP-2067 and COMP-2057, or both COMP-1400 and COMP-1410, or both ESCI-1100 and ESCI-1111, or both PHYS-1300 and PHYS-1310, or both PHYS-1400 and PHYS-1410, or both ESCI-1130 and ESCI-2400.

(d) additional courses from any area of study to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Biological Sciences

Major Concentration: BIOL-2101; BIOL-2111; BIOM-2131; BIOL-2142; CHEM-2300; BIOC-2010; one additional 2000-level course; two 2000 or 3000-level courses; three 3000-level or above courses. (Additional requirements: BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110.)

Minor Concentration: BIOL-2101; BIOL-2111; BIOM-2131; BIOL-2142; one other 2000-level course; one 3000-level or above courses. (Additional requirements: BIOL-1101, BIOL-1111, CHEM-1100, CHEM-1110.)

Minor in Biological Sciences

The minor in Biological Sciences consists of six courses including BIOL-1101, BIOL-1111, plus four BIOL- or BIOM- courses at the 2000 level or above, one of which must be at the 3XXX level or above. Courses that cannot count toward the Biological Sciences minor are BIOL-1013, BIOM-1073, and BIOM-2093. A minimum grade of 60% must be received in each course.

INTEGRATIVE BIOLOGY COURSES

Students must normally have completed the prerequisites indicated, but under special circumstances may be permitted to take a particular course with the consent of the instructor.

Not all courses listed will necessarily be taught each year. Where enrollment limits are placed on specific courses, students who require these courses as part of their program will be given preference.

BIOL-1013. Organisms and the Environment

Organisms interacting with other organisms and with their physical environment. Ecological impacts of human activity. This course is offered on-campus and as a distance course. (Intended for non-majors and students requiring preparation for BIOL-1111 and BIOL-1101.)(Not counted for credit in any Faculty of Science program.) (2 lecture hours a week.)

BIOL-1101. Cell Biology

Examination of the principles governing living systems, with emphasis on the molecular and cellular basis of life, molecular genetics, energetics, differentiation, and development. (Grade 12 “U” Biology or equivalent, or BIOM-1003 and BIOL-1013 are strongly recommended) (3 lecture, 3 laboratory hours a week.)

BIOL-1111. Biological Diversity

Principles governing living systems; the origins and diversity of life; evolution, reproduction, and heredity; the structure and function of viruses through plants and animals; basic principles of ecology. (Grade 12 “U” Biology or equivalent, or BIOM-1003 and BIOL-1013 are strongly recommended) (3 lecture, 3 laboratory hours a week.)

BIOL-2040. Human Physiology I

Introduction to human physiology: a systems approach. Topics include homeostasis and feedback control, enzymes and energy, membrane transport, metabolism, and the nervous, skeletal muscle, and cardiovascular systems. This course is offered on-campus and a distance course. (Prerequisites: any two first year biology courses.) (3 lecture hours a week.)

BIOL-2050. Human Physiology II

Introduction to human physiology: a systems approach. Topics include respiratory, endocrine, digestive and renal systems, and control of metabolism. (Prerequisite: BIOL-2040 or consent of instructor.) (3 lecture hours a week.)

BIOL-2063. Principles of Biological Anthropology

A biocultural perspective of human genetic and phenotypic variation in an evolutionary context including but not limited to: comparisons to other primates; identifying sources and nature of variation in living humans and critique of race; investigations of illness in the past and present; and the study of extinct species. May be taken by Science students for credit but does not count as a Science option towards the fulfillment of the specified requirements for the Biological Sciences and Behaviour, Cognition and Neuroscience degrees.

BIOL-2070. Introductory Microbiology

Growth, genetics, structure, physiology, and diversity of microbes and viruses. This course is offered on-campus and as a distance course. (Prerequisites: any two first year biology courses; Antirequisite: BIOL-2071.) (3 lecture hours a week.)

BIOL-2071. Introductory Microbiology and Techniques

Growth, genetics, structure, physiology, and diversity of microbes and viruses. (Antirequisites: BIOL-2070; prerequisites: BIOL-1111 and BIOL-1101.) (3 lecture, 3 laboratory hours a week including follow-up visits outside scheduled times)

BIOL-2080. Economic Botany

Earth’s biosphere is the product of plant activity and animal life and is ultimately dependent on plants. This course provides basic plant biology as a background to a discussion of the relationship between

humans and plants, particularly economically important plants and their products. Plants used for food, flavours, drugs, stimulants, fuel and/or industrial raw materials will be explored. (Prerequisite: BIOL-1111 and BIOL-1101 or permission of the instructor.) (3 lecture hours.) (This is an experiential learning course).

BIOL-2101. Ecology

Introduction to the fundamental concepts of ecology including factors affecting species distribution, reproductive strategies, population growth and regulation, species interactions, and community level organization and energetics. (Prerequisites: BIOL-1111, or BIOL-1013 with instructor approval) (3 lecture, 3 laboratory/discussion hours a week.)

BIOL-2111. Genetics

The course reviews transmission genetics and principles of inheritance. The material also includes non-nuclear inheritance and gene linkage, gene expression and regulation, mechanisms and phenotypic effects of DNA mutation and repair, and the principles and applications of population and quantitative genetics. Students will be exposed to molecular genetic techniques such as PCR and DNA sequencing. (Antirequisite: BIOM-2093; Prerequisite: BIOL-1111 and BIOL-1101.) (3 lecture, 3 laboratory hours a week.)

BIOL-2142. Principles of Evolution

This course explores the fundamental mechanisms of population and species evolution through selection and genetic drift. Topics include the interaction of gene mutation, selection, and population characteristics in the process of microevolution, mechanisms of speciation in macroevolution, and current applications in evolutionary analysis. (Prerequisite: BIOL-1111.) (3 lecture hours a week.)

BIOL-2480. Principles of Neuroscience

This course is meant to serve as a survey course that will provide familiarity with and an understanding of the basic principles of Neuroscience. The main emphasis will be on the morphology of neural systems, processes of neural signalling and communication, and how such basics relate to sensory processes and behaviour. The main purposes of the course are to provide a background for students interested in, and those taking higher level courses related to the neurosciences. (Prerequisites: BIOL-1111, BIOL-1101, and BIOL-2040 (or KINE-2600), or permission of instructor.) (3 lecture hours.)

BIOL-3022. Research Principles and Study Design in Biological Sciences

Introduction to the logic and principles used to develop sound and efficient studies in the biological sciences: generating, testing, and discriminating among hypotheses; dealing with unwanted sources of variation; ; selecting and executing statistical analyses and evaluating their assumptions and appropriate choice of statistical analysis. Instruction in the use of selected network and personal computer software for data analysis and presentation. (Prerequisites: BIOL-2101, BIOL-2111, BIOM-2131, and STAT-2910, or consent of instructor.) (3 lecture, 2 laboratory/tutorial hours a week.)

BIOL-3201. Applied Entomology

Students will become familiar with insect taxonomy, anatomy, physiology, behaviour and ecology and apply this knowledge in studying the utility of insects within the applications of pest management, disease transmission and legal investigations. The course will cover the detection, collection, identification and analysis of insect evidence, as well as the current state of knowledge in the use of insect evidence. (Prerequisites: BIOL-2101 and semester 5 standing or above) (Cross-listed with FRSC-3201)

BIOL-3212. Environmental Physiology

This course is designed to introduce students to the diversity of adaptations possessed by organisms (including humans) enabling them to successfully interact with and survive in their abiotic/biotic environments. Topics will include overviews of the mechanisms organisms use to balance energetics, homeostasis and metabolism in environments varying in temperature, water availability, resources and oxygen. Descriptions of these systems will be supplemented frequently with the current methods that medical-, field- and laboratory-based researchers use to investigate these physiological adaptations to the environment. (Prerequisite: BIOL-2101 or consent of instructor) (3 lecture hours, 1 tutorial hour a week)

BIOL-3230. Animal Behaviour

This course will emphasize the link between organisms and their environment. The thrust of the course will be to understand why different species behave in different ways and why within species there may be individual differences in behaviour. The aim of the course is to derive a basic understanding of how animals have evolved behaviours that aid in survival and reproduction. Students will gain experience by participating in activities throughout the term. (Prerequisites: BIOL-2101, BIOL-2111, and BIOM-2131, or permission of instructor.) (3 lecture hours a week.)

BIOL-3241. Fishes and Fisheries

The fishes are the most diverse, the oldest, and the most abundant group of vertebrates on earth. This course surveys their evolution, their phylogenetic relationships, and their morphological, physiological, behavioural, and ecological adaptations to life in virtually every aquatic environment on earth. The laboratory includes units on gross anatomy of a typical actinopterygian fish, identification of local fauna, study of age and growth, and other selected topics. (Prerequisites: BIOL-2101, BIOL-2111, BIOM-2131.) (3 lecture, 3 laboratory hours a week) (This is an experiential learning course.)

BIOL-3250. Population and Community Ecology

This course will examine the ecology of individual populations and the interactions of species within communities. Topics of population ecology will investigate ecological patterns and dynamics, as well as population growth and regulation, linking to processes occurring at lower (individual and within-individual) and higher (species interactions, communities, and ecosystems) levels of biological organization. Topics of community ecology will build upon these same ideas, but by examining the dynamics of assemblages of populations of two or more species co-occurring in the same geographic area. (Prerequisite: BIOL-2101.) (3 lecture hours a week.)

BIOL-3261. Biology of Birds

This course gives students a thorough understanding of the biology of birds, with an emphasis on avian ecology, evolution, and behaviour. This course complements Ecology, Evolution, Physiology, Animal Behaviour, and Conservation. Classroom lectures are integrated with laboratory exercises which provides students with hands-on exposure to the topics covered. (Prerequisite: BIOL-2101.) (3 lecture, 3 laboratory hours a week.) (This is an experiential learning course.)

BIOL-3281. Plant Ecology

Evolutionary and community aspects of plant interactions with other organisms and the physical environment. The course deals with plant demography at different levels: individual, population, community, and ecosystem. (Prerequisite: BIOL-2101.) (3 lecture, 3 laboratory hours a week.)

BIOL-3291. Invertebrate Biology

Survey of major classes of the invertebrates from an evolutionary, phylogenic, and ecological perspective. Emphasis on the morphological, physiological, and behavioural adaptations that permit animals to exploit the full range of earth's habitats, including the living bodies of other organisms

(parasitism). (Prerequisites: BIOL-2101, BIOL-2111, and BIOM-2131.) (3 lecture, 3 laboratory hours a week.)

BIOL-3571. Animal Cells and Tissues

The structure and organization of animal systems at the tissue, cellular, and subcellular levels. Contemporary techniques, including electron microscopy, immunocytochemistry, and in situ hybridization are discussed. (Prerequisites: BIOL-2111 and BIOM-2131.) (2 lecture, 3 laboratory hours a week.)

BIOL-4008, BIOL-4208, BIOL-4408, BIOL-4508. Special Topics in Biology

Selected topics of current interest which may vary from year to year. (May be repeated for credit if content changes.)

BIOL-4212. Speciation

The course will present an overview of current knowledge, controversy and research directions into the origin of species and will include topics such as species concepts, methods of studying speciation, tempo and modes of speciation, isolation mechanisms, reinforcement, and macroevolution. Background in basic Mendelian genetics, population genetics, evolution, ecology and biological diversity is required. (Prerequisite: BIOL-2142) (2 lecture hours, 1 tutorial hour a week)

BIOL-4220. Science Communication: A Biological Approach

The purpose of this course is to have students learn the theories and best practices of science communication to the non-scientist, with an emphasis on biological problems and perspectives. Students will learn about different venues and types of scientific communication and will use hands-on examples to develop standards of best practice. Students will participate in weekly discussions and readings, culminating in a final presentation of their work. (Prerequisites: BIOL-2101 and BIOL-2142, or permission of the instructor.) (3 lecture hours.)

BIOL-4241. Stream Ecology

Physical properties and biotic responses in rivers, including morphometry, energy processing, behavioural adaptations of organisms, and interactions among organisms. (Prerequisite: BIOL-2101.) (3 lecture, 3 laboratory hours a week, and a field trip.)

BIOL-4252. Evolutionary Endocrinology

This course will examine the molecular, cellular and organismal processes underlying the functioning of the major vertebrate endocrine systems. Topics will include overviews of the major vertebrate endocrine systems (e.g., reproductive, stress, metabolic, developmental etc.) by integrating recent medical-, field- and laboratory-based experimental research to explore the role of endocrine systems in our lives. The evolutionary role of hormones will be emphasized throughout as a means for medical health practitioners and environmental biologists to appreciate how and why complex endocrine systems are impacted by human-induced changes in the environment. (Prerequisite: BIOL-2101 or consent of instructor) (3 lecture hours, 1 tutorial hour a week)

BIOL-4262. Animal Communication

This course will cover mechanistic and evolutionary aspects of communication in vertebrates and invertebrates across four signaling modalities: visual, acoustic, chemical, and electrical. The first part of the course will review mechanisms of signal production, transmission through the environment, and perception by signal receivers for each signaling modality. The second part of the course will examine how natural and sexual selection shape the evolution of communication strategies in animals. The approach will be explicitly evolutionary, and will draw from a broad range of disciplines including physics,

chemistry, ecology, psychology, and behavioural ecology. (Prerequisite: BIOL-2101.) (3 lecture hours per week. 2 tutorial hours every other week.)

BIOL-4270. Conservation Biology

Principles of conservation biology emphasizing population and biogeographic attributes, including genetics, habitat fragmentation, and island processes, which characterize endangered species and habitats. Case studies of management of threatened species and habitats will be addressed. (Prerequisites: BIOL-2101 and BIOL-2111, or consent of instructor.) (3 lecture hours a week.)

BIOL-4280. Limnology

Selected aspects of the ecology of large water masses - large lakes and estuaries. Emphasis on physical properties and chemical dynamics of aquatic systems, and on life history requirements in such systems. (Prerequisite: BIOL-2101 or BIOL-4864.) (3 lecture hours a week.)

BIOL-4450. Behavioural Neurobiology

This course will cover the structural, physiological, and biochemical mechanisms in the nervous system that are important for animal natural behaviours. In-depth case studies will be conducted to examine how animals have developed neural mechanisms for solving behavioural problems encountered in their environmental niches. Topics will be related to sensory processing, motor control, and learning and memory. Research methods used in the study of neural mechanisms of behaviour will also be discussed. (Prerequisite: BIOL-2480) (3 lecture hours a week)

BIOL-4481. Excitable Cells

A systemic view of regulation in the nervous system. Physiological control mechanisms at the levels of molecules through cells, neural circuits and neural muscular regulation are discussed and investigated. (Prerequisites: BIOM-2131 and BIOL-2480.) (2 lecture, 3 laboratory hours a week.)

BIOL-4570. Plant Molecular Biology and Physiology

Plant development and its coordination by means of hormones and other molecular signals. Molecular approaches applied to the analysis and modification of plant development will be discussed. (Prerequisite: BIOM-2131.) (2 lecture hours, 1 seminar hour a week.) (This is an experiential learning course).

BIOL-4864. Great Lakes Field Biology

The physical, chemical, and biological properties of the Great Lakes system; measures of transport and fate of contaminants in aquatic systems and food webs; changes in species abundance, composition, and distributions. Field work stresses sampling techniques and measurements of temporal and spatial variation. Students are required to complete a project and present a seminar. (Prerequisites: BIOL-2101 and STAT-2910, or consent of instructor.) (2 weeks, Intersession; 26 hours lecture, 52 hours field/laboratory work, 8 hours seminar.)

BIOL-4874. Field Course in Tropical Ecology

This two-week field course is a hands-on exploration of the flora and fauna of the tropics with an emphasis on ecology, behaviour, evolutionary adaptations, and community relationships. The course is normally held in Costa Rica but may occasionally be offered at other sites in the Neotropics. Field research will include identifying birds, mammals, reptiles, amphibians, insects, and plants; studying the ecology of neotropical animals in multiple ecosystems; capturing and banding birds; monitoring the social behaviour of monkeys; observing army ants, leaf-cutter ants, termites, ant/acacia mutualisms; and assessing different conservation practices. The course consists of field excursions, lectures, and data collection for independent projects. Project reports are submitted within one month of the completion of

the course field component. The course will usually take place during the Winter Study Week and one week before or after. (Pre-requisite: BIOL-2101 and permission of instructor)

BIOL-4904. Undergraduate Research in Biology

Completion of an undergraduate research project, including an oral presentation at an annual colloquium and submission of written final report. (10 laboratory hours a week; offered over two terms.) (A 6.00 credit hour research project which counts as two courses.) (Registration and selection of a supervisor requires the consent of the Department Head) (Prerequisites: major average of 70% and a cumulative average of 60%.) (This is an experiential learning course).

BIOL-4914. Undergraduate Research in Biology

Completion of an undergraduate research project, including an oral presentation at an annual colloquium and submission of written final report. (Registration and selection of supervisor will be completed with consent of the Department Head.) (Restricted to students who have completed BIOL-4904.) (10 laboratory hours a week; offered over two terms.) (A 6.00 credit hour research project which counts as two courses.) (This is an experiential learning course).

MATHEMATICS AND STATISTICS

PROGRAM REGULATIONS

All programs in Mathematics are subject to the general University and Faculty of Science regulations as outlined in the relevant sections of this calendar. Additionally, Mathematics majors must obtain a 60% or better in each Mathematics or Statistics course which is explicitly required in their program of registration. Students registered in the combined Mathematics and Computer Science Honours program also must obtain at least 60% in all required Computer Science courses.

SUGGESTED COURSES FOR MATHEMATICS SPECIALIZATIONS

Pure Mathematics: COMP-2310, MATH-3270, MATH-4220, MATH-4230, MATH-4580

Statistics: COMP-2310, STAT-3920, STAT-3950, and MATH-4580.

Applied Mathematics: COMP-2310, MATH-3550, MATH-3960, PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2500, PHYS-3500, PHYS-4100, and STAT-3960.

Actuarial: MATH-3960, ACSC-3980, ACSC-4980, ACSC-4981, STAT-3920, STAT-3950, STAT-3960, STAT-4980, STAT-4981, ACCT-1510, ACCT-2550, FINA-2710, and FINA-4740.

PROGRAMS

General Mathematics

Degree Requirements

Total courses: thirty.

(a) MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2780, MATH-2790, MATH-3590, STAT-2920 and STAT-2950; plus four other MATH, STAT or ACSC courses at the 2XXX level or above.

(b) COMP-1400 and COMP-1410;

(c) four courses from the Faculty of Arts, Humanities and Social Sciences;

(d) three courses from any area of study, including Mathematics and Statistics;

(e) eight courses from any area of study, excluding Mathematics and Statistics.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken with the MATH, STAT, or ACSC prefix.

Honours Mathematics

Degree Requirements

Total courses: forty.

- (a) MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3200, MATH-3580, MATH-3581, MATH-3590, STAT-2920, STAT-2950; plus eight more MATH, STAT or ACSC courses at the 3XXX level or above.
- (b) COMP-1400 and COMP-1410;
- (c) four courses from Faculty of Arts, Humanities and Social Sciences;
- (d) twelve courses from any area of study.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken with the MATH, STAT, or ACSC prefix.

Honours Mathematics and Statistics

Degree Requirements

Total courses: forty.

- (a) MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3200, MATH-3580, MATH-3581, MATH-3590, STAT-2920, STAT-2950, STAT-3920, STAT-3950; plus two additional Statistics courses (STAT) at the 3XXX-level or above; plus eight more MATH, STAT or ACSC courses at the 3XXX level or above.
- (b) COMP-1400 and COMP-1410;
- (c) four courses from Faculty of Arts, Humanities and Social Sciences;
- (d) eight courses from any area of study.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken with the MATH, STAT, or ACSC prefix.

Honours Mathematics and Computer Science

This is a joint offering between the School of Computer Science and the Department of Mathematics and Statistics.

Degree Requirements

Total courses: forty.

- (a) Mathematics and Statistics: MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3200, MATH-3580, MATH-3581, MATH-3590, STAT-2920, STAT-2950; plus two MATH, STAT or ACSC courses numbered 3XXX or higher.
- (b) Computer Science: COMP-1000, COMP-1400, COMP-1410, COMP-2120, COMP-2140, COMP-2310, COMP-2540, COMP-2560, COMP-2650, and COMP-3150; plus three additional COMP courses at the 3XXX level or above.

(c) four Mathematics, Statistics, or Computer Science courses at the 2000 level or above, excluding COMP-2057, COMP-2067, COMP-2077, COMP-3057 and STAT-2910.

(d) seven courses from any area of study.

Courses used to calculate the major average are: courses listed under requirements (a) to (c), and any courses taken with the MATH, STAT, or ACSC prefix.

Honours Mathematics with Finance Concentration

This is a joint offering between the Department of Mathematics and Statistics and the Odette School of Business.

Degree requirements

Total courses: Forty

(a) MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3580, MATH-3581, MATH-3590, MATH-4960, STAT-2920, STAT-2950, STAT-3920, STAT-3950, STAT-3960, ACCT-1510, ACCT-2510, FINA-2700, FINA-2710, FINA-3710, FINA-3720, FINA-3790, FINA-4720, FINA-4770

(b) ECON-1100, ECON-1110, ECON-3130, ECON-4140, COMP-1400, COMP-1410, COMP-2120, PHIL-2240

(c) Six courses from any area of study excluding Business and Mathematics and Statistics.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken with the MATH, STAT, or ACSC prefix.

Honours Actuarial Science

Degree requirements

Total courses: 40

(a) MATH-1020, MATH-1250, MATH-1720, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3200, MATH-3580, MATH-3581, MATH-3590, MATH-3960, ACSC-3980, ACSC-4980, ACSC-4981, STAT-2920, STAT-2950, STAT-3920, STAT-3950, STAT-3960, STAT-4550, ACSC-4030, three courses from MATH, STAT or ACSC at the third year level or higher.

(b) COMP-1400, COMP-1410, ECON-1100, ECON-1110, ACCT-1510, FINA-2700

(c) Two courses from the Faculty of Arts, Humanities and Social Sciences

(d) Six courses from any area of study

Courses used to calculate the major average are all courses taken with the MATH, STAT, or ACSC prefix.

Combined Honours Mathematics Programs

Degree Requirements

Honours programs combining Mathematics with a second Honours area of study (other than Computer Science) will consist of:

Total courses: forty.

(a) Mathematics and Statistics: MATH-1020, MATH-1250 or MATH-1260, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3200, MATH-3580, MATH-3581, MATH-3590, STAT-2920, STAT-2950; plus two additional MATH, STAT or ACSC courses at the 3XXX level or above.

(b) Course Requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.

(c) COMP-1400 and COMP-1410;

(d) any additional courses as determined by the second area of study;

(e) additional courses, if necessary, from any area of study to a total of forty courses.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken with the MATH, STAT, or ACSC prefix.

Concurrent Bachelor of Mathematics (General)/Bachelor of Education

Admission is to first-year only with a minimum of 80%.

This is a joint offering between the Department of Mathematics and Statistics and the Faculty of Education. See Faculty of Education for details.

Honours Business Administration and Mathematics (with/without thesis and with/without Specialization)

This is a joint offering between the Department of Mathematics and Statistics and the Odette School of Business. See Odette School of Business for details.

Certificate in Statistical Consulting

Open only to students currently enrolled in a degree program, are in good academic standing in their program, and meet the admission requirements for a program in Mathematics and Statistics.

Total courses: 9

(a) SCIE-1000

(b) MATH-1730, MATH-2250, STAT-2950, STAT-4980, STAT-4981, STAT-4460, STAT 4550,

(c) STAT-4600

The necessary suite of prerequisite courses outside of the certificate are MATH-1020, 1720, 1250 AND 1730 and STAT-2920.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Mathematics and Statistics

Major Concentration: MATH-1020, MATH-1250, MATH-2250, MATH-2251, MATH-2780, MATH-2790, STAT-2920, STAT-2950; four of MATH-3160, MATH-3200, MATH-3270, MATH-3580, MATH-3581, MATH-3590, STAT-3960. (Additional requirements: MATH-1720, MATH-1730.)

Minor Concentration: MATH-1020, MATH-1250, MATH-2780, MATH-2790, MATH-3590, STAT-2920. (additional requirements: MATH-1720, MATH-1730.)

Minor in Mathematics

A minor in Mathematics can be obtained upon completion of six courses from the following list, with a minimum grade of 60% in each course: MATH-1020, MATH-1250 or MATH-1260 or MATH-1270, MATH-1720 or MATH-1760, MATH-1730, MATH-2250, MATH-2251, MATH-2780, MATH-2790, MATH-3XXX, MATH-4XXX, and STAT-2910 or STAT-2920.

Minor in Statistics

A minor in Statistics can be obtained upon completion of: (a) MATH-1250 or MATH-1260 or MATH-1270, (b) MATH-1720 or MATH-1760, (c) MATH-1730, (d) STAT-2920, (e) STAT-2950, and (f) any 3XXX or 4XXX STAT course. A grade of at least 60% must be obtained in all of the courses taken.

MATHEMATICS AND STATISTICS COURSES

Students are reminded that, as indicated in the course descriptions, certain Mathematics and Statistics courses may not be available for credit in some or all of the degree programs. All courses listed will not necessarily be offered each year.

ACTUARIAL SCIENCE COURSES

ACSC-3980. Theory of Interest

This course will cover measurement of interest, elementary and general annuities, amortization schedules and sinking funds, bonds, depreciation, depletion and capitalized cost. (Prerequisite: MATH-1730 or consent of instructor.) (3 lecture hours per week.)

ACSC-4030. Derivative Markets I

Topics include financial derivatives, short selling, European and American options, hedging, arbitrage, forwards, futures, swaps, bond price models, binomial model. (Prerequisite: ACSC-3980, STAT-3920, STAT-3950) (3 lecture hours per week.)

ACSC-4980. Life Contingencies I

This course will cover life contingencies, survival distributions and life tables, life insurance, life annuities, net premiums and net premium reserves. (Prerequisites: MATH-2780, MATH-2790, ACSC-3980, and STAT-2950, or consent of instructor.) (3 lecture hours per week.)

ACSC-4981. Life Contingencies II

This course will cover advanced life contingencies, risk theory, survival models, and construction and graduation of mortality tables. (Prerequisite: ACSC-4980 or consent of instructor.) (3 lecture hours per week.)

MATHEMATICS COURSES

MATH-1020. Mathematical Foundations

This course will cover mathematical logic, proof methods and development of proof techniques, mathematical induction, sets, equivalence relations, partial ordering relations and functions. (Prerequisite: One of COMP-1000, MATH-1250, MATH-1260 or MATH-1270.) (2 lecture hours, 2 tutorial hours per week.)

MATH-1250. Linear Algebra I

This course will cover linear systems, matrix algebra, determinants, n-dimensional vectors, dot product, cross product, orthogonalization, eigenvalues, eigenvectors, diagonalization and vector spaces. (Prerequisites: Both Ontario Grade 12 Advanced Functions (MHF4U) and Calculus and Vectors (MCV4U) or MATH-1280.) (Antirequisites: MATH-1260, MATH-1270.) (3 lecture hours, 2 tutorial hours per week.)

MATH-1260. Vectors and Linear Algebra

This course is for students without Ontario Grade 12 Calculus and Vectors (MCV4U). The course MATH-1250 is for students with MCV4U. This course will cover vectors, three-dimensional geometry, linear systems, matrix algebra, determinants, n-dimensional vectors, dot product, cross product, orthogonalization, eigenvalues, eigenvectors, diagonalization and vector spaces. The course is equivalent to MATH-1250 for all prerequisite purposes. (Prerequisite: Ontario Grade 12 Advanced Functions (MHF4U).) (Antirequisites: MATH-1250, MATH-1270.) (4 lecture hours, 2 tutorial hours per week.)

MATH-1270. Linear Algebra (Engineering)

This course will cover linear systems, linear transformations, matrix algebra, determinants, vectors in R^n , dot product, orthogonalization, diagonalization, eigenvectors and eigenvalues, in the context of and with an emphasis on a broad range of applications in Science and Engineering. (Prerequisite: MATH-1280 or both Ontario Grade 12 Advanced Functions (MHF4U) and Calculus and Vectors (MCV4U)) (Antirequisite: MATH-1250, or MATH-1260.) (3 lecture hours, 1 tutorial hour per week.)

MATH-1280. Access to Linear Algebra

This course will cover matrix algebra, linear systems, vectors, lines and planes in three-dimensional space, equations and inequalities in one variable and linear relations. This course serves as the prerequisite for MATH-1250 and MATH-1270. Majors in Science and majors in Engineering will not be given credit for this course. (3 lecture hours, 1 tutorial hour per week.)

MATH-1720. Differential Calculus

This course will cover trigonometric functions and identities, inverse trigonometric functions, limits and continuity, derivatives and applications, mean value theorem, indeterminate forms and l'Hôpital's rule, antiderivatives and an introduction to definite integrals. This course is for students who have taken both Ontario Grade 12 Advanced Functions (MHF4U) and Ontario Grade 12 Calculus and Vectors (MCV4U). Students who do not have credit for MCV4U should take MATH-1760. (Prerequisites: Ontario Grade 12 Advanced Functions (MHF4U) and Ontario Grade 12 Calculus and Vectors (MCV4U) or MATH-1780.) (Antirequisite: MATH-1760.) (3 lecture hours, 1 tutorial hour per week.)

MATH-1730. Integral Calculus

This course will cover antiderivatives, the definite integral and the fundamental theorem of calculus, techniques of integration, applications, improper integrals, sequences and series, convergence tests, power series, Taylor and Maclaurin series, and polar and parametric coordinates. (Prerequisite: MATH-1760 or MATH-1720.) (3 lecture hours, 1 tutorial hour per week.)

MATH-1760. Functions and Differential Calculus

This course will cover a review of functions, trigonometric functions and identities, transcendental functions, inverse trigonometric functions, introduction to limits, continuity, derivatives and applications, mean value theorem, indeterminate forms and l'Hôpital's rule, antiderivatives and an introduction to definite integrals. This course is for students who have taken Ontario Grade 12 Advanced Functions (MHF4U), but have not taken Ontario Grade 12 Calculus and Vectors (MCV4U). Students who have credit for MCV4U should take MATH-1720. The course is equivalent to MATH-1720 for all prerequisite purposes. (Prerequisite: Ontario Grade 12 Advanced Functions (MHF4U).) (Antirequisite: MATH-1720.) (4 lecture hours, 1 tutorial hour per week.)

MATH-1780. Access to Differential Calculus

The course will cover straight lines, relations and functions, trigonometric functions, limits, derivatives, curve sketching, equations and inequalities, transformations, symmetry, exponential and logarithmic functions. This course serves as the prerequisite for MATH-1720 and MATH-1760. Majors in Science, majors in Engineering and students with at least 70% in Ontario Grade 12 Advanced Functions (MHF4U) will not be given credit for this course. (Antirequisites: MATH-1760, or MATH-1720) (3 lecture hours, 1 tutorial hour per week.)

MATH-1980. Mathematics for Business

An introduction to concepts and techniques of mathematics useful in business situations. Topics include mathematical modeling of qualitative scenarios, linear simultaneous equations, inequalities, exponential and logarithmic functions, graphical linear programming, and probability. This course is intended for students in Business Administration. May not be taken for credit in any program within the Faculty of Science or the Faculty of Engineering. (Prerequisite: Any grade 12 "U" math course, or MATH-1780.) (3 lecture hours, 1 tutorial hour per week.)

MATH-2250. Linear Algebra II

This course is a rigorous and proof-based study of linear systems, vector spaces, linear transformations, projections, pseudo-inverses, determinants, inner product spaces and applications. (Prerequisites: MATH-1020 and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours, 1 tutorial hour per week.)

MATH-2251. Linear Algebra III

This course is a rigorous and proof-based study of eigenvalues and eigenvectors, diagonalization, similarity problem, canonical form for real and complex matrices, positive definite matrices, computational methods for approximating solutions to systems of linear equations and eigenvalues. (Prerequisite: MATH-2250.) (3 lecture hours, 1 tutorial hour per week.)

MATH-2780. Vector Calculus

This course will cover quadric surfaces, vector differential calculus, functions of several variables, maximum and minimum problems, multiple integrals, vector differential operators, line and surface integrals, Green's theorem, Stokes' theorem and Gauss' theorem. (Prerequisites: MATH-1730, and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours, 1 tutorial hour per week.)

MATH-2790. Differential Equations

This course will cover first-order ordinary differential equations (ODEs), higher-order ODEs with constant coefficients, Cauchy-Euler equations, systems of linear ODEs, Laplace transforms, and applications to science and engineering. (Prerequisites: MATH-1730, MATH-2780 (except for Electrical Engineering and

Physics students who may take MATH-2780 concurrently) and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours, 1 tutorial hour per week.)

MATH-3150. Introduction to Graph Theory

This course will cover paths and cycles, bipartite graphs, graph isomorphisms, connectivity, Eulerian graphs, Hamiltonian graphs, trees, properties of trees, planarity, Euler's formula, dual graphs, coloring graphs, Brooks' theorem, coloring maps, chromatic polynomials, digraphs, matchings, Menger's theorem, Hall's theorem, and Tutte's theorem. (Prerequisites: MATH-2250 or COMP-2310.) (3 lecture hours per week.)

MATH-3160. Combinatorics

This course will cover finite combinatorics, in particular, the pigeonhole principle, permutations and combinations, binomial coefficients, the inclusion-exclusion principle, recurrence relations and generating functions, special counting sequences, Polya counting. (Prerequisites: MATH-1730 and MATH-1020.) (3 lecture hours per week.)

MATH-3200. Abstract Algebra

This course will cover an introduction to groups, rings and fields. (Prerequisite: MATH-2250 or MATH-3270.) (3 lecture hours per week.)

MATH-3270. Number Theory

This course will cover divisibility, primes, fundamental theorem of arithmetic, greatest common divisor, Euclidean algorithm, least common multiple, linear Diophantine equations, congruency, residue classes, Chinese remainder theorem, number theoretic functions, theorems of Euler, Fermat, Wilson, theory of primes, and quadratic residues. (Prerequisites: one of MATH-1250, MATH-1260 or MATH-1270, and MATH-1020.) (3 lecture hours per week.)

MATH-3550. Introduction to Fourier Series and Special Functions

This course will cover Fourier series, Sturm-Liouville problems, heat and wave equations, Laplace equation, weighted L^2 -spaces and orthogonal bases, Gamma function, Bessel functions, Legendre polynomials and hypergeometric functions. (Prerequisite: MATH-2780 and MATH-2790.) (3 lecture hours per week.)

MATH-3580. Introduction to Analysis I

This course is a rigorous and proof-based study of supremum and infimum, the real number system, countable and uncountable sets, metric spaces, compact sets, connected sets, Cauchy sequences, completeness, limits and continuity, maximum and minimum on compact sets, intermediate value theorem, differentiation and the mean value theorem. (Prerequisites: MATH-1730, MATH-1020 and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours, 1 tutorial hour per week.)

MATH-3581. Introduction to Analysis II

This course is a rigorous and proof-based study of Riemann-Stieltjes integral, sequences and series of functions, uniform and absolute convergence, equicontinuity, Arzela-Ascoli theorem, Stone-Weierstrass theorem, power series, and functions of several variables. (Prerequisite: MATH-3580.) (3 lecture hours, 1 tutorial hour per week.)

MATH-3590. Complex Variables

This course will cover complex numbers, analytic functions, exponential and logarithm functions, contour integration, Cauchy's integral formula, series, Taylor and Laurent expansions, residue theory, applications

to real integrals. (Prerequisite: MATH-2780; Corequisite: MATH-2790.) (3 lecture hours, 1 tutorial hour per week.)

MATH-3800. Numerical Methods

This course will cover iterative solution methods for nonlinear equations in one variable, Lagrange interpolation, cubic splines, Bezier curves, numerical differentiation and integration (quadrature), initial value problems, linear algebraic systems (direct methods) and Newton's method for nonlinear systems. (Prerequisites: MATH-2780, MATH-2790, and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours per week.)

MATH-3940. Numerical Analysis for Computer Scientists

This course is an introduction to the applications of numerical methods using computer-oriented algorithms such as finding roots, solving systems of equations, differentiation, integration and optimization. (Restricted to students in Computer Science.) (Prerequisites: COMP-1410, MATH-1730 and one of MATH-1250, MATH-1260 or MATH-1270.) (3 lecture hours per week)

MATH-3960. Linear Optimization

This course will cover the graphical solution of two variable linear programs, the tableau simplex algorithm, the revised simplex algorithm, linear programming theory, sensitivity analysis, the transportation problem, the assignment problem and integer programming. (Prerequisite: MATH-2250 or consent of instructor.) (Antirequisite: INDE-3120.) (3 lecture hours per week.)

MATH-4000. Topics in Mathematics

This course will cover advanced topics not covered in other courses. (May be repeated for credit when the topic is different.) (Prerequisite: consent of instructor.) (3 lecture hours per week.)

MATH-4210. Ring Theory and Modules

This course is designed to introduce students to the structure and theory of general rings and their modules. It will provide an appropriate foundation for more advanced graduate material in algebra. Topics covered will include: semisimple rings, Wedderburn-Artin Theorem, modules over a principal ideal domain, projective, injective and flat modules, introduction to homology theory. (Prerequisite: MATH-2251 and MATH-3200.) (3 lecture hours per week.)

MATH-4220. Introduction to Group Theory

This course will cover abstract groups, subgroups, quotient groups, products, isomorphism theorems, group actions, orbits, class equation, Sylow theorems, finitely generated abelian groups. (Prerequisites: MATH-2251 and MATH-3200.) (3 lecture hours per week.)

MATH-4230. Introduction to Field Theory

This course will cover polynomial rings, splitting fields, the fundamental theorem of Galois theory, Galois' criterion for solvability by radicals, algebraically closed fields and finite fields. (Prerequisites: MATH-2251 and MATH-3200.) (3 lecture hours per week.) (Cross-listed with MATH-8220)

MATH-4300. General Topology

Introduction to general set theoretic topology, including product and quotient spaces, continuity and homeomorphisms, nets and filters, separation and countability, compactness, connectedness. (Prerequisite: any one of the following courses: MATH-3150, MATH-3160, MATH-3200, MATH-3270, MATH-3550, MATH-3580, or MATH-3590.) (3 lecture hours per week.)

MATH-4570. Functional Analysis

This course will cover normed and Banach spaces, bounded linear operators, dual spaces, Hahn-Banach theorem, uniform boundedness principle, open mapping theorem, Hilbert spaces, operators on Hilbert spaces, and weak and weak* topologies. (Prerequisite: MATH-4580.) (3 lecture hours per week.)

MATH-4580. Measure Theory and Integration

This course will cover measures, Lebesgue measure, Lebesgue integral, monotone and dominated convergence theorems, Fubini's theorem, L_p -spaces, modes of convergence and Radon-Nikodym theorem. (Prerequisite: MATH-3581.) (3 lecture hours per week.)

MATH-4960. Portfolio Optimization

This is a first course on Markowitz mean-variance portfolio optimization. The course will cover quadratic programming, parametric quadratic programming, the efficient frontier, the capital asset pricing model, Sharpe ratios and implied risk-free returns, portfolio optimization with constraints, and quadratic programming solution algorithms; also covered are professional writing and presentation skills and the use of optimization software. (Prerequisite: MATH-2251.) (3 lecture hours per week.) (Cross-listed with MATH-8820.)

STATISTICS COURSES

Undergraduate Statistics courses taught outside Mathematics and Statistics may not be taken for credit in any mathematics program.

STAT-2910. Statistics for the Sciences

This course will cover descriptive statistics, probability, discrete and continuous distributions, point and interval estimation, hypothesis testing, goodness-of-fit and contingency tables. (Prerequisite: Grade 12 "U" Advanced Level Mathematics (MHF4U, MCV4U, MDM4U) or Grade 11 Functions and Applications (MCF3M) or Grade 11 Functions (MCR3U).) (Course equivalencies and antirequisites as stated in the University of Windsor Senate Policy on Introductory Statistics Courses.) (May not be taken for credit after taking STAT-2920 or STAT-2950.) (3 lecture hours, 1 tutorial hour per week.)

STAT-2920. Introduction to Probability

This course will cover descriptive measures, combinatorics, probability, random variables, special discrete and continuous distributions, sampling distribution, and point and interval estimation. (Prerequisite: MATH-1730.) (3 lecture hours, 1 tutorial hour per week.)

STAT-2950. Introduction to Statistics

This course will cover distributions, point and interval estimation, hypothesis testing, contingency tables, analysis of variance, bivariate distributions, regression, correlation and non-parametric methods. (Prerequisite: STAT-2920.) (3 lecture hours, 1 tutorial hour per week.)

STAT-3920. Probability

The course will cover the axioms of the theory of probability, discrete and continuous distributions including binomial, Poisson, exponential, normal chi-square, gamma, t , and F distributions, multivariate distributions, conditional distributions, independence, expectation, moment generating functions, characteristic functions, transformation of random variables, order statistics, law of large numbers and central limit theorem. (Prerequisite: STAT-2950.) (3 lecture hours per week.)

STAT-3950. Statistics

This course will cover point and interval estimations, properties of estimators, methods of estimation, least squares estimation and linear models, Bayesian estimation, Rao-Blackwell theorem, tests of

hypotheses, Neyman-Pearson Lemma and analysis of variance. (Prerequisite: STAT-3920.) (3 lecture hours per week.)

STAT-3960. Stochastic Operations Research

This course will cover deterministic dynamic programming, stochastic dynamic programming, queuing theory, Brownian motion, decision analysis and simulation. Optional topics are inventory theory and Markov processes. (Prerequisites: STAT-2920, MATH-1250 or MATH-1260, MATH-1730.) (Antirequisite: INDE-4120.) (3 lecture hours per week.)

STAT-4000. Topics in Statistics

This course will cover advanced topics in probability or statistics not covered in other courses. (Prerequisite: consent of instructor.) (3 lecture hours per week.) (May be repeated for credit when the topic is different.)

STAT-4200. Actuarial Regression and Time Series

This course introduces regression and time series analyses. Topics include multiple linear regression, least squares, model fitting, estimation, testing, matrix formulation, indicator variables, logistic regression, residual analysis, prediction intervals, times series, autoregressive models, moving average models, ARIMA models, fitting models, estimation and forecasting. (Prerequisite: STAT-2950.) (Anti-requisite: STAT-4550.) (3 lecture hours per week.)

STAT-4410. Stochastic Processes

This course covers discrete and continuous time Markov processes, renewal theory, branching processes, Brownian motion. (Prerequisite: STAT-2920 and STAT-2950, MATH-1250 and MATH-2790.) (3 lecture hours per week.)

STAT-4460. Statistical Data Analysis

This course takes a computer-oriented approach to equip students with the experience of data analysis, beginning with the design of experiments to the presentation of results. Depending on the background of the students, different topics will be emphasized. (Prerequisite: STAT-3920, STAT-3950 and STAT-4550 or consent of instructor.) (3 lecture hours per week.)

STAT-4470. Survival Analysis

This course covers survivorship and hazard functions and their relationship to lifetime distributions and densities, types of censoring, the Kaplan-Meier and Nelson-Aalen estimators of the survivor and cumulative hazard functions, log rank tests, parametric survival time distributions and related regressions, semi-parametric regression models including the Cox's PH model, and regression diagnostics. Further topics may include the counting process approach, recurrent event analysis, time dependent covariates, frailty models, sequential and group sequential techniques and statistical learning algorithms. (Prerequisite: STAT-3920 and STAT-3950.) (3 lecture hours per week.)

STAT-4500. Generalized Linear Models

This course is aimed at giving theoretical and methodological background for the analysis of discrete or continuous data using generalized linear models and other semi-parametric models where full distributional assumptions cannot be justified. (Prerequisite: STAT-3920 and STAT-3950.) (3 lecture hours per week.)

STAT-4550. Regression Analysis

This course covers simple and multiple linear regression, inference on regression parameters, residual analysis, stepwise regression, polynomial regression, diagnostics and remedial measures for

multicollinearity and influential observations, weighted least squares, logistic regression, nonlinear regression. (Prerequisite: (STAT-2910 or STAT-2950) and MATH-1250.) (3 lecture hours per week.)

STAT-4560. Statistical Consulting

This course is aimed at training students on how to: (a) develop problem solving skills in applied statistics; (b) interact with clients from other scientific disciplines who seek statistical consultancy; and (c) improve skills for writing statistical data analysis reports. (Pre-requisites: STAT 4460 and STAT 4550; Anti-requisite: STAT 4600) (3 lecture hours a week.)

STAT-4490. Discrete Multivariate Analysis

This course is aimed at giving theoretical and methodological background for the analysis of discrete or continuous data using generalized linear models. The main topics covered are descriptive and inferential statistics for two-way and three-way contingency tables, generalized linear models for discrete responses, binary regression models (emphasizing logistic regression), multcategory logit models for nominal and ordinal responses, loglinear models for contingency tables, matched pairs, Modeling correlated, clustered responses, and Random effects: Generalized linear mixed model. (Prerequisite: STAT-3920 and STAT-3950).

STAT-4600. Practicum in Statistical Consulting

This course will provide students with practical experience in statistical consulting, where they will integrate statistical theory, methods, and procedures in an applied setting. Students will assist clients with solving a broad range of problems in data analysis, research design, and statistical computing while also gaining skills in conducting and interpreting statistical analyses, oral and written communication, and the ethical practice of consulting. Students will successfully complete the on-line Tri-Council Course on Research Ethics and the SAS base programming certificate. (Prerequisites: STAT-4460 and STAT-4550. Anti-requisite: STAT-4560.) (3 hours per week with a total of 12 lecture hours, 12 tutorial hours, and 12 experiential learning hours.)

STAT-4700. Biostatistics

This course will be focused on the application of statistical methods in life and health sciences. Topics covered will include the formulation of study objectives in statistical hypotheses testing and estimation frameworks, the design of clinical studies, types of data and measurements, data description and visualization, procedures for testing statistical hypotheses, estimation via point estimates and confidence intervals, linear and logistic regression models for clinical data, analysis of event history data such as survival end-points, and the statistical analysis of categorical data. Students will be expected to use a statistical software such as R, SAS, SPSS, or Tableau for data analysis and visualization. This course will also introduce the concepts of Indigenous Data Sovereignty and will include appropriate examples reflecting Indigenous knowledge. (Prerequisite: STAT-3950.) (3 lecture hours per week.)

STAT-4980. Experimental Designs

This course will cover ANOVA models without and with interactions, randomized block, Latin square, factorial, confounded factorial, balanced incomplete block, other designs and response surface methodology. (Prerequisite: STAT-2950 or STAT-3920.) (3 lecture hours per week.)

STAT-4981. Sampling Theory

This course will cover basic concepts, simple random and stratified sampling, ratio and regression methods, systematic and cluster sampling, multi-stage sampling, PPS sampling, and errors in surveys and sampling methods in social investigation. (Prerequisite: STAT-2950 or STAT-3920.) (3 lecture hours per week.)

PHYSICS

PROGRAMS

Honours Physics (with/without Co-op)

Degree Requirements

Total courses: 40 (43 for Co-op option)

(a) PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2210, PHYS-2500, PHYS-3100, PHYS-3200, PHYS-3210, PHYS-3500, PHYS-3900, PHYS-4130, PHYS-4100, and six courses in Physics at the 3XXX or 4XXX level.

(b) CHEM-1100, CHEM-1110, CHEM-2400, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-2780, MATH-2790, MATH-3550, ELEC-2170 or COMP-2650.

(c) two of Arts, Humanities and Social Sciences

(d) seven courses from any area.

For Co-op stream, in addition:

(e) three Co-op terms: PHYS-2980, PHYS-3980, PHYS-4980, (oral and written reports required). Students must maintain major and cumulative averages of 65% or better to qualify for Co-op placements.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

If a student has an outstanding commitment to an employer, then withdrawal from the Co-op program will be granted on an exception basis and will take effect following the work term. If a student withdraws from an undergrad Co-op program they will be subject to the following Co-op fee payments:

If a student withdraws from Co-op prior to the first Friday of classes of the semester following their first work term, no further Co-op fees will be charged once the withdrawal has been processed.

If a student withdraws from Co-op after the first Friday of classes of the semester following their first work term, they be liable for paying the Co-op fee for the term in which they are dropping and one additional term.

In the interest of building solid partnerships with employers, students who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Recommended courses (if any): Students who intend to take additional mathematics courses are advised to take MATH-1020 in first year. COMP-2120 is recommended. COMP-3400 and MATH-3590 are strongly recommended. Students planning to pursue health professions should seek advice from an academic advisor in the Department of Physics within the first year.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

Withdrawal from the Co-op program will be granted on an exception basis only as it must be determined that the student has no outstanding commitments to employers. Students who wish to withdraw must meet with a Co-op Coordinator and complete a withdrawal form. However, the only time a student may withdraw from an undergraduate Co-op program without further Co-op fee payment implications is by the 1st Friday of classes after their first Co-op work term. Students who withdraw from Co-operative Education at any other time will be liable for paying the Co-op fee for the term in which they are dropping and one additional term. This will help offset the costs of developing another student for placement.

In the interest of building solid partnerships with employers, students who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Physics with Thesis (with/without Co-op)

Degree Requirements

Total courses: 40 (43 for Co-op option)

(a) PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2210, PHYS-2500, PHYS-3100, PHYS-3200, PHYS-3210, PHYS-3500, PHYS-3900, PHYS-4900 (6.0 credits)**, PHYS-4130, PHYS-4100, and six additional courses in Physics at the 3XXX or 4XXX level.

(b) CHEM-1100, CHEM-1110, CHEM-2400, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-2780, MATH-2790, MATH-3550, ELEC-2170 or COMP-2650.

(c) two of Arts, Humanities and Social Sciences

(d) five courses from any area.

**Only students who have maintained a major average of 70% and a cumulative average of 60% will be permitted to enrol in PHYS-4900.

For Co-op stream, in addition:

(e) three Co-op terms: PHYS-2980, PHYS-3980, PHYS-4980, (oral and written reports required). Students must maintain major and cumulative averages of 65% or better to qualify for Co-op placements.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Physics (Medical Physics) (with/without Co-op)

Degree Requirements

Total courses: 40 (43 for Co-op option)

(a) PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2210, PHYS-2500, PHYS-3100, PHYS-3200, PHYS-3210, PHYS-3500, PHYS-3700, PHYS-3900, PHYS-4130, PHYS-4100, PHYS-4700, PHYS-4710 and three more courses in Physics at the 3XXX or 4XXX level.

(b) BIOL-1101, CHEM-1100, CHEM-1110, CHEM-2300, CHEM-2400, BIOC-2010 or BIOC-2015, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-2780, MATH-2790, MATH-3550.

(c) two of Arts, Humanities and Social Sciences.

(d) five courses from any area.

For Co-op option, in addition:

(e) three Co-op terms: PHYS-2980, PHYS-3980, PHYS-4980, (oral and written reports required). Students must maintain major and cumulative averages of 65% or better to qualify for Co-op placements.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Student are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

If a student has an outstanding commitment to an employer, then withdrawal from the Co-op program will be granted on an exception basis and will take effect following the work term. If a student withdraws from an undergrad Co-op program they will be subject to the following Co-op fee payments: If a student withdraws from Co-op prior to the first Friday of classes of the semester following their first work term, no further Co-op fees will be charged once the withdrawal has been processed. If a student withdraws from Co-op after the first Friday of classes of the semester following their first work term, they be liable for paying the Co-op fee for the term in which they are dropping and one additional term.

In the interest of building solid partnerships with employers, student who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once

students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Recommended courses (if any): Students who intend to take additional mathematics courses are advised to take MATH-1020 in first year. COMP-2120 is recommended. COMP-3400 and ELEC-2170 or COMP-2650 are strongly recommended. Students planning to pursue health professions other than Medical Physics should seek advice from an academic advisor in the Department of Physics within the first year.

For medical school, four (4) courses are recommended that are classified as “writing intensive.” (PHYS-3980, PHYS-4980, PHYS-4900, and PHYS-4000 all contain intensive writing components.)

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Co-op students will apply for work opportunities as advertised by the Centre for Career Education using an Internet-based software program and employers will make interview and hiring decisions. Students are also encouraged to seek Co-op employment outside of the advertised postings by completing a guided job search process facilitated by the Centre for Career Education.

Withdrawal from the Co-op program will be granted on an exception basis only as it must be determined that the student has no outstanding commitments to employers. Students who wish to withdraw must meet with a Co-op Coordinator and complete a withdrawal form. However, the only time a student may withdraw from an undergraduate Co-op program without further Co-op fee payment implications is by the 1st Friday of classes after their first Co-op work term. Students who withdraw from Co-operative Education at any other time will be liable for paying the Co-op fee for the term in which they are dropping and one additional term. This will help offset the costs of developing another student for placement.

In the interest of building solid partnerships with employers, students who have accepted a Co-op employment offer (either by ranking a position in round 1 of the job competition or by accepting a position either verbally or in writing in later rounds) must honour that commitment. Therefore, once students have accepted an offer of employment for a work term, they will be considered registered in the appropriate work term course and must remain in the Co-op program until they have completed their work term requirements. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Honours Physics (Medical Physics with Thesis) (with/without Co-op)

Degree Requirements

Total courses: 40 (43 for Co-op stream)

(a) PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2210, PHYS-2500, PHYS-3100, PHYS-3200, PHYS-3210, PHYS-3500, PHYS-3700, PHYS-3900, PHYS-4900 (6.0 credits)**, PHYS-4130, PHYS-4100, PHYS-4700, PHYS-4710, plus three additional courses in Physics at the 3XXX or 4XXX level.

(b) BIOL-1101, CHEM-1100, CHEM-1110, CHEM-2300, CHEM-2400, BIOC-2010 or BIOC-2015, COMP-1400, COMP-1410, MATH-1250 (or MATH-1260), MATH-1720 (or MATH-1760), MATH-1730, MATH-2780, MATH-2790, MATH-3550.

(c) two of Arts, Humanities and Social Sciences.

(d) three courses from any area.

**Only students who have maintained a major average of 70% and a cumulative average of 60% will be permitted to enrol in PHYS-4900.

For Co-op option, in addition:

(e) three Co-op terms: PHYS-2980, PHYS-3980, PHYS-4980, (oral and written reports required). Students must maintain major and cumulative averages of 65% or better to qualify for Co-op placements.

All Co-op positions must be full-time, paid, related to the degree program and approved by the University. The process of securing a Co-op position is competitive. Failure to honour these commitments and/or to complete all work term requirements will lead to being required to withdraw from the Co-op program and will result in a failing grade on his/her transcript for that work term.

Courses used to calculate the major average are: courses listed under requirement (a), and any courses taken in the major area(s) of study.

Combined Honours Physics Programs

Degree Requirements

Total courses: forty.

- (a) Physics: PHYS-1400, PHYS-1410, PHYS-1500, PHYS-2200, PHYS-2210, PHYS-2500, PHYS-3100, PHYS-3200, PHYS-3210, PHYS-3500, and two more Physics courses at the 3XXX or 4XXX level.
- (b) Course requirements-Other Subject: courses used to calculate the major average in the other subject area, as prescribed by that area of study.
- (c) CHEM-1100, CHEM-1110, CHEM-2400, MATH-1250, MATH-1720, MATH-1730, MATH-2780, MATH-2790, MATH-3550
- (d) additional courses, if necessary, from any area of study, to a total of forty.

Courses used to calculate the major average are: courses listed under requirements (a) and (b), and any courses taken in the major area(s) of study.

Honours Certificate in Physics

Admission Requirements

A candidate for the Honours Certificate in Physics shall hold a degree in:

- (i) Bachelor of Science (B.Sc) in Physics with a minimum CGPA of 65% or
- (ii) A four-year Bachelor's degree in Chemistry, Electrical Engineering, Applied Mathematics or other fields related to Physics with a minimum CGPA of 65%.

The program can also be taken concurrently by third and fourth year students at the University of Windsor in Engineering and Science Fields.

Certificate in Physics

Total courses: 8

Degree requirements:

PHYS-3100 Quantum Mechanics I

PHYS-3200. Electromagnetism: Statics

PHYS-3500. Advanced Classical Mechanics

One 3000 or 4000 level course in Science.

It is recommended that students complete either: PHYS-3900. Techniques in Experimental Physics I, PHYS-3600. Computational Physics, or PHYS-3610. The Mathematics of Physics.

PHYS-4100. Quantum Mechanics II

PHYS-3210. Electromagnetism: Dynamics

PHYS-4130. Introduction to Statistical Mechanics

One of SCIE-3800, SCIE-3900, or SCIE-3990. Students intending to proceed to a graduate program in Physics are encouraged to take SCIE-3900, and work in a research group to acquire research skills.

Notes:

Students without prior course work in PHYS-2210 (modern physics or equivalent); PHYS-2500 (Mechanics or equivalent); MATH-2780 (vector calculus or equivalent); Math-2790 (differential equations or equivalent); MATH-3550 (special functions or equivalent) must complete these courses (or their equivalents) to allow enrolment in the required certificate courses named above as they are the necessary pre-requisites.

To qualify for the certificate, students will be required to successfully complete all eight courses at the University of Windsor. No transfer credit will be considered for this certificate.

No courses taken as part of the Honours Certificate in Physics can count towards a graduate degree.

Major and Minor Concentrations - Bachelor of Interdisciplinary Arts and Science (IAS) - Physics

Major Concentration: PHYS-2200, PHYS-3250, PHYS-2500, PHYS-3200, PHYS-3500, PHYS-3210, PHYS-3100, PHYS-3110, MATH-2780, MATH-2790, MATH-3550, and one other Physics course at 3XXX or 4XXX level. (additional requirements: PHYS-1400, PHYS-1410, MATH-1720 and MATH-1730, and MATH-1250.)

Minor Concentration: PHYS-2200, PHYS-3250, PHYS-2500, and three other Physics courses at the 3XXX or 4XXX level. (additional requirements: PHYS-1400, PHYS-1410, MATH-1250, MATH-1720, MATH-1730.)

Minor in Physics

The minor in Physics consists of six PHYS courses one of which must be at the 3XXX level. Courses that cannot count toward the Physics minor are: PHYS 1000, 1010, 2000, 2040, 2050, 2060, 2980, 3980, 4980, and 4900. A minimum grade of 60% must be received in each course.

PHYSICS COURSES

Not all courses listed will necessarily be offered in each year.

PHYS-1000. Introduction to Astronomy I

The solar system with emphasis on the results of recent space exploration. This is a descriptive course suitable for the non-scientist. (May be taken by B.Sc. students for credit, but does not count as a Physics course or other science course towards the fulfillment of the requirements for the B.Sc. degree.) (2 lecture hours a week.)

PHYS-1010. Introduction to Astronomy II

The stars, galaxies, including pulsars, black holes, and quasars. Current theories of the structure of the universe will be discussed. This is a descriptive course suitable for the non-scientist. (May be taken by B.Sc. students for credit, but does not count as a Physics course or other science course towards the fulfillment of the requirements for the B.Sc. degree.) (2 lecture hours a week.)

PHYS-1300. Introductory Physics for Life Sciences I

This is an algebra-based course intended for students interested in the biological or health sciences, or related disciplines. The topics covered include the basic mechanical concepts of force, work and energy, properties of matter, and heat, with examples and applications drawn from the modeling of biological systems. (Prerequisites: one 4 "U" or OAC mathematics course or equivalent.) (3 lecture hours a week, 3 laboratory hours per week) (Anti-requisites: PHYS-1305, PHYS-1400.) (Open to students in Human Kinetics, Forensic Science, Bachelor of Arts and Science, and all programs within in the Faculty of Science; exceptions only with the permission of the Head or designate.)

PHYS-1305. Introductory Physics for Life Sciences I (B)

This is an algebra-based course intended for students interested in the biological or health sciences, or related disciplines. The topics covered include the basic mechanical concepts of force, work and energy, properties of matter, and heat, with examples and applications drawn from the modeling of biological systems. This course serves as the prerequisite for PHYS-1400 and GENG-1110. Majors in Science and Majors in Engineering will not be given credit for this course. (Antirequisite: PHYS-1300.) (Prerequisites: One 4U or OAC mathematics course or equivalent.) (3 lecture hours a week.)

PHYS-1310. Introductory Physics for Life Sciences II

This course is a continuation of PHYS-1305 intended for students interested in the biological or health sciences, or related disciplines. The topics covered include wave motion, sound, electricity and magnetism, light, and an introduction to topics in modern physics involving the life sciences such as the quantum nature of radiation and its interaction with biomolecules, high energy radiation and radioactivity, and the statistical treatment of data. (Prerequisite: PHYS-1300 or PHYS-1400.) (3 lecture hours per week, 3 laboratory hours per week.) (Antirequisites: PHYS-1410.) (Open to students in Human Kinetics, Forensic Science, Bachelor of Arts and Science, and all programs within in the Faculty of Science; exceptions only with the permission of the Head or designate.)

PHYS-1400. Introductory Physics I

First semester in a four-semester sequence in calculus-based introductory physics with an emphasis on mechanics. (Prerequisites: Grade 12 "U" Advanced Functions and Introductory Calculus or equivalent. Recommended co-requisite: MATH-1720.) (3 lecture hours per week, 3 laboratory hours per week.) Open to students in Engineering, Human Kinetics, Forensic Science, Bachelor of Arts and Science, and all programs within in the Faculty of Science; exceptions only with the permission of the Head or designate. (Antirequisites: PHYS-1300, PHYS-1305.)

PHYS-1410. Introductory Physics II

Second semester in a four-semester sequence in calculus-based introductory physics with an emphasis on electricity and magnetism. (Prerequisite: PHYS-1400 or GENG-1110. Recommended co-requisite: MATH-1730.) (3 lecture hours per week, 3 laboratory hours per week.) (Antirequisites: PHYS-1310) (Open to students in Engineering, Human Kinetics, Forensic Science, Bachelor of Arts and Science, and all programs within in the Faculty of Science; exceptions only with the permission of the Head or designate.)

PHYS-1500. From Symmetry to Chaos in the Universe: An Introduction to Theoretical Methods in Contemporary Physics

An introduction to the pillars of 20th and 21st century physics which form the basis of subsequent courses in physics and the basis of current research: complexity and chaos, special and general relativity, quantum phenomena, symmetry and symmetry breaking, and cosmology. Motivated by these pillars, mathematical tools and techniques that are used extensively in physics for practical problem solving and data analysis are introduced at a first-year level. Computer-aided graphical and approximate computational methods will also be introduced. (Prerequisites: PHYS-1400, MATH-1720, and MATH-1250) (3 lecture hours and one tutorial hour per week.)

PHYS-2000. The Exoplanet Revolution

This course will examine the development and evolution of our understanding of the nature and origins of planetary systems before and after the discovery of the first exoplanets. Students will learn about the various methods used to detect and measure exoplanets, and will actively engage in the analysis of data collected through remote off-site telescopes. The course will include a review of recent discoveries regarding the different classes of planets that exist and their characteristics and origins. It will also look more closely at planets found in the habitable zones around their stars and the conditions that exist there, particularly in planetary atmospheres. Finally, it will review the latest developments in new telescope technologies and space missions and what their capabilities should allow astronomers to discover in coming years. (Prerequisite: PHYS-1000 or PHYS-1010.) (May be taken by B.Sc. students for credit, but does not count as a Physics course or other science course towards the fulfillment of the requirements for the B.Sc. degree.) (3 lecture hours a week.)

PHYS-2040. History of Astronomy

This online course explores the contributions to astronomy made by First Nations, Indian, Chinese, Mayan, Australian, Egyptian, Babylonian, Greek, and Islamic cultures. We start with oral history traditions and follow with explorations of early astronomical instruments and their applications. We will examine medieval European views and how these led to the philosophies of modern astronomy. The course will also highlight how we came to move from a 'geocentric' to a 'heliocentric' view of the solar system by examining the contributions of Copernicus, Brahe, Kepler, Galileo, and Newton. (Open to students with semester 3 and above standing.) (May be taken by BSc and BFS students for credit, but satisfies only the course requirements for "any area of study" toward the fulfilment of the requirements for a BSc or BFS.) (Online asynchronous delivery.)

PHYS-2060. Physics and Society-The Present

Modern society is dominated by the dramatic development of physics and technology from the industrial revolution to the present. This development and its impact on society are explored in the course. A number of topics of current interest such as, nuclear energy, world energy supplies, pollution, global warming, climate change, and possible solutions to the energy crisis are discussed in detail. This course gives students who are majoring in the arts, humanities, business, law, and biomedical sciences an introduction to modern ideas in Physics and to see how these ideas affect our day-to-day lives. (2 lecture

hours a week.) Does not count towards the major requirements for a degree in the Department of Physics.

PHYS-2100. Topics in Physics

A continuation of calculus-based introductory physics concepts presented in PHYS-1400 with an emphasis on topics that are of particular interest to engineers. Topics to be discussed include fluid mechanics, introductory thermodynamics, and electricity and magnetism. (Prerequisites: PHYS-1400, MATH-1730.) (3 lecture hours per week, 3 laboratory hours per week.) (Open only to students in Engineering, exceptions only with the permission of the instructor, the Head, or designate.)

PHYS-2200. Oscillations, Waves, and Electromagnetism

Third semester in a four-semester sequence in calculus-based introductory physics with an emphasis on wave phenomena, oscillations, and electromagnetism. (Prerequisite: PHYS-1410 or equivalent.) (3 lecture hours and 3 laboratory hours per week.)

PHYS-2210. Modern Physics

A calculus-based physics course with an emphasis on physical models of phenomena at subatomic length scales and high velocities. The course includes an introduction to the special theory of relativity, quantum mechanics, nuclear physics, particle physics, and standard model physics. The technological applications of these phenomena will be discussed. (Prerequisite: PHYS-1410 or equivalent.) (3 lecture hours per week.)

PHYS-2500. Intermediate Classical Mechanics

Classical mechanics at the intermediate (second-year) level: Newton's Laws and consequences – Galilean invariance, conservation theorems, applications to rectilinear motion and motion in two/three dimensions; introduction to noninertial reference frames, particularly in rectilinear motion; driven oscillators with damping; central forces, the Kepler problem; dynamics of rigid bodies – planar motion; special relativity – Lorentz transformations, relativistic kinematics and dynamics. (Prerequisites: PHYS-1410 and MATH-1730, or equivalent; Recommended: PHYS-1500.) (3 lecture hours and 1 tutorial hour per week.)

PHYS-2980. Co-op Work Term I

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course can not continue in the Co-op program.) (This is an experiential learning course.)

PHYS-3100. Quantum Mechanics I

An introduction to quantum mechanics. Topics to be covered may include: mathematical formalism, solutions to Schroedinger's equation, Dirac notation, eigenvalue problems, hydrogen and helium atoms, spin, two-particle systems, atomic and molecular spectroscopy, perturbation theory. (Prerequisites: PHYS-2210, PHYS-2500, MATH-3550, or PHYS-3610.) (3 lecture hours per week.)

PHYS-3110. Atomic and Molecular Spectra

Introduction to atomic and molecular spectroscopy, hydrogen and helium atoms, perturbation theory, isotopes; introduction to nuclear physics. (Prerequisites: PHYS-3100, MATH-2780, and MATH-2790, or equivalents.) (3 lecture hours a week.)

PHYS-3200. Electromagnetism: Statics

Classical electromagnetism focusing on stationary phenomena. Topics to be covered may include: electrostatics in vacuum, electric potential, conductors; magnetostatics in vacuum, currents, vector potential; electro- and magnetostatics in matter; techniques for Laplace's equation, multipole expansion; electromagnetic induction. (Prerequisites: PHYS-2210, PHYS-2500, and MATH-3550 or PHYS-3610.) (3 lecture hours per week.)

PHYS-3210. Electromagnetism: Dynamics

Classical electrodynamics focussing on the significance of the unification of electricity and magnetism in Maxwell's equations. Topics to be covered may include: electromagnetic waves in free space, in matter, at interfaces, and in wave guides; potential formulation, gauge transformations, and Liénard-Wiechert potentials; radiation; electrodynamics and special relativity. (Prerequisites: PHYS-3200, and MATH-3550 or PHYS-3610.) (3 lecture hours per week.)

PHYS-3250. Optics

Geometrical optics: review of laws of reflection and refraction; lenses and mirrors (matrix optics); stops, optical systems, aberrations. Introduction to wave optics; interferometry, diffraction, polarization, Fresnel equations, elements of dispersion theory. (Prerequisites: PHYS-2200 and MATH-2780.) (3 lecture hours and 3 laboratory hours per week.)

PHYS-3500. Advanced Classical Mechanics

Classical mechanics, focusing on further developments of formalism and more complex systems: calculus of variations; Lagrangian formalism and an introduction to the Hamiltonian formalism; systems of particles; noninertial reference frames – rotating coordinate systems, centrifugal and Coriolis forces; three-dimensional rigid body motion – inertia tensor, Euler angles, equations of motion; coupled oscillations; continuum mechanics. (Prerequisites: PHYS-2500, MATH-2780, and MATH-2790 or equivalents.) (3 lecture hours and 1 tutorial hour per week.)

PHYS-3600. Computational Physics

An introduction to computational methods in physics, with an emphasis on applications to problems in Classical Mechanics, Electromagnetism and Quantum Mechanics. Best practices for scientific computing, data analysis and visualization will be emphasized. Topics to be discussed may include numerical integration, differentiation, and optimization; linear and non-linear equations; techniques for initial and boundary value problems for ordinary and partial differential equations; fast Fourier transforms; eigenvalue problems; numerical linear algebra; and an introduction to Monte Carlo methods. (Prerequisites: PHYS-2210, PHYS-2500, MATH-2780 and MATH-2790.) (3 lecture hours and 1 tutorial hour per week.)

PHYS-3610. The Mathematics of Physics

Mathematical topics/methods ubiquitous in physics, to give accelerated access to upper-level physics courses by providing the essential background in mathematics: central differential equations of physics and their solutions (e.g. Bessel functions, spherical harmonics, orthogonal polynomials); vector/function spaces, Fourier series/orthogonal function expansions; calculus of complex variables, residue theorem; Schwartz distributions; Green's functions; with time permitting, selected topics of current interest in mathematical/theoretical physics. (Prerequisites: MATH-2780 and MATH-2790, or equivalent. Recommended: PHYS-1500.) (3 lecture hours per week.)

PHYS-3700. Introduction to Medical Physics

Physical principles and experimental techniques applied to medicine and biology. Applications of x-rays and gamma rays in medical diagnosis and therapy. Physical principles of lasers, ultrasound, and magnetic fields in mapping structures. Physical techniques for the diagnosis and therapy of the human body. This course is intended to be of interest to students in Biology and Chemistry/Biochemistry, as well as Physics. (Prerequisite: PHYS-1400 and PHYS-1410, or the consent of the instructor.) (3 lecture hours per week.)

PHYS-3900. Techniques in Experimental Physics I

All physics hypotheses, models, and theories need to be tested and verified through experiments to ensure their validity in representing the observable universe. This course will emphasize the concepts of experimental design and techniques needed for making these observations. The student will design and construct experiments that test theories presented in upper-year physics courses, with an emphasis on electromagnetism and quantum mechanics. Topics may include error analysis, circuit design and analysis, microwave radiation, fibre optics, and spectroscopy. (Prerequisites: PHYS-2210 and one of MATH-3550 or PHYS-3610.) (1.5 hours of laboratory and 1.5 hours of tutorial per week.)

PHYS-3910. Techniques in Experimental Physics II

All physics hypotheses, models, and theories need to be tested and verified through experiments to ensure their validity in representing the observable universe. This course is a continuation of PHYS-3900, with an emphasis on experimental design, modelling, simulation, and construction. Topics may include design and fabrication of apparatus, microprocessor programming, sources of noise, and noise reduction in measurements. (Prerequisites: PHYS-3900 or consent of instructor.) (1.5 hours of laboratory and 1.5 hours of tutorial per week.)

PHYS-3980. Co-op Work Term II

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course can not continue in the Co-op program.) (This is an experiential learning course.)

PHYS-4000. Technical Communication Skills

Introductory lectures and workshops on technical writing and instruction, followed by supervised instruction of first-year Physics students in PHYS-1500, and projects in writing resumes and technical manuals and in preparing a multimedia computer module for a problem area in physics instruction. The computer module can employ any suitable combination of Maple, C++, Visual Basic, HTML, Java. (Prerequisite: PHYS-1500.) (2 lecture, 2 laboratory honours a week.)

PHYS-4100. Quantum Mechanics II

An introduction to more advanced topics in quantum mechanics. Topics to be covered may include: operators and physical observables, postulates on measurements, representation and change of basis, two-state systems, quantum entanglement, degeneracy, generalized uncertainty principle, operator method for simple harmonic oscillator, Hamiltonian as a generator of translations in time, momentum as a generator of spatial translations, angular momentum as a generator of spatial rotations, symmetries and conservation laws, Zeeman effect, density matrices, the variational method. (Prerequisites: PHYS-3100 and PHYS-3500, or consent of instructor.) (3 lecture hours per week.)

PHYS-4130. Introduction to Statistical Mechanics

Thermal equilibrium, diffusive equilibrium; Boltzmann and Gibbs distributions, canonical and grand canonical partition functions; thermodynamics from statistical mechanics, entropy, work, heat; Helmholtz free energy, Gibbs free energy, enthalpy, Gibbs-Duhem relation, equations of state, Maxwell relations, response functions; Planck distribution and thermal radiation, Fermi-Dirac distribution and the Fermi gas, Bose-Einstein distribution and the Bose gas, ideal gas; chemical reactions; binary mixtures; phase transitions; elementary kinetic theory. (Prerequisites: CHEM-2400 and PHYS-3100, or consent of instructor.) (3 lecture hours per week.)

PHYS-4160. Condensed-Matter Physics

Elements of crystallography, crystal diffraction, reciprocal lattices, lattice dynamics and thermal properties of solids, phonons, solution of Schrodinger equation in periodic potential, band theory, Fermi surfaces of metals and semiconductors, optical properties of dielectrics. (Prerequisite: PHYS-3100 or consent of instructor.) (3 lecture hours per week.)

PHYS-4250. Design and Application of Lasers

Stimulated emission, rate equation approach to amplification and output power calculations; Gaussian beams, stable and unstable resonators, Q-switching, mode-locking and cavity dumping, ruby, Nd:YAG and other solid-state lasers, semi-conductor, gas and dye lasers. (Prerequisites: PHYS-3100 and PHYS-2250, or three years of Electrical Engineering or Engineering Materials, or equivalent.) (3 lecture hours per week.)

PHYS-4600. Special Topics in Physics

Advanced topics in contemporary physics. (Prerequisite: to be determined according to the topic.) (May be given as a seminar course, or as a directed, self-study course.) (May be repeated for credit when the topic is different.)

PHYS-4670. Special Techniques in Health Physics

This course consists of a variety of specialized topics involving the applications of the principles of physics to the study and characterization of living tissues, and the detection and treatment of pathological conditions. Topics will include the applications of acoustic microscopy, computational and statistical methods in medical physics, nanotechnology, and the interaction of ionizing radiation with living tissue. Course may be repeated when the topic is different. (Prerequisite: PHYS-3700, or the consent of the instructor.) (3 lecture hours a week.)

PHYS-4700. Radiological Physics

Radioactive decay schemes, interaction of photons with matter, linear and mass attenuation coefficients, stopping power for charged particles, radiation detection and instrumentation. The course will include clinical experience. (Prerequisite: PHYS-3700, or the consent of the instructor.) (3 lecture, 3 lab hours a week.)

PHYS-4710. Medical Imaging

The course will cover a broad range of modern imaging techniques and their theoretical foundations, such as ultrasound, planar x-ray imaging, computer tomography (CT) imaging, magnetic resonance imaging (MRI), positron emission tomography (PET), and radionuclide molecular imaging. The course will include practical laboratory experience at the University of Windsor, and at the Windsor Regional Cancer Centre. (Prerequisite: PHYS-3700, or the consent of the instructor.) (3 lecture hours and 3 laboratory hours per week.)

PHYS-4720. Magnetic Resonance Imaging

This course will present the physics and mathematics of magnetic resonance imaging with an emphasis on signal generation and detection, spatial encoding, and image reconstruction. Advanced topics in current

MRI research (pulse sequence design, constrained image reconstruction, other topics) will also be presented. (Prerequisites: PHYS-3700.) (3 lecture hours a week.)

PHYS-4730. Radiobiology

Radiobiology is the study of the action of ionizing radiation on living things. A thorough understanding of the benefits and risks to humans associated with exposure to all forms of ionizing radiation is essential for any medical physicist. This course will review all the forms of ionizing radiation as well as the physics and chemistry of radiation absorption and interactions in the cells of the body. Students will be introduced to the events which have led to our current understanding of the field of radiobiology including in vitro cellular experiments, in vivo animal model experiments, clinical trials on human patients, and nuclear accident/bomb victim exposures. Ultimately, all of the current understanding of radiobiology will be used to explain why the current practice of clinical radiation therapy is practiced as it is by clinical medical physicists and radiation oncologists and how this knowledge can inform future developments in the field. (Prerequisites: PHYS-4700 or consent of instructor.) (3 lecture hours per week.)

PHYS-4900. Research

Design, researching, execution and managing, analysis, and reporting (Written and oral) of a supervised physics project in a recognized research laboratory, on- or off-campus. This is a problem-based course with emphasis on team work. Students must present three seminars discussing their research project: on background, on the research plan, and a final seminar accompanying a written report containing the main results, conclusions, and suggestions for further work. With departmental approval, the research may be applied toward partial fulfillment of the M.Sc. degree. (Prerequisites: PHYS-1500.) (1 lecture hour, 12 laboratory hours per week over two terms) (6.0 credit hours).

PHYS-4980. Co-op Work Term III

Supervised experience in an approved career-related setting with a focus on the application of theory and the development of transferable skills. The Co-op work experience is designed to provide students with an enriched learning opportunity to integrate academic theory and concepts in an applied setting. (Prerequisite: Student must be enrolled in a Co-operative education program. Offered on a Pass/non-Pass basis. Supervised practicum requires the successful completion of a minimum of 420 hours. Students who do not pass the course cannot continue in the Co-op program.) (This is an experiential learning course.)

The Schulich School of Medicine and Dentistry – Windsor Program

Launched in Fall 2008, the Schulich School of Medicine & Dentistry – Windsor Program is based on a distributed medical education model involving a partnership between the Schulich School of Medicine & Dentistry at the University of Western Ontario (UWO), the University of Windsor, and regional hospitals. This partnership builds on the Southwestern Ontario Medical Education Network (SWOMEN) which was initiated in 2002 to optimize medical education opportunities in the area and address the shortage of physicians across the region. All students will be fully registered at UWO and will receive UWO degrees.

For more information go to: <http://www.uwindsor.ca/medicine>.

Regulations

Students in the Windsor Program are subject to the academic regulations of the University of Western Ontario and its Schulich School of Medicine & Dentistry. University of Windsor non-academic policies and procedures govern student conduct on the University of Windsor campus.

Admission and Program Information

For admission and program information see the University of Western Ontario Schulich School of Medicine and Dentistry.

Student Services at the University of Windsor

Although fully registered at UWO, students in the Windsor Program have “affiliate” student status at the University of Windsor, with access to University of Windsor services and facilities.

GLOSSARY

This glossary explains some terms which are used frequently throughout this Calendar. It is intended as a quick-reference guide and may not necessarily offer the complete, official definitions and explanations as they are applied to the University's programs and the administration of its regulations.

Antirequisite - A course or other level of attainment which, if already successfully completed, does not permit registration for credit in another course, and which cannot be taken for credit concurrently with that other course.

Attempt - Generally, any course for which a final grade has been assigned, including "WF" - Withdrew Failing. Failures which are repeated and for which credit is subsequently earned may or may not be considered as attempts, depending upon individual faculty regulations. If a student transfers from one program to another, not all previous attempts necessarily will be counted as attempts within the student's new program.

Bachelor's Degree (Baccalaureate) - The first university degree, for which a student follows a specific undergraduate program (e.g., B.A. - Bachelor of Arts).

Certificate - At the undergraduate level, a program consisting of eight to twelve one-term course equivalents in a specialized area(s) of study.

Corequisite - A course which must be taken concurrently with another course which lists it as a corequisite.

Course - A unit of study identified by a course title and a unique course number. Unless otherwise specified, the term "course" refers to a one-term, 3.0 credit course offering.

Two-Term Course - A course taught over two terms, usually the Fall and Winter terms. A two-term course normally carries twice the credit value of a one-term course, or 6.0 credits.

Half Course - A course having a value of 1.5 credits. Half courses may be offered for fewer contact hours per week over an entire term, or may be concentrated in either the first or the second half of a term.

Credit - A unit of academic value earned within a particular program. A credit value of 3.0 normally is assigned to a one-term course. A two-term course, therefore, would have a credit value of 6.0; a half-course 1.5.

Other credit values may be assigned. Some courses may be taken for varying amounts of credit within a specific range (e.g. 2.0 to 9.0 credits); other courses may be offered for alternate credit values (e.g., 3.0 or 6.0 credits).

Credit values are used in the calculation of averages for academic standing and in the determination of the student's year or level within a specific program. (See also "Weight").

Cross-Listed Courses - Courses which are listed under two different numbers in two different subject areas. Cross-listed courses may be taken in either subject area, but credit may be earned in only one course.

Cumulative Average - An average which is based upon all courses counted as attempts within a student's career.

Diploma - At the undergraduate level, a program of study less extensive than a degree program, but requiring more courses than a certificate program.

Full-Time Student - A student who is registered in four or more undergraduate courses in a term. (i.e., 12.0 credits or more).

Linked Courses - Credit may not be allocated to certain courses until a subsequent course is also successfully completed. Such "linking" of courses will be noted in the course descriptions.

Major - A formal, specific concentration of courses within a subject area as defined by its degree program(s).

Major Average - An average based upon courses attempted within the student's major as defined by the student's degree program.

Part-Time Student - A student who is registered in less than four undergraduate courses in a term (i.e., less than 12.0 credits).

Prerequisite - A course for which credit must have been earned prior to registration in another course which lists it as a prerequisite. ("Consent of Instructor" may be listed as an alternative to, or in addition to a given course prerequisite.)

Program - A combination of courses in a subject area (or areas) which fulfills the requirements for a degree, certificate, or diploma.

Program Approval - For students in certain programs, consulting with and obtaining the signed approval of course selections by a faculty advisor may be required as part of the registration process.

Registration - The process of selecting courses, obtaining faculty approval for course selections where necessary, and making the appropriate arrangements with the University to pay the required fees.

Required Course - A course for which credit must be earned in a student's program.

Semester - Same as "Term" (see below).

Standing Required - Individual faculties and set out specific requirements which students must meet in order to continue in their programs. These requirements normally include the maintenance of specific minimum cumulative and major averages, and also place certain restrictions upon the number of courses a student is permitted to have failed. Progress is reviewed at the end of each term.

Term - An academic period of twelve to thirteen weeks' duration. The Fall term extends from September to December; the Winter term from January to April. Intersession, which extends for six weeks from mid-May through the end of June, and Summer Session, which extends from the beginning of July to mid-August are considered together as a single term.

Transcript - A document issued by the Office of the Registrar which records all aspects of a student's registrations and grades obtained at the University. An "official" transcript is one which bears the official seal of the University and which is sent directly to another institution or official of an organization. "Unofficial" transcripts also may be issued to the student.

Withdrawal - A formal procedure set out within the regulations of the University for withdrawing from an individual course(s), or from the University entirely.

Weight - For students registered in the Faculty of Engineering, the calculation of averages is based upon a weighting factor. The weight of an individual course is equal to the number of lecture hours per week, plus one-half of the number of laboratory and/or tutorial hours per week.

Year (or Semester) - Attaining a particular Year or Semester level depends upon earning credit for a specific number of courses. The number of courses normally taken in one term/semester determines the Semester level; the number of courses normally taken in a program over both the Fall and Winter terms of a "regular" academic year would determine the Year level. In some programs, the attainment of a specific level also may reflect the earning of credits in a particular group or sequence of courses.
